

EL ARTE DEL IDIOMA CHOROTI

CHOROTI GRAMMAR

CAPÍTULO I DEL ALFABETO

LAS vocales que se necesitan son las siguientes pronunciadas como en castellano :

a, e, i, o, u, ai, oi, au

más estas dos *ă* e *ő* que suenan como la *u* en *but* y la *o* en *not* del inglés respectivamente.¹

Las consonantes simples son 11 :

h (aspirada), *j* (como en castellano), *k*, *l*, *m*, *n*, *p*, *s*, *t*, *w*, *y*

Los sonidos compuestos son 11 : *ch*, como en chato.

sh, la *x* catalana.

ts, como en el inglés *nuts*.

th (final), *thl* (antes de vocal), como el galense *ll* o el castellano con *z*.

fu o *fw*, como en *fua*, *fwa*, algarroba.

ku o *kw*, como en *okuaka*, *okwaka*, hacer hervir.

ni o *ñ*, como en *niat*, *ñat*, agua.

ki o *ky*, como en *kió*, *kyó*, mano.

hi o *hy* (con aspiración fortísima), como en *hiúki*, *hyúki*, dedo.

pi o *py*, como en *piúse*, *pyúse*, barbas.

CHAPTER I THE ALPHABET

THE following vowels are required, being pronounced as in Spanish :

a, e, i, o, u, ai, oi, au

and the two short vowels *ă*, *ő*, as heard in the words *but*, *not*.

The simple consonants are :

h, k, l, m, n, p, s, t, w, y ; j (as in Spanish)

The compound sounds thus :

ch, as in church.

sh, as in shoe.

ts, as in nuts.

th (terminal), *thl* (preceding a vowel), like the Welsh *ll*.

fu or *fw* as in *fuá*, *fwá*, fruit of algarroba.

ku or *kw*, as in *okuáka*, *okwáka*, to boil.

ni or *ñ*, as in *niat*, *ñat*, water.

ki or *ky*, as in *kió*, *kyó*, hand.

hi or *hy* (very strongly aspirated), as in *hiúki*, *hyúki*, finger.

pi or *py*, as in *piúse*, *pyúse*, whiskers.

¹ En castellano la *o* se produce con los labios recogidos de suerte que formen círculo, su correlación inglesa al contrario con los labios estirados hacia atrás, algo que no es ni *a* ni *o*. La *ő* que es como la *o* inglesa en *not*, ambos sonidos imposibles en castellano.

shi o *shy*, como en *shiúki*, *shyúki*, mi dedo.

Letras dobles con guión intermedio indica que se haran sonar separadamente.

Las consonantes dobles son de uso raro, como en *alénná*, anta, pero sirven para abreviar el sonido de la *e* y distinguirlo de la otra *e* en *aléna*, perro : lo general es que cada letra tenga su sonido por separado.

Las letras o sonidos *th*, *thl*, *fu*, *j*, son muy suaves, tanto que casi no se perciben, hasta pueden llamarse un suspiro ; así pues : *thlahepa* hace *'lahepa* ; *fuopo* hace *'wopo* ; *tojwe* se vuelve *to'we* o *to'he*.

Las siguientes letras faltan :
b, *c*, *d*, *g*, *ng*, *q*, *r*, *rr*, *ll*, *v*, *x*, *z*

shi or *shy* as in *shiúki*, *shyúki*, my finger.

Hyphened letters like *t-h*, *s-h*, indicate that they are separate sounds, as in *pit-head*, *mis-hap*.

Double letters are very rare, but used in, e.g., *alénná*, tapir, to give a shorter sound to the *e* than that of *aléna*, dog, but generally double letters require separate enunciation.

The letters or sounds *th*, *thl*, *fu*, *j*, are very soft—one might almost say used with affectation—and sometimes scarcely perceptible, so that *thlahepa* becomes *'lahepa* ; *fuopo* becomes *'wopo* ; and *tojwe* becomes either *to'we* or *to'he*.

The following letters are not required :

b, *c*, *d*, *g*, *ng*, *q*, *r*, *rr*, *ll*, *v*, *x*, *z*

CAPÍTULO II

DEL ACENTO

El idioma Choroti es suave y sonoro, las vocales son francas y las sílabas cortas y claras, que suenan como cantadas, y llegan a subir hasta el falsete en la conversación formal. Partículas se infijan y sufijan en la frase para que se produzca una sensación rítmica ; así : *Mai iñát* se dice *Mai piñáte*, trae agua.

Excepciones hay, pero la regla es que la voz cargue sobre la radical, así pues :—*i-pót*, su tapa ; *ti-pónape*, está tapado ; *póle*, nube.

Nombres sustantivos simples, y

CHAPTER II

THE ACCENT

The language is very smooth and musical, with open vowels and short clear syllables, spoken in a singing voice, which reaches a kind of falsetto in all formal speech. Particles are infix and suffixed to a sentence to give it an agreeable rhythm, thus : *Mai iñát* becomes *Mai piñáte*, bring water.

There may be some exceptions, but usually the accent falls on the root : *i-pót*, its cover ; *ti-pónape*, it is covered ; *póle*, cloud.

Simple nouns, particularly those

más si empiezan por vocal y son de derivación dudosa, acentúan sobre la segunda, *ex. gr.* :—*alá*, árbol; *alénta*, caballo.

La consonante final (sobre todo si es *m*, *j*, o *t*), en voces aisladas o al fin de la frase, desaparece en los más de los casos, *ex. gr.* : *pole nam* se hace *pole na'*, nublado; *aj* se vuelve *a'*, pégue; *wet* hace *we'*, casa; o se le aumenta una vocal haciendo de *iñat*—*iñate*, agua; *sius*—*siuse*, pez.

El acento (') como en *A'* (tú), podrá significar o una *j* suave, una *h* suavemente aspirada, o un descanso de la voz. Los acentos importantes o poco acostumbrados suelen señalarse así (').

beginning with a vowel, of which the derivation is not so evident, receive the accent on the second syllable: *alá*, tree; *alénta*, horse.

The final consonant (especially *m*, *j*, and *t*) of a word standing alone, or at the end of a sentence, is often dropped: *pole nam* becomes *pole na'*, cloudy; *aj* becomes *a'*, strike; *wet* becomes *we'*, house; or a vowel is added as: *iñat* to *iñate*, water; *sius* to *siuse*, fish.

The accent (') as in *A'* (thou), may represent a soft *j*, a slight aspirate *h*, or merely a rest in the voice. Important or unusual accents are marked thus: (').

CAPÍTULO III

DE LA EUFONIA

Al revés de las más de las lenguas en el Chaco pocos son los cambios que el idioma Choroti efectúa en razón de la eufonía: las partículas se agregan simplemente a la raíz que permanece de principio a fin más o menos clara y evidente. En los derivados la vocal del fin sufre apócope aun cuando no resultaría inconveniente alguno si se retuviere, *ex. gr.*: *a-fué-na*, ave; *a-fué-na-ta* o *a-fuén-ta*, gallina.

Los sonidos siguientes se intercambian sin ser equivalencias dialécticas, desde que con frecuencia se adoptan por la misma

CHAPTER III

EUPHONY

Unlike the majority of the languages in this Chaco group, the Choroti makes very few modifications for euphony, the particles being simply added to the root forms, which remain throughout more or less clearly evident. When forming derivatives the final vowel is occasionally dropped, though it could be retained without inconvenience: *a-fué-na*, bird; *a-fué-na-ta* or *a-fuén-ta*, fowl, hen.

The following sounds are interchangeable, not being merely dialectal equivalents, but are frequently adopted by the same

persona en su conversación, individual in the course of conversation :
ex. gr. :

s, sh	sius, shius	pez	fish
ki, ch	kiote, chote	oreja	ear
si, eh	siowa, chowa	negro	black
s, ts	siat, tsiat	mojado	wet
fu, w	fuopo, wopo	hombro	shoulder
h, y	ahine, ayine	hombre	man
l, th	kiol, kioth	langosta	locust
p, w	paso, waso	arrastrar	crawl
u, o	tu, to	fuerte	strong
u, i	u-wa, i-wa	pedazo	piece
i, e	tiowe, teowe	dentro	inside
e, ai	kojhe, kojhai	dulce	sweet
ă, o, ö	tăm, tom, tōm	ser, estar	to be

CAPÍTULO IV

CLASIFICACIÓN DE LAS PALABRAS

“Eso que se llama ‘partes de la oración’ a que estamos tan acostumbrados, corresponde en realidad a las gramáticas griega y latinas, y a su vez al desarrollo elevadísimo de esas intelectualidades : la hemos adoptado nosotros porque es un medio muy conveniente de tratar la interrelación que existe entre todos los pensamientos que vienen a formar la frase ; pero es posible que la lengua exista sin las llamadas ‘partes de la oración’ y no es de suponer que existieran en los primeros comienzos del lenguaje.”

Lo mas importante en estudios de esta naturaleza es poderse dar uno cuenta desde el comienzo del modo cómo piensan los Indios y de cómo se manejan en el uso de

CHAPTER IV

CLASSIFICATION OF THE WORDS

“The distinction of ‘parts of speech,’ familiar to us in a highly-developed state from the Greek and Latin grammars, is a useful means of showing the relations among the several thoughts talked of in a sentence. But it is possible to do without parts of speech, and it is not to be supposed that they existed in the earliest forms of language.”¹

It is of the greatest importance at the outset to arrive at a clear understanding of the Indian’s mode of thought, and his manner of using words. In common with

¹ Tylor, *Anthropology*, p. 138.

las voces en su idioma. En común con todas las demás unidades del grupo chaqueño, los vocablos de esta lengua se reducen a cuatro categorías, a saber: Nombres en absoluto; voces que dependen de otros nombres; verbos; y partículas.

1. Nombres Sustantivos en absoluto. Como esta categoría es la primera en importancia forzosamente tiene que encerrar la sinopsis de todo cuanto puede ser materia de conversación entre gente de tan escasa cultura, esto es, los nombres de animales, aves, e insectos; de árboles, plantas, y vegetales en general; de los elementos atmosféricos, y demás fenómenos naturales; fuera de los de utensilios y demás cosas aplicables a esa clase de vida primitiva.

Las palabras estas invariablemente son simples en su forma y por lo general carecen de inflexión, a no ser el caso de un plural más o menos arbitrario. Lo de la naturaleza en sí es para el indígena considerado como absoluto, *i.e.* tigre, palmera, sol, fuego, selva—sin necesidad de llevar ni artículo ni articulación alguna de posesivo. La relación que el hombre pueda tener con cualquiera de estos animales o cosas es una otra idea y muy secundaria que se expresa mediante alguna palabra enlazada con la anterior, *ex. gr.*: el perro mi compañero; el tigre mi enemigo; el zapallo o calabaza de mi cosecha; la luna mi lumbre; el fuego mi calor; el agua mi bebida; la olla mia (esto es absoluto).

the other members of the Chaco group, the words of this language fall into four divisions, viz.: Absolute nouns; dependent words; verbs; and particles.

1. Absolute Nouns. Ranking first in importance, this division is practically a synopsis of the subjects of conversation possible to the uncultured—the names of animals, birds, and insects; trees, plants, and vegetables; the elements and natural phenomena; and the few instruments and appliances necessary to a primitive life.

These words are invariably simple in form, and rarely inflected except to denote an arbitrary plural. Nature is absolute to the savage—tiger, palm, sun, fire, forest—no article or possessive particle is required. His relation to it is a secondary idea, and is shown by a dependent word—the dog my pet; the tiger my enemy; the pumpkin my planting; the moon my light; the fire my warmth; the water my drink; the pot mine (absolute).¹

¹ Touching the earlier stage of words before they entered the realm of absolute nouns, everything, perhaps, in nature was shown to be related to man by a pronominal particle; see Derivation, Chap. XXI.

2. Nombres sustantivos posesivos que dependen de los absolutos. Aunque estos ocupan el segundo lugar en nuestra clasificación son ellos de la mayor importancia para el estudio de la lengua en razón de las inflexiones a que están sujetos en cuanto a número y relación pronominal. En las lenguas llamadas ‘clásicas’ el nombre de la persona o cosa que posee tiene su caso en genitivo en los dialectos incultos del Chaco el orden se invierte, porque el nombre del que posee permanece en la forma absoluta, mientras que él de la cosa poseída es el que lleva la inflexión. Los nombres de las partes del cuerpo humano y de otros seres, los parentescos de familia, estado, rasgos característicos y acciones se incluyen en esta división, en la que entran los nombres, pronombres, sustantivos derivados de adjetivos o de verbos y aun a las preposiciones y adverbios.

3. Los Verbos. Esta división corresponde no solo a los verbos sino también a los adjetivos, porque en realidad estos son verbos neutros.

4. Las Partículas. Las partículas estas pueden ser, ora prefijos, ora infijos, ora sufijos de cualquier palabra o frase, “las complicaciones gramaticales que nacieron de comienzos simples,” como dice Tylor: todas ellas requieren ser minuciosamente estudiadas, porque son las que nos demuestran cual es la relación personal o sintáctica en qué

2. Dependent words. Second in rank, this division contains the words of primary importance to the grammarian, because of their inflections for number and pronominal relation. In classical languages the possessive noun has a genitive case; in the unrefined dialects of the Chaco the order is inverted—the possessive noun remains absolute, the dependent noun must be inflected. The names of the parts of the human and other bodies, family relationships, state, characteristics, and actions are included in this division, thus embracing, not only nouns, but pronouns, adjectival and verbal substantives, and even prepositions and adverbs.

3. Verbs. This division contains both verbs and adjectives, the latter being neuter verbs.

4. Particles. The particles may be prefixes, infixes, or suffixes of a word or sentence, “the complicated devices of grammar that arose from simple beginnings” (Tylor), and demand the most attentive study, showing us as they do the personal and prepositional relation to the absolute nouns, and the method adopted to form new words.

dependen del nombre absoluto, y cómo, con ellos, se forman nuevos vocablos.

Los nombres compuestos en realidad son frases completas y desde luego no se trata de ellos en esta clasificación.

Compound nouns are really sentences and are consequently excluded from this classification.

CAPÍTULO V DE LAS CLASES DE INFLEXIÓN

Las inflexiones pueden ser varias, pero posible es reducirlas a tres divisiones :

1. De los Nombres Absolutos.
2. De la División por " Y."
3. De la División por " S."

CHAPTER V CLASSIFICATION OF THE INFLECTIONS

The inflections are somewhat varied, but may be classed under three heads :

1. The Absolute Nouns.
2. The " Y " Division.
3. The " S " Division.

CAPÍTULO VI DEL ARTÍCULO

Artículo aislado, como tal, puede decirse que no existe, pero ciertas partículas hay que mucho se le parecen, v.q. :

(a) La partícula eufónica *n* o *m* :
m-piäk, paja ; thatching grass
n-janat, un rebenque ; a whip

(b) La partícula *la*, *lo*, etc. :
lo-wole, la yerba ; the weeds

(c) Como el nombre de la persona o cosa poseída lleva la inflexión que denota relación personal lo usual es que retenga el prefijo personal de 3^a si llega a emplearse en sentido abstracto : esta regla sólo es de aplicación

CHAPTER VI THE ARTICLE

No true separable article exists, but certain particles might be noted in this connection.

(a) An euphonic *n* or *m* :
im-pose, la barba ; the beard
in-tiete, el ojo ; the eye

(b) The particle *la*, *lo*, etc. :
ikojhe la woyi, es dulce el pan ;
the bread is sweet

(c) Dependent words being inflected to denote person, it is usual to retain the 3rd personal prefix when used in the abstract. This only applies to words relative to animals or inanimate things :

si se trata de animales o cosas inanimadas, *ex. gr.* :

- i-fues*, ala ; wing
thl-o, semilla ; seed
ta-kat, pico ; bill, beak
u-we, hormiguero ; ant-hill
ta-wo, el plantar ; the planting of

Las partículas estas, que en su origen sirvieron para dar mayor sonoridad al vocablo, acabaron por establecerse lexicamente y llegaron hasta la aglutinación permanente en los nombres absolutos, es decir, que aquellas perdieron su valor pronominal, *ex. gr.* :

- i-niat* o *i-ñat*, agua ; water
i-thla, piojo ; louse

(d) La partícula *n* (*na*, *ne*, *ni*, etc.) se usa de personas, para distinguirla del otro prefijo de 3^a que corresponde a los animales o cosas inanimadas, y se emplea también en general para formar los nombres del cuerpo humano, sus ropas, prendas, y todo lo demás que se relaciona intimamente con el hombre, *ex. gr.* :

- ta-kat*, pico del ave ; bill of bird
t-ate, teta del animal ; teat of animal
ni-yik, el collar ; the necklace
ni-wuk, la casa ; the house

Esta importante partícula es por excelencia la que se responsabiliza de hacer nombres sustantivos de los derivados de verbo, *ex. gr.* :

- Nombe.*
naiyi, camino, senda ; road, path
năp, canto, grito ; song, cry
năk, comida ; food
niat, agua ; water
nate, cántaro ; pitcher

i-kiás, cola ; tail
thla-hilis, huevas ; spawn
ti-sie, carne ; flesh
u-weat, llaga ; sore, boil
ta-la, la matanza ; the killing of
Used to give balance to the word, these particles have gradually worked their way into the language and acquired permanency with absolute nouns, or, in other words, have lost their pronominal significance :

- i-naiyi*, escalera ; ladder
i-năk-awet, mesa ; table

(d) The particle *n* (*na*, *ne*, *ni*, etc.) is used of persons in contradistinction to the 3rd personal prefixes used of animals or inanimate things, and is employed with the general form of the names of the parts of the human body, clothes, possessions, and actions intimately associated with man, *e.g.* :

- na-kat*, barba del hombre ; man's chin
nah-ate, pecho de la mujer ; the human breast

n-amis, el tocado ; the head-dress
ni-yet, la mi casa ; the my house

This important particle is emphatically responsible for generalising nouns derived from verbs, *e.g.* :

- Verbo.*
yik, ir ; to go
yap, gritar ; to cry
tiuj, comer ; eat
ai-ya, beber ; drink
ai-ya, beber ; drink

La *n* también sirve para enlazar las diferentes partes de la frase entre sí, *ex. gr.*:

<i>Yome ni fuat</i> , se apagó el fuego ;	the fire is out
<i>Isei niñat</i> , está crecido el río ;	the river is high
<i>Po neleowa</i> , tengo animal ;	I have an animal
<i>Po ni yitiowe</i> , tengo alma ;	I have a soul (inside)
<i>Ayohi na sius kathlomata</i> , voy a pescar mañana ;	I will go and fish to-morrow
<i>Po niñat</i> , hay agua ;	there is water
<i>Kankap loj alaihe niyet</i> , hace muchos años que he dejado la mi casa ;	I left home many years ago
<i>Olöwe niyet siale</i> , dejé mi casa en mi juventud ;	I left home when young
<i>Ohoji yamope ni fue wanthalös</i> , me voy al lugar (campo) de los avestruces ;	I am going to the ostrich camp
La partícula <i>p</i> con frecuencia se utiliza en el mismo sentido, <i>ex. gr.</i> :	The particle <i>p</i> is frequently used in sentences in a similar way, <i>e.g.</i> :
<i>Aliana pa kiuni</i> , maté el tigre ;	I killed the tiger
<i>Iwe iwem palenta</i> , están allá los caballos ;	the horses are there
<i>Maiyi pala</i> , trae la leña ;	bring the firewood
<i>Ntelia aki piñat</i> , quiero más agua ;	I want more water
<i>Sahiyi piñata</i> , demasiada agua ;	too much water

CAPÍTULO VII
DEL NOMBRE SUSTANTIVO
NÚMERO

Los nombres tienen número singular y plural, pero lo usual es que se use la voz en su forma simple para expresar uno u otro número. El plural se hace de los modos siguientes:

1. Se sufja una *s* si la palabra concluye por vocal, o la sílaba *is* si acaba en consonante :

CHAPTER VII
THE NOUN—NUMBER

Nouns have both singular and plural numbers, but in actual use the simple form of the word expresses equally well either number. The plural is formed :

1. By adding *s* to words ending with a vowel, or *is* to those ending with a consonant :

Singular	Plural	Castellano	Inglés
<i>alena</i>	<i>alenas</i>	perro	dog
<i>kiuni</i>	<i>kiunis</i>	tigre	tiger
<i>palnat</i>	<i>palnatis</i>	lengua	tongue
<i>pasat</i>	<i>pasatis</i>	labio	lip

2. Sustituyendo *s* cuando la final es *k o j*:

Singular	Plural	Castellano	Inglés
<i>tak</i>	<i>tas</i>	cuerda, asa	cord, handle
<i>anthlöj</i>	<i>anthlös</i>	víbora	snake

3. Cambiando las terminaciones aumentativas *taj*, *tiuj*, *tiuk*, por la otra *tahes*:

Singular	Plural	Castellano	Inglés
<i>alena-taj</i>	<i>alena-tahes</i>	aguara-guazu	wolf
<i>nisa-tiuj</i>	<i>nisa-tahes</i>	chancho	pig
<i>sonta-tiuk</i>	<i>sonta-tahes</i>	cabra	goat

4. Introduciéndose la *l* como infijo o sufijo:

Singular	Plural	Castellano	Inglés
<i>s-as</i>	<i>si-les</i>	nuestro hijo	our son
<i>kiu</i>	<i>kiu-lis</i>	asta	horn

5. Mediante una *e* final agregada a la *s*:

Singular	Plural	Castellano	Inglés
<i>niwe</i>	<i>niwase</i>	hombro	shoulder
<i>thla-wo</i>	<i>thla-wose</i>	su flor	its flower(Chun.). ¹

6. Con el aumento de *k o ki* finales:

Singular	Plural	Castellano	Inglés
<i>tsu</i>	<i>tsuk</i>	huevo	egg
<i>kiu</i>	<i>kiuk</i>	cuerno	horn (Chun.)
<i>tiet-thile</i>	<i>tiet-thilek</i>	cejas	eyebrows
<i>kias</i>	<i>kias-ki</i>	cola; pl. cola de pájaro	tail; pl. tail of bird

7. La partícula *po* (*pa*, *pu*) mas que no sea verdaderamente

2. By substituting *s* for final *k* or *j*:

Singular	Plural	Castellano	Inglés
<i>tak</i>	<i>tas</i>	cuerda, asa	cord, handle
<i>anthlöj</i>	<i>anthlös</i>	víbora	snake

3. By changing the augmentative terminations *taj*, *tiuj*, *tiuk*, to *tahes*:

Singular	Plural	Castellano	Inglés
<i>alena-taj</i>	<i>alena-tahes</i>	aguara-guazu	wolf
<i>nisa-tiuj</i>	<i>nisa-tahes</i>	chancho	pig
<i>sonta-tiuk</i>	<i>sonta-tahes</i>	cabra	goat

4. By introducing *l* into the word or its termination:

Singular	Plural	Castellano	Inglés
<i>s-as</i>	<i>si-les</i>	nuestro hijo	our son
<i>kiu</i>	<i>kiu-lis</i>	asta	horn

5. By final *e* attached to the usual *s*:

Singular	Plural	Castellano	Inglés
<i>niwe</i>	<i>niwase</i>	hombro	shoulder
<i>thla-wo</i>	<i>thla-wose</i>	su flor	its flower(Chun.). ¹

6. By the addition of final *k* or *ki*:

Singular	Plural	Castellano	Inglés
<i>tsu</i>	<i>tsuk</i>	huevo	egg
<i>kiu</i>	<i>kiuk</i>	cuerno	horn (Chun.)
<i>tiet-thile</i>	<i>tiet-thilek</i>	cejas	eyebrows
<i>kias</i>	<i>kias-ki</i>	cola; pl. cola de pájaro	tail; pl. tail of bird

7. The particle *po* (*pa*, *pu*), though not a true plural, is some-

¹ Ejemplo del Chunupi. Example from the Chunupi.

de plural suele usarse aun con palabras que tienen su propio plural por inflexión :

Singular	Plural
wole	wole-po
tiete	tiete-pa
kiote	kiote-pu

times used even with words that have their own inflected plural :

Castellano	Inglés
cabellos	hair
ojo	eye
oreja	ear

8. Muchas temas hacen su plural con el sufijo *wa*, y si terminan en consonante le prefijan la vocal eufónica, así—*iwa*, *ewa*, etc.

Singular	Plural
kiwet	kiwet-iwa
kiuti	kiuti-wa
ele	ele-wa
nietowe	nato-wa
tiete	tato-wa

8. Many words make their plural by the addition of *wa*; those ending with a consonant require a vowel, *iwa*, *ewa*, etc.

Castellano	Inglés
boca	mouth
pipa	pipe
loro	parrot
nariz	nose
ojo	eye

Los últimos dos ejemplos parecen como si fuesen irregulares, pero si nos fijamos en el dialecto No. 2 (Apendice A.) encontramos allí las variantes *nato* y *tāta* respectivamente en el singular: la mudanza de *a* por *ie* está perfectamente ajustada al fonetismo de estos idiomas.

These last two examples appear irregular, but a reference to the second dialect (Appendix A.) gives *nato* and *tāta* respectively in the singular: the change from *a* to *ie* is perfectly regular.

9. Alargándose alguna vocal :

9. By the lengthening of a vowel :

Singular	Plural
pose	piuse

Castellano	Inglés
barba	beard

10. Aumentandose una vocal :

10. By the addition of a vowel :

Singular	Plural
kio	kioyi

Castellano	Inglés
mano	hand

11. Suprimiendo la *k* del singular para hacer plural :

11. Final *k* is dropped to form the plural :

Singular	Plural
tetik	teti

Castellano	Inglés
plato, losa	plate, crock

CAPÍTULO VIII

DEL NOMBRE SUSTANTIVO GÉNERO

Si nos hemos de atener al lado práctico de la cosa podríamos asegurar que el género de las palabras es de ínfima importancia por lo que respecta al idioma Choroti, desde que adjetivos, verbos y voces que deberian concordarse con otras carecen de toda mudanza no siendo la que se refiera a número o persona.

Existe empero, a pesar de lo dicho, algo fundamental que puede considerarse como género y está infiltrado en toda esa lengua, pero que requiere un estudio prolongado, intenso del "folk-lore," de las creencias y de toda la lengua de esas gentes, si pretendemos determinar lo que es o puede ser.

A propósito de este hecho, he aquí algo muy curioso : el perro ovejero,¹ *sontas-iwoki* es femenino, sin necesidad de que sea una perra : de ello se deduce la probabilidad de ciertas distinciones gramaticales de género que no tienen nada que ver directamente con lo que es pura y sencillamente sexo.

Como otro ejemplo al caso podría citarse el de las palabras *thlös*

¹ En lugares silvestres y solitarios perseguidos por el "puma" y el "yaguar" se adiestran perros grandes para que acompañen y protejan la majada contra las salvajinas del campo. Desde cachorro se le mete en el "chiquero" con las ovejas y cabras y entre ellas lo crían con leche de estas hasta que aprende a correr con la majada: jamás se le permite que entre en la casa.

¹ In wild and unfrequented countries, where the puma and jaguar rove and prey, big dogs are trained to run with and protect the flock from attacks. When quite young the pup is placed in the pen with the sheep and goats, and there nurtured (with goat's milk) till strong enough to run with the flock. It is never allowed into the house.

CHAPTER VIII

THE NOUN—GENDER

From a practical working point of view, the gender of the noun is of slight consequence in this language, owing to the fact that the adjectives, verbs, and dependent words suffer no change, but remain undeclined except to denote number and person.

There is evidence, however, of a gender system running through the language, which a prolonged and special study of the folk-lore and beliefs, together with the language of the people, would determine.

One curious example, for instance, is that of the shepherd-dog,¹ *sontas-iwoki*, being in the feminine; an indication that "dog" (not necessarily "bitch") is feminine, from which we may deduce the probability of a grammatical distinction, not of necessity agreeing with sex.

Again, one might cite the use of the words *thlös* (son), and

(hijo), y *thlöse* (hija) : estos vocablos que se ajustan al sexo si se trata de personas se confunden cuando se usan de los animales, porque en tal caso corresponden a nuestro *chico*, *pequeño*, *cria*. Lo general es que se emplee la forma *thlöse*, pero si mucho los apuramos entonces cambian y dicen *thlös*, si se trata de animal macho, *ex. gr.* :

waka-thlös, ternero

waka-thlöse, ternera

Si se quiere significar el sexo de los animales entonces se valen de las voces *ayine* (macho) y *aséene* (hembra), que se sufjan, *ex. gr.* :

waka-ayine, toro

waka-aséene, vaca

Los ejemplos que se dan en seguida forzosamente están limitados a los nombres sexuales de los interparentescos consanguíneos, que como es muy natural se reducen a un corto número, y aun más esto, su mismo estudio se ve cortado por esas idiosincrasias tribales, aun existentes en el día, que determinan la clase de interparentesco según el sea matrilineal o patrilineal.

(a) La partícula femenina de más importancia es el sufijo *ki* y no ha de confundirse con el sustantivo *i-ki*, del instrumento, que forma compuestos con otros nombres simples para significar la cosa que se destina a tal cual uso :

Masculino	Femenino
<i>wo</i> pl. <i>wos</i>	<i>wo-ki</i>

<i>ka-wo</i>	<i>ka-wo-ki</i>
--------------	-----------------

thlöse (daughter). Though quite distinct sexually when referring to persons, the words are equivocal when applied to animals, being then the equivalent of *young*, *small*, *offspring*. Usually the feminine *thlöse* is employed, but if pressed the people will use the masculine term *thlös* when speaking of a male animal, *e.g.* :

waka-thlös, bull-calf

waka-thlöse, cow-calf

To denote the sex of animals the words *ayine* (male), and *aséene* (female), are suffixed :

waka-ayine, bull

waka-aséene, cow

The illustrations that follow are therefore taken from the sexual names of the family relationships, which in themselves are limited in number, and furthermore, restrict our study because of the existing tribal peculiarities which determine their relationships, *i.e.* by male or female descent.

(a) The most important feminine particle is the *ki* suffix (not to be confused with the noun, *i-ki*—instrument, thing for—attached to simple nouns to form a compound) :

	Castellano	Inglés
<i>él</i> o <i>ella</i> que	doer, attendant	
hace		
<i>peon</i> , <i>sirviente</i>	<i>man-servant</i> ,	
	<i>maid-servant</i>	

Masculino	Femenino	Castellano	Inglés
<i>penik-iwo</i>	<i>penik-iwoki</i>	cocinero,-ra	man cook, woman cook
<i>sontas-iwos</i>	<i>sontas-iwoki</i>	ovejero,-ra	shepherd, shepherdess
<i>naiyi-wos</i>	<i>naiyi-woki</i>	baqueano,-na	road guide (man, woman)
<i>alentas-iwos</i>	<i>waka-kati-woki</i>	potrerizo, lechera	groom, milkmaid
<i>asile</i>	<i>asile-ki</i>	soltero,-ra	bachelor, spinster
<i>nechias</i>	<i>nechias-ki</i>	patrón,-na	master, mistress
<i>kiále</i>	<i>kiále-ki</i>	niño, niña	boy, girl
<i>kilaii</i>	<i>kilaii-ki</i>	forestero,-ra	foreigner (man, woman)
<i>yakatniona</i>	<i>yakatniona-ki</i>	dueño, dueña	owner (man, woman)
<i>y-aiyi</i>	<i>y-aiyi-ki</i>	mi compañero, -ra	my companion (man, woman)
<i>its-usia</i>	<i>its-usia-ki</i>	mi amigo,-ga*	my friend (man, woman)

(b) *Y* es una letra de valor masculino que se impone, como lo es la *s* de femenino (pero hay que fijarse bien en el lugar que ocupa. S.A.L.Q.), ex. gr. :

Masculino	Femenino	Castellano	Inglés
<i>ayine</i>	<i>aséene</i>	varón, mujer	man, woman
<i>ijyelu</i>	<i>ijyelis</i>	cuñado,-da	brother - in - law, sister-in-law
<i>eyéwu</i>		brujo	witch-doctor
<i>eyihawo</i>		mayor de mili- cos	military officer

(c) El femenino se distingue por el infijo *j*, ex. gr. :¹

Masculino	Femenino	Castellano	Inglés
<i>kimpena</i>	<i>kimpejna</i>	huérfano,-na	orphan (boy, girl)
<i>iseni</i>	<i>isejni</i>	sobrino,-na	nephew, niece
<i>kiini</i>	<i>ijnia</i>	hermano,-na (menor)	brother, sister (younger)

¹ *J* es un sonido que equivale a *s* la confusión de estas dos letras es muy usual, así Juris o Surís (avestruces), etc. S.A.L.Q.

(b) *Y* is a prominent masculine letter, and *s* is index of the feminine (see further under Derivation, Chapters XIII-XV), e.g. :

Castellano	Inglés
varón, mujer	man, woman
cuñado,-da	brother - in - law, sister-in-law
brujo	witch-doctor
mayor de mili- cos	military officer

(c) The feminine is indicated by the infix *j* :

Castellano	Inglés
huérfano,-na	orphan (boy, girl)
sobrino,-na	nephew, niece
hermano,-na (menor)	brother, sister (younger)

(d) Los masculinos (suelen) terminar en consonante, los femeninos en vocal :

Masculino	Femenino
<i>y-as</i>	<i>y-ase</i>
<i>kimanik</i>	<i>kimanki</i>
<i>fuemek</i>	<i>lojse</i>
<i>a-ktech</i>	<i>a-kte</i>

(d) Masculine forms end in a consonant, feminine forms in a vowel :

Castellano	Inglés
mi hijo, hija	my son, daughter
siervo,-va	ma n-serv a n t,
	maid-servant
mozo, moza	youth, maid
tu abuelo,-la	thy grand-father, grand - mother (Chun)

(e) Ejemplos varios :

(N.B.—La *l* de masc., la *t* de fem.)

Masculino	Femenino
<i>pa-pa</i>	<i>ta-te</i>
<i>pa-i</i>	<i>me-me</i>
<i>kihi</i>	<i>kihi-le</i>
<i>kiili</i>	<i>kitia</i>
<i>kili</i>	<i>kite</i>
<i>its-emla</i>	<i>its-emla</i>

(e) Various examples :

(N.B.—The *l* masc. and *t* fem.)

Castellano	Inglés
mi padre, ma- dre	my father, mo- ther
mi padre, ma- dre	my father, mo- ther (Dial. 2)
viejo, vieja	old person (man, woman)
hermano,-na (mayor)	brother, sister (elder)
tío, tí a	uncle, aunt.
mi marido, mu- jer	my husband, wife.

(f) Los ejemplos siguientes son tomados del Chunupi y se refieren a la *l* de masculino :

Masculino	Femenino
<i>aschäkla</i>	<i>aschäkche</i>
<i>chäkla</i>	<i>chitaa</i>
<i>taakla</i>	<i>thlutska</i>

(f) The following examples from the Chunupi illustrate the *l* masculine :

Castellano	Inglés
viudo, viuda	widow, widower
hermano,-na (mayor)	brother, sister (elder)
muchacho,-cha	boy, girl

CAPÍTULO IX

DEL NOMBRE SUSTANTIVO—CASO
Y PERSONA

El Choroti en nada se diferencia de las lenguas que hablan las

CHAPTER IX

THE NOUN—CASE AND PERSON

Choroti does not differ from the languages of the surrounding

naciones circumvecinas, excepción hecha del idioma Quechua, porque sus nombres sustantivos permanecen inalterables en cuanto a caso : para nominativo, vocativo, acusativo, etc., la forma grammatical es invariable ; es el buen sentido que las más de las veces determina al objeto o sujeto, ayudado también por la colocación de estos en la frase. Ciertas partículas suelen emplearse, ya como posposiciones en el caso de los verbos, ya como cónjuges entre verbo y sustantivo, que en cierto sentido hacen las veces de índice que da la idea de dativo o ablativo : de estas se dirá algo más en otro capítulo al tratar de la sintaxis.¹

Por el momento son las partículas que denotan caso posesivo las que más reclaman nuestra atención : todo sustantivo absoluto requiere uno u otro de los tantos pronombres que indican posesión concreta, segun la persona o cosa de que se trata, e.g. :

ayine ika anat, el hombre su tierra (finca, etc.)

aseene thla taas, la mujer su olla

Los sustantivos secundarios y derivaciones de verbos se declinan en forma tal que expresan su dependencia como de cosa poseída por quien se significa en el sustantivo o pronombre, ex. gr. :

am a-kyuti, tú tu-pipa

ayine thl-et, el hombre su-madre

aseene i-thluk, la mujer su-bolsa

peoples (though unlike the Quechua) in the fact that its nouns remain uninflected for case. The nominative, vocative, and accusative have the same grammatical form, and common sense for the most part decides the subject or object, though often helped out by its position in the sentence. Little particles are here and there used, either in the nature of postpositions to the verbs, or as copulas between verb and noun, to indicate to some extent the idea of a dative or ablative, and will be dealt with in the chapter on syntax.¹

The particles that denote possession now claim our attention. The absolute nouns require one or other of the absolute possessive pronouns to denote its concord with the possessive noun, like the archaic English expression : "John his book," now written "John's book," e.g. :

ayine ika anat, the man his land

aseene thla taas, the woman her pot

In a similar manner the dependent and verbal nouns are inflected to show their dependence upon, or possession by, the absolute noun or pronoun, e.g. :

am a-kyuti, thou thy-pipe

ayine thl-et, the man his-mother

aseene i-thluk, the woman her bag

sam si-les, nosotros nuestros-hijos
kilaii ta-woma, el forastero su-
plantar

No obstante que al fin todo ello no deja de ser una y la misma cosa, convendrá al estudiante de la materia hablar de estas inflexiones como que son de las divisiones *y* (en singular y masculino) y de *s* (en plural y femenino).

Y, Y-as, mi hijo
S, S-inta, mis dientes

Los ejemplos que se darán en seguida pondrán en evidencia gran variedad de cambios eufónicos, debidos, como a su tiempo se demostrará, no a diferencias verdaderas de inflexión sino al modo de ajustarse a la derivación. Los muchos ejemplos que se dan es con el objeto de facilitar la declinación de los sustantivos que se incluyen en el vocabulario bajo de diferentes letras iniciales, como cuando la voz *ki-o* (mano) ha de buscarse en la *k* no obstante que su verdadera raíz es *o* como lo sería también en el caso de *wo* advirtiéndose que esta inflexión tiene su variante.

Las inflexiones siguen el mismo orden de los pronombres personales y se explican solas; no se necesita pues más que una que otra nota en que se dará cuenta de los cambios eufónicos que se produzcan.

sam si-les, we our-children
kilaii ta-woma, the foreigner his-
planting

Though essentially one, it may be convenient to the student to consider the inflections as the *y* (singular and masculine), and the *s* (plural and feminine) divisions:

Y, Y-as, my son
S, S-inta, my teeth

The examples which follow evidence a considerable variety of euphonic changes, due, as will be shown later, not to real differences of inflection, but to the method of derivation.¹ The multiplicity of illustrations is given as an aid to the pronominal declension of the nouns which appear under their respective initial letters in the vocabulary, thus *e.g.* nouns like *ki-o* (hand) are clearly demonstrated under the section "Nouns with Initial *K*." *O* is the real word, as is also the *o* in *wo* (neck), but the initial *w* slightly alters the inflection.

The inflections follow the order of the personal pronouns and are for the greater part self-explanatory. It is therefore only necessary to add a note with regard to the euphonic changes.²

¹ See various chapters on Derivation.

² Euphony, however, cannot be held responsible for all the changes as *e.g.* the absence of the *k* or *w* in the first person singular. The student is referred to the chapters on Derivation.

MODIFICACIONES EUFÓNICAS, ETC.

(a) La primera persona singular se forma con *y* o *i* con los siguientes cambios :

<i>E</i>	<i>e-leowa</i>
<i>EY</i>	<i>ey-aj</i>
<i>IY</i>	<i>iy-etik</i>
<i>II, YE</i>	<i>yi-alat</i>
<i>AH</i>	<i>ah-etik</i>
<i>IJY</i>	<i>ijy-ate</i>

(b) La *s* de la primera persona singular podrá ser también *sh* o *ts*, ex. gr. :

<i>s</i>	<i>i-sio</i> o <i>i-syo</i>
<i>sh</i>	<i>i-shio</i> o <i>i-sho</i>
<i>ts</i>	<i>i-tsio</i> o <i>i-tso</i>

La *ts* es la que más se usa cuando precede a *e* o *u*:

<i>e</i>	<i>its-eha</i>
<i>u</i>	<i>its-usha</i>

(c) La primera persona del plural puede ser *s*, *sa* o *si*:

<i>s</i>	<i>s-ot</i>
<i>sa</i>	<i>sa-tipot</i>
<i>si</i>	<i>si-lujse</i>

(d) La *a* de segunda persona en singular, y *as* o *asa* en plural es regular si la inicial que sigue es consonante; si es vocal, la vocal misma sirve para determinar segunda persona de singular.

<i>a</i>	<i>a-kio</i>
<i>as</i>	<i>as-kio</i>
<i>o</i>	<i>ot</i>
<i>e</i>	<i>et</i>

(e) A veces puede hacerse uso de una *H* como prefijo o infixo en todas tres personas :

MODIFICATIONS FOR EUPHONY,
ETC.

(a) The first person singular is formed with *y* or *i* with the following modifications :

mi caballo	my horse
mi piel	my skin
mi cabeza	my head
mi almohada	my pillow
mi cabeza	my head
mi teta	my teat

(b) The *s* of the first person singular may be *sh* or *ts*, e.g. :

mi mano	my hand
mi mano	my hand
mi mano	my hand
The <i>ts</i> is most general before the vowels <i>e</i> and <i>u</i> :	

mi flecha	my arrow
mi amigo	my friend

(c) The first person plural may be either *s*, *sa* or *si*:

nuestro pecho	our chest
nuestro pañuelo	our handkerchief
nuestro arco	our bow

(d) The *a* of the second person singular, and *as* or *asa* of the second person plural, are regular before initial consonants. For vowel roots the vowel itself indicates the second person singular.

tu mano	thy hand
vuestra mano	your hand
tu pecho	thy chest
tu madre	thy mother

(e) An occasional *H* prefix or infix is possible in all persons :

hi-tipot
ha-tipot

mi pañuelo
tu pañuelo

my handkerchief
thy handkerchief

(f) La tercera persona tiene dos inflexiones, una por *i*, la otra por *t* o *thl*, que se distinguen con todo claridad: las que llevan *i*, *t* o *thl* son de uso general para designar tercera persona y de uso particular para significar cosas inanimadas y animales, en contraposición con la inflexión por *n* que se reserva para las personas, e.g.:¹

3 ^a persona	De animal	Humana
<i>i-wet</i>	<i>i-wet</i>	<i>ni-wet</i>
<i>thl-äk</i>	<i>thl-äk</i>	<i>n-äk</i>
<i>t-ate</i>	<i>t-ate</i>	<i>nah-ate</i>

N.B.—Con una o dos excepciones la inflexión por *i* si precede a consonante, y por *t* o *thl* si la letra que sigue es vocal.

(g) La palabra en su tema radical tiene su inflexión para significar el plural complejo, *mis*, *nuestros*, etc., y el femenino *nuestras*, etc., ex. gr.:

Singular	<i>Y-aiyi</i>	mi compañero	my companion
Plural	<i>Y-aiyis</i>	mis compañeros	my companions
Femenino	<i>Y-aiyiki</i>	mi compañera	my (female) companion
Plural	<i>Y-aiyis</i>	mis compañeras	my (female) companions

Compañero	Compañera	Compañeros,-as	Castellano	Inglés
1. <i>Y-aiyi</i>	<i>Y-aiyiki</i>	<i>Y-aiyis</i>	mi, mia, mis	my
2. <i>aiyi</i>	<i>aiyiki</i>	<i>aiyis</i>	tu, tuya, tus	thy
3. <i>THL-aiyi</i>	<i>THL-aiyiki</i>	<i>THL-aiyis</i>	su, suya, sus	his, her, its
1. <i>S-aiyi</i>	<i>S-aiyiki</i>	<i>S-aiyis</i>	nuestro, -tra, our -tros, -tras	
2. <i>AS-aiyi</i>	<i>AS-aiyiki</i>	<i>AS-aiyis</i>	vuestro, -tra, your -tros, -tras	
3. <i>THL-aiyi</i>	<i>THL-aiyiki</i>	<i>THL-aiyis</i>	su, suya, sus	their

Nota.—La tercera persona sirve para las 3 formas, su de él, de ella; de ello; y también para el plural, su de ellos, de ellas.

¹ Vease Cap. VI, sec. d.

¹ See Chap. VI, sect. d.

(f) The third person has two inflections: *i*, and *t* or *thl*, which are clearly illustrated. These *i*, and *t* or *thl* inflections have the general use of denoting the third person; and a specific use to indicate things inanimate and of animals, in apposition to the *n* inflection used of persons, e.g.:¹

Castellano	Inglés
casa, lugar	home, place
comida	food
ubre, pecho	udder, breast

N.B.—With one or two exceptions the *i* inflection is used before consonants; the *t* or *thl* before vowels.

(g) The word itself is inflected to denote the plural and feminine, the pronominal particle remaining invariable, e.g.:

(h) La modificación que se advierte en los ejemplos bien merecen que se diga algo acerca de ellos en este lugar. La inflexión es de uso muy general con verbos y sustantivos, siendo la más común el cambio de *a* en *ie*, que en los sustantivos equivale a un cambio de segunda a primera y tercera personas :

Mudanza	1.	2.	3.	Castellano	Inglés
<i>A—IE</i>	<i>isie-te</i>	<i>asa-te</i>	<i>isie-te</i>	pie	foot
<i>O—U</i>	<i>ilu-jse</i>	<i>alo-jse</i>	<i>ilu-jse</i>	arco	bow
<i>A—EO</i>	<i>ileo-wa</i>	<i>ala-wa</i>	<i>ileo-wa</i>	animal	animal
<i>A—IA</i>		<i>ane-chas</i>	<i>ine-chias</i>	jefe	chief

DECLINACIÓN POSESIVADA DE LOS NOMBRES POSSESSIVE INFLECTION OF THE NOUNS

A. Nombres en Absoluto

A. Absolute Nouns

TAAS olla ; pot

<i>ya taas</i>	mi olla ; my pot	<i>sa taas</i>	nuestra olla ; our pot
<i>a taas</i>	tu olla ; thy pot	<i>asa taas</i>	vuestra olla ; your pot
<i>thla taas</i>	su olla ; his pot	<i>thla taas</i>	su olla ; their pot

ANAT tierra, finca ; land, estate

<i>yaka anat</i>	mi tierra ; my land	<i>saka anat</i>	nuestra tierra; our land
<i>aka anat</i>	tu tierra ; thy land	<i>aska anat</i>	vuestra tierra ; your land
<i>ika anat</i>	su tierra ; his land	<i>ika anat</i>	su tierra ; their land

Con pocas excepciones los temas con vocal inicial siguen la regla del *taas*; mientras que las de consonante se ajustan al 2º ejemplo *anat*.

With few exceptions the vowel roots follow the order of the former example *taas*, the nouns with initial consonants follow the order of the latter example *anat*.

B. Temas con Vocal

A o AJ pellejo ; skin

Singular	Plural
1. <i>ey-a</i>	1. <i>s-a</i>
2. <i>a</i>	2. <i>as-a</i>
3. <i>t-a</i>	3. <i>t-a</i>

B. Vowel Roots

ĀK o ŌK comida ; food

Singular	Plural
1. <i>y-äk</i>	1. <i>s-äk</i>
2. <i>äk</i>	2. <i>as-äk</i>
3. <i>thl-äk</i>	3. <i>thl-äk</i>

ALAT almohada ; pillow

Singular	Plural
1. <i>ya-alat</i>	1. <i>sa-alat</i>
2. <i>alat</i>	2. <i>as-alat</i>
3. <i>thl-alat</i>	3. <i>thl-alat</i>

ET madre ; mother

1. <i>ta-te</i>	1. <i>s-et</i>
2. <i>et</i>	2. <i>as-et</i>
3. <i>thl-et</i>	3. <i>thl-et</i>

OT pecho ; chest

1. <i>yo-t</i>	1. <i>s-ot</i>
2. <i>ot</i>	2. <i>as-ot</i>
3. <i>t-ot</i>	3. <i>t-ot</i>

Observese el alargamiento de la vocal que precede a la *y* :

AS o *OS* hijo ; son

Singular	Plural
1. <i>y-as</i>	1. <i>s-as</i>
2. <i>as</i>	2. <i>as-as</i>
3. <i>thl-as</i>	3. <i>thl-as</i>

ETEK o *ETIK* cabeza ; head

1. <i>ey-itek</i>	1. <i>s-eteck</i>
2. <i>eteck</i>	2. <i>as-eteck</i>
3. <i>thl-eteck</i>	3. <i>thl-eteck</i>

OTALE corazón ; heart

1. <i>y-otale</i>	1. <i>s-otale</i>
2. <i>otale</i>	2. <i>as-otale</i>
3. <i>t-otale</i>	3. <i>t-otale</i>

Note the lengthening of the vowel sound before *y* :

YIK, collar ; necklace.

Singular	Plural
1. <i>e-yik</i>	1. <i>si-yik</i>
2. <i>ai-yik</i>	2. <i>asai-yik</i>
3. <i>ti-yik</i>	3. <i>ti-yik</i>

También la aspiración en el ejemplo siguiente :

Also the aspirate in the following example :

TIPOT pañuelo, del verbo *po*, cubrir: handkerchief, from verb *po*; cover

Singular	Plural
1. <i>hi-tipot</i>	1. <i>sa-tipot</i>
2. <i>ha-tipot</i>	2. <i>asa-tipot</i>
3. <i>thla-tipot</i>	3. <i>thla-tipot</i>

C. Consonantes Iniciales

Regla general. Ante todo conviene establecer esto, que las inflexiones cuando la inicial que sigue es consonante se ajustarán al tipo del ejemplo esto :

C. Initial Consonants

General rule. Before noting the exceptions and giving details it can be laid down as a general rule that the inflections before an initial consonant follow the order of the appended example :

Les hijos; children

I-les, mis h. ; my ch.

SI-les, nuestros h. ; our ch.

A-les, tus h. ; thy ch.

AS-les, vuestros h. ; your ch.

I-les, sus h. ; his, her ch.

I-les, sus h. ; their ch.

1. *Sustantivos con iniciales*
fu o w

El *fu* y la *w* se suprime en la primera persona del singular: se sustituyen la *y*:

FUOPO brazo; upper arm

Singular	Plural
1. <i>e-yopo</i>	1. <i>si-fuopo</i>
2. <i>a-fuopo</i>	2. <i>as-fuopo</i>
3. <i>i-fuopo</i>	3. <i>i-fuopo</i>

WOLE pelo; hair

1. <i>e-yole</i>	1. <i>si-wole</i>
2. <i>a-wole</i>	2. <i>as-wole</i>
3. <i>i-wole</i>	3. <i>i-wole</i>

Nota.—La *u* a veces se usa en 3^a persona, ex. gr. *u-we* (hormiguero), que es la misma voz *wet*, sin la *t*, que ha sufrido apócope.

2. *Sustantivos con iniciales* ki,
ke, ku

La *k* se suprime en la 1^a persona del singular; *s* la suple en los nombres con *ki* y *ts* en los de tipo *ke* o *ku*: la *i* de 1^a pers. sing. no siempre se hace sonar, ex. gr.: *sio* en lugar de *isio* (mano).

KIO mano; hand

Singular	Plural
1. <i>i-sio</i>	1. <i>si-kio</i>
2. <i>a-kio</i>	2. <i>as-kio</i>
3. <i>i-kio</i>	3. <i>i-kio</i>

KIUTI pipa; pipe

1. <i>i-siuti</i>	1. <i>si-kiuti</i>
2. <i>a-kiuti</i>	2. <i>as-kiuti</i>
3. <i>i-kiuti</i>	3. <i>i-kiuti</i>

1. *Nouns with initial fu*
or w

The *fu* or *w* is not used in the 1st pers. sing.; the *y* taking its place:

WO cuello; neck

Singular	Plural
1. <i>e-yo</i>	1. <i>si-wo</i>
2. <i>a-wo</i>	2. <i>as-wo</i>
3. <i>i-wo</i>	3. <i>i-wo</i>

WET casa; house

1. <i>i-yet</i>	1. <i>si-wet</i>
2. <i>a-wet</i>	2. <i>as-wet</i>
3. <i>i-wet</i>	3. <i>i-wet</i>

Note.—*u* is sometimes used in the 3rd pers., e.g. *u-we* (ant-hill); which is the same word as *wet*, but the *t* dropped.

2. *Nouns with initial ki,*
ke, ku

The *k* is not used in the 1st pers. sing., the *s* taking its place with *ki* nouns, and *ts* with *ke* and *ku* nouns. The *i* of the 1st pers. sing. is not always sounded, e.g. *sio* for *isio* (hand).

KIOTE oreja; ear

Singular	Plural
1. <i>i-siote</i>	1. <i>si-kiote</i>
2. <i>a-kiote</i>	2. <i>as-kiote</i>
3. <i>i-kiote</i>	3. <i>i-kiote</i>

KEHA flecha; arrow

1. <i>i-tseha</i>	1. <i>si-keha</i>
2. <i>a-keha</i>	2. <i>as-keha</i>
3. <i>i-keha</i>	3. <i>i-keha</i>

KUSIA o *KUSHA* amigo ; friend

- | | |
|--------------------|--------------------|
| 1. <i>i-tsusia</i> | 1. <i>si-kusia</i> |
| 2. <i>a-kusia</i> | 2. <i>as-kusia</i> |
| 3. <i>i-kusia</i> | 3. <i>i-kusia</i> |

Muy necesario es distinguir entre sustantivos cuyo sonido *k* no es radical sino simplemente uno de tantos afijos propios de la inflexión, como sucede en los ya citados y otros como *kat*, en que la *k* es sonido propio de la raíz.

Los nombres con prefijo *ka*, como ser *ka-wo* se declinan como los nombres absolutos (sección A).

KAT barba ; chin

- | | |
|------------------|------------------|
| Singular | Plural |
| 1. <i>ya-kat</i> | 1. <i>si-kat</i> |
| 2. <i>a-kat</i> | 2. <i>as-kat</i> |
| 3. <i>ta-kat</i> | 3. <i>ta-kat</i> |

3. Sustantivos con inicial 1

Los nombres que empiezan por *l* muchas veces son irregulares (si nos es lícito atribuir al *ie* el carácter de irregularidad) porque la *o* y la *a* de la 2^a persona en singular suenan *u*, *eo*, *ie*, etc., en 1^a y 3^a personas, apareciendo también el infijo eufónico *th* en la 2^a de plural, ex. gr. *asthlojse*.

LES hijos, hijas ; children

- | | |
|-----------------|------------------|
| Singular | Plural |
| 1. <i>i-les</i> | 1. <i>si-les</i> |
| 2. <i>a-les</i> | 2. <i>as-les</i> |
| 3. <i>i-les</i> | 3. <i>i-les</i> |

HIUKI dedo ; finger¹

- | | |
|-------------------|--------------------|
| 1. <i>i-shuki</i> | 1. <i>si-hiuki</i> |
| 2. <i>a-hiuki</i> | 2. <i>as-hiuki</i> |
| 3. <i>i-hiuki</i> | 3. <i>i-hiuki</i> |

It is necessary to distinguish between the *k* nouns above (where the *k* is not radical, but forming part of the inflection) and nouns like *kat*, where the *k* is a part of the root.

Nouns formed with the *ka* prefix, like *ka-wo*, belong to the order of the absolute nouns (sección A).

KA-WO peón ; workman

- | | |
|-------------------|-------------------|
| Singular | Plural |
| 1. <i>yaka wo</i> | 1. <i>saka wo</i> |
| 2. <i>aka wo</i> | 2. <i>aska wo</i> |
| 3. <i>ika wo</i> | 3. <i>ika wo</i> |

3. Nouns with initial 1

Nouns with initial *l* are often irregular (if we may term the *ie* modification irregular), the *o* and *a* of the 2nd person singular becoming *u*, *eo*, or *ie* in the 1st and 3rd persons; and the euphonic *th* appears in the 2nd person plural after the *s*, e.g. *as-thlojse*.²

LOJSE arco, escopeta ; bow, gun

- | | |
|-------------------|----------------------|
| Singular | Plural |
| 1. <i>i-lujse</i> | 1. <i>si-lujse</i> |
| 2. <i>a-lojse</i> | 2. <i>as-thlojse</i> |
| 3. <i>i-lujse</i> | 3. <i>i-lujse</i> |

¹ The *hiu* or *hyu* sound is dealt with in the chapters on Derivation.

² See Derivation, Chap. XXVI.

4. *Sustantivos con iniciales m, n, p, s, t*

NIWE hombro ; shoulder

Singular	Plural
1. <i>i-niwe</i>	1. <i>si-niwe</i>
2. <i>a-niwe</i>	2. <i>as-niwe</i>
3. <i>i-niwe</i>	3. <i>i-niwe</i>

SATE pie ; foot

1. <i>i-sie-te</i>	1. <i>si-sie-te</i>
2. <i>a-sa-te</i>	2. <i>asa-sie-te</i>
3. <i>i-sie-te</i>	3. <i>i-sie-te</i>

Nota.—(a) Nombres con inicial *m* o *n* son muy pocos.

(b) La importante inflexión por *ie* del *sate* y *tate* de más arriba campea por todo el idioma, como podrá verse en algunos de los verbos. Si se quiere que las sílabas *sie*, *sa*, etc., se consideren meros y simples infijos, como en el ejemplo de arriba *i-(sie)-te*, entonces podría decirse que no se altera la regularidad de la inflexión pronominal.

(c) La *p* y la *w* se sustituyen una a otra en Choroti ; pero el uso ha dado valor fijo a la *p* por ejemplo en :

Palnat, lengua *Piokio*, talón
Pasat, labio *Pose*, vello

que se declinan como el *pose* de arriba. Ciertos nombres, como *wu* (frazada) por igual razón se atienen a la *w* y se declinan tal y como los de *fu* o *w* de más arriba. Unas uantas voces, a lo que de ellas mismas consta, más modernas como *pesinik* o *wesinik* (papel, libro), pueden servirse de

4. *Nouns with initial m, n, p, s, t*

POSE vello ; down, hair

Singular	Plural
1. <i>i-pose</i>	1. <i>si-pose</i>
2. <i>a-pose</i>	2. <i>as-pose</i>
3. <i>i-pose</i>	3. <i>i-pose</i>

TATE ojo ; eye

1. <i>i-tie-te</i>	1. <i>si-tie-te</i>
2. <i>a-ta-te</i>	2. <i>as-tie-te</i>
3. <i>i-tie-te</i>	3. <i>i-tie-te</i>

Note.—(a) Inflected nouns with initial *m* or *n* are very rare.

(b) The important inflection *ie*, seen in *sate* and *tate* above, runs through the language, as will be seen with some of the verbs. If the syllables *sie*, *sa*, etc., are regarded as infixes as arranged above, *i-(sie)-te*, the regularity of the pronominal inflection is not interfered with.

(c) *P* and *w* are interchangeable letters in Choroti, but custom has fixed the *p*, e.g. in :

Palnat, tongue *Piokio*, heel
Pasat, lip *Pose*, down

and they are inflected as *pose* above. In some nouns like *wu* (a blanket), long usage has determined the *w*, and they are inflected as the *fu* or *w* initial nouns above. A few stray words, probably of more recent formation, like *pesinik* or *wesinik* (paper, book), may employ either the *p*

p o de w para 2^a y 3^a personas or w in the 2nd and 3rd persons, excluyendolas de la 1^a, ex. gr. : and use neither in the 1st person :

<i>esinik o isinik, mi papel</i>	<i>esinik or isinik, my paper</i>
<i>ap-esinik, tu papel</i>	<i>ap-esinik, thy paper</i>
<i>iw-esinik, su papel</i>	<i>iw-esinik, his paper</i>

CAPÍTULO X

DE LOS PRONOMBRES

CHAPTER X

THE PRONOUNS

1. *Los Pronombres Personales son :* 1. *The Personal Pronouns are :*

Singular		
<i>ya ; yah ; Yam</i>	<i>yo ; me</i>	<i>I ; me</i>
<i>a ; ah ; am</i>	<i>tú ; te</i>	<i>thou ; thee</i>
<i>i, e ; ih ; im</i>	<i>él, ella, ello ; le, la, lo</i>	<i>he, she, it ; him, her, it</i>
Plural		
<i>sa ; sah ; sam</i>	<i>nosotros ; nos</i>	<i>we ; us</i>
<i>asa ; asah ; asam</i>	<i>vosotros ; vos</i>	<i>you ; ye</i>
<i>i, e ; ih ; im</i>	<i>ellos, ellas ; los, las</i>	<i>they ; them</i>

La forma primera y segunda de estos pronombres *ya* o *yah* son las que se acostumbra usar cuando son finales o estan solas ; pero si inician la frase o se usan en combinación con otras letras se les sufixa una *m* eufónica. El *im* de 3^a persona puede considerarse más bien como artículo, *q.v.*

2. *Los Pronombres Reflexivos*

El reflexivo se forma con los sufijos *kata* o *käta* :

The first two forms of these pronouns *ya* or *yah* are used when final or standing alone ; when initial or in combination with other letters an euphonic *m* is suffixed. The *im* of the 3rd person may be confined to the use as article, *q.v.*

2. *The Reflexive Pronouns*

The particle *kata* (or *käta*) is added to form the reflexive :

Singular		
<i>yam-kata</i>	<i>yo mismo</i>	<i>myself</i>
<i>am-kata</i>	<i>tú mismo</i>	<i>thyself</i>
<i>na-kata</i>	<i>él mismo, ella misma</i>	<i>himself, herself</i>
Plural		
<i>sam-kata</i>	<i>nosotros mismos</i>	<i>ourselves</i>
<i>asam-kata</i>	<i>vosotros mismos</i>	<i>yourselves</i>
<i>na-kata</i>	<i>ellos id., ellas id.</i>	<i>themselves</i>

3. Los Pronombres de Posesiva-
ción Absoluta

(a) En su forma más simple la posesivación se produce por medio de los pronombres personales de 1^a y 2^a personas, y con las partículas *thla* o *na* en 3^a. *Na* es la que particulariza lo que es pertenencia del hombre. Tanto *thla*, como *na*, se usan en singular y plural.

(b) Para formar el posesivo se sufija la partícula *ka* a la forma sencilla de los pronombres personales : carece de plural el *ka* este, no como en Vejoz que tiene *kai*, pl. de *ka* : no lo necesita porque esto se deduce de la forma plural en que está el nombre, e.g.

yaka wonta, mi sombrero

yaka wontas, mis sombreros

Estas dos formas (a) y (b) de los pronombres posesivos casi siempre se usan con los nombres absolutos ; se preceden al sustantivo en el orden sintáctica, como en el ejemplo arriba, y en esta forma denota permanencia porque cuando la posesión es precaria corresponde la otra partícula *kimet*.

ya-ka, etc., equivale a *mi*, *mío*, o, *es mío*, etc.

3. The Absolute Possessive Pro-
nouns

(a) The simplest form of possession is with the personal pronouns in the 1st and 2nd persons, and with *thla* or *na* in the 3rd. *Na* is used particularly for the possessions of man. *Thla* and *na* are used in both numbers.

(b) The particle *ka* is added to the simple form of the personal pronouns to denote the possessive. The *ka* has no plural form as in Vejoz (sing. *ka*, pl. *kai*) ; the plural is sufficiently indicated by the inflected form of the noun itself.

yaka wonta, my hat

yaka wontas, my hats

These two forms (a) and (b) of the possessive pronouns are mostly used with the absolute nouns ; they precede the noun in the order of syntax, as in the above example, and denote permanency, in contra-distinction to *kimet*, which implies temporary possession.

ya-ka, etc., expresses *my*, *mine*, or *is mine*, etc.

		Singular	
(a)	(b)	Castellano	Inglés
<i>ya</i>	<i>ya-ka</i>	mi, mío, mía	my, mine
<i>a</i>	<i>a-ka</i>	tu, tuyó, tuyá	thy, thine
<i>thla</i>	<i>i-ka</i>	su, suyo, suya	his, her, its
Plural			
<i>sa</i>	<i>sa-ka</i>	nuestro, -tra	our
<i>asa</i>	<i>as-ka</i>	vuestro, -tra	your
<i>na</i>	<i>i-ka</i>	su, suyo, suya	their

(c) La posesión precaria, como también la frase *ello es mio*, etc., se expresan mediante la palabra *kimet*, pl. *kimetis*, que más bien es un segundo sustantivo que un pronombre, y significa *cosa poseída o habida*, como que se deriva del verbo *kima*, haber, tener, poseer, tomar, etc. Siguiendo la regla general de los sustantivos que dependen de otros lo usual es que siga al nombre absoluto; e.g. *iñat isimet* el agua que es mia. *Hone isimet* traeme lo mío.

(c) To denote temporary possession also the verbal idea *it is mine*, etc., the word *kimet*, pl. *kimetis*, is used. It is in more of the nature of a dependent noun than a true pronoun, and means *thing held or possessed*, derived from the verb *kima*, to have, hold, possess, take, etc. Following the general rule of the dependent nouns, it usually follows the absolute noun, e.g. *iñat isimet*, my water, i.e. the water which I hold. *Hone isimet*, bring mine, i.e. bring that which I have or use, etc.

Singular	Plural	Castellano	Inglés
(cosa; thing)	(cosas; things)		
<i>i-simet</i>	<i>i-simet-is</i>	mi y mis	my
<i>a-kimet</i>	<i>a-kimet-is</i>	tu y tus	thy
<i>i-kimet</i>	<i>i-kimet-is</i>	su y sus de él, etc.	his, her, its
Plural			
<i>si-kimet</i>	<i>si-kimet-is</i>	nuestro,-tra, y nuestros, our -tras	
<i>as-kimet</i>	<i>as-kimet-is</i>	vuestro,-tra, y vuestros, your -tras	
<i>i-kimet</i>	<i>i-kimet-is</i>	su y sus de ellos, etc.	their

(d) Si el posesivo se refiere a animales ello se señala mediante un derivado de la partícula *la o le*, que significa animal doméstico o familiar, en Vejoz *la*; Toba *lo*; Chun. *klau*; LM. *witip*. Como *kimet* este sigue al nombre absoluto: *Hone nalenta nileowa Manuel*, trae el caballo de Manuel.

Cual sea el animal (caballo, vaca, etc.) a veces se calla: *Hone nechias ileowa*, Trae el (caballo) del jefe.

(d) Possession of animals is denoted by a derivation of *la* or *le*, a family or domestic animal, in Vejoz *la*, Tob. *lo*, Chun. *klau*, LM. *witip*. Like *kimet*, it follows the absolute noun: *Hone nalenta nileowa Manuel*, Bring Manuel's horse.

The animal (horse, cow, etc.) is often understood: *Hone nechias ileowa*, Bring the chief's (horse).

Singular (animal)	Plural (animales)	Castellano	Inglés
<i>i-leo-wa</i>	<i>i-leo-was</i>	mi y mis	my
<i>a-la-wa</i>	<i>a-la-was</i>	tu y tus	thy
<i>i-leo-wa</i>	<i>i-leo-was</i>	su y sus de él, etc.	his, her, its
			Plural
<i>si-leo-wa</i>	<i>si-leo-was</i>	nuestro y nuestros	our
<i>as-thlao-wa</i>	<i>as-thlao-was</i>	vuestro y vuestros	your
<i>i-leo-wa</i>	<i>i-leo-was</i>	su y sus de ellos, etc.	their

Nota.—La forma alternativa de *i-leowa* es *e-leowa*.

4. Los Pronombres Demostrativos

Los pronombres demostrativos se forman mediante ciertas partículas, intercambiables cuya significación trataremos de poner en limpio como sigue : el uso de estos como adverbios es muy general.

(a) La partícula *n* determina que la persona de que se trata está cerca del que habla, ex. gr. :

<i>na-ka</i>	él, ella, ello, ellos, ellas ; este, esta, esto (teniendoles cerca)
<i>no-kii</i>	esto, este lugar, aquí, cerca

he, she, it, they ; this, these (near me)
this, this place, here, near at hand

(b) La partícula *s* significa distancia del que habla, ex. gr. :

<i>shu-ki</i>	él, ella, ello, ellos, ellas ; ese, esa, eso, esos, aquél, aque- lllos (que están lejos)
<i>se-kii</i>	aquél, aquel lugar, allá, fuera (estando lejos)
<i>shu-ki ka-wonta</i>	su sombrero de él
<i>su-nia-sa ketsi</i>	aquella, ella
<i>shu-na-po</i>	ellos, aquellos
<i>shu-shi-lám</i>	aquél, allá está él
<i>shu-sha-lon-sehe</i>	él más allá
<i>shio-si-la wuk</i>	aquella casa
<i>wuke ketsi shio-</i>	aquella otra casa
<i>si-lots-wo</i>	

(b) The *s* particle signifies away from the speaker :

he, she, it, they, that, those (away from me)
that, that place, there, away from
his hat
she there
they, those
he there, he is there
he further off
that house
the other house there

N.B.—An alternate form of *i-leowa* is *e-leowa*.

4. The Demonstrative Pronouns

The demonstrative pronouns are formed by ringing the changes on a few little particles, whose signification must be made clear. They are frequently used as adverbs.

(a) The *n* particle denotes nearness to the speaker :

(b) The *s* particle signifies away from the speaker :

<i>se-he, sa-hiyi, se-hiyi</i>	alli	there
<i>sie-tse, ke-tse</i>	alli	there
<i>tom sehe</i>	más allá	beyond
<i>tom awet sehe</i>	otro lado	other side of
<i>iñat awet sehe</i>	otro lado del río o del agua	other side of river or across the water

(c) La partícula *k* parece ser el sonido radical en torno del cual giran las demás ; porque en *ki* o *ke* la *i* y la *e* no son sino sonidos de 3^a persona, como en los ejemplos de arriba *no-kii* (él aquí o cerca); *se-kii* (él allí o lejos).

<i>ki-ai-yo</i>	esto (tal vez sea de masculino)	this (perhaps masculine)
<i>ki-ai-yoj-ne anapane</i>	ella volverá también	she will return also
<i>ke-tse</i>	otro, otra, el otro, el ausente, él que está allá, él que está lejos.	other, another, the other, the absent one, the one there, the distant one.

Las partículas *ki*, *kipe*, *kiwa* (más) tal vez sean también demostrativos. *Kipe* en Suhin es *shipe*, más, otro.

<i>ntelia aki piñat</i>	quiero más agua	I want more water
<i>woyies maiyi kipe</i>	quiero más panes o traeme más panes	I want (or bring me) more loaves

(d) La partícula *l* se presenta en varias combinaciones, ver arriba (sec. b) y en la frase *laak wuk* (esta casa) en el sentido de algo que se indica, señala o se cita en definitiva.

(c) The *k* particle seems to be the base around which the others revolve, *ki* or *ke* being simply the *i* or *e* of the 3rd person as above ; *no-kii* (he here or near) ; *se-kii* (he there or away).

The particles *ki*, *kipe*, *kiwa* (more) may be demonstratives. *Kipe* in Suhin is *shipe*, more, other.

(d) The *l* particle appears in several forms above (sect. b) and in the phrase *laak wuk* (this house), with the idea of thing indicated, pointed out, or referred to definitely.

5. Partículas y Pronombres Interrogativos

(a) En algunos casos, y no muchos, especialmente si se forman con *po* (haber o tener) no se hace necesario usar la partícula ; porque para producir el efecto interrogativo basta con levantar la voz.

5. Interrogative Pronouns, and Particles

(a) In some few cases, especially with *po* (have), no particle is used to express the interrogative, the raising of the voice is sufficient.

<i>Po piñat ?</i>	<i>¿ Hay agua ?</i>	Is there water ?
<i>Po po ika-kiales ?</i>	<i>¿ Tiene él alguna gente allí ?</i>	Has he any people there ?
<i>Sekii po</i>	<i>Sí, tiene</i>	Yes, he has
<i>Inka kialesia ?</i>	<i>¿ Se ha ido la gente ?</i>	Have the people gone ?

(b) Las partículas *ma* o *maka* equivale al simple interrogante: expresses simple interrogative :

¿ es él ? *¿ eres tú ?* etc. *is he ?* *are you ?* etc.

Ma es āna niñat ? *¿ Está buena el agua ?* Is the water good ?

Ma loj āna ni kiales ? *¿ Es mucha la gente ?* Are there many people ?

Ma poa pa waka iweeni ? *¿ Hay vacas allá ?* Is there cattle there ?

Ma akna ka thloma ta ? *¿ Te vas mañana ?* Are you going away to-morrow ?

Ma ka lanki ka thloma ta ? *¿ Vas á carnear mañana ?* Are you killing to-morrow ?

Ma ka ape ? *¿ Porqué vuelves ?* Why hast thou returned ?

(c) Las partículas *te* o *ta* equivalen a todos estos interrogativos : quién, qué, cuál, cuándo, cómo, dónde, de dónde, cuánto, cuántos, etc.

(c) The particle *te* or *ta* comprises all the interrogatives : who, which, what, when, how, where, how many, how much, etc.

<i>Te pa thle ?</i>	<i>¿ Cómo se llama ?</i>	What is the name of ?
<i>Te mpa thle ?</i>	<i>" " " " " "</i>	<i>Who ? which ? what ? how ?</i>
<i>Tempa ?</i>	<i>¿ qué ? ¿ cuál ? ¿ cómo ? ¿ quién ?</i>	
<i>Tempa ihi ?</i>	<i>¿ dónde ? ¿ a dónde ?</i>	Where ? whither ?
<i>Tempa intelia ?</i>	<i>¿ Qué quieres ?</i>	What dost thou want ?
<i>Tempa nom ?</i>	<i>¿ Cuánto es o importa ?</i>	How much ?
<i>Tempa nowa ?</i>	<i>¿ Cuántos son o estan ?</i>	How many ?
<i>Tempa yiine ?</i>	<i>¿ Quién sabe ?</i>	Who knows ?
<i>Tempa yihane ?</i>	<i>" " "</i>	
<i>Tee tinis tewuk ?</i>	<i>¿ Cómo se pasa el río ?</i>	How can he cross the river ?
<i>Tee ti-lesāna ?</i>	<i>¿ Cómo se hace ?</i>	How is it done ?
<i>Tempa nowa kaniya ?</i>	<i>¿ Cuántos son los pescados ?</i>	How many fish are there ?

<i>Tempa nōm po weno ?</i>	¿ Cuánto vale ?	How much is it worth ?
<i>Tempa nōm po winno ?</i>	¿ Cuánto hay que abonar ?	How much to pay ?
<i>Tempa nom powa ?</i>	¿ Cuánto tiene ?	How much has he ?
<i>Tepe nom powo yi ?</i>	” ” ”	” ” ”
<i>Tempa nom pi woiyi nōk yi ?</i>	¿ Cuánto pan tiene ?	How much bread has he ?
<i>Tempa ihi pa waka ?</i>	¿ Dónde está la vaca ?	Where is the cow ?
<i>Tempa ihi pa nechias ?</i>	¿ Dónde está el patrón ?	Where is the master ?
<i>Tempa ihi pa simanik ?</i>	¿ Dónde está mi mozo de mano ?	Where is my man-servant ?
<i>Tampa aki ?</i>	¿ A dónde va ?	Where are you going ?
<i>Tempa iyama na-hata alena ile-mitsi ?</i>	¿ Dónde está el perro blanco ?	Where is the white dog ?
<i>Tapa teali ?</i>	¿ De dónde viene ?	From where have you come ? (or) has he come ?
<i>Teno nalentas ike apo ?</i>	¿ Cuál caballo está lastimado ?	Which horse is hurt ?
<i>Tepane yiapa ha liana ?</i>	¿ Cuál vaca carnearemos ?	Which cow should we kill ?
<i>Ka lemihi ayapa</i>	La negra	The black one
<i>Tepeyahapo yapeni ?</i>	¿ Cuál hombre volverá ?	Which man will return ?
<i>Tehe inta ?</i>	¿ Qué tiene (de herida o lastimadura) ?	What is it (a wound) ?
<i>Ite</i>	Es una espina	It is a thorn
<i>Tepe yu ?</i>	¿ Qué tiene ? i que posee ?	What have you ? what do you possess ?
<i>Tempa ntelia ?</i>	¿ Qué (cuánto, cuántos) quieres ?	What (how many, how much) do you want ?
<i>Tempa nowa palen-tas nes ?</i>	¿ Cuántos caballos han llegado ?	How many horses have come ?
<i>Tempa nowa pi sotas ?</i>	¿ Cuántos ovejas son ?	How many sheep are there ?
<i>Tempa nowa pi kiales ni wete ?</i>	¿ Cuánta gente hay allí en el campamento ?	How many people are there in the encampment ?

6. Partículas Indefinidas y Negativas

(a) Pueden considerarse como pronombres indefinidos las siguientes partículas :

ta, de cosas inanimadas—cuál quiera

na, de persona—alguien

pa, reflexivo—nuestro *se*

thla, negativo—nadie, nada

(b) El relativo se expresa por medio de un adjetivo o participio, ex. gr. :

Yataj na waka ti-liana. La vaca que fue carneada está gorda.

(c) Las partículas *ka* y *po* denotan posesión y relación personal, sirviendo así para formar muchas palabras y frases, como por ejemplo : *ka* se usa en *ya-ka*, mi ; *naka*, él, ella, este.

Po (*p*, *pa*, *pi*) hace las veces del verbo *poseer*, sirviendo de artículo y de reflexivo. Sirvanos de ejemplo, la frase esta sencilla : ¿ Cómo se llama ?

te (qué), *pe* (teniendo), *thle* (nombre) ?

te (qué), *pe* (el), *thle* (nombre) ?

te (qué), *pe* (mismo), *thle* (nombre) ?

te (qué), *pe* (es), *thle* (nombre) ?

Este modo de decir se comprueba en los idiomas correlacionados.

(d) En todos los casos en que se usa la partícula *p* (o sea su recíproca o equivalente *k*) habrá de reconocerse que en su origen no es otra cosa que una partícula pronominal.

6. Indefinite and Negative Particles

(a) The following particles may perhaps be considered as indefinite pronouns :

ta, things inanimate—something

na, persons—someone

pa, reflexive—self

thla, negative—no one, nothing

(b) The relative pronoun is expressed by an adjective or participle, e.g.

Yataj na waka ti-liana. The cow that was killed is fat.

(c) The particles *ka* and *po* denote possession and personal relation, and enter into many words or phrases thus, e.g. *ka* is used in *ya-ka*, my ; *na-ka*, he, she, this.

Po (*p*, *pa*, *pi*) is used as the verb 'to possess,' as article, and as reflexive. Take, for example, the simple expression : What is the name of ?

te (what), *pe* (having), *thle* (name) ?

te (what), *pe* (the), *thle* (name) ?

te (what), *pe* (itself), *thle* (name) ?

te (what), *pe* (is), *thle* (name) ?

These uses are borne out by the allied languages.

(d) However varied its uses the particle *p* (with its companion *k*) must be considered in its primary sense a pronominal particle.

Como verbo, *po* (ser, estar, haber, tener) es indeclinable y tan puede sufijarse como prefijarse :

<i>I-fuesis po</i>	tiene alas	it has wings
<i>Its-emla po</i>	tengo mujer	I have a wife
<i>Its-emla po</i>	soy casado o casada	I am married (used by either sex)
<i>Po woho</i>	él tiene tabaco	he has tobacco
<i>Athliane po</i>	tiene con qué fumar	he has a smoke
<i>Po wukinitaj</i>	tengo plata	I have money
<i>Po niñat</i>	hay agua	there is water
<i>Thlös po</i>	está con ería	it has (or is with) young

(e) "Carenzia de" se expresa mediante *thla* o *la* y las más de las veces también con el sufijo de alguna vocal, ex. gr.:

<i>Thla thletik i</i>	acéfalo, sin cabeza	headless
<i>Thla wole yi</i>	sin pelo	hairless
<i>Thla yaka wonta ha</i>	no tengo sombrero	I am hatless
<i>Thla sius e</i>	hay pocos (ó no hay) pescados	there are but few (or no) fish
<i>La kiwet a</i>	sin boca ; callar	without a mouth ; to be silent

(f) El negativo doblado *thla-he* y la forma *thla-he-pa* (sin-no tener) también se emplean, ex. gr. :

(f) The double negative *thla-he* and the form *thla-he-pa* (without-not-having) are also used, e.g. :

<i>Thla-he-pa</i>	nada, nadie	nothing, no one
<i>Ka-nák-nei</i>	ninguno	none, not one
<i>Thlahepa kanáknei</i>	no hay ninguno	there is none
<i>Thlahepa neki</i>	dejar de llover	to cease raining
<i>Thlahepa piata ha</i>	no queda maíz	there is no maize left
<i>Thlahe wu yi</i>	desnudo, sin ropa	naked, blanketless
<i>Thlapa tiuj</i>	no hay qué comer	there is nothing to eat

(g) La partícula *thla* o *la* tiene a más las formas *laj*, pl. *las*, ex. gr. :

(g) The particle *thla* or *la* has also the form *laj*, pl. *las*, e.g. :

<i>Laj thlös a</i>	estéril, horro	childless, barren
<i>Las pole yi</i>	sin nubes, claro	cloudless, clear sky

(h) Los dos siguientes ejemplos sirven para demostrar el inter-

(h) The two following examples illustrate the interchange of *he*

cambio de *he* y *ne* tan frecuente and *ne* so frequent in the Chaco en las lenguas del Chaco languages :

<i>He ta po iyi iñat</i>	No hay agua	There is no water
<i>Ne tám po wohu ya</i>	No hay tabaco	There is no tobacco

7. Verbo "Ser" o "Estar"

El verbo "ser" o "estar" se expresa por medio del pronombre prefijado a la palabra correspondiente, que muy amenudo se sufixa también. Una a eufónica, que tiene algo del valor del artículo, muchas veces se interpone entre el pronombre y nombre, ex. gr. :

Yam-A-nechas-i. Yo un jefe yo *Yam-A-nechas-i.* I a chief I

1^a Persona Singular

<i>Yam a Yofuaha hi</i>	Yo soy Choroti	I am a Choroti
<i>Yam Athle hi</i>	Yo soy Chunupi	I am a Chunupi
<i>Yam a nechas i</i>	Yo soy cacique	I am a chief
<i>Yam ayine he</i>	Yo soy varón	I am a man
<i>Sewanthle nechas e</i>	Yo soy el único ca- cique	I am the only chief
<i>Yam nehe</i>	Yo soy ; yo soy también	I am, I am also

2^a Persona Singular

<i>Am a Yofuaha</i>	Tú eres Choroti	Thou art a Choroti
<i>Am Athle a</i>	Tú eres Chunupi	Thou art a Chunupi
<i>Am a nechas wu a</i>	Tú eres un cacique principal	Thou art a great chief
<i>Am ayine a</i>	Tú eres hombre o indio	Thou art a man or Indian
<i>Am neha</i>	Tú eres, tú eres tam- bién	Thou art, thou art also

3^a Persona Singular

<i>Naka Yofuaha</i>	Él es Choroti	He is a Choroti
<i>Nak Athle</i>	Él es Chunupi	He is a Chunupi
<i>Nak ayine</i>	Él es varón	He is a man

1^a Persona Plural

<i>Sam a Yofuaha itse</i>	Somos Choroti	We are Choroti
<i>Som a Yofuaha itse</i>	Somos Choroti	We are Choroti
<i>Sam Athle itse</i>	Somos Chunupi	We are Chunupi
<i>Sam a kihilas e</i>	Somos viejos	We are old people

2^a Persona Plural

<i>Asam a Yofuaha</i>	Vosotros sois Choroti	Ye are Choroti
<i>Asam Athle</i>	Vosotros sois Chunupi	Ye are Chunupi
<i>Kilai asa</i>	Vosotros sois forasteros	Ye are strangers

3^a Persona Plural

<i>Naka Yofuaha</i>	Ellos son Choroti	They are Choroti
---------------------	-------------------	------------------

Nota.—Los afijos pronominales propios de nombres y adjetivos, etc., pueden valer también lo que el verbo “ser” o “estar,” *ex. gr.* *Y-as* mi hijo o yo soy un hijo. Veanse los capítulos que tratan de la sintaxis como ejemplos de adjetivos adverbios y de las partículas *ka*, *po*, *ta*, *tām*, etc.

Note.—The conjunctive pronouns of the nouns and adjectives, etc., can also be read as the verb “to be,” *e.g.* *Y-as*, my son or I am a son. See chapters on Syntax for illustrations of adjectives, adverbs, and the particles *ka*, *po*, *ta*, *tām*, etc.

CAPÍTULO XI

DE LOS ADJETIVOS

(a) Los adjetivos tienen inflexión por número y persona, pero no por género; algunos que la tienen por número siguen el orden de los sustantivos, *ex. gr.*:

<i>loj</i>	pl. <i>loj-wa</i>	muchos	many
<i>fuesi</i>	pl. <i>fuesis</i>	malo	bad
<i>ata</i>	pl. <i>atis</i>	gordo	fat

(b) Otros siguen el orden de los verbos, *ex. gr.*:

<i>es</i>	pl. <i>es-ishe</i>	bueno	good
<i>ya</i>	pl. <i>ya-hale</i>	muerto	dead
<i>shiat</i>	pl. <i>shiat-ehi</i>	rojo	red

CHAPTER XI

THE ADJECTIVE

(a) The adjectives are inflected for number and person but not for gender. Some of the inflections for number follow the order of the nouns, *e.g.*:

(b) Some follow the order of the verbs, *e.g.*:

(c) Las inflexiones por persona, que corresponden a frases en que entra el verbo "ser" o "estar" son idénticas a la conjugación pasiva o participial del verbo. Si el adjetivo se emplea sólo entonces lleva el pronombre personal que puede prefijarse o sufijarse segun convenga, *ex. gr.*:

<i>yam itses</i> o <i>itse ya</i>	yo soy bueno	I am good
<i>am a nes</i> o <i>nes a</i>	tú eres bueno	Thou art good
Singular		Plural
	<i>A</i> muerto ; dead	
1. <i>yam sa</i> o <i>s-A</i>	1. <i>sam kasahale</i> o <i>kas-Ahale</i>	
2. <i>am ina</i> o <i>n-A</i>	2. <i>asam anahale</i> o <i>n-Ahale</i>	
3. <i>ya</i> o <i>y-A</i>	3. <i>yahale</i> o <i>y-Ahale</i>	
<i>TU</i> o <i>TONNE</i>	vivo, fuerte ; alive, strong	
1. <i>si-tu</i>	1. <i>kas-tu</i>	
2. <i>a-tu</i>	2. <i>a-tu</i>	
3. <i>i-tu</i>	3. <i>i-tu</i>	

(d) *Las inflexiones de la 1^a persona.*

Los prefijos *s* (o *si*) y *ts* (o *its*) son característicos de 1^a persona en singular, y se prefija *ka* como partícula que determina 1^a de plural, *ex. gr.* :

Singular	Plural	Castellano	Inglés
<i>si-wenthle</i>	<i>kas-wenthle</i>	sólo, único	alone, only
<i>its-es</i>	<i>kats-esishe</i>	bueno	good
<i>s-ata</i> o <i>s-atāj</i>	<i>kas-atis</i>	gordo	fat
<i>s-ewo</i>	<i>kas-ewo</i>	cansado	tired
<i>si-paala</i>	<i>kas-paala</i>	flaco	lean
<i>si-fuese</i>	<i>kas-fuesis</i>	malo	bad
<i>si-shiat</i>	<i>kas-shiatehi</i>	rojo	red

En la 1^a y 3^a personas del singular se produce cambio de vocal en la raíz, *ex. gr.* :

(c) The inflections for person, which are to be read as the verb "to be," are similar to the passive or participial inflections of the verb. When used alone the personal pronouns accompany the adjective, and may be either pre-fixed or suffixed, *e.g.* :

<i>yam itses</i> o <i>itse ya</i>	yo soy bueno	I am good
<i>am a nes</i> o <i>nes a</i>	tú eres bueno	Thou art good

Singular

A muerto ; dead

Plural

1. <i>yam sa</i> o <i>s-A</i>	1. <i>sam kasahale</i> o <i>kas-Ahale</i>
2. <i>am ina</i> o <i>n-A</i>	2. <i>asam anahale</i> o <i>n-Ahale</i>
3. <i>ya</i> o <i>y-A</i>	3. <i>yahale</i> o <i>y-Ahale</i>

TU o *TONNE* vivo, fuerte ; alive, strong

1. <i>si-tu</i>	1. <i>kas-tu</i>
2. <i>a-tu</i>	2. <i>a-tu</i>
3. <i>i-tu</i>	3. <i>i-tu</i>

(d) *The inflections of the 1st person.*

The prefixes *s* (or *si*) and *ts* (or *its*) characterises the first person singular, to which is prefixed the particle *ka* to form the 1st person plural, *e.g.* :

Internal vowel changes take place in the 1st and 3rd persons singular, *e.g.* :

Mudanza	1 ^a persona	3 ^a persona	Castellano	Inglés
I a E	si-limitsi	i-lemitsi	blanco	white
O a IO	si-toj	i-tioj	alto	tall
EA a I	si-nealej	i-nilej	hambriento	hungry

(e) *Las inflexiones de la 2^a persona.*

1. El pronombre personal en casi todos los casos acompaña al adjetivo en singular y plural.

2. La partícula *a*, aunque usual, no siempre determina 2^a persona.

3. En lugar del prefijo *am* a veces se emplea un simple *m*, ex. gr. *manés vice amanés* (tú eres bueno).

4. El uso de la partícula *n* en 2^a persona es muy frecuente con vocal que la una o sin ella, ex. gr. *na* o *am-i-na* (tú eres muerto ó rendido).

5. Ocurren también cambios de vocales medias, como *nes* o *nis* (eres bueno).

(e) *The inflections of the 2nd person.*

1. The personal pronoun in almost every case accompanies the adjective of both numbers.

2. The particle *a*, though most frequent, is not a sure guide for the 2nd person.

3. The *m* of the pronoun is sometimes adopted instead of *am*, e.g. *manés vice amanés* (thou art good).

4. The particle *n* is frequently used in the 2nd person with or without a connecting vowel, e.g. *na* or *am-i-na* (thou art dead or faint).

5. Internal changes of vowels also exist, as *nes* or *nis* (thou art good).

Singular	Plural	Castellano	Inglés
<i>a-wenthle</i>	—	uno, único	one, only
<i>n-es</i>	<i>n-esishe</i>	bueno	good
<i>an-ewo</i>	<i>an-ewoyi</i>	cansado	tired
<i>a-paala</i>	<i>a-paala</i>	gordo	fat
<i>a-lemitsi a</i>	<i>a-lemitsi asa</i>	blanco	white
<i>a-tonne a</i>	<i>a-tonne asa</i>	fuerte	strong

(f) *Las inflexiones de la 3^a persona.*

El prefijo que determina 3^a persona en ambos números es la *i* (o *e*) si precede a consonante, o la *y*, si la que sigue es vocal.

(f) *The inflections of the 3rd person.*

The distinguishing prefix of the 3rd person of both numbers is the *i* (or *e*) preceding a consonant, or the *y* preceding a vowel.

Singular	Plural	Castellano	Inglés
<i>y-a</i>	<i>y-ahale</i>	muerto	dead
<i>y-ata</i>	<i>y-atis</i>	gordo	fat
<i>y-ewo</i>	<i>y-uwofuo</i>	cansado	tired

Singular	Plural	Castellano	Inglés
<i>es o is</i>	<i>esishe</i>	bueno	good
<i>i-piala</i>	<i>i-piala</i>	flaco	lean
<i>i-tio</i>	<i>i-tio</i>	alto	tall
<i>i-tujwi</i>	<i>i-tujwi</i>	largo	long
<i>i-wenthle</i>	—	sólo, único	alone, only (a) ¹
<i>i-yenthle</i>	—	uno	one (b)

Sewo (cansado) y *sewa* (ser cortado) se dicen ambos de 3^a persona : en el primer caso puede ello resultar de un descuido, pero el segundo acaso tenga que ver con la raíz *es* (vease *esite*, cortar, y *sinat*, cuchillo), y no con la otra *Ewaha*, q.v.

El prefijo *t* como en *ti-mes* (dos) también se usa en 3^a persona de adjetivos como también con formas participiales y consustantivos.

La forma Negativa de Adjetivos

(a) La forma negativa en los adjetivos se produce con el prefijo *ha* para la 1^a persona del singular, y con el otro *he* para todas las demás personas en singular y plural.

its-es, soy bueno ; I am good

es, es bueno ; he is good
he-i-tio, no alto ; not tall

Algunas veces la partícula se infija como en *Kas-he-loj* (no somos o estamos muchos).

(b) No es posible exagerar la importancia de la forma negativa en los adjetivos por el valor antítetico que en ellos se encierra, puesto que *he-es* no solo dice "no

¹ Comparese esta sección con la correspondiente de los Verbos Neutros, y con los nombres que empiezan por *fu*. La forma (a) podrá ser de sustantivo, la (b) de verbo.

Sewo (tired) and *sewa* (to be cut) are both used in the 3rd person. The former may be due to carelessness of speech ; the latter may belong to the root *es* (cf. *esite*, to cut, and *sinat*, knife), and not to *Ewaha*, q.v.

The prefix *t*, as in *ti-mes* (two), is also used in the 3rd person of adjectives as with the participial forms and with nouns.

The Negative of Adjectives

(a) The negative is formed by prefixing *ha* to the 1st person singular, and *he* to all the other persons singular and plural.

hats-es, no soy bueno ; I am not good

he-es, no es bueno ; he is not good
he-loj, no muchos ; not many

The particle is sometimes infixated as *Kas-he-loj* (we are not many).

(b) The importance of the negative forms of the adjectives cannot be exaggerated, forming as they do direct antitheses. *he-es* is not only a negative "not good," but

¹ Compare this section with the corresponding section of the Neuter Verbs ; and with the *fu* initial nouns. The form (a) may be substantival, and (b) verbal.

bueno"; sino en realidad "malo," "enfermo," "pobre," "feo," etc.; y la voz *fuese* (malo) es un derivado de *es* (bueno), que a su vez nos proporciona el verbo *ne-wes-ine* (ser culpable) y otras iguales en valor.

Comparación de los Adjetivos

(a) La forma intensiva o superlativa de los adjetivos consiste en ésto, que se acentua la última sílaba fuertemente, así que de una palabra se hace otra aguda. Las voces simples cargan la voz por lo general sobre la penúltima sílaba, así *séwo* (cansado), para hacerla de superlativo se dice *sewó* (muy cansado). Si la voz consta de una sola sílaba entonces la vocal se prolonga así: *tó* (duro); *tó . ó . ó* (durísimo). A veces se le aumenta otra adjetivo, como de *es* (bueno); *wuj es* (muy bueno).

séwo, cansado ; tired

yíowe, maduro ; ripe

tójne, caro ; costly

sótí, hediondo ; stinking

átehe, doloroso ; painful

he-tó, débil ; weak

(b) La misma regla sirve para los adverbios, verbos, nombres sustantivos y cualquier otra palabra cuyo sentido es susceptible de ser intensificado, *ex. gr.*:

pájhí, tiempo ha ; long ago

thlöse, criatura, joven ; child, young

Nota.—El Choroti siempre silba cuando se vale de la forma intensiva.

"bad," "ill," "poor," "ugly," etc.; and *fuese* (bad) is a derivative of *es* (good), which in turn supplies us with the verb *ne-wes-ine* (to be to blame) and other words of note.

The Comparison of Adjectives

(a) The intensive or superlative form of the adjectives consists of strongly emphasising the last syllable. The simple word usually receives the accent on the first syllable like *séwo* (tired), the superlative becomes *sewó* (very tired). If there is only one syllable, the vowel is prolonged *tó* (hard); *tó . ó . ó* (very hard). It is sometimes assisted by another adjective as *es* (good); *wuj es* (very good).

sewó, muy cansado ; very tired

yíowé, muy maduro ; very ripe

tojné, muy caro ; very costly

sótí, muy hediondo ; very fetid

átehé, muy doloroso ; very painful

he-tó . ó, muy débil ; very weak

(b) The same rule applies to adverbs, verbs, nouns, or any word that can bear an intensive form, *e.g.*:

pájhí, mucho tiempo ha ; very long ago

thlosi, muy joven ; very young

N.B.—A Choroti always whistles whenever he uses an intensive form.

(c) El modo más general de hacer la comparación es por medio de una aposición directa que establece un contraste, así "El caballo es más fuerte que la vaca," se expresa : *I-to palenta, he-to waka*, es decir ; el caballo es fuerte, la vaca no es fuerte.

<i>to</i> , fuerte, duro	
<i>he-to</i> , no fuerte, no duro	
<i>to . ó</i> , muy fuerte, muy duro	
<i>es</i> , bueno	
<i>he-es</i> , no bueno	
<i>wuj es</i> , muy o mucho bueno	
<i>siówa</i> , negro, oscuro	
<i>lemi</i> , blanco	
<i>chowatsí</i> , muy negro	

(d) Otro modo de formar el comparativo es por medio de la partícula de pluridad *tsé* o *tsi* (Vej. *che* ; *Suhin she*), e.g. :

<i>i-lemi</i> , blanco	
<i>i-lemi-tsi</i> , blancos	
<i>i-lem-atsi</i> , muy blanco	

(e) Hay otro modo más por medio de partículas calificativas y por la combinación de los dos métodos anteriores, ex. gr. :

<i>chowatsí</i> , negro o negros	
<i>ithlena ka lemi</i> , ser o estar casi blanco	
<i>chowatsí</i> , muy negro o negros	
<i>i-tújwi</i> , largo	
<i>i-tújwi yini</i> (o <i>niata</i>) más largo	
<i>i-tujwi</i> , muy largo	
<i>nakayine</i> , bajo	
<i>ithlena ka támpeya</i> , estar en efecto casi arriba	
<i>iy-anat-e</i> , en o sobre el suelo	

(c) The commonest form of comparison is (to use a paradox) by direct contrast, thus, "The horse is stronger than the cow," is expressed : *I-to palenta, he-to waka*, i.e. the horse is strong, the cow is not strong.

<i>to</i> , strong, hard	
<i>he-to</i> , not strong, not hard	
<i>to . ó</i> , very strong, very hard	
<i>es</i> , good	
<i>he-es</i> , not good	
<i>wuj es</i> , very or much good	
<i>siówa</i> , black, dark	
<i>lemi</i> , white	
<i>chowatsí</i> , very black	

(d) Comparison is also made by adding the plural particle *tsé* or *tsi* (Vej. *che* ; *Suhin she*), e.g. :

<i>i-lemi</i> , blanco	
<i>i-lemi-tsi</i> , blancos	
<i>i-lem-atsi</i> , very white	

(e) Another method is by using qualifying words or particles, and combining the other two previous modes, e.g. :

<i>chowatsí</i> , black, sing. and pl.	
<i>ithlena ka lemi</i> , to be almost white	
<i>chowatsí</i> , very black, sing. and pl.	
<i>i-tújwi</i> , long	
<i>i-tújwi yini</i> (or <i>niata</i>) longer	
<i>i-tujwi</i> , very long, longest	
<i>nakayine</i> , low	
<i>ithlena ka támpeya</i> , being in fact almost above	
<i>iy-anat-e</i> , on the ground	

CAPÍTULO XII

DE LOS NUMERALES

(a) Los siguientes son los numerales de uno a veinte :

1. *wenthle, iyenthle*, uno
2. *ti-mes*, dos
3. *nahape*, tres
4. *inulitse o inujlitsi*, cuatro
5. *yen-sikio-nō*, cinco
6. *iyenthle-tāmni*, seis
7. *times-tāmni*, siete
8. *nahape-tāmni*, ocho
9. *inulitse-tāmni*, nueve
10. *tiwono-sikio-ya*, diez

(b) Los primeros cuatro numerales se declinan como los adjetivos :

si-wenthle, soy uno ; I am one

a-wenthle, eres uno ; thou art one

i-yenthle, es uno ; he is one

(c) Los demás numerales tienen que ver con los dedos de manos y piés :

5. *yen-sikio-nō* mi una mano my one hand
6. *iyenthle-tāmni* alcanza uno de la otra mano reach one on the other hand
10. *tiwono-sikio-ya* completar las manos complete the hands
15. *iyenthle-sisiete-nojwe* acabar con un pie to exhaust one foot
20. *tiwono-sisiete-ketsi* completar el otro pie to complete the other foot
2. *ti-mes* dos, también unos cuantos, no muchos two, also means a few, not many

CHAPTER XII

THE NUMERALS

(a) The following are the numerals one to twenty :

11. *yel-tām-sisiete*
12. *times-tām-sisiete*
13. *nahape-tām-sisiete*
14. *inulitse-tām-sisiete*
15. *iyenthle-sisiete-nojwe*
16. *yel-tām-sisiete-ketsi*
17. *times-tām-sisiete-ketsi*
18. *nahape-tām-sisiete-ketsi*
19. *inulitse-tām-sisiete-ketsi*
20. *tiwono-sisiete-ketsi*

(b) The first four numerals are declined like the adjectives :

- kas-mes*, somos dos ; we are two
asam-mesa, sois dos ; ye are two
ti-mesa, son dos ; they are two

(c) The other numerals refer to the hands and feet : .

CAPÍTULO XIII
DE LOS VERBOS

(a) Con motivo de ser tantas las anomalías que presentan los verbos en su inflexión de persona, no solo en cuanto a modificaciones internas sino también por lo que respecta a los prefijos, no es posible establecer una conjugación clara y terminante, razón por lo cual habrá que consultar el Apéndice B (Derivación, Cap. V) en que se incluirá la conjugación completa de los principales verbos.

(b) En términos generales y por conveniencia las inflexiones de persona se dividirán en dos clases (1) la de verbos activos, y (2) la de los neutros o participiales, que en realidad son parecidos en esto a los adjetivos.

1. *LANIT*, atar; to tie

Singular

1. *a-lanit*, ato ; I tie
2. *a-leinit*, atas ; thou tiest
3. *i-leinit*, ata ; he ties

Plural

1. *a-lanite*, atamos ; we tie
2. *a-leinite* atais ; ye tie
3. *i-leinit*, atan ; they tie

2. *LEANTE*, es o está atado ; is tied

Singular

1. *si-leante*, estoy a. ; I am t.
2. *a-lante*, estás a. ; thou art t.
3. *ti-leante*, está a. ; he is t.

Plural

1. *kas-lantcha*, estamos a. ; we are t.
2. *a-leante*, estais a. ; ye are t.
3. *ti-leante*, están a. ; they are t.

A. *Del Activo*

(a) *Las Inflexiones de la 1^a persona*

Nota.—Los verbos de esta división no son necesariamente acti-

A. *The Active*

(a) *The Inflections of 1st person*

N.B.—The verbs of this division are not necessarily active or

vos o transitivos en el sentido nuestro, ni tampoco los de la división B, lo son pasivos o neutros.

1. Con pocas excepciones la 1^a persona de singular y plural se hace con el prefijo *a*, pero el plural lleva un sufijo o sea la forma del verbo mismo que corresponde a ese número.

Singular	Plural	Castellano	Inglés
<i>a-fuaha</i>	<i>a-fuaha-na</i>	hachear	chop
<i>a-temi</i>	<i>a-tema-ha</i>	acabar	finish
<i>a-tepis</i>	<i>a-tepis-e</i>	mamar	suck
<i>a-wuth</i>	<i>a-wuth-le</i>	subir	climb
<i>a-lane</i>	<i>a-lana-ha</i>	sacar	remove
<i>a-tate</i>	<i>a-tata-e</i>	arrojar	throw
<i>a-le-i</i>	<i>a-le-ki</i>	cesar	cease
<i>a-yik</i>	<i>a-kine</i>	ir, irse	go, go away
<i>a-tiuj</i>	<i>a-towa</i>	comer	eat

2. Algunos pocos verbos que empiezan por vocal son defectivos en cuanto al prefijo de 1^a persona ; para evitar ambigüedad o darles más énfasis se expresa el pronombre personal :

yam oma, empujo ; I push
ose, corro ; I run
omate, apago ; I extinguish
okie, lo muerdo ; I bite it
esite, lo corto ; I cut it

3. En varios de los verbos neutros se advierte una *t* en el plural de la 1^a persona.

ekati, bailo ; I dance
a-maa, duermo ; I sleep

4. El verbo *na*, pl. *naha*, se emplea como verbo auxiliar de movimiento, decisión o mandato

transitive in our sense, nor those of the B division passive or neuter.

1. With but few exceptions the 1st person of both singular and plural numbers is represented by the prefix *a*, the plural number being distinguished by a suffix or a plural form of the verb itself.

2. A few verbs whose root initial is a vowel are defective in prefix of the 1st person, and to avoid ambiguity or to lay emphasis the personal pronouns are introduced :

sam omak, empujamos ; we push
oki, muerdo ; I bite
okäse, persigo ; I chase
okakie, lo mordemos ; we bite it
esitaha, lo cortamos ; we cut it

3. With several neuter verbs *t* appears in the plural of the 1st person.

ta-katini, bailamos ; we dance
ta-mökaihe, dormimos ; we sleep

4. The verb *na*, pl. *naha*, is used as an auxiliary verb of movement, decision or command—go,

—ve, anda, camina, adelántate, go on, go forward, let us go or vayamos, hagamos, etc. do, etc.

na yape, pues señor, me voy a casa
naha yapele, volvamos
e-fwuki, pinto ; I paint

ai-ya iñate, bebo agua ; I drink water

(b) *Las Inflexiones de la 2^a persona*

1. En la segunda persona del singular el verbo por lo general se halla en su forma más simple, o sea, la radical a que se agrega alguna partícula determinante que denote el plural ; la radical que dice "ir" es *a* ; así pues :

na, camina, caminad
ma, muévete, moveos
ak, pl. *akine*, tú te vas ; vosotros os vais
ape, pl. *apele*, te vuelves ; os volveis

2. Muchas veces las formas imperativas e indicativas son idénticas, y por la misma razón en el segundo caso lo usual es que se prefije el pronombre personal :

ak, vé ; *am ak*, tú andas
a, pega ; *am a*, tú pegas
oma, empuja ; *oma a*, tú empujas

3. El prefijo *thl* es la única diferencia flexional de 2^a persona y sólo se emplea en muy contados casos :

Thl-esite, cortas ; thou cuttest
Thl-okie, muerdes ; thou bitest

4. A veces suele emplearse como inflexión redundante o reflexiva :

na yape, well, I'm going home
naha yapele, let us be returning
naha fwukihe, pintemos ; let us paint

naha yák ates, vamos a tomar aloja ; let us drink beer

(b) *The Inflections of the 2nd person*

1. In the 2nd person singular the verb is generally found in its simplest or root form, to which is added a distinctive particle to denote the plural, e.g. the root word "go" is *a* :

na, go forward thou, ye
ma, go, move thou, ye
ak, pl. *akine*, thou goest away ; ye go away
ape, pl. *apele*, thou goest back ; ye go back

2. Frequently the imperative and indicative forms of the verb are identical, consequently the indicative usually prefixes the personal pronoun :

ak, go thou ; *am ak*, thou goest
a, strike thou ; *am a*, thou strikest
oma, push thou ; *oma a*, thou pushest

3. The prefix *thl* is the only distinctive inflection of the 2nd person and that is only used with comparatively few verbs :

Thl-esitaya, cortais ; ye cut
Thl-okakehi, mordeis ; ye bite

4. It is sometimes used as a redundant or reflexive prefix :

Ape o *thl-ape*, tú regresas
Apele o *thl-apele*, regresais

5. Si la raíz empieza por consonante el prefijo podrá ser *a* o *i*: y en tal caso el pronombre personal es lo único que determina la 2^a persona del indicativo :

Singular

a-fuaha, hacheas ; choppest
i-tepis, mamas ; suckest
a-kati, bailas ; dancest
a-wuth, te encaramas ; climbest
a-leane, remueves ; removest
a-tiete, arrojas ; throwest
l-esaña, tú haces ; thou makest
thl-esaña, tú haces ; thou makest
i-tuj, tú comes ; thou eatest
i-tu, traes ; bringest

6. Un prefijo *t* se encuentra, ya en singular, ya en plural, ya en las dos partes :

oma, empujas ; thou pushest
am ati-omate, tú apagas ; thou extinguishest

(c) *Las Inflexiones de la 3^a persona*

1. Los prefijos que determinan 3^a persona no presentan dificultad alguna ; son la *i* (si se empieza por consonante) ; la *y* (si la que sigue es letra vocal) : las únicas excepciones a la regla son : (a) cuando falta el prefijo como en *tepis* (él mama), y (b) en la inflexión por *t*, que suele ser la de algunos verbos de esta división, *ex. gr.* :

a-skine, yo me rio
ti-skine, él se rie

2. Algunos verbos tienen forma plural, *ex. gr.* *i-ya* (él va) ; *i-*

Ape or *thl-ape*, thou returnest
Apele or *thl-apele*, ye return

5. Before a consonant root both *a* and *i* are used : so that the personal pronoun is the only certain mark of the 2nd person indicative :

Plural

a fuahana, hachais ; ye chop
i-tepise, mamais ; ye suck
a-katini, bailais ; ye dance
a-wuthle, encaramais ; ye climb
a-leanaie, removeis : ye remove
a-tietae, arrojais ; ye throw
l-esänayi, v. haceis ; ye make
thl-esänayi, v. haceis ; ye make
a-tuwa, v. comeis ; ye eat
i-tune, traeis ; ye bring

6. A *t* prefix sometimes appears in either one or both numbers :

it-umaha, empujais ; ye push
asam ati-omatie, vosotros apagais
(el fuego) ; ye extinguish (fire)

(c) *The Inflections of the 3rd person*

1. The prefixes of the 3rd person of both numbers offer no difficulty whatever ; they are *i* (before a consonant), and *y* (before a vowel). The only exceptions to this rule are (a) the absence of a prefix, as *tepis* (he sucks), and (b) the *t* inflection, which is used with some verbs of this division, *e.g.* :

a-skine, I laugh
ti-skine, he laughs

2. Some verbs have a plural form, *e.g.* *i-ya* (he goes) ; *i-yamne*

yamne (ellos van); pero el singular sirve también muchas veces para expresar el plural.

3. Otros verbos cuya inicial es la *w* la suprimen en 3^a persona, así : *a-wuth* (yo subo) hace *i-yuth* (él sube). Veanse los nombres con inicial *w* o *fu* donde el orden se invierte, *ex. gr.* :

i-yu, mi ropa
i-wu, su ropa

4. La *h* es un cambio fonético o sexual por *y*, como lo es la *e* por *i*, así es que los dos interquivalencias ocurren en la 3^a persona *ex. gr.* :

y-isito o *ih-isito*, él corta ; he cuts
h-ewaha, ello corta (como ser pasto) ; it cuts (as grass)
e-tiuj o *i-tiuj*, él come ; he eats

La *i* á veces lleva su aspiración, como por ejemplo : *i-yi* o *hi-yi* (él pega).

5. Ejemplos varios :

y-isite, corta ; he cuts
ti-fwuki, pinta ; he paints
y-ome, se apaga ; it goes out

tiete, arroja ; he throws
nes, llega ; he arrives
i-meia, duerme ; he sleeps

6. Unos pocos verbos tales como *Kima* (agarrar, tener, etc.) sustituyen la *s* como prefijo de 3^a persona a la inversa de lo que sería la regla para los sustantivos con inicial *ki* (vease Cap. IX).

i-Sio, mi mano ; my hand
a-Kima, yo tengo ; I hold
a-Kefuop, yo abrazo ; I embrace
a-Kiesima, yo pellisco ; I pinch

(they go) ; but the singular is often used to express the plural number.

3. Verbs with initial *w* drop it in the 3rd person, thus : *a-wuth*, I climb, becomes *i-yuth*, he climbs. Compare the nouns with initial *w* or *fu*, where the order is inverted, *e.g.* :

i-yu, my blanket
i-wu, his blanket

4. The *h* is an euphonie or sexual change of *y*, as is also *e* of *i*, so both are found as inflections of the 3rd person, *e.g.* :

The *i* is sometimes aspirated, as *e.g.* : *i-yi* or *hi-yi*, he strikes.

5. Various examples :

i-fuaha, hachea ; he chops
ta-kati, baila ; he dances
y-omate, él apaga ; he extinguishes
i-ya, se vá ; he goes away
y-ape, regresa ; he returns
i-tu, trae ; he brings

6. A few verbs like *Kima* (grip, hold, etc.) substitute *s* in the 3rd person, inversely to the nouns with initial *ki* (Chap. IX).

i-Kio, su mano de él ; his hand
i-Sima, él tiene ; he holds
i-TSefuop, él abraza ; he embraces
Siesima, él pellisca ; he pinches

7. Los siguientes ejemplos verbales demuestran cómo se modifican las vocales en la 1^a sílaba de dichas palabras, *ex. gr.* como en *TA-te*; *TIE-te*:

1 ^a persona	2 ^a persona	3 ^a persona	Castellano	Inglés
<i>a-tate</i>	<i>a-tiete</i>	<i>i-tiete</i>	arrojar	throw
<i>a-naii</i>	<i>a-nii</i>	<i>i-nii</i>	bañarse	bathe
<i>a-nès</i>	<i>i-nis</i>	<i>nes</i>	venir	come
<i>a-lanit</i>	<i>a-leinit</i>	<i>i-leinit</i>	atar	tie
<i>a-lane</i>	<i>a-leane</i>	<i>i-leane</i>	sacar	take off

B. Del Pasivo

1. Como los verbos del Choroti son en si una miscelánea de las más peregrinas, nos vemos obligados a incluir, entre las que deberían ser una serie fija de prefijos propios de los adjetivos, participios y verbos neutros, los de un que otro verbo activo como *s-ae* (yo lo golpeo) y *tsa-hane* (yo lo sé): estas son las excepciones y como tales deben formar entre los irregulares de la 1^a persona. Las 2^a y 3^a personas siguen las inflexiones del activo, *ex. gr.*:

1. *S-ae* 2. *ae*
1. *Tsa-hane* 2. *a-hane*

2. La inflexión personal es perfectamente regular:

- Singular
(1) *s o ts* (*sa, si, its, sh*)
(2) *a o n*
(3) *t o i*

3. La inflexión pronominal de los adjetivos y verbos neutros es idéntica. Vease el Cap. XI. Ahora sólo nos falta que tomar en consideración estas mismas par-

7. The following verbs illustrate the vowel modifications that take place in the first syllable of the word, *e.g. TA-te*; *TIE-te*:

B. The Passive

1. The extraordinary medley of Choroti verbs compels us to include with what should be a clearly marked set of prefixes for the adjectives, participles, and neuter verbs an occasional active verb like *s-ae* (I strike it) and *tsa-hane* (I know), but these are the exception, and when met with can be treated as irregular in the 1st person. The 2nd and 3rd persons follow the active inflections, *e.g.*:

3. *ai-yie*, golpear; strike
3. *yi-hane*, saber; know

2. The inflections for person are perfectly regular:

- Plural
(1) *kas o kats*
(2) *a o n*
(3) *t o i*

3. The inflected adjectives and neuter verbs are one and the same thing, and are fully explained in Chap. XI. It now remains to us to consider these inflec-

tículas en su uso con verbos activos, *ex. gr.* :

Activo, *A-we*; yo veo

Pasivo, *SI-we*; yo soy visto

Activo, *I-fuaha*, él hachea

Pasivo, *TI-fuaha*, está hacheado

4. La inflexión esta puede interpretarse como :

SI-we

(1) Pasiva : yo soy visto

(2) Reflexiva : yo me veo

(3) Objetivamente (con caso régimen) : él, ella, ello, ellos, ellas me ven, vosotros me veis

(4) Participial o gerundiva : El mi ver de

Está claro pues que la idea que predomina en estas inflexiones de sentido pasivo no son más que un sustantivo verbal, y como tal ocupa un lugar secundario en la frase, convirtiéndose a veces en un sustantivo simple, *ex. gr.* :

Atemi ta-la waka (lit. : "Acabé el matar de la vaca")

Ta-la puede interpretarse así : "el matar de ello," "la carneada"

La voz *ti-woma* (cosa plantada, el plantar) es un ejemplo de participio que pasa a ser sustantivo, i.e. *ti-woma*, "jardin."

5. Algunos verbos tienen su forma gerundiva o substantivada que lleva la flexión de persona como los participios y se ajusta a las mismas reglas gramaticales :

ta-la, el matar ; the killing of
kas-to, el que nos come ; our
eater

ta-wo, el plantar ; the planting of

tions as applied to the active verb, *e.g.* :

Active, *A-we*; I see

Passive, *SI-we*, I am seen

Active, *I-fuaha*, he chops

Passive, *TI-fuaha*, it is chopped

4. The inflections can be read as :

SI-we

(1) Passive : I am seen

(2) Reflexive : I see myself

(3) Objective : he, she, it, they, you see me

(4) Participial or gerundive : my seeing of

It is evident, therefore, that the underlying idea of these passive inflections is a verbal substantive, and as such is rightly placed as a second verb in a sentence, and in some instances used as a simple noun, *e.g.* :

Atemi ta-la waka, I have finished killing the cow (lit. : "I finish the kill cow")

Ta-la can thus read : "its being killed" ; "killing of it" : "slaughter."

The word *ti-woma* (planted, planting) is an example of the participle being used as a noun, viz. : *tiwoma*, "garden."

5. Some verbs have a gerundive or substantival form, which is inflected for person as the participle and follows the same syntactical rules :

ti-liana, se mata ; it is killed
kas-tiuj, se nos come ; we are eaten

ti-woma, se planta ; it is planted

6. Otros verbos carecen de forma especial para el participio ; el verbo activo en general lleva las inflexiones pasivas :

a-tiuj, como ; I eat
a-liana, mato ; I kill

6. Other verbs have no special form for the participle, the ordinary active form receiving the passive inflections.

si-tiuj, soy comido ; I am eaten
ti-liana, es matado : it is killed

(C) *Conjugación del Verbo "Pone,"*
tapar ; cubrir

(C) *Conjugation of the Verb "Pone,"*
cover ; block up

(D) <i>Notas al Verbo—1. De la Forma</i>	(D) <i>Notes on the Verb—1. Form</i>
(a) Los verbos son o neutros o activos: aquellos denotan una acción completa en sí o característica del cuerpo éstos, la necesidad de otros factores, persona y cosa que reciba la acción del verbo o instrumento con que se opera, ex. gr.:	(a) Verbs are neuter or active: the former denotes a natural action or characteristic of the body; the latter implies the existence of a second factor—the action of another person, animal, or instrument, e.g.:
Neutro	Activo
<i>nu'we</i> , nacer ; to be born	<i>nu'iyyi</i> , parir ; to give birth
<i>wen</i> , ver ; to see	<i>yen-ihi</i> , espiar ; to spy
<i>a</i> , golpear ; to strike	<i>a-e</i> , pegarle ; to strike an object, strike with instrument
<i>a</i> , golpear ; to strike	<i>a-ané</i> , apalear ; hit with stick
<i>oki</i> , morder ; to bite	<i>oki-e</i> , morderlo ; to bite an object ; nip with pincers

(b) Igualmente se distingue entre la forma reflexiva y la causativa, *ex. gr.* :

Reflexivo

yome, apagarse ; to go out as fire
kaitsihi, apresurarse ; to hurry self
oki, morderse ; bite self

(c) Lo propio sucede cuando ha de distinguirse entre el particípio y el verbo, *ex. gr.* :

Participio

sewo, cansado ; tired
i-tsat, mojado ; wet

(d) En otras palabras es la diferencia que existe entre el adjetivo y el verbo causativo que de él se forma :

Adjetivo

yi-le, seco ; dry
to, firme ; firm, tight
wosa, chato ; flat
wom, grande, mucho ; big, much
fuesi, malo ; bad

(e) De la misma manera de un sustantivo puede hacerse verbo :

Nombre

to'se, humo ; smoke
yas, mi hijo ; my son
i-fuatsithle, saliva ; spittle

(f) El reflexivo se produce mediante la afijación de varias partículas *p*, *pet*, *thl*, etc., y con los prefijos de pasiva :

Verbo

s-a, pego ; I strike
a-yapene, volveré ; I will return
ape, regresa ; return thou
o-ki, muerdo ; I bite

(b) In the same way the reflexive and causative are expressed, *e.g.* :

Causativo

yom-ate, apagar ; put out
kaitsihi-ne, apresurar ; hasten
oki-e, morder á otro ; bite another

(c) Participle and verb are equally well expressed, *e.g.* :

Verbo

sewo-tsiho, cansar ; to tire
o-tsat-it, mojar ; to make wet

(d) In other words, it is the difference of adjective and its causative :

Causativo

e-la-te, secar ; to make dry
to-jne, afirmar ; make tight
wos-ine, achatar ; flatten
wom-ine, añadir ; add to, make big
ne-wesi-ne, ser culpable ; to be at fault, cause of ill

(e) In a similar manner the verb is formed from the noun :

Verbo

ti-tus-ina, ahumar ; to make a smoke
a-yas-ina, adopto hijo ; I adopt a child
o-fuatsithle, salivar ; to spit

(f) The reflexive is expressed with various particles, *p*, *pet*, *thl*, etc., and with the passive prefixes :

Reflexivo

ap-a, me pego ; I hit myself
a-yapene pet, me volveré ; I myself will return
thl-ape, vuélvete tú mismo ; thou thyself return
se-ki, me muerdo ; I bite myself

a-nepuni, lamo ; I lick
e-kathlope, cierra la puerta ; shut
the door

(g) En los siguientes ejemplos parece que se advierte cierto sentido de reciprocidad, *ex. gr.* :

Verbo	
<i>la</i> , matar ; to kill	
<i>yákiwita</i> , juntar ; join	
<i>lesána</i> , hacer, etc. ; make, etc.	

si-nepuni, me lamo ; I lick myself
te-kathlope, la puerta se cierra sola ;
the door closes of itself

(g) A kind of reciprocal seems to be expressed in the following words, *e.g.* :

Reciprocal	
<i>ne-la-ne</i> , batirse unos con otros ;	
fight, wage war with one another	
<i>nojhiwita</i> , reunirse, juntarse ; to	
be together, flock, crowd	
<i>ne-les-hána</i> , estarse cuidando ; to	
take care (of us or one another)	

2. Número y Persona

(a) En los verbos se distingue entre el singular y plural mediante ciertos sufijos o infijos. El plural concuerda con el sujeto y no con el caso régimen, *ex. gr.* : *fuaha*, "uno sólo hachea"; *fuaha-na*, "muchos hachean." El idioma Lengua-Mascoy observa otro proceder, *ex. gr.*, *i-taith*, "morderlo"; *il-taith*, "morderlos." El plural concuerda con el caso régimen.

Singular	Plural	Castellano	Inglés
<i>nes</i>	<i>nes-a</i>	llegar, venir	arrive, come
<i>fuaha</i>	<i>fuaha-na</i>	hachear	chop
<i>ak</i>	<i>ak-ine</i>	irse	go away
<i>to</i>	<i>to-ne</i>	acarrear	carry
<i>lane</i>	<i>lana-ha</i>	sacar	remove
<i>lei</i>	<i>leki</i>	cesar	cease
<i>oki</i>	<i>okaki</i>	morder	bite
<i>fwuki</i>	<i>fwuki-yi</i>	marcar	mark, brand
<i>tepis</i>	<i>tepis-e</i>	mamar	take breast
<i>omate</i>	<i>omat-i-e</i>	apagadlo	ye extinguish it
<i>nii</i>	<i>ni-atse</i>	bañarse	bathe

(b) La persona se indica en tres formas : (1) por los pronombres personales, que podrán ser, ya prefijos, ya sufijos, del verbo, *e.g.*

2. Number and Person

(a) Verbs have singular and plural numbers, which are indicated by a variety of suffixes or infixes. The plural form refers to subjects not objects, *e.g.* *fuaha*, "one chops"; *fuaha-na*, "many chop." In the Lengua-Mascoy language the opposite order obtains, *e.g.* *i-taith*, "bite it"; *il-taith*, "bite them."

(b) Person is expressed in three ways : (1) by the personal pronouns, which can precede or follow the verb, *e.g.* *yam a-nes* or *a-nes*

yam a-nes o a-nes ya, “yo vengo o llego aquí”; o (2) por prefijos en forma de partículas pronominales; o (3) por modificaciones internas del vocablo y en este caso es la primera sílaba que se modifica.

(c) Los prefijos sirven para distinguir las voces de activa y pasiva unas de otras; pero la *a* de 2^a persona hace las veces de las dos, ya sea verbo o su participio que se use en pasiva; *ex. gr.* : *a-fuaha*, se te cortajea (verbo) *a-leante*, atado (part. de pasiva)

Activo

- (1) *a-fuaha*, hachear ; chop
- (2) *a-fuaha*, , , ,
- (3) *i-fuaha*, , , ,

(d) Los prefijos de 3^a per. de activa o pasiva no dejan lugar a duda y corresponden exactamente a los prefijos posesivos de los nombres, *e.g.* :

- i-pose*, su barba
t-ot, su pecho

(e) Salvo contadas excepciones, lo usual es que la *a* sea el índice característico de la 2^a persona para nombres y verbos en singular, pero para plural con cierta modificación: hace también las veces de pronombre personal, como por ejemplo, *a* (tú); *asa* (vosotros).

(f) La 1^a persona del singular se expresa con *a* o *s*, y la del plural con *a* (si es de activo), con *kas* (si es de pasivo o se afija a ciertos adjetivos). La *s* desempeña un rol muy importante como índice de 1^a persona en plural, así:

- S-am* o *S-om*, nosotros ; nos
Si-wu, nuestra manta

ya, “I come or arrive here”; (2) by prefixes; and (3) by internal changes, the first syllable of the word suffering the inflection.

(c) Prefixes are used to distinguish the active and passive voices, but the *a* of the second person is alike for both voices, whether the ordinary verb or the participle is used in the passive, *e.g.* :

- a-fuaha*, art chopped (verb)
a-leante, art tied (participle)

Pasivo

- (1) *si-fuaha*, hacheado ; chopped
- (2) *a-fuaha*, , , ,
- (3) *ti-fuaha*, , , ,

(d) The 3rd personal prefixes of both voices are quite clear, and correspond exactly to the possessive prefixes of the nouns, *e.g.* :

- i-pose*, his beard
t-ot, his chest

(e) Though there are exceptions, the *a* in the main is the characteristic index of the 2nd person for verbs and nouns in the singular, and with slight modifications for the second person plural as well: it is also the personal pronoun, *a* (thou); *asa* (ye).

(f) The 1st person singular is represented by *a* or *s*, and in the plural by *a* (with active) and *kas* (with the passive and with many adjectives). The *s* plays a very important part as index to the 1st person plural, thus :

- S-am* or *S-om*, we, us
Si-wu, our blanket

Los sustantivos con *k* inicial hacen 1^a persona del singular con *s*, *ex. gr.*: *i-Syo*, o simplemente *Syo* o *Sho*, "mi mano." El Suhin o Chunupi, dialecto muy afín del Choroti, se sirve también de *s* o *h* para formar su 1^a persona de verbos en singular y plural, *ex. gr.*:

S'nam o *Hă-nam*, yo vengo
Hă-cheshine, nos sentamos

A lo que parece está en evidencia, que la *a* de 1^a persona en Choroti es una simple modificación de *ya* en singular y de *sa* en plural, forma común de los dos números y que se diferencian por medio de un sufijo, *ex. gr.*:

A-yape, yo regreso
A-yape-le, nosotros regresamos,
en lugar de ser, *YA-yape* y
SA-yape

(g) En cuanto al intercambio de *y* con *h* véase los Capítulos XI y XII en el artículo sobre "Las Derivaciones." Que la *s* en singular y el *kas*, forma plural de dicha *s*, sirvan para expresar las formas pasivas, reflexivas y objetivas "me" y "nos" está todo ello muy de acuerdo con la idiosincrasia de este idioma y de los demás codialectos que lo rodean: la *y* representa al varón o agente activo; la *s* la mujer o recipiente pasiva, *ex. gr.*:

a-YI-ne, hombre o varón
a-SEE-ne, mujer

Cf. "Derivación" Capítulos XIII y XV.

(h) Otras modificaciones que se relacionan con la persona se pro-

Nouns with the *k* initial use *s* in the 1st person singular, *e.g.* *i-Syo* or simply *Syo* or *Sho*, "my hand." The closely allied dialect of Suhin or Chunupi uses *s* or *h* as index to the 1st person of verbs in singular and plural, *e.g.*:

S'nam or *Hă-nam*, I come
Hă-cheshine, we sit down

It seems fairly evident, therefore, that the *a* of the 1st person in Choroti is a modification of *ya* in the singular, and of *sa* in the plural, and made uniform for both numbers, the plural being indicated by a suffix, *e.g.*:

A-yape, I return
A-yape-le, we return; instead of
YA-yape and *SA-yape*

(g) On the interchange of *y* and *h* see "Derivation," Chapters XI and XII. That *s* in the singular, and *kas* (which is a plural form of *s*) in the plural, should be used to express the passive, reflexive, or objective "me" and "us," is quite in keeping with the rest of this language and with the surrounding dialects: the *y* represents the man or active agent; the *s* the woman or passive recipient:

a-YI-ne, man
a-SEE-ne, woman

See "Derivation," Chapters XIII and XV.

(h) Other modifications are made for person with the verb

ducen en el mismo tema verbal y la que más resalta es ese cambio de *a* en *ie* o *ea*, ex. gr. :

ta-te > *tie-te*, arrojar
la-ne > *lea-ne*, quitar
la-nit > *lei-nit*, atar
to > *tio*, traer

La misma regla es aplicable a los sustantivos, y su significación no puede ser mas clara ni mejor definida : la *a* es de 2^a persona, la *ie*, etc., de 1^a y 3^a personas, ex. gr. :

a-sate, tu pie
i-siete, mi y su pie

Los verbos empero ponen de manifiesto una serie de variantes, así que seria necesario contar con un vocabulario amplio y muy completo de todos los verbos y sus partes si hemos de pretender descubrir alguna regla sencilla para todos los casos. Esto al menos se puede asegurar, que el imp. de 2^a pers. en sing. se vale del sonido fuerte de *a*, mientras que para la 3^a persona del indicativo se emplea la modificación en *ie*, ex. gr. :

táte, imp. arroja (tú)
tiete, ind. arroja (él)
láne, imp. saca (tú)
leane, ind. saca (él)

N.B.—En Lengua-Mascoy no hay cómo confundir el imperativo con él indicativo, y el cambio de la vocal fuerte (imp.) a la débil (indic.) es muy frecuente, ex. gr. :

i-yátim, derrama (tú)
ăb-yitmeyi, derramas (tú)

Ello hace sospechar que esta irregularidad en las inflexiones de

itself, the most noteworthy of which is the change from *a* to *ie* or *ea*, e.g. :

ta-te > *tie-te*, throw
la-ne > *lea-ne*, take off
la-nit > *lei-nit*, tie
to > *tio*, bring

The same principle exists with the nouns, and its signification is clear and defined : the *a* belongs to the 2nd person, the *ie*, etc., to the 1st and 3rd persons, e.g. :

a-sate, thy foot
i-siete, my and his foot

The verbs, however, exhibit much variation, but a full and complete vocabulary of every verb and part might reveal a simple law governing these inflections. One point is fairly certain, viz. the imperative of the 2nd person singular contains the strong vowel *a*, and the indicative 3rd person the modified *ie* form, e.g. :

táte, imp. throw
tiete, ind. throws
láne, imp. take off
leane, ind. takes off

N.B.—In Lengua-Mascoy there can be no confusion between the imperative and indicative, and the change from a strong vowel in the imperative to a weak one in the indicative is frequent, e.g. :

i-yátim, pour out
ăb-yitmeyi, thou pourest out

From this I gather that the irregularity of the inflections in

la 1^a y 2^a personas se deben a algo parecido a confusión entre las formas imperativas e indicativas.

3. Modo y Tiempo

(a) Las formas que adopta el verbo para el indicativo é imperativo muchas veces son idénticas, razón por la cual al indicativo suele aumentarse el pronombre personal, *v.g.* : *Am ape*, “tu vuelves”; pero no faltan indicios que existe una inflexión propia del modo imperativo, *ex. gr.* :

imp. *tate*, pl. *tatae*; arroja
ind. *a-tiete*, pl. *a-tietae*; tú arrojas
imp. *lane*, pl. *lanei*; remover
ind. *a-leane*, pl. *a-leaniae*; tú re-

mueves

(b) El subjuntivo carece de inflexión propia, pero se subentiende por la misma colocación de las voces, *ex. gr.* :

Ka akna, hethlek, si no te has de ir, avisamelo
(Ver Sintaxis, Cap. XV.)

(c) El infinitivo incluye en sí a participios y sustantivos. La terminación participial es la letra *e*, *ex. gr.* :

pone, cubrir; *pone-e*, cubierto
maa, dormir; *maa-te*, dormido
lanit, atar; *leant-e*, atado

Las partículas de pasivo a veces se afilan al verbo simple para indicar que es participio, *ex. gr.* : *ti-liana*, “muerto ó matado.” Segun parece no se distingue el pasado del presente participial, *ex. gr.* : *ti-ponee* es, “cubriendo” y “cubierto,” a no ser que se haga

the 1st and 2nd persons is probably due to some confusion of the imperative and indicative forms.

3. Mood and Tense

(a) The indicative and imperative forms of the verb are frequently alike; for that reason the indicative usually adds the personal pronoun as *Ape*, “return thou”; *Am ape*, “thou returnest,” but there are indications of an existing inflection peculiar to the imperative mood, *e.g.* :

imp. *tate*, pl. *tatae*; throw
ind. *a-tiete*, pl. *a-tietae*; throwest
imp. *lane*, pl. *lanei*; remove
ind. *a-leane*, pl. *a-leaniae*; re-

movest

(b) The subjunctive has no inflected form, and for the most part is understood by the arrangement of the words, *e.g.* :

Ka akna, hethlek, if you do not go away, tell me.
(See Syntax, Chap. XV.)

(c) The infinitive contains the participles and substantives. The participle termination is *e*, *e.g.* :

pone, cover; *pone-e*, is covered
maa, sleep; *maa-te*, is sleeping
lanit, tie; *leant-e*, is tied

The passive particles are sometimes added to the ordinary verb to indicate the participle, *e.g.* *ti-liana*, “is killed.” There seems to be no distinction made between the present and past participle, *e.g.* *ti-ponee*, is “covering,” and “covered,” unless we take the

del sustantivo un participio, lo que, como sucede en Lengua-Mascoy serviría para dar la idea de algo permanente, o sea usual, etc.¹ Choroti, *ex. gr.* : *atemi ta-fuaha*, "he acabado el hachear"; *tsahane ta-pa*, "yo sé (acostumbro) el nadar." El sustantivo se distingue por una partícula fuerte *ta* que se prefija al verbo en su forma simple, *ex. gr.* :

la (matar); *ta-la* (el matar)

woma (plantar); *ta-wo* (el plantar, lo plantado, un jardín)
ti-fuaha (hacheado); *ta-fuaha* (el hachear, hacha, lo hacheado)

tiuj (comer); *kas-to* (nuestro comedor, i.e. él que nos come)

(d) El modo indicativo tiene 4 tiempos, a saber: Presente, Futuro, Pasado y Pasado remoto.

Tiempo presente es la forma más sencilla del verbo, que muchas veces es monosílábico, por ejemplo, *la* (matar); *ya* (ir); *li* (limpiar); a estas radicales suelen añadirseles partículas que modifiquen su significado, como en *ya-pe* (volver a ir); *ya-me* (ir allá, llegar).

Las partículas *ne* (o *na*) y *te* parecen que son en realidad las terminaciones del presente de actualidad, *ex. gr.* :

a-la, yo mato

a-lia-na, yo estoy matando

pero lo usual es que indistinta-

¹ Vease el inglés.

substantive as a participle, which like the Lengua-Mascoy would give the idea of permanence, that which is habitual, etc.¹ Choroti, e.g. *atemi ta-fuaha*, "I have finished the chopping of"; *tsahane ta-pa*, "I know to swim" (i.e. I can swim). The substantive is distinguished by a strongly-marked *ta* prefix to the root verb :

la (to kill); *ta-la* (killing, slaughter)

woma (to plant); *ta-wo* (planting, that which is planted, a garden)
ti-fuaha (is chopped); *ta-fuaha* (the chopping, which is chopped, chopper)

tiuj (to eat); *kas-to* (our eater)

(d) The indicative mood has four tenses, viz.: Present, Future, Past, and Remote Past.

The present tense is the simple form of the verb, which is very often monosyllabic in form, as *la* (kill), *ya* (go), *li* (clean), to which are added particles modifying the meaning, as *ya-pe* (to re-go, re-turn, go back); *ya-me* (go there, reach).

The particles *ne* (or *na*) and *te* seem to be, in exact speech, the terminations of the actual present tense, e.g. :

a-la, I kill

a-lia-na, I am killing

but looseness of speech pre-

¹ e.g. L.-M. *Yitcha*, "yellow," used of a fruit just ripened; *Yatiklāma*, "yellow," as in the permanent colour of an animal.

mente se diga de los dos modos, así :

la-ne, yo abro o estoy abriendo
esi-te, yo corto o estoy cortando

(e) El tiempo futuro, como en Guarani, se hace sufijando la partícula *ne* al presente, *ex. gr.* :

a-yape, yo vuelvo
a-yape-ne, yo volveré

No está de más advertir que esa *a* de 1^a persona en los verbos también es característica del Guarani, *ex. gr.* :

A-mboe, yo enseño
A-mboe-ne, yo enseñaré

(f) Tiempo pasado se forma con la partícula *pajhi* y si ha de ser tiempo remoto entonces el *pajhi* será fuertemente agudo. Como *pajhi* en realidad es voz que dice "tiempo pasado" y nombre sustantivo requiere el artículo *pi*, *ex. gr.* :

a-liana pi pajhi, maté años ha
a-liana pa kiuni, yo maté un tigre

(g) El imperativo tiene dos tiempos, presente y futuro, *ex. gr.* :

póne, cúbrello
onka-ponane, cubriráslo (más tarde)

Nota.—El prefijo *ka* determina el futuro con nombres y verbos de una manera muy marcada, y el modo como se combina con el imperativo que niega o manda, *ex. gr.* *ka-ak* (no vayas) y el negativo de futuro, *ex. gr.* : *a-kai-yik-ne* (no querré ir) eslabona estas dos formas (imperativa y futura) una

vails and the two terms are used without distinction :

la-ne, I open or am opening
esi-te, I cut or am cutting

(e) The future tense, like the Guarani, adds the particle *ne* to the present tense, *e.g.* :

a-yape, I return
a-yape-ne, I shall return

It may be noted that the *a* of the 1st person of verbs is also characteristic of Guarani, *e.g.* :

A-mboe, I teach
A-mboe-ne, I shall teach

(f) The past tenses are denoted with the particle *pajhi*, and its intensive form with the acute accent *pajhi* indicates the remote past. The word *pajhi* is in reality a noun signifying "time past," and as such requires the article *pi*, *e.g.* :

a-liana pi pajhi, I killed years ago
a-liana pa kiuni, I killed a tiger

(g) The imperative mood has two tenses, the simple present and future, *e.g.* :

póne, cover it
onka-ponane, cover it (later)

Note.—The *ka* prefix is a very important mark of the future with nouns and verbs; and its connection with both the negative imperative or prohibitive, *e.g.* *ka-ak* (do not go), and the negative future, *e.g.* *a-kai-yik-ne* (I will not go), links together these two forms (imperative and future) in

con otra en Choroti, así como ellas se combinan en otras lenguas del Chaco, como que son de mando y su respuesta.

El verbo auxiliar *ma* (ir, avanzar, moverse, etc.), mucho se emplea para reforzar el imperativo, *ex. gr.* :

ma lesāna, haz (tú)

ma-ka lesāna, tú lo harás

(*h*) El participio de futuro o sea sustantivo se expresa mediante el sonido o la sílaba *ka*, como se verá en los capítulos que tratan de la sintaxis.

(*i*) Los tiempos del pasivo mucho se parecen a los del activo ; pero la forma actual del verbo pasivo tal vez varie, como por ejemplo de *pone* (cubrir) las variantes de la 3^a persona son :

ti-ponee ; *ti-ponaha* ; *ti-ponahe*
ti-ponaii ; *ti-ponea* ; *ti-poneha*

La final *ha* es la forma plural del activo, y la *e* final es de participio. El prefijo *ti* de 3^a persona a veces se usa en la primera del plural como infixo, *ex. gr.* :

kase-ponee o *kas-ti-ponaha*, somos tapados

4. *El Negativo*

(*a*) Las partículas negativas del verbo son de gran importancia ; las del presente y pasado en el indicativo son *ha* para la 1^a persona del singular, *ex. gr.* :

ha-yape, yo no vuelvo

y *he* para las demás personas, *ex. gr.* :

he-yape, él no vuelve

Choroti, as they are combined in other Chaco languages, being in fact simple command and response.

The auxiliary verb *ma* (to go, advance, move, etc.) is frequently used in the imperative, *e.g.* :

ma lesāna, make

ma-ka lesāna, thou shalt make

(*h*) The future participle or noun is expressed with the *ka* particle, as is clearly illustrated in the chapters on Syntax.

(*i*) The tenses of the passive are similar to those of the active. The actual form of the passive verb may vary as, *e.g.* from *pone* (to cover) ; the variants of the 3rd person passive are :

ti-ponze ; *ti-ponaha* ; *ti-ponahe*
ti-ponaii ; *ti-ponea* ; *ti-poneha*

The final *ha* is properly the plural form of the active ; and the final *e* the participial. The *ti* prefix of the 3rd person is sometimes used in the first plural as infix, *e.g.* :

kase-ponee or *kas-ti-ponaha*, we are covered

4. *The Negative*

(*a*) The negative particles of the verb are of paramount importance. The negative of the indicative present and past tenses is *ha* in the 1st pers. sing., *e.g.* :

ha-yape, I return not

and *he* for all other persons, *e.g.* :

he-yape, he returns not

(b) En la voz pasiva *ha* se prefiere a la 1^a persona del singular, *ex. gr.* :

ha-si-leante, no estoy atado
y *he* en los demás casos :

he-a-lante, no se te ata
he-ti-leante, no se le ata

Si la persona es de 1^a en plural *he* se infija, como :

kas-he-lanteha, no se nos ata

(c) El negativo del futuro imperativo se forma con *ka* o *kai*, *ex. gr.* :

ka-ak, no vayas

a-kai-yik, yo no iré

ka-si-ponee-ne, no se me tapará

(b) In the passive voice the *ha* is prefixed to the 1st pers. sing., *e.g.* :

ha-si-leante, I am not tied
and *he* to the other forms :

he-a-lante, thou art not tied
he-ti-leante, he is not tied

In the first plural it is usually infixated, as :

kas-he-lanteha, we are not tied

(c) The imperative and future negative is formed with *ka* or *kai*, *e.g.* :

ka-ak, do not go

a-kai-yik, I will not go

ka-si-ponee-ne, I shall not be covered

5. Las Transiciones

(a) Este nombre de "transiciones" se aplica por los autores a esas partículas de los idiomas indios que, como el Quechua, sirven de afijos para los verbos significando el sujeto y caso régimen de los mismos, ya como prefijos, infijos o sufijos, *ex. gr.* (en Quechua *wa* o *hua* es *me*; *nki* es *tú*; *n* es *él*) :

muna-hua-nki, tú me quieres
muna-hua-n, él me quiere

En el Vejoz o Aiyo *me* se expresa con el sufijo *nō*, *ex. gr.* :

aj-nō, tú me pegas
yaj-nō, él me pega

En Lengua-Mascoy los prefijos *e*, *in* sirven para expresar *me* y *nos* respectivamente :

e-tikpāngkyi, se me pega

in-tikpāngkyi, se nos pega

(a) The term "transitions" given by grammarians to the particles in the Quechua language, expresses in other words the objective prefixes, suffixes, or infixes of the active verb, *e.g.* in Quechua the particle *wa* or *hua* is *me*, thus :

muna-wa-nki, thou lovest me
muna-wa-n, he loves me

In Vejoz or Aiyo *me* is indicated by the suffix *nō*, *e.g.* :

aj-nō, thou strikest me
yaj-nō, he strikes me

In Lengua-Mascoy the prefixes *e* and *in* are used to express *me* and *us* respectively :

e-tikpāngkyi, thou (or anyone) strikkest me
in-tikpāngkyi, thou (or anyone) strikkest us

En el Choroti el *me* se dice por medio de los prefijos *se* o *si*, y para *nos* usan la forma plural *kas*, *ex. gr.*:

se-ki, se me muerde
si-tuj, se me come
kas-oki, se nos muerde
kas-to, se nos come

Como se dijo ya estos prefijos son los mismos de la voz pasiva y podrían traducirse así:

se-ki, soy mordido
kas-oki, somos mordidos

En una palabra el sujeto o actor no se distingue con claridad, sino sólo el objeto o caso régimen; es de advertir empero que en las frases de sujeto bien concreto, como por ejemplo en este: *Kiuni si-we* (el tigre *me ve*) la partícula *si* a todas luces es de caso régimen, como lo son también las partículas del Vejoz y Lengua-Mascoy que se citaron arriba.

Desde luego si el prefijo de 1^a persona en pasiva es también de caso régimen, no lo podrá ser menos ese prefijo *ti* de 3^a pers. dicho de pasiva:

ti-liana, se lo mata
ti-liana, (alguien) lo mata

En Lengua-Mascoy lo propio sucede con el prefijo *kyel* que parece ser común, *ex. gr.*:

kyel-watneyi, se enciende, o, alguien *lo* enciende

En Choroti el sufijo *e* puede también considerarse como partícula de caso régimen, *ex. gr.*:

oki, muerdo ; *oki-e*, lo muerdo

In Choroti *me* is indicated by the prefix *se* or *si*, and *us* by the plural form *kas*, *e.g.*:

se-ki, thou (or anyone) bitest me
si-tuj, thou (or anyone) eatest me
kas-oki, ye (or anyone) bite us
kas-to, ye (or anyone) eat us

As we have already seen, these are also the passive prefixes and could read equally well:

se-ki, I am bitten
kas-oki, we are bitten

In short, the person who does the action (the subject) is not clearly defined, but only the one who suffers the action (the object); at the same time in sentences where the subject is clearly expressed, as, *e.g.*: *Kiuni si-we* (the tiger sees me), the particle *si* is distinctly objective, as are also the particles in Vejoz and Lengua-Mascoy quoted above.

If, therefore, the passive prefix of the 1st person is also objective, the passive prefix *ti* of the 3rd person must be likewise objective, thus:

ti-liana, it is killed
ti-liana, (someone) killed it

In Lengua-Mascoy the *kyel* prefix has the same indefinite force, *e.g.*:

kyel-watneyi, it is lighted ; or, someone lit it

In Choroti the suffix *e* can also be claimed as an objective particle, *e.g.*:

oki, I bite ; *oki-e*, I bite it

(b) De los ejemplos que se darán en seguida fácilmente se comprenderá que los pronomombres personales y sus partículas claramente establecen la llamada "transición" de persona a persona :

1. *De 1^a a 2^a persona*

A-we a, yo te veo ;
A-lanite asa, nosotros os atamos ;

2. *De 1^a a 3^a persona*

Oki-e, yo lo (la, los, las) muerdo ;
A-we nāka, yo lo veo ;

3. *De 2^a a 1^a persona*

Am si-we, tú me ves ;
Si-leinit, átame (tú, imp.) ;
Si-leinte, atanos (o atadnos, imp.) ;
Kasi-wennane sa, vosotros nos vereis ;
Am kas-esite, tú nos estás cortando ;

4. *De 2^a a 3^a persona*

Am a-tiete, tú lo arrojas ;
Asam a-leinite, vosotros los atais ;
Am thl-esite, tú lo estas cortando ;

5. *De 3^a a 1^a persona*

Si-leante, (alguien) me ata ;
Nāka si-we, él me ve ;
Sius si-ke, el pez me muerde ;
Kas-lanteha, él o ellos nos atan ;

6. *De 3^a a 2^a persona*

Yokie a, ello te muerde ;
I-wenne a, ello te ve ;
I-tio asa, ellos os llevan ;
A-lante a, alguien te ata ;

7. *De 3^a a 3^a persona*

Ti-fuaha, alguien lo hachea ;
I-tio nāka, él lo carga ;
Y-okiakie, ellos los muerden ;
Aiyi-e, él le pega ;

(b) From the following illustrations it will be readily seen that the personal pronouns for the most part indicate the clear transition from person to person :

1. *1st to 2nd person*

I see thee
We bind ye

2. *1st to 3rd person*

I bite it, him, her, them
I see him

3. *2nd to 1st person*

Thou seest me
(thou) bind me (imperative)
Bind us (imperative)
Ye will see us

Thou art cutting us

4. *2nd to 3rd person*

Thou throwest it
Ye bind them
Thou art cutting it

5. *3rd to 1st person*

Someone binds me
He sees me
The fish bites me
He or they bind us

6. *3rd to 2nd person*

It bites thee
It sees thee
They carry you
Someone binds thee

7. *3rd to 3rd person*

Someone chops it
He carries him
They bite them
He strikes it

Otros ejemplos sobre este y demás puntos que se relacionan con los verbos se darán en la parte que trata de la sintaxis.

Further illustrations on this and other points connected with the verbs are given under the chapters on syntax.

CAPÍTULO XIV

ADVERBIOS, PREPOSICIONES, ETC.

(a) La idea adverbial puede expresarse de muchos modos, pero que es un adverbio liso y llano acaso no exista.

1. "Lugar" se expresa con *wet* (casa, hogar, lugar, etc.).

kieme-wet, cañaveral (dulce);
inäk-awet, comedor;
fuisket, palmar;

2. "Ubicación" se expresa con pronombres:

nō-kii, aquí
se-kii, allí;

3. Para los interrogativos "dónde," "cuándo," "cómo," etc., se sirven de un pronombre y de un sustantivo:

Tempa nom? i Cuánto? (i qué cantidad);

Tempa ihi? i Dónde?

4. Los de tiempo se expresan con nombres, como "día," "noche," "tarde," "año," etc., ampliados con el prefijo *ka* y el sufijo *ta*, ex. gr.:

ka nes ta, cuando llegue él;
ka tholma ta, mañana;
nakap ata, el año o verano venidero;
yitahe después, mas tarde;
akip iyita, al fin del verano;

CHAPTER XIV

ADVERBS, PREPOSITIONS, ETC.

(a) Adverbial ideas are clearly expressed in many ways, but a true adverb is hard to find.

1. "Place" is expressed with *wet* (house, home, place of, etc.).

cane-fields (sugar)
eating-place
palm grove

2. "Position" is expressed with pronouns:

here
there

3. The interrogatives "where," "when," "how," etc., are formed with a pronoun and substantive:

How much? (i.e. what quantity?)

Where?

4. "Time" is expressed with nouns, "day," "night," "afternoon," "year," etc., assisted with the *ka* prefix and the *ta* suffix, e.g.:

when he arrives
to-morrow
next year, next summer
after, later
at the end of summer

5. Un adjetivo sirve para modificar a otro, *ex. gr.* :

wuj es, muy bueno, muy bien ;

6. Varias afijos se juntan con los verbos a guisa de adverbios y posposiciones :

ya-pe, volver, volver á ir, retroceder ;

yami-sha, bajar, descender, sumergirse ;

wanthle-sha, primero ;

yuki-wita, reunir ;

ya-pe-met-na, retornar, repetir ida o venida ;

7. Algunas de estas partículas se han vuelto sustantivos, pero para emplearse como adverbios o preposiciones, *ex. gr.* :

na-ta-pe, sobre (la mesa), sobre, encima ;

na-pi-ni, atrás, en pos de, hacia atrás ;

ki-pe o ki-wa, más ;

8. Para decir "sin," "faltando," etc., se sirven de la partícula *thla* :

thla kio yi, sin manos ;

thla wole yi, calvo, sin cabello ;

9. Suelen los adjetivos y verbos neutros servir de adverbios, *ex. gr.* :

tojwe, lejos ;

hetope, cerca, al lado de ;

10. Partículas intensivas suelen agregarse a los nombres para dar la idea de ubicación, *ex. gr.* :

wuk, casa ; house ; *wuk-oho* ;

11. La palabra *éé* (sí) implica asentimiento a cualquier concepto

5. Adjectives are used to modify one another :

very good, much good

6. Particles are attached to verbs as adverbs and postpositions :

to re-go, re-turn, go back, go again

to go down, go under

first

to join together

to go (or come) back here or again

7. Some of these particles have been formed into substantives, but with adverbial or prepositional use :

on (the table) ; above, over

behind, at the rear, backwards

more

8. "Without," short of, etc., is denoted with the prefix *thla* :

without hands

hair-less

9. Adjectives or neuter verbs are employed as adverbs :

far

near, by the side of

10. Intensive particles are used with nouns to give an idea of position :

dentro de la casa ; inside the house

11. The word *éé* (yes) implies assent whether to a positive or

afirmativo o negativo; *He-wa* (nó) es una negación en ambos casos, *no es así*.

12. *Nehe* y *kipl* se usan en el sentido de *y*, *también*, *así como*, *más*, ex. gr.:

yam nehe, y yo también;
wanthe kiwa piñata, no hay sino
poca agua;

En el idioma Suhin el modo de decir es este: *Oteth shipe inaat*, que equivale a *yo quiero más agua*.

13. Las interjecciones abundan, como: *j Tám!* (¡ tan rojo !); *j Nsot!* (¡ qué olor !)

negative question. *He-wa* (no) is a denial: *it is not*.

12. *Nehe* and *kipl* are used in the sense of *also*, *likewise*, *as well*, *more*, e.g.:

and I also
there is but little water

In Suhin the same expression is: *Oteth shipe inaat*, and implies that *I want more water*.

13. Interjections abound as: *Tám!* (how red); *Nsot!* (what a smell)

CAPÍTULO XV

SINTAXIS

(A) *Del Nombre en Caso Posesivo*

El nombre del poseedor por lo general precede al de lo poseído, pero ocurren excepciones, ex. gr.:

<i>Ascene ixu</i>	La frazada de la mujer	The woman's blanket
<i>Sinat iwe</i>	La vaina del cuchillo	The knife's sheath
<i>Wakas-iwuk</i>	El corral de las vacas	Cow-pen
<i>Kiales ileowas wakas</i>	El ganado de la gente	The cattle of the people

(B) *De los Adjetivos*

El adjetivo que sólo califica por lo general sigue al sustantivo, pero lo precede si tiene que ver con el sentido del verbo, ex. gr.:

<i>Kankap loj</i>	Muchos años	Many years
<i>I-kawos loj</i>	Sus muchos vasallos	His many followers
<i>I-kawos loj</i>	El tiene muchos vasallos	He has many followers
<i>Iñat yuusa</i>	Agua clara	Clear water
<i>Tiete lemani</i>	Con nube en un ojo	Wall-eyed

CHAPTER XV

SYNTAX

(A) *The Possessive Noun*

The possessive noun (or owner) usually precedes the dependent noun (or thing possessed), but there are exceptions, e.g.:

<i>Ascene ixu</i>	La frazada de la mujer	The woman's blanket
<i>Sinat iwe</i>	La vaina del cuchillo	The knife's sheath
<i>Wakas-iwuk</i>	El corral de las vacas	Cow-pen
<i>Kiales ileowas wakas</i>	El ganado de la gente	The cattle of the people

(B) *The Adjective*

The simple adjective usually follows the noun, but precedes it to express verbal force, e.g.:

<i>Tiete wenthle</i>	Tuerto ; con un solo ojo	One-eyed
<i>Iñat nimteha</i>	Río bajo ; con poca agua	Low water
<i>Iñat se</i>	Río alto ; con mucha agua	High water
<i>Weela iketsia</i>	Otro mes (luna)	Other month.
<i>Tewuk iketsi</i>	El otro río	The other river
<i>Iñat he-esi</i>	Agua sucia	Dirty water
<i>Hatsahane iñat he-esi</i>	No (quiero) agua sucia	I do not (want) dirty water, <i>i.e.</i> can't put up with it
<i>Kiala niyuwakine</i>	El muchacho es bajo	The boy is short
<i>Wanthla waka tise</i>	Hay poca carne de vaca	There is little beef
<i>Wamthla iñat</i>	Hay poca agua	There is little water
<i>Times alentas awihiki nu wasok</i>	Hay dos caballos en el potrero o cercado	There are two horses in the paddock
<i>Isei niñat</i>	El agua corre mucho	The current is strong
<i>Yo-wanthle si-tu</i>	Yo estoy fuerte, vivo	I am (really) strong, alive
<i>Ikojhe la woyi</i>	El pan es dulce	The bread is sweet
<i>Ikaitsiyi alenta</i>	El caballo es andador	The horse is a good goer
<i>Itio ala</i>	El árbol es alto	The tree is tall
<i>Hone apa woiyi ahike</i>	Traeme pan fresco	Bring me fresh bread
<i>Wiuj inta toj</i>	Hay mucho de comer	There is much to eat

(C) *De Adjetivos y Verbos Neutros*

Tanto con adjetivos como con verbos neutros el orden sintáctico varía bastante, y mucho depende del énfasis que se quiera dar a las respectivas palabras :

<i>Pole nam</i>	Nublándose está	Clouds gather
<i>Siwanthle ayape iyete</i>	Sólo me vuelvo á casa	Alone I return to my house
<i>Sahiya piñata</i>	Demasiada es el agua	There is too much water
<i>Awen am anetiuq</i>	Sólo estas comiendo	Alone thou eatest
<i>Hitek atehe</i>	La cabeza me duele	My head aches
<i>Sinta atehe</i>	Las muelas me duelen	My teeth ache
<i>Aseene katoki sehe</i>	El brazo (codo) de la mujer está roto	The woman's arm (elbow) is broken
<i>Ayine iwu itsisi</i>	La manta del hombre está rota	The man's blanket is torn
<i>Yoome ni fuat</i>	Se apagó el fuego	The fire is out
<i>Iyam alena</i>	El perro dispara	The dog runs away
<i>Iyam anechias</i>	El patrón se fué (o llegó allá)	The master has gone (or reached there)
<i>Alenta piana</i>	Le tiene miedo al caballo	He is afraid of the horse
<i>Yapo hitek yia kat</i>	Mi cabeza se resiente del calor	My head suffers with the heat

(C) *Adjectives and Neuter Verbs*

Both with adjectives and neuter verbs there is much variety in syntactical arrangement : emphasis on a particular word seems to be the general guide :

(D) *Del Verbo Activo
Sujeto y Objeto*

(a) Por los ejemplos que se dan en seguida se podrá juzgar de lo difícil que es establecer una regla

(D) *Active Verbs
Subject and Object*

(a) From the following sentences it will be seen how difficult it is to state any general rule. The

general : la más usual es la inglesa, sujeto, predicado y caso régimen : el sujeto no siempre se expresa, sino que se subentiende y el prefijo verbal lo da a conveer.

English order of subject, predicate, and object seems to be the most common. The subject is frequently not expressed but understood, and the verbal prefix denotes the subject :

<i>Atejwi piate</i>	He concluido el maíz	I have exhausted the maize
<i>Akaiwe who</i>	Mezquino el tabaco	I keep back the tobacco
<i>Atemi tateini</i>	He acabado de zanjar	I have finished digging
<i>Ayohi na vius kathlomata</i>	Voy a salir a pescar mañana	I am going to fish to-morrow
<i>Po ni yitiowe</i>	Tengo alma	I have a soul
<i>Kankap loj alaihe niyet</i>	Años hace que abandoné mi casa	It is many years since I abandoned my house
<i>Po hai iyas</i>	Tengo un hijo	I have a son
<i>Olöwe niyet siale</i>	Salí de casa cuando niño	I left home when young
<i>Ohoyi yiöh sekii</i>	Viví allí con ella	I abode with her there
<i>Omate ni fuat</i>	Apaga el fuego	Put out the fire
<i>Ohoyi yanope ni fue wan-thlös</i>	Voy al campo de los avestruces	I am going to the camp of the ostriches
<i>Hölöwe aseene</i>	Yo abandoné a la mujer (esa)	I deserted the woman
<i>Iyenthle yase</i>	Tengo una sola hija	I have only one daughter
<i>Ilesma ka-kiwet iyamni</i>	Abrieron la puerta y se fueron	They opened the gate and departed
<i>Aliana pa kiuni</i>	Yo maté un tigre	I killed a tiger
<i>Tatehe ána kiuti</i>	Llena la pipa (con tabaco)	Fill the (tobacco) pipe
<i>Atatehe pat</i>	La llenaré	I will fill it
<i>Loj kapeaye ni alentas aya</i>	Muchos de los caballos volvieron	Many of the horses came back again

(b) Si se pone el caso régimen en primer lugar se suprimen las partículas *ni* o *pi*:

<i>Awenni ni kiuni</i>	Veo el tigre	I see the tiger
<i>Kiuni awenni</i>	Veo el tigre	I see the tiger
<i>Kiuni si-we</i>	El tigre me ve a mí	The tiger sees me
<i>Ave la malekia</i>	Halio la mula	I find the mule
<i>Suni ave</i>	Halio el cuchillo	I find the knife

(c) Si el sujeto y el caso régimen ambos se expresan, por regla general precede el primero :

<i>Alena yame thlide</i>	El perro se lleva el hueso	The dog carries off the bone
<i>Kiuni itiuj yoki aseene masa</i>	El tigre se mascó a la mujer	The tiger killed (lit. eat and bite) the woman
<i>Kiuni iyoki häne</i>	El tigre me "mascó" a mí	The tiger killed me
<i>Ayine kiuni aki</i>	El hombre mató el tigre	The man killed the tiger
<i>Thlaawu wiatne</i>	El viento le sopló	The wind blew (moved) it
<i>Kilai inu'we</i>	El forastero se cayó	The stranger fell
<i>Malekia inu'igi</i>	La mula lo volteó	The mule threw him off

(b) When the object is placed first the *ni* or *pi* particle is not used :

(c) When both subject and object are expressed, the subject usually precedes :

(d) Las siguientes frases son ejemplos de la colocación del caso régimen directo e indirecto y también del instrumental :

<i>Henope ni fuat taas</i>	Arrima la olla al fuego	Put the pot on the fire
<i>Laanit kasejhäna neyäk itui</i>	Ata la chalana con una soga fuerte	Tie the boat with a stout rope
<i>Iñat thlehehe inäkawet</i>	Lava la mesa con agua	Clean the table with water
<i>Wennama na thile alena</i>	Dale al perro un hueso	Give the dog a bone
<i>Wennam nälena na thile</i>	Dale al perro un hueso	Give the dog a bone
<i>Ala ani anthloj</i>	Mata la vibora con un cuchillo	Kill the snake with a knife
<i>Afuhahamki anthlöj sinat</i>	Mata la vibora con un cuchillo	Kill the snake with a knife
<i>Yajahane ni kiale</i>	Castiga al niño con un chicle	Hit the child with a whip
<i>Anope inketsa</i>	Ponlo encima del otro	Put it on top of the other
<i>Wem po iwa</i>	Dame un pedazo	Give me a piece
<i>Wem po iwo thlösi</i>	Dame un pedacito	Give me a little piece
<i>Wem pa wohu iwa</i>	Dame un pedazo de tabaco	Give me a bit of tobacco
<i>Hone kin taas ascene</i>	Traeme la olla de la mujer	Bring me the woman's pot
<i>Hone ti sinat iwe</i>	Traeme la vaina del cuchillo	Bring me the knife sheath
<i>Hone na lujse ayine</i>	Traeme el arco del hombre	Bring me the man's bow

(E) *Del Verbo Pasivo*

Forma Gerundiva o Particinal

(a) El segundo verbo de la frase por lo general no es mas que un sustantivo con el prefijo *ta* de 3^a persona o de no con la partícula *ka* del verbo "ser" o "estar," como inicial, *ex. gr.* :

<i>Tsa-hane ta-pa</i>	Sé nadar
<i>Hatsa-hane ka-pe</i>	No sé nadar

(b) Otras veces dos formas simples del verbo indicativo se siguen una u otra, *ex. gr.* :

<i>Atemi akime</i>	Acabé (de estarlo) teniendo
<i>Atemi yam afuaahi</i>	Acabé yo (de estar) cortando
<i>Atemi tofuahatsi alá</i>	Acabé (de estar) cortando leña
<i>Atemi tawo</i>	Acabé de plantar
<i>Atemi tafuaha</i>	Acabé de hachear
<i>Atemi takijme</i>	Acabé de trabajar
<i>Atemi tayekiu</i>	Acabé de comer
<i>Atemi tala</i>	Acabé de carnear
<i>Atemi a-lanit</i>	Acabé de atarlo
<i>Atemi takima</i>	Acabé de hacer fiesta

(d) The following sentences illustrate the direct and indirect object and instrumentality :

<i>Henope ni fuat taas</i>	Arrima la olla al fuego	Put the pot on the fire
<i>Laanit kasejhäna neyäk itui</i>	Ata la chalana con una soga fuerte	Tie the boat with a stout rope
<i>Iñat thlehehe inäkawet</i>	Lava la mesa con agua	Clean the table with water
<i>Wennama na thile alena</i>	Dale al perro un hueso	Give the dog a bone
<i>Wennam nälena na thile</i>	Dale al perro un hueso	Give the dog a bone
<i>Ala ani anthloj</i>	Mata la vibora con un cuchillo	Kill the snake with a knife
<i>Afuhahamki anthlöj sinat</i>	Mata la vibora con un cuchillo	Kill the snake with a knife
<i>Yajahane ni kiale</i>	Castiga al niño con un chicle	Hit the child with a whip
<i>Anope inketsa</i>	Ponlo encima del otro	Put it on top of the other
<i>Wem po iwa</i>	Dame un pedazo	Give me a piece
<i>Wem po iwo thlösi</i>	Dame un pedacito	Give me a little piece
<i>Wem pa wohu iwa</i>	Dame un pedazo de tabaco	Give me a bit of tobacco
<i>Hone kin taas ascene</i>	Traeme la olla de la mujer	Bring me the woman's pot
<i>Hone ti sinat iwe</i>	Traeme la vaina del cuchillo	Bring me the knife sheath
<i>Hone na lujse ayine</i>	Traeme el arco del hombre	Bring me the man's bow

(E) *The Passive Verb*

Gerundive or Participial Form

(a) The second verb in a sentence is generally a substantive. The prefix may be *ta* of the 3rd person, or the *ka* of the verb "to be," as initial, *e.g.* :

<i>Tsa-hane ta-pa</i>	I can swim, or I know to swim
<i>Hatsa-hane ka-pe</i>	I cannot swim

(b) Sometimes, however, two simple forms of the verb in the indicative follow each other, *e.g.* :

<i>Atemi akime</i>	Acabé (de estarlo) teniendo	I have finished holding it
<i>Atemi yam afuaahi</i>	Acabé yo (de estar) cortando	I have finished my cutting
<i>Atemi tofuahatsi alá</i>	Acabé (de estar) cortando leña	I have finished cutting fuel
<i>Atemi tawo</i>	Acabé de plantar	I have finished planting
<i>Atemi tafuaha</i>	Acabé de hachear	I have finished chopping
<i>Atemi takijme</i>	Acabé de trabajar	I have finished working
<i>Atemi tayekiu</i>	Acabé de comer	I have finished eating
<i>Atemi tala</i>	Acabé de carnear	I have finished killing
<i>Atemi a-lanit</i>	Acabé de atarlo	I have finished tying it
<i>Atemi takima</i>	Acabé de hacer fiesta	I have finished feasting

<i>Atemi asijma</i>	Acabé el trabajo	I have finished work
<i>Atemi ane wuk</i>	Acabé de hacer la casa	I have finished making the house
<i>Tsahane takijma</i>	Sé tirar (con arco)	I can shoot (with bow)
<i>Hatsahane asijma</i>	No sé tirar	I cannot shoot
<i>Hatsahane kai-yap</i>	No puedo guitar	I cannot shout
<i>Hateses kapea</i>	No cómo bien	I cannot eat
<i>Tsahane atu</i>	Puedo llevarlo	I can carry it
<i>Hatsahane ame</i>	No puedo dormir	I cannot sleep

(F) *El Negativo*

(a) El negativo por lo general se forma con la partícula *he* prefijada al nombre o al verbo, con esta salvedad, que en la 1^a pers. del sing. esta partícula se vuelve *ha*, *yo no soy*:

<i>Ha-tses</i>	No estoy bien	I am not well
<i>Ha-si-fuaha</i>	No estoy hacheado	I am not chopped
<i>Ha waka ya</i>	No soy una vaca	I am not a cow
<i>He leowa</i>	No es (animal) manso	Undomesticated (animal)
<i>He tiliihi</i>	No liso; áspero	Not smooth, rough
<i>Ha-peyeyi</i>	No oigo	I do not hear
<i>He-petsihini</i>	Discordante; mal sonante	Unpleasant to the ears, discordant
<i>He-tipetsile</i>	Sordo, que no oye	Deaf

(b) El imperativo que niega o prohibitivo se forma con el prefijo *ka*, ex. gr.:

<i>Ka ak</i>	No te vayas	Do not go away
<i>Ka ape awete</i>	No te vuelvas á tu casa	Do not go home
<i>Ka akna</i>	No lo sigas	Do not follow it
<i>Ka lönna</i>	No lo mates	Do not kill it
<i>Ka ajna</i>	No le pegues	Do not hit him
<i>Ka ápamit</i>	No vengas	Do not come

(c) La partícula *enlowe* o *enkohe* se usa también como prohibitivo:

<i>Enlowe ka fuaha</i>	No lo haches	Do not chop it
<i>Enlowe ka kajla</i>	No robes, no robarás	Do not steal, thou shalt not steal

(d) El futuro indicativo de negación se forma también con el *ka* o *kai*:

<i>A-kai-yik</i>	No voy, no iré	I am not going, I shall not go
<i>A-kai-yape</i>	No estoy por volver	I am not returning
<i>A-kai-yape</i>	No volveré	I shall not return
<i>A-kai-lionna ya</i>	No lo mataré	I shall not kill it
<i>A-kai-yapomet</i>	No volveré aquí	I shall not come back here
<i>Kai-yapomet</i>	No vendrá	He is not coming

(F) *The Negative*

(a) The ordinary negative is formed with the *he* prefix, which is attached to noun and verb, the only exception being in the 1st pers. sing. of verbs, *ha* being *I am not*:

<i>Ha-tses</i>	No estoy bien	I am not well
<i>Ha-si-fuaha</i>	No estoy hacheado	I am not chopped
<i>Ha waka ya</i>	No soy una vaca	I am not a cow
<i>He leowa</i>	No es (animal) manso	Undomesticated (animal)
<i>He tiliihi</i>	No liso; áspero	Not smooth, rough
<i>Ha-peyeyi</i>	No oigo	I do not hear
<i>He-petsihini</i>	Discordante; mal sonante	Unpleasant to the ears, discordant
<i>He-tipetsile</i>	Sordo, que no oye	Deaf

(b) The negative imperative or prohibitive is formed with the *ka* particle, e.g.:

(c) *Enlowe* or *enkohe* is also used as a prohibitive:

<i>Enlowe ka fuaha</i>	No lo haches	Do not chop it
<i>Enlowe ka kajla</i>	No robes, no robarás	Do not steal, thou shalt not steal

(d) The negative of the future indicative is also formed with *ka* or *kai*:

<i>A-kai-yik</i>	No voy, no iré	I am not going, I shall not go
<i>A-kai-yape</i>	No estoy por volver	I am not returning
<i>A-kai-yape</i>	No volveré	I shall not return
<i>A-kai-lionna ya</i>	No lo mataré	I shall not kill it
<i>A-kai-yapomet</i>	No volveré aquí	I shall not come back here
<i>Kai-yapomet</i>	No vendrá	He is not coming

(G) *Frases Adverbiales*

Las de esta sección tienen su valor excepcional porque hacen conocer el idiotismo sintáctico de las frases condicionales.

1. *La Particula Ka*

Para decir *cuando*, *en tiempo que*, etc., de futuro se ha de poner por lo general la particula *ka* que equivale a la forma participial o sustantival del verbo "ser" (siendo, siendo que). A más de esta particula suele sufijarse la otra *ta* que completa el sentido, *ex. gr.*:¹

<i>Ka afuenta náp ta</i>	Cuando cante el gallo	At cock-crowing
<i>Ka thloma ta</i>	Mañana	To-morrow
<i>Ayapene ka weela nám ta peya</i>	Volveré cuando salga la luna	I shall return when the moon rises
<i>Ayapene ka weela nep ta se</i>	Volveré cuando se ponga la luna	I shall return when the moon sets
<i>Ayapene ka afuenta náp ta</i>	Volveré cuando cante el gallo	I shall return at the cock-crowing
<i>Ayapene ka thlá ta pole yé</i>	Volveré cuando cese la lluvia (<i>i.e.</i> cuando no haya nubes)	I shall return when the rain ceases (<i>i.e.</i> when there are no clouds)
<i>Ayapene ka nés ta pa ne-chias</i>	Volveré cuando llegue el patrón	I shall return when the master comes
<i>Ayapene ka tetsiha ta ine</i>	Volveré cuando se acabe el invierno	I shall return at the end of winter
<i>Ayapene ka thloma ta</i>	Volveré mañana	I shall return to-morrow
<i>Ayapene ka thloma ta kiu</i>	Volveré cuando salte el lucero	I shall return when the day-star appears
<i>Ayapene ka thloma na ka tele</i>	Volveré cuando amanezca	I shall return at daybreak

2. *Tiempo Futuro (ejemplos varios)*

Adviertase como se diferencia el giro de la frase en los siguientes ejemplos :

<i>Ayapene weela iketsi na</i>	Volveré en el mes próximo
<i>Ayapene times yata path-lata ta</i>	Volveré en dos meses

¹ En Lengua-Mascoy el sufijo *ta* se incorpora en las partículas determinantes de tiempo así:—*sa-ta* (futuro); *ath-ta* (pasado); *ñá-ta* (pasado remoto).

(G) *Adverbial Sentences*

The sentences of this section are exceptionally valuable as showing the terseness of construction in conditional phrases.

1. *The Particle Ka*

To express *when*, *at the time of*, etc., in the future generally requires the particle *ka*, which is the participial or substantival form of the verb "to be" (being, it being). The additional particle *ta* as suffix often accompanies the *ka* prefix, *e.g.* :¹

<i>Ka afuenta náp ta</i>	Cuando cante el gallo	At cock-crowing
<i>Ka thloma ta</i>	Mañana	To-morrow
<i>Ayapene ka weela nám ta peya</i>	Volveré cuando salga la luna	I shall return when the moon rises
<i>Ayapene ka weela nep ta se</i>	Volveré cuando se ponga la luna	I shall return when the moon sets
<i>Ayapene ka afuenta náp ta</i>	Volveré cuando cante el gallo	I shall return at the cock-crowing
<i>Ayapene ka thlá ta pole yé</i>	Volveré cuando cese la lluvia (<i>i.e.</i> cuando no haya nubes)	I shall return when the rain ceases (<i>i.e.</i> when there are no clouds)
<i>Ayapene ka nés ta pa ne-chias</i>	Volveré cuando llegue el patrón	I shall return when the master comes
<i>Ayapene ka tetsiha ta ine</i>	Volveré cuando se acabe el invierno	I shall return at the end of winter
<i>Ayapene ka thloma ta</i>	Volveré mañana	I shall return to-morrow
<i>Ayapene ka thloma ta kiu</i>	Volveré cuando salte el lucero	I shall return when the day-star appears
<i>Ayapene ka thloma na ka tele</i>	Volveré cuando amanezca	I shall return at daybreak

2. *Future Time (various examples)*

Notice the difference of construction in the following examples :

<i>Ayapene weela iketsi na</i>	Volveré en el mes próximo	I shall return next month
<i>Ayapene times yata path-lata ta</i>	Volveré en dos meses	I shall return in two months

¹ In Lengua-Mascoy the *ta* suffix is embodied in the tense particles thus:—*sa-ta* (future); *ath-ta* (past); *ñá-ta* (remote past).

<i>Ayapene nakap ata</i>	Volveré en el año próximo	I shall return next year
<i>Ayapene akip iyita</i>	Volveré al fin del verano	I shall return at the end of summer
<i>Ayapene iñat se</i>	Volveré cuando el río esté crecido	I shall return when the river is high
<i>Ayapene iñat nimteha</i>	Volveré cuando esté bajo el río	I shall return when the river is low
<i>Ayapene atemi ates</i>	Volveré cuando se me acabe la aloja	I shall return when I have finished the drink
<i>Ayapene ti-timata ni waka tiliana</i>	Volveré cuando hayan carneado la vaca	I will come back when the cow is killed
<i>Ayapene times tapa afuihi</i>	Volveré dentro de dos meses	I will come back in two months
<i>Ayikne noote</i>	Me voy esta tarde	I am going away this afternoon
<i>Ayikne imut</i>	Me voy esta mañana	I am going away this morning
<i>Ayikne kathlomata</i>	Me voy mañana	I am going away to-morrow
<i>Ayikne ayoyine piñat se</i>	Me iré cuando haya mucha agua	I will go away when there is plenty of water
<i>Atataha kathlomata ipesinik</i>	Escribiré otra vez mañana	I will write again to-morrow
<i>Times ka weela yátisa</i>	En dos meses engordarán	In two months they will grow fat
<i>Ayape-metna a nooti ta</i>	Volveré aquí esta tarde	I will come back here again this afternoon
<i>Kankaploj nák nojwe eyape-metna</i>	A los muchos años vendré otra vez	It will be many years before I return here again
<i>Ayapene apajha ta hina iyete</i>	Hoy día volveré a casa	I will go back to my house to-day
<i>Anisna niwanthle yitahe Lomíngoo</i>	Llegaré despues del Domingo	I shall arrive after Sunday
<i>Háneámäna kile anatsi kiú</i>	Vuelve cuando el sol esté por allá (apuntando más o menos a las cuatro p.m.)	Come back when the sun is there (pointing to about 4 P.M.)
<i>Anatsi kile yapene häná</i>	Ya muy tarde volveré otra vez	In the late afternoon I will come back again

3. Tiempo Pasado

Del tiempo pasado son ejemplos los siguientes :

<i>Ka thloma ketsi ata iya</i>	Se fué ayer	He went yesterday
<i>Ka thloma ketsi ata tiliana waka</i>	Ayer mataron una vaca	A cow was killed yesterday
<i>Times na ka ajna</i>	Hace dos noches	It was two nights ago
<i>Times nakap nes ayine</i>	Hace dos años que llegó el hombre	It was two years ago since the man came
<i>Loj nakap ohoyi ayine iwete</i>	Por muchos años habité la toldería de los Indios	I have lived among the Indians for many years
<i>Loj ni nakap tiyapene ni kiales</i>	Hace muchos años que volvió la gente	It is many years since the people came back
<i>Nooti ti-ya</i>	Murió ayer	He died yesterday
<i>Aliana na ni kiuni</i>	Maté un tigre	I killed a tiger
<i>Ha ala ni kiuni</i>	No maté el tigre	I did not kill the tiger
<i>Weela ki ala neti ni kiuni</i>	El mes pasado maté un tigre	Last month I killed a tiger

3. Past Tense

The following examples illustrate the past tense :

<i>Awenthle pi neti nakap ala ni kiuni</i>	El año pasado maté un tigre	Last year I killed a tiger
<i>Owejna anape kinule wen tāmni nakap iketsi</i>	Vendi estas cuentas van ya seis años	I sold these beads six years ago
<i>Loj ana yam nahe tokis</i>	Hace tiempo ya que pasaron los soldados	It is some time since the soldiers went by

4. Adverbios varios

(a) El adverbio *kethli* o *kethlie* incluye todos los que se relacionan con tiempo que lo es o está por ser pasado, como recién, poco ha, etc., o está por ser de futuro, como luego, al punto, en uno o dos días, en seguida, etc.:

<i>Kethli lahanelo</i>	Ahora viene	He is just coming
<i>Kethliya nes nechias</i>	Ayer llegó el patrón	The master arrived yesterday
<i>Kethliya yape</i>	Acaba de llegar	He has just returned
<i>Tathlaha tiyapene</i>	Ayer se fué	He went yesterday
<i>Niwanthlehe tiyapele</i>	Acaba de llegar	He has just come back

(b) De repente :

<i>Hefui im-pole nāmpēhe</i>	De repente vino la lluvia (o nubes)	The rain (or clouds) came suddenly
<i>Notsi hefui</i>	De repente saltó	It jumped up suddenly

(c) Talvez :

<i>Neniko ayapene</i>	Talvez volveré	Perhaps I shall return
<i>Nenik aiyikne</i>	Talvez me vaya yo	Perhaps I shall go away
<i>Enta paí yone</i>	Talvez venga yo	Perhaps I shall come

(d) Casi (vease Comparación de Adjetivos) :

Este adverbio las más de las veces exige la partícula *ka*:

<i>Ithleana ka si-lanit</i>	Casi me ataron	I was almost bound
<i>Ithleana ka si-liana</i>	Casi me mataron	I was almost killed
<i>Ithleana ka so-ki</i>	Casi me picó o mordió	I was very nearly being bitten
<i>Ithleana kiuni si-tiuj</i>	Casi me comió el tigre	I was almost eaten by the tiger

(e) Si (conjunción) :

<i>Po owénāma</i>	Si tengo te lo daré	If I have it I will give it you
<i>Nam na polis, tetsihaine</i>	Si se nubla refrescará	If there are clouds it will be cool
<i>Neki, akaiyikne</i>	No me iré si llueve	If it rains I shall not go away
<i>Ka akna, he-thlek</i>	Si no vas a ir avisame	If thou art not going let me know

4. Various Adverbs

(a) The word *kethli* or *kethlie* includes all adverbs of time relative to time just past (just recently, not long ago, etc.), and just about to (soon, quickly, in a day or two, presently, immediately, etc.):

<i>Kethli lahanelo</i>	Ahora viene	He is just coming
<i>Kethliya nes nechias</i>	Ayer llegó el patrón	The master arrived yesterday
<i>Kethliya yape</i>	Acaba de llegar	He has just returned
<i>Tathlaha tiyapene</i>	Ayer se fué	He went yesterday

(b) Suddenly :

<i>Hefui im-pole nāmpēhe</i>	De repente vino la lluvia (o nubes)	The rain (or clouds) came suddenly
<i>Notsi hefui</i>	De repente saltó	It jumped up suddenly

(c) Perhaps :

<i>Neniko ayapene</i>	Talvez volveré	Perhaps I shall return
<i>Nenik aiyikne</i>	Talvez me vaya yo	Perhaps I shall go away
<i>Enta paí yone</i>	Talvez venga yo	Perhaps I shall come

(d) Almost (cf. Comparison of Adjectives) :

This word generally requires the particle *ka*:

<i>Ithleana ka si-lanit</i>	Casi me ataron	I was almost bound
<i>Ithleana ka si-liana</i>	Casi me mataron	I was almost killed
<i>Ithleana ka so-ki</i>	Casi me picó o mordió	I was very nearly being bitten
<i>Ithleana kiuni si-tiuj</i>	Casi me comió el tigre	I was almost eaten by the tiger

(e) If, when (conditional) :

<i>Po owénāma</i>	Si tengo te lo daré	If I have it I will give it you
<i>Nam na polis, tetsihaine</i>	Si se nubla refrescará	If there are clouds it will be cool
<i>Neki, akaiyikne</i>	No me iré si llueve	If it rains I shall not go away
<i>Ka akna, he-thlek</i>	Si no vas a ir avisame	If thou art not going let me know

<i>Wenkimne wopotuisi akijme</i>	Si me das un saco (te) tra- bajaré	If thou wilt give me a coat I will work
<i>Yaka-länki kathlomata, hone n-tse</i>	Si carneas mañana dame la panza	If you kill to-morrow, give me the paunch
<i>Nam na pole ayikne</i>	Si se nubla saldré	If it clouds over I shall de- part
<i>Aliana pi kiuni, avena ni naha pi taj</i>	Si mato un tigre te daré el cuero	If I kill a tiger I will give thee the skin
<i>Nes ate ayas ayapene</i>	Cuando llegue mi hijo vol- veré	When my son arrives I will return
<i>Fua yiowe alesäna ates a</i>	Cuando madure la algar- roba haré aloja	When the bean-fruit is ripe I will make beer

VOCABULARIOS

CHOROTI—CASTELLANO—INGLES

A

- A** (ya, yape, yik) : ir, irse, mover ; root verb to go, move.
- A, ha** : no soy ; negative prefix, 1st p., I am not.
- thl-A** : fruta ; fruit.
- A, am** : tú ; thou
- y-A, pl. y-Ahale** : muerto ; dead.
- A** : pegar, golpear ; strike, 2nd p.
- p-A** : pegarse, golpearse ; strike self.
- Áe** : tocar campana ; ring bell.
- Áane** : apalear ; beat with stick.
- t-A, t-Aj, pl. t-Ahes** : pellejo, piel, cuero, cáscara, concha ; skin, outer covering, as peel, bark, hide, shell, etc.
- Aáthloi** : campo ; camp.
- Afuéna, pl. s** : ave, pájaro ; bird (generic).
- Afuenta-tiuk** : tucán ; toucan.
- Afuénta** : gallina ; domestic fowl.
- Afuiiya** : volar, huir ; fly, flee, run away.
- Áha** : garza blanca ; egret.
- Ahaiyi** : murciélagos ; bat.
- Ahaiyik** : un pez ; a fish.
- Áhe** : piedra ; stone.
- Ahike** : fresco, nuevo ; new, fresh.
- Ahine** : hombre ; man. *V. Ayine*.
- Ait** : poner ; place. *V. Ot.*
- Aitaisi** : parar (plantar poste u horcón); to place upright as post.
- Aitkofue** : poner abajo ; to put below or under.
- s-Aiyi, pl. s** : compañero ; companion.
- Aiyie** : apalear ; strike with stick.
- s-Aiyi-ki** : compañera ; female companion or friend.
- Aiyitáj** : apuñalar ; to stab.
- ta-Aj** : azotar ; to whip, flog.
- s-Ajanat** : azote, rebenque ; a whip.
- y-Ajahane** : azotar, castigar ; to whip, thrash, flog.
- t-Ajahane** : apalear ; to kill birds with stick.
- Ajná** : noche, oscuridad ; night, darkness.
- Ajna-aketsia** : anteanoche ; night before last.
- Ajnajhe** : anoche ; last night.
- Ajna-thlele** : duende, fantasma, vago de la noche ; ghost, spirit.
- Ajne** : bajar ; to lower.
- Ak, pl. akine** : ir ; go thou, go ye.
- Ak** : puesto (de estancia tierra adentro) ; outpost.
- s-Ák** : comida, alimento ; food.
- Aka** : tu, tus, tuyos ; thine, thy.
- Aki** : matar ; kill. **Ayine kiúni aki** : el hombre mató el tigre ; the man shot a tiger.
- Akimet, pl. is** : tu, tus, tuyos ; thy, thine (thing held).

- Akipiyita : al fin del verano ; at the end of the summer.
- Akiúse : veneno ; poison.
- Akiúya : Tolderia del Cacique Maltisa ; name of an Indian village.
- Alá : árbol, planta, palo, leña, yugo, barril ; tree (generic), plant, stick, wood, fuel, yoke, barrel. Ala-oki : alezna ; awl, pricker. Ala-sámthli : palo delgado ; thin stick. Ala-ti-thlutiñhö : barrena ; auger, borer.
- Alá : hacha ; axe.
- Alá ne wosok : pitar ; to whistle, pipe.
- Alameyi : mano izquierda ; left hand.
- yi-Aläp, 2^a p. atewaäp : cintura ; waist.
- Alapástana : alacrán ; scorpion.
- Alápite : pájaro (bandurria) ; blue ibis.
- sa-Alat : almohada ; pillow.
- tl-Alat : viga ; beam.
- Aláte : cormorán (biguá) ; Brazilian cormorant.
- Alatki : exhalar ; exhale, give out scent.
- Alátu : granizo ; hail.
- Alawa, pl. s : tu, tus (animal) ; thy (animal).
- Ále : primavera ; springtime.
- Aléaneki : mono ; grey monkey.
- Aléna, pl. s : perro ; dog.
- Aléna-taj : aguará guazú ; wolf.
- Aléna-thli : pulga ; flea.
- Aléna-thlöse, pl. alénas iles : perrito ; pup.
- Alénna : anta ; tapir.
- Alénta, pl. s : caballo ; horse.
- Alenta ilisiki : espuela ; spur.
- Alenta piana : tiene miedo del caballo ; afraid of horse.
- Alenta tontak : cincha del caballo ; girth.
- Alenta thlöse, pl. alentas iles : potrillo ; colt.
- Alenta thlotaki : jerga ; saddle cloths.
- Alentas-iwos : potrizerzo, cuidador de los caballos ; groom, man who looks after the horses.
- Alentas-iwuk : corral para caballos ; stable-yard.
- Aliane : orejeras ; ear discs.

Serrucho, sierra ; saw : **Olöö-ki**.
Servir ; to hand round : **Maii**.
Servir pipa ; to hand pipe : **Thlöni pet**.
Sesos ; brains : **Tikithli**.
Sí (asenso) ; yes : **Éé**.
Siembra ; planting : **ta-Wo**.
Siempre viene ; always coming : **i-Yometne**.
Sierva ; maid-servant : **Kimanki**.
Siervo ; man-servant : **Kimani**.
Siete ; seven : **Times tāmni**.
Silbar ; to whistle : **Tawili**.
Silla ; chair : **i-Wet**.
Simból (pasto) ; tall pasture : **Piléti**, pl. s.
Sin, no hay, no tiene ; without, none : **Thla, thlahe**.
Sin ala o pelo ; hairless : **Thla wole**.
Sin cola ; tailless : **Thla kias a**.
Sin mano ; handless : **Thla kio yi**.
Sobaco ; armpit : **si-Fuopo-ki**.
Sobar cueros ; soften hides : **Owahane**.
Sobre-puesto ; leather covering over the seat of saddle : **Wata**.
Sobrina ; niece : **Isejni**.
Sobrino ; nephew : **Iseni**.
Soga ; rope : **Néyák**.
Sol ; sun : **Kilé**.
Soldado ; soldier : **Tokis**.
Soldado ; follower : **Ka-wo**, pl. s.
Sólido ; solid : **To, tu**.
Sólo ; only, alone : **Wenthle, wanthle**.
Soltar ; let go : **Láne, lane anekna**.
Soltera ; spinster : **Asile-ki**.

Soltero ; bachelor : Asile.	Su, sus (haber) ; his, her, its, their (possession) : Ikimet , pl. is.
Sombra ; shade : Pe.	Suave ; soft : he-To.
Sombra de persona ; shadow of person : i-Pi.	Subir ; climb : a-Wuth.
Sombra de la casa ; shade of the house : Wuk-ipe.	Subir ; ascend, go up incline : a-Hulepeha, nuktikenape.
Sombrero ; hat : Wonta, ka-Wonta , pl. s.	Subir escalera ; go up ladder : Majhihi.
Somero ; shallow : he-To'we.	Sucio ; dirty : he-Esi, töthli.
Somos dos ; we are two : kas-Mes.	Sudar ; perspire : si-Kiúnihi.
Sonar ; to sound : Taahe.	Sudor ; sweat : Kiúni.
Soñar ; to dream : a-Maaope, o-wethli, si-wethlehana.	Suegra ; mother-in-law : Ohoiyi.
Soplado por el viento ; blown with the wind : Thlaawu wiatne.	Suegro ; father-in-law : Ohojwe.
Soplar ; to blow : Pehomät, wowi.	Suelo ; floor : Anát.
Soplar (viento) ; wind blows : yi-Wowiti.	Suelto ; free, loose : he-To, iskiunine.
Soplar fuego ; blow the fire : Pajwi ni fuat.	Sueño tener ; be sleepy : Kánetipo.
Sordo ; deaf : Néile, he-tipetsile.	Sufrir ; suffer : Kioki.
Soy varón ; I am a man : Yam ayine he.	Sur ; south : Iniwuk.
Su, sus ; his, her, its, their : Ika.	Suri ; ostrich : Wánthla , pl. s.
Su, sus (animal) ; his, her, its, their (animal) : Ileowa , pl. s.	Suspender, cesar ; suspend, cease : Lei , pl. leki.
	Suspirar ; to sigh : ti-Yejlehi.
	Sustancia ; flesh of vegetable : Thlösa.

T

Tabacal ; tobacco plantation : Wohu-owet.	Talvez vuelva ; perhaps I shall return : Nenike ayapene.
Tabaco ; tobacco : Wohú.	También ; also : i-Welapis.
Tajar ; chop : Fuaha.	También yo ; I also : Yam nehe.
Tajtaj (pájaro) ; ibis : Kojká.	Tambor ; drum : Po', pom, pomiteo.
Tala (árbol) ; a tree : Seenuk.	Tapa ; lid, top, cover : i-Pot.
Talón ; heel : Piokio.	Tapa de cajón ; lid of box : Pelite.
Talvez ; perhaps : Nenik.	Tapar ; cover, stop up : Pone, owalisiki.
Talvez me vaya ; perhaps I shall go : Nenik aiyikne.	Tapera ; deserted village : Wikiuyuse.
Talvez venga yo ; perhaps I shall come : Entapai yone.	

- Tapietes (tembeteros) ; an Indian tribe : **Ofuénik**.
Tarde del día ; afternoon, evening : **Noot**, anátsi, kile anatsi.
Tatuaje ; tattooing : **Yitte**, e-yu-keet.
Tatuar ; to tattoo : a- **Yitki**.
Techar ; to roof : **ti-Lisána** awet.
Techo ; roof : **ti-Teatahaa**, **ti-ponahape**.
Tejer ; weave : **Yuuti**, ta-kawehene.
Tela ; cloth : **Thlotakine**, pl. s.
Telaraña ; cobweb : i-**Thlek**, si-waläk-ithlek.
Temblar ; tremble : **Kititine**.
Temer ; to fear : **Yúskila**.
Temprano ; early, soon : **Opethna**, **Kethli**.
Tenazas ; tweezers : i-**Teniki**.
Tender ; spread out : a-**Kojni**.
Tenedor ; fork : i- **Nök-aki**.
Tener ; to have, hold : a-**Kime**, po. *V. NÄKI*.
Teñir ; to dye : **Lenate**.
Terminar ; finish : **Lei**, pl. leki.
Ternero, ra ; calf : **Waka thlöse**, pl. wakas iles.
Terremoto ; earthquake : **Anát-tiwei**.
Testículos ; testicles : **Kianis**, pl. is.
Teta ; teat : **Ate**, nahate.
Tía ; aunt : i-**Kite**, i-kietse.
Tiempo pasado ; time past : **Pajhi**, tojle o natojle.
Tiempo de las flores ; flowering time : **Oyikantö**.
Tiene alas ; having wings : i-**Fuesis** po.
Tierno ; tender : he- **To**.
Tierra ; earth : **Anát**.
Tierra de ; land of : **Ka-anat**.
Tieso ; tight : **To**, tu.
Tigre ; jaguar : **Kiúni**, pl. s.
Tijeras ; scissors, shears : **Kasontis**, ka-sonatis ; wonis-iki.
Tímido ; timid : **Yúskila**.
Tintura ; dye : **Maha**.
Tintura para tatuaje ; juice for tattooing : **Istek-thla**.
Tío ; uncle : **Ta**, **tata**, i-kili.
Tirador ; leather apron : **Tisi-howa**.
Tirante ; joist : **Thlalat**.
Tirar ; throw away : **Tate**.
Tirar ; pull : i-**Tio**, a-tóne, ti-tiona.
Tirar ; shoot : i-**Tiyaki**, teya.
Tiritar ; shiver, shake : **Kititine**.
Tiritora ; shivering : **Tetsihe**.
Tizón ; firebrand : **Fuátehuk**.
Tobas ; Indian tribe : **Yothloki**.
Tobillo ; ankle : si- **Siete-wo**.
Tobillo, nuez del ; ankle-bone : **Miósoki**.
Tocado ; head-dress : **Namis**.
Tocar ; touch : **Etiti**.
Tocar, chocar ; knock : **Eyape**.
Tocar tambor ; beat drum : i-**Pi**, i-pu ; pom yie.
Tocar (campana) ; ring bell : **Áé**.
Todo ; all : **Loj**, pl. wa ; nojhe, nojwe.
Todo (del mismo género) ; all of a sort : **Nojle**. no Todo ; not all of a sort : he- **Nojle**.
Todo ; all : **Wukie**, kisopo.
Todos se fueran ; all have gone : **Pathlatata**.
Tolderia ; Indian village : **Wikiu**.
Tolderia (varios) ; village names : **Lejhansita**, watikifuaha, akiuya.
Toldo viejo ; ruined village : **Wikiu-yuse**.

- Tomar ; to take : **a-Kime**, yaha.
Tomar agua ; to drink water :
 ai-Ya iñate.
Tonto ; silly : **Hepiye**.
Torcer, hacer cordón ; twist fibre,
 make string : **ä-Tethle neyäk**.
Torcido ; crooked : **Soyotsäne**.
Toro ; bull : **Waka ayine**.
Tortuga ; tortoise : **Anátaj**.
Tortuga chica ; small tortoise :
 Kitiine.
Tos ; cough : **tä-Kóaki**.
Toser ; to cough : **a-Kóaki**.
Trabajar ; to work : **ta-Kijme**.
Trabajo ; work : **Kijma**.
Trae, traed ; bring thou, ye :
 Hone, pl. **honeyi**.
Traer ; to bring : **a-To**, **tio**, pl.
 tone, imp. **hone**.
Traer ; fetch : **Maii**, **woyi**.
Traer acá ; bring here : **Homkä-**
 makitnihí.
Traer a mí ; bring to me : **Hom-**
 keikiu.
Traer agua ; fetch water : **Hone**
 piñat, **maií piñat**.
Traer caballo ; fetch horse : **Woyi**
 palenta.
Tragadero ; gullet : **Taananki**.
Tragar ; to swallow : **a-Te**,
 yámisha, **yámkisha**.
Traje ; clothes : **Thlotakíne**, pl. s.
Trama de la tela ; web, woof :
 ti-Teteyapea.
Trampa ; trap : **Katsala**.
Tranquera ; gateway : **Ka-kiwet**,
 nöhiyi.
Trapo viejo ; rag : **Paj**.
Trastos ; utensils : **Lowe**.
Trayendo agua ; bringing water :
 Mähhowo pe iñat, **tósihine iñate**.
- Trece ; (13) thirteen : **Nahape**
 täm sisiete.
Tremolando ; fluttering : **Wásá**.
Trenza ; forelock : **i-Ya**.
Trenzar ; plait, braid : **yä-Kápá-**
 late.
Tres ; three : **Nahape**.
Tribu de indios ; an Indian tribe :
 Mathlela.
Tripas ; intestines : **Kasile**, pl. s.
Triste ; sad : **ha-Tankayne**.
Tronar ; to thunder : **Taawin**.
Tronco de la flecha ; shaft of
 arrow : **i-Fua**.
Tronco del árbol ; trunk of tree :
 i-Tisuk.
Tropezar ; stumble : **Topisha**.
Trueno ; thunder : **Suntini**, **shun-**
 tini.
Tú ; thou : **A'**, **am**.
Tú mismo ; thyself : **Amkata**.
Tu, tus ; thy, thine : **Aka**.
Tu, tus (animal) ; thy (animal) :
 Alawa, pl. s.
Tu, tus (haber) ; thy (possession) :
 Akimet, pl. is.
Tubo (de tetera) ; spout : **i-Kiwet**.
Tucán ; toucan : **Afuena-tiuk**.
Tucutucu (conejito) ; camp rat,
 kind of guinea-pig : **Iyis**.
Tuerto ; one-eyed : **Talók**, pl.
 taloki ; **tiete wenthle**.
Tuétano ; marrow : **Tikithli**.
Tuna ; prickly pear : **Kihat**.
Tupido ; dense : **Thlá**.
Turbio ; muddy : **he-Esi**.
Tusca (fruta) ; bean fruit : **Ijneata**.
Tuscal ; grove of bean fruit trees :
 Ijneata-ket.
Tusco (árbol) ; bean fruit tree :
 Ijneaták.

U

Ubre ; udder : ta-Ate.	Uña ; finger- or toe-nail : Hiúki-ta, pl. hiúki-t'hes.
Úcle ; prickly pear : Kihat.	Urdimbre ; warp : i-Fuenik.
Último ; last : i-Niya.	Urdir ; to put on the warp : Kawenhi.
Ulua (cacto) ; cactus : Tsetila.	Utensilio ; utensil : Tetik , pl. teti.
Único ; only. <i>V. KIWE.</i>	Útero ; womb : i-Tiowehe.
Uno, único ; one, only, alone : Wenthle, iyenthle.	
Untar ; to grease : e-Likine.	

V

Vaca, ganado vacuno ; cattle : Wáka , pl. wakas, wakaas.	Vapor ; steam : im-Peth.
Vaca ; cow : Waka-aseene.	Vaquero ; cowherd : Waka-wos, wakas-iwos, i-yihane.
Vaciar (sólidos) ; empty out solids : Sayi.	Varón ; man : Ayine , pl. s.
Vaciar (agua) ; empty out water : Ejne niñat.	Vasallo ; subject, serf : Ka-wo , pl. s.
Vacio ; empty : i-Wetnahe.	Vaso ; vessel : Ki (particula).
Vago de la noche ; night vagrant, ghost : Ajna-thlele.	¡ Ve ! go on ! Na !
Vaina ; sheath : i-We , sinat-iwe.	Veinte ; (20) twenty : Tiwono siete ketsi.
Va a llover ; will rain : Kanahata.	Vela ; candle : Heyomai.
Vamos ; let us go : Naha.	Velar ; to watch : Yam-thlomai-hi.
Vamos a comer ; let us eat : Nahani si-yoj.	Vello ; down : Póse.
Vamos a bañar ; let us bathe : Nahani iñate.	Vello de la tuna ; prickly fur of cactus fruit : Awo.
Vamos a cazar ; let us hunt : Naha tsämku.	Ven, venid ; come thou, ye : Homet , pl. honamet.
Vamos a hacer fiesta ; let us make a feast : Haiyi-kalisha hāna.	Vena ; veins : Sataki.
Vamos a pasear ; let us go for a walk : Nahani.	Venado ; deer : Sóna , pl. s.
Vamos a pescar ; let us fish : Hai-yó sius.	Vencer ; conquer : Wonthle.
Vamos a tomar aloja ; let us drink beer : Naha yák ates.	Venda ; band : si-Kawák , pl. iwa.
	Venda, tocado ; head-fillet : Na- mis.
	Vender ; sell : o-Wejna.
	Veneno ; poison : Akiuse.
	Vengar ; revenge : Yamaiahi.
	Venir ; to come, arrive : a-Nes.

Venir ; to come here : Yomet. <i>V.</i>	Viene otra vez ; coming again :
HOMET.	a- Námana atiaiyi.
Venir de ; to come from : Töthle.	Viento ; wind : Thlaawu.
Venir otra vez ; to come again : a- Yapemetna.	Viento hacer ; wind blows : Thlaawu yi-wowiti.
Ventana ; window : Kiwet-thlösi.	Viento sud ; south wind : Iníwuk.
Ventana de la nariz ; nostril : Niéto-fua.	Viento norte ; north wind : Tojniheyi.
Ver ; to see : We, wen ; a-we ; a-weni.	Viga ; beam : Thlalat.
Verano ; summer : Eyáhapea, kió-fue.	Vinal ; a tree : Isiósoki-tiuk.
Verdad ; in truth : Ijyáte.	Vino ; wine : Ates.
Verde ; green : Maha.	Virgen ; virgin : Asile-ki.
Verde, nuevo ; fresh, green : i- Fuatso, fuatsithkät.	Viruela ; small-pox : Otehe.
Verdolaga ; purslane : Wojta.	Visita ; visitor : Lon'hile, lonjile, wahena.
Verdura ; grass : Hop, hup.	Visitar ; to visit : Kanistana.
Verse ; to be seen : si-We.	Viuda (pájaro) ; crazy widow : Kátílu.
Vestido ; dress : Wu ; i-wasit, wasut.	Vivir ; to live : Ohoyi, yuwita.
Vestir (camisa) ; to dress, put on shirt : Ótse.	Vivir allá ; to live there : ij-Yoj-niheyi.
Vestir (poncho) ; to dress, put on blanket : Wuhi.	Vivo ; alive : Wásá. yo estoy
Vestir (calzones) ; to dress, put on trousers : Óshe.	Vivo ; I am alive : Yo wanthle si-tu.
Vía láctea ; milky-way : Nai-yimpe, naimpe (<i>i.e.</i> vía arriba).	Volar ; to fly : Afuiiya.
Víbora ; snake : Anthlöj, pl. ant-thlös.	Volcar ; to upset : Nuhiyi, watsilat.
Víbora cascabel ; rattlesnake : Kilésina.	Voltear ; knock down : Yamishe, oma, nuhiyi.
Víbora coral ; coral snake : Shiatáme.	Volver ; return : a- Yape, pl. le, thlapi, niyape.
Vieja ; old woman : Kihile.	Volver ; return : Kánoyi naháne.
Viejito, ta ; oldish person : Kiili.	Volver aquí ; return here : a- Na-pamet.
Viejo ; old man : Kihi.	Volver aquí otra vez ; return again here : a- Yapemetna.
Viejo (adj.) ; old : Yuse, ihuse.	Volveré ; I will return : a- Yapene.
Viene de la banda ; he comes from other side of river : Töthleheniat awetsehe.	Volveré a tu casa ; I will go back to your house : a- Namáne awuke.
Viene en seguida ; coming at once : Lonile.	Volver, volvió ; returned : Yape-yata, yape-leta, yape-netaa.
	Volver, volvió ; returned : a- Yapene natojle.

Volverse ; turn self about : a- Yape , pl. le ; nuki.	Vuelve, volved ; return thou, ye : Ma ape , pl. ma apele .
Vomitar ; vomit : tā- Kohi .	Vuestro, tros ; your : Aska .
Voraz ; greedy : ti- Yeku-itiuj .	Vuestro, tros (animal) ; your (animal) : Asthlaowa .
Vosotros, tras ; ye, you : Asa' , asam.	Vuestro, tros (haber) ; your (pos- session) : Askimet , pl. is.
Vosotros mismos ; yourselves : Asamkata .	Vulva ; female genital : Nukisi .
Vosotros, vuestro ; you, your : a-Lewos.	

Y

Yacaré ; alligator : Athlute .	Yesca ; tinder : Fuatikos .
Yaguar ; jaguar : Kiúni , pl. s.	Yesquero ; tinder-box : Fuatihí .
Yema ; yolk of egg : Mahahine .	Yica, llica ; string bag : i- Thluk .
Yema del dedo ; pads (of a cat's foot) : Tōsanate .	Yo ; I : Ya' , yam.
Yendo ; going : a- Yusihine .	Yo mismo ; myself : Yamkāta .
Yerba ; grass : Hop , hup.	Yugo ; yoke : Alá .
	Yuyu ; weeds : Wole , lowole.

Z

Zambullir ; dive : a- Yuwisha .	Zinc, chapa de ; sheet of zinc Isaahi .
Zanja ; ditch : Iwóyis .	Zonzo ; stupid : Néile .
Zapallo ; pumpkin : Óso .	Zorra ; fox : Yíos .
Zapallo (aneo) ; long pumpkin : Óso-ta , ósine.	Zumo ; sap, juice : Thle-tsi .
Zapatos ; shoes : i- Sáti .	Zumbar ; hum, buzz : Yap .

APÉNDICE A

CHOROTI OR YÓFUUAHA

INTRODUCTION

I

SITUATED on the River Pilcomayo between $21^{\circ} 30'$ and $22^{\circ} 30'$ parallels south latitude, the country of the Choroti extends but a few leagues inland from the left bank of the river. Fortín Guachalla marks the southern limit, and within a few leagues of that military settlement are a number of villages lying along a well watered gully, which may be said to contain half the entire population of the Choroti, whom I estimate at about 2500 inclusive of women and children. Northwards till San Francisco or Villa Montes is reached are scattered villages near the river, and a few minor ones four to ten leagues inland, where a fair supply of water can be found or wild fruits be obtained.

Their neighbours to the north are the Toba and Chiriguano; across the river are the Mataco-Guisnai; to the south are their allies the Suhin-Chunupi (called or rather miscalled by the local Bolivians *Tapiete*, the latter a Chiriguano-speaking people that lie to the northwest, famous for making the shell necklaces which they barter with the Choroti and other tribes for clothes and various commodities); to the east lies a deep waterless forest which is uninhabited, and rarely passed through. Away beyond this *desierto* are the eastern Suhin, the Towothli-Enimaga, and from their boundaries to the River Paraguay stretch the Lengua-Mascay.

The Choroti call themselves *Yófuaha*, which I venture to interpret "the Pigeon People" from *ófuo* (pigeon), and which I believe to be their totem. This was impressed upon me when at a solemn naming of myself, after insisting that I would not be called *Kilaii*, or "foreigner," but demanded to have a true Indian title which I deserved after long residence in the Chaco, they then styled me the "Pigeon." The name *Palomo* was known by the old chroniclers, which may refer to

the Choroti or the Towothli (the Pigeon eaters), a people with whom they must have had considerable contact.

The Toba are known to the Choroti by the name of *Yothloki*; the Chiriguano are called *Iñone*; the Suhin or Chunupi bear the name of *Athle*; the Mataco are designated *Hotenu*; the Tapiete, who make the shell necklaces, are called *Ofuénik*; and the Quechuas *Lionilia*. The name *Máthlela* may refer to the Lengua-Maseoy or be a general term for the eastern tribes.

The word *Choroti* in the mouths of Indians becomes *Choloti*, *Soloti* or *Tsoloti*, but the tribes have, of course, their own native name for this people; the Suhin-Chunupi, for example, call them *Ekhliník*, and the Vejoz give them the name of *Wichitás*. The latter name under the form of *Abuchetas* is given by Camaño in his ethnographical map, who places them between the Bermejo and Pilcomayo, but in the same parallel of latitude. Among the old writers the name Choroti occurs. Lozano, for instance, in 1733 includes the name *Xolota* (probably pronounced Sholota) in his list of tribes,¹ but nothing very definite is recorded by them. Padre Cardús has a short accurate description of the Choroti, but in it he includes the Suhin-Chunupi under the general name of Choroti.² In 1910 Dr. Lehmann-Nitsche published a short vocabulary of the Choroti and some excellent photographs together with anthropological studies.³ Baron Nordenskiold has also written an interesting account of his sojourn among them and well illustrated his description of their customs and habits by photo reproductions.⁴

II

In physique the Choroti are somewhat smaller than the Mataco, and decidedly short in comparison with the Toba or Suhin. Their sturdy appearance might suggest a previous mountain home, but I think it is fairly evident that they have lived long in the lowlands of their vicinity.

Both sexes wear the hair long, tattoo their faces, and wear the *orejera*, or ear-disc. There are, however, exceptions in these last two customs.

It is difficult to find many in truly native costume to-day. For a long time this part of the Pilcomayo has been within touch of a wither-

¹ Quoted by Dr. LEHMANN-NITSCHE, *Vocabulario Chorote ó Solote*, *Revista del Museo de la Plata*, tomo xvii., p. 112.

² *Las Misiones Fransiscanas*, JOSÉ CARDÚS.

³ *Anales del Museo de la Plata*, tomo 1.

⁴ *La Vie des Indiens dans le Chaco*, ERLAND NORDENSKIOLD.

ing civilization which has left its mark upon them physically and socially. Clothed in cheap European clothes at all stages of decay, they present an abject appearance, and in the more distant villages there is certainly an attempt at clothing with all, except the little children, which is usual among all the tribes, but the veriest rag, old sack or a pocket handkerchief has to do duty for covering. Poverty struck me in my travels among them to be the outstanding feature of the Choroti.

Linking up as it were the different specimens of dress and ornament seen at various villages it is quite easy to dress them in the costume of their fathers of a few generations ago. Like the untouched Lengua-Mascoy, Suhin, and Towothli of the interior the blanket woven either with wool or cotton would be the chief dress of the men, girt round the waist with a hide or woven belt, necklaces of shells, bones and seeds, and a head-dress and feathers would complete the picture. Specimens of these are still to be seen, but for the most part bear the mark of the eastern Suhin.

The women would be modestly clothed like the interior peoples, with a skirt of skins sewn together, reaching from the waist to the ankles, the upper part of the body remaining unclothed but relieved with a few necklaces, beads or twisted feathers, and surmounted by a neat head-band. Though the present-day dress of the young girls is that adopted by the Chiriguano, a kind of sleeveless, waistless gown caught at the shoulders with a couple of safety pins, I, nevertheless, saw some of the old-fashioned honest skirts (much the worse for wear) and some of the ornaments. Hundreds of bead necklaces, of the particular type supplied by our Mission to its workers, and bartered by them to the Suhin for goats and donkeys, and *urucu* (the red seeds of the *Bixa orellana* pounded into a cake for facial painting), were to be seen adorning the bodies of the youths and maidens.

Another article of dress still worn by some of the older men is a sleeveless shirt, either made of string or wool. The young people who have been out to work on the various sugar estates or at *estancias* are clothed with shirt, trousers and hat, and the women, as already described, with some kind of cotton material in the form of a gown. The older people of both sexes are content to wrap themselves round with a cloth folded skirt-like and fastened at the waist.

The Choroti are pleasant but not boisterously merry, rather inclined to be solemn, not bubbling over with fun and amusement like their eastern neighbours. They speak in an affected voice like a child's treble, which rises and falls in musical cadence during a long conversation, and some of their words are clipped as it were with a kind of lisp, a soft purring language that has not the forceful grip

of the Suhin, the strong guttural of the Toba, or the cowed nasal of the Mataco.

They are by no means a warlike people, but nevertheless hold their own with the Mataco on the other side of the river, who sometimes cross to settle a dispute or make a raid. The only weapon visible was the bow, with arrows of both wooden and iron points. A few shot-guns and rifles have been introduced among them.

III

Though their habitat is a river bank the Choroti cannot be termed a "river Indian" in the sense of the famous Paiyagua, the river pirates of Paraguay; on the contrary, he is a "child of the forest." The immediate country watered by the Pilcomayo is good and suitable for cattle, but a few leagues inland where the Choroti have their homes the physical characteristics of the territory are endless patches of scrubby forest land, broken here and there with small open camps, and an occasional water-hole or sluggish stream winding its way to the main river. A sandy soil producing an abundance of cactus and stumpy thorny shrubs, an occasional knoll of higher ground and a few timber trees, or a hollow with a few palms (*carandai*) offer little attraction to the traveller or wealth to the settler.

The cattle *peon* who has to work in this type of country wears a cape as covering from behind, and attached to the saddle in front as protection to himself and his mount are *guarda-montes*, a kind of hide shield, and my companion and I regretted the absence of these useful travelling articles when wending our way through the woods from village to village. With torn clothes and scratched hands and face we rode along the narrow tracks, scarcely visible in places owing to their infrequent usage, and at times we were compelled to dismount and lead our animals through the dense and thorny growth.

Choosing some quiet spot within reasonable distance of water, often hidden away from the main track, sheltered behind bushes or scraggy trees, the Choroti build their little settlement. Their huts are well made, of grass, supported on boughs of trees which meet at the top, forming a conical or beehive shaped appearance, varying from six to ten feet high in the centre, with a circular floor space ranging from ten to fifteen feet in diameter, entered by a little doorway three feet high and two feet wide, which is often blocked at night with a hurdle of grass as a protection against the beasts of camp and forest.

Some villages are arranged in sections of several huts each, huddled

together beneath the shade of some friendly *algarrobo* or *quebracho*. Others are built in a circle of some considerable extent, the open space enclosed serving as a field for games or a tying-up place for their horses or flocks.

The whole disposition of their villages, and the manner of building their huts, indicate, as is also the case with the Mataco, a people on their defence, who dread attack. The secluded village and the shape of their grass houses built to act as a soft receiving shield for the descending arrows of their enemies, resemble those of the Suhin, and form a striking contrast to the Lengua-Mascoy, who used to build chiefly with reed mats resting on crossed poles and carried from place to place, and who invariably prefer the open spaces.

IV

The Choroti are split up into little family groups living not far apart from each other in the *montes*, and never far from the river Pilcomayo. Often in the dry season for lack of food and water they leave their forest homes and settle close to the river, which has always an abundance of fish, easily netted or trapped. A triangular shaped net supported on a couple of rods is the more general method of fishing. The man enters the water with his net, and when he feels the weight of fish folds the one rod over the other and drags it to land. Attached to his naked waist is a thickish cord with a sufficient length of loose hanging line, containing a wooden needle-like skewer at the end, which he passes through the fish and when full of fish girdles it round the loins.

Their chiefs have little real power, but are recognised as such, and to some extent on important occasions lead the way. But as has already been remarked, extreme poverty is the keyword of the Choroti, touching not only their country but their social and personal belongings.

They have few flocks of sheep and goats and an occasional beast of burden—a horse or donkey—meagre gardens give them a certain amount of food supplies and drinks for the summer festivities. The wild fruits such as the algarroba and cactus are plentiful; some of which are pounded up in a wooden mortar and pressed into cakes.¹ But such is the poverty of these people that on one occasion all the hostess had to offer our native guide on arrival was a handful of cactus

¹ “*Patai*” is the name of the cakes or “bricks” of algarroba sweet meal in the N.-W. of Argentina.

fruits ; and at another village their welcoming present consisted of some sweet biscuits that had been purchased at a neighbouring shop !

From the Indian standpoint the Choroti are sadly lacking in etiquette. Knowing by long experience the rules of native society I endeavour to strictly adhere to them when travelling among Indians. In some cases there was a feeble response on the arrival of our little party, but for the most part there seemed to be a want of that delicate courtesy characteristic of the interior peoples. At the village of Atámó, which is very largely intermingled with Suhin, a stricter code is observed, and when we halted waiting for the formal invitation to be seated, some of the brighter spirits, but more especially an old "mother," rose to the occasion, and showed that though in abeyance, the old-fashioned etiquette of her people existed in all its simple charm. During the few days of our stay she continued to treat us as welcome guests by many minor attentions. A gift of tobacco is very acceptable among the various tribes, but among the Choroti salt is held in high esteem owing to its scarcity. I did not observe the *saladillo* or salt plant in the vicinity, which exists and is largely used in the interior among the Suhin, who manufacture it with a rough mixture of ashes compounded with those of the plant itself.

Whatever they may have been in the past, the Choroti are not now a hunting people, and indeed it would be difficult for them to be, for the country itself is singularly bereft of game. Of bird life we saw little, an occasional deer, ostrich or fox was sighted, and the footprints of the tapir were here and there apparent, but during our wanderings there were few indications of animal life. The most pronounced and most objectionable sign of life observed were the holes made by the burrowing animals, often a source of risk to life and limb.

V

The few sheep kept by the people supply them with a little wool for spinning, a commodity that can now be purchased at one or other of the camp stores. The art of weaving is known and practised but confined chiefly to the manufacture of belts, head-bands and tassels for their beads and necklaces, but now and again a blanket is made.

String is prepared from the fibre of a bromelia and netted into fishing nets, the large bags for carrying the household utensils and for gathering fruit, the small scrips worn by the men, and also sleeveless shirts. Like all Indians they are expert in making string-puzzles or cat's cradles for the amusement of the young.

The water jar and the pot are the chief vessels of pottery; I saw neither plates nor pipes of clay. The pipes are made from various woods, the *mistól* and the *palo-santo* being the favourites. Some of these are rudely carved in the usual Chaco manner, pigs' heads, cock's comb, the human figure, woman with pitcher on back, and others, but the commonest form was that of a plain longish piece of wood with a hole burnt through, hollowed somewhat bigger at one end for receiving the tobacco, but requiring no stem.

Gourds are as usual turned to a variety of uses, a rattle for the feasts; split in half to meet the need of dishes, bowls, ladles, spoons, cups and water vessels; a lid cut out and forming a puzzle box for the reception of cotton, needles, fish-hooks, and little nicknacks; while some are cut off at the neck and corked for carrying shot, beads, and other small things. A few of the gourds are decorated with drawings of trees, spirits, men and animals.

Though I believe it is customary to carry the fire with them from village to village, they always have the sticks and tinder-box for producing fire by friction with them. A good many of the people, however, now possess the European handy firestriker, a development of the ancient flint and steel.

Among the most interesting of implements seen was one for facial marking. It consisted of a plain piece of wood half of which possessed a row of points, carved out like a crude wooden printing block, which they dipped into the liquidized paint and made the impression.

VI

During the summer months when the wild fruits are plentiful and the garden produce ripe, the people indulge in feasts. Many of these are connected with the puberty of both sexes, others are simply drinking bouts. It is worthy of note that the women and children never drink, a characteristic of all the Chaco peoples, and in vivid contrast to the Chiriguano or Guarani women-folk who, as a general rule, indulge as freely as the men.

At one place visited while a feast was in progress the men were seated in a circle around the drink supply, made of fermented *sandías* or water-melons, which was contained in a hide receptacle sunk in the ground. The men were, of course, dressed in gala costume, all the dress and ornaments possible were loaded on their heads and necks. A few rattles and the striking of pots formed the musical outfit, the

singing being led off by an old chief in a cracked voice while he assiduously beat his drum.

The women drew and boiled water for diluting the drink after the first heavy draught round, but otherwise took no part in the feast. In case of wordy disputes or maudlin helplessness the women interfere or assist.

At another feast (from the general appearance being that of a girl's puberty feast) in addition to the drums was a "professional" dancer—a girl of fine figure, not tall or of striking good looks, but physically strong and of tremendous endurance, danced for hours at a stretch and with short intervals from morning to night, the weird and difficult step, bearing in her right hand a tall bamboo with deer-hoofs tied at the top, and singing the peculiar chant so difficult of imitation by the European. Every now and again some of the little girls went and joined her, but throughout the greater part of the day from sunrise to sunset, backwards and forwards in front of the huts, she continued her lonely dance to the same step and tune. For this she received in due time adequate remuneration. This was quite novel to my experience of Indian dances, both as regards the payment and the solitary dance; the usual custom is performed by relatives of the pubescent, who form groups and dance in regular turns. Boys dressed as devils feign an attack on the girl sitting in her booth, who are warded off by the singing women.

In common with the other Chaco tribes the gambling game known to the Lengua-Mascot under the name of *Häs-tawa* (Toba, *Soka*; Choroti, *Suki*; Suhin, *Sukák*; which are forms of the word *Sikkyi*, the name given to the dice employed in the Lengua-Mascot language) is also indulged in by the Choroti. The game is played with four dice, made of smooth pieces of wood a little bigger than a finger (which it represents) with a flat and round side. These are thrown on to a hide and the score is made accordingly. Even numbers count, and the player continues till he throws an odd, e.g. three flats and a round. Four rounds in Lengua-Mascot (and in many of the dialects) is called a *Tawa*, a name I believe to be connected with the Quechua word for "four" (*tahua*). The score is kept with arrows stuck in a prepared scoring place made in the ground in semi-circular form, and consists of two "wells" at either end, two "wells" in the centre, and the intervening space filled with a number of grooves cut out of the ground.

Into these spaces are placed the object or its representative gambled for by each player. The wells must be avoided in scoring if possible. The score has to run from one end to the other and back again. On the return journey the player scoring into a place containing say a

pipe appropriates it as gain. Should he play into the well he is "burnt" or out of the game.

It is an ancient game connected with pillage, war and rape; and the terms and all the movements of the game are closely wrapped up with marriage and sexual intercourse.

VII

The Choroti language is one of the simplest of the Chaco tongues. In many respects it has close affinities with the Mataco-Mataguayo group of which my Vejoz¹ is a characteristic member. Both Vejoz and Choroti point to a common ancestry, but each has developed peculiarities of its own. The relationship of the Toba, Vejoz and Choroti if gauged by the second person is most intimate. The personal pronoun *am* is common to all, but in the plural each goes its own way of formation, thus :

Choroti, <i>am</i>	Vejoz, <i>am</i>	Toba, <i>am</i>	Thou
Choroti, <i>as-am</i>	Vejoz, <i>am-el</i>	Toba, <i>k-am-i</i>	Ye
Choroti, <i>s-am</i>	Vejoz, <i>n-am-el</i>	Toba, <i>k-om-i</i>	We

Again in the conjunctive particles of possession the *a* is used by all, being in fact a form of the personal pronoun; and in the second person of verbs, which is frequently the imperative, and as such the most used and consequently the primitive root, likewise all use the *a* or the root letter of the verb.

The pronoun of the first person is usually a derivative of the second, the commonest method in the Chaco being to prefix a *y* or *i*, and in this contracted form serves as a prefix to the nouns to denote possession, e.g. *ya-taas* (my pot). In Vejoz one of the pronouns of the first singular is *O-thl-am* (or *ho-thlam*). Here we notice the presence of the reflexive *th* or *tl*, which also occurs in the old Lengua of Aguirre² in the pronouns of first and second persons, viz. *Yls-cha* (I); *Als-cha* (thou). It also occurs in the Lengua-Mascoy pronoun *Ith-chi* (thou fem.) and *Ith-chip* (thou masc.). In Chiquito, which has many interesting comparisons with the Choroti, it appears as a prefix *ax* or *ash* to all the personal pronouns, e.g. *Ax-ñi* (I).

In an appendix³ I have endeavoured to shew the simplicity of derivation and by examples how the Choroti has affinities with the

¹ R. J. HUNT, *El Vejoz, De la Revista del Museo de la Plata*, tomo xxii. (segunda serie, tomo ix.), pagina 7 y siguientes.

² See Appendix C on the Lengua-Enimaga or Towothli.

³ See Appendix B on Word Formation and Particles.

surrounding tribal tongues; one principle that I would specially mention is in the formation of nouns by the addition of prefixes, thus from the Choroti *u* the Vejoz make *ky-u* (a horn); from the Suhin *eyi* the Lengua-Mascay with the prefix *p* make *paiya* (a mosquito). The chapters on derivation not only give the particles, prefixes and suffixes, but also some of the important root words which can be traced through many of the Chaco languages and frequently in Quechua and Mojo as well. The sexual value of the letters will also repay study and comparison as well as the tribal, sexual or euphonic interchange of letters.

The influence of the Choroti, or perhaps better expressed the Mataco-Choroti, has been very widespread. Nations that have come into the country and have mingled with these apparently original peoples have used their language as a base and upon it have built their own particles. Birds, animals and trees new to the experience of the immigrants, and for which they evidently had no name on their arrival, still retain for the most part the original names of the Mataco-Choroti. This influence can be specially seen in the old Lengua (Aguirre), the Lengua-Enimaga or Towothli, and the Suhin-Chunupi; to some extent in Paiyaguá and in that medley of tongues known as the Chiquito.

I am indebted to my colleague, Mr. W. Barbrooke Grubb, for the Towothli words which he collected at various times, which with a few others I compiled into the accompanying list,¹ copying out at the same time the Lengua and Enimágá words of Aguirre's list for comparison. A close study of these words reveals many intimate touches with the present Choroti, together with a Mojo influence which is also to be found in the Choroti itself.

To Mr. Andrew Pride, my friend and colleague, I owe my first insight into the Suhin language, and his vocabulary which is here given² formed my groundwork for the study of the Chunupi or western Suhin. In this language the two influences of the Mataco-Choroti are very apparent. In the same breath they use a distinctive Mataco word with another peculiar to the Chorotis, e.g. the Vejoz *Eyāj* (the jaguar) and Choroti *Nuu* (the dog), and *Tenuk* (the domestic cat). Contrast this with the Toba words *Kid-yuk* (the jaguar) and *Pi-yāk* (the dog), distinguished from each other by a prefix only; or a similar formation with the *n* root in the Towothli *Te-nuk* (cat); *Kāma-te-nuk* (the jaguar); *No-nak* (dog).

I regret not having secured more words of the second dialect of the Choroti,³ which in some respects is more primitive than the dialect specially studied, but which in any case is a simple dialectal difference and does not offer the varied changes of the Suhin or Towothli.

¹ See Appendix C.

² See Appendix D.

³ See Part II of this Appendix.

During three years of regular correspondence with my friend Professor Lafone Quevedo, I have learnt much of the general bearing of these unknown Chaco languages upon the wider field of South American linguistics, and through his many hints and suggestions, and constant encouragement to throw out my feelers into the Quechua and Mojo particularly, I venture in this work to compare and weave into my net some of the beauties of Andean type.

He generously disclaims the thanks that I would gladly offer for all his help in revision of ideas and conclusions, for the translation into Spanish of the Grammar, and for his excellent introduction to this work, all of which he declares make for scientific truth for which we both earnestly seek.

VOCABULARIOS

CASTELLANO—INGLÉS—DIALECTO CHOROTI, No. 2

A

Abanicarse ; fan self : Ahutan.	Agujero de la oreja ; orifice of ear : si-Kióte-toka.
Abeja ; bee : Nuwalák.	Aliento, resuello ; breath : si-Ye.
Aequia ; canal : Nálasik.	Almohada ; pillow : Nasuat.
Acostarse ; rest, lie down : a-Mahaina.	Anta ; tapir : Aléna.
Adios ; good-bye : Yape. (responesta) Thlapile.	Antebrazo ; forearm : si-Kió.
Afeitarse ; shave oneself : si-Pose-ke.	Araña ; spider : Suwalák.
Agua ; water : Anát.	Arco ; bow : si-Lóse.
Aguará guazú ; maned wolf : Mawo-taj.	Asno ; ass : Maliki-toj.
	Atar ; to tie : Nawitikai.
	Avestruz ; ostrich : Ámla.
	Azucar ; sugar : Wouū.

B

Barba (pelo) ; beard : si-Pose.	Boca ; mouth : s-Aii, s-ahi.
Barba ; chin : s-Ak.	Borrar ; blot out : Huleiki.
Barriga ; stomach : si-Tsa.	Botella ; bottle : in-Natak.
Beber, tomar agua ; to drink : Haye natas.	Brazo ; arm : si-Wopu.

C

Caballo ; horse : Alenta.	Calvo ; bald head : Satoa.
Cabellos ; hair : so-Wále.	Calzones ; trousers : Okiles.
Cabeza ; head : s-Aták.	Cama ; bed : Nowa.
Cabra ; goat : Sonta-toj.	Caminar ; to walk : Tuetiki.
Caer ; fall : Nuheni.	Camino ; road : Naiyij.
Caliente ; hot : a-Kus.	Camisa ; shirt : Wopotoki.

Canilla ; shin-bone : si-Kala-wela.	Collar ; necklace : i-Sipa, tókuni.
Cántaro ; pitcher : Natak.	Comer ; eat : a-Yekuna.
Caña dulce ; sugar cane : Tisohun.	Corazón ; heart : s-Otule.
Carancho ; hawk : Ahosta.	Costillas ; ribs : si-Lis.
Casa ; house : sa-Wo.	Cuchara ; spoon : Tótune.
Cejas ; eyebrows : si-Táta-wela.	Cuchillo ; knife : Sáhowe.
Ceniza ; ashes : Tathlat.	Cuchillo grande ; big knife : Sahotoj.
Ceniza ; ashes : Toloj.	Cuerda del arco ; bow string : Alása.
Cielo ; sky : Pole.	Cuerno, asta ; horn : U.
Ciervo ; marsh deer : Sehena.	Culo ; buttocks : su-We.
Codo ; elbow : si-Kátóki.	
Cola ; tail : Nú.	

CH

Chajá ; turkey buzzard : Saaj.	Chancho ; pig : Nisatoj.
Chaleco ; waistcoat : Opasesimo.	Chupar ; suck, chew : Tohulya.

D

Dedo ; finger : si-Yéseki.	Diente ; tooth : s-Awe.
Dedo del pie ; toe : si-Huki.	Dormir ; sleep : Me.

E

Echar, arrojar ; throw out : a-Tatat-he.	Espejo ; mirror : ti-Yenai.
Escoba ; broom : Opi-toj.	Estómago ; stomach : si-Tsa.
Esconderse, (?) péguele ; hide self, (?) strike him : Matatu.	Estornudar ; sneeze : Nejat, as-natusen.
Escopeta ; gun : Sata-atoj.	Estrella ; star : Kátais.
Espalda ; back : si-Keyi.	Excremento ; dung : i-Muk.

F

Faja ; belt : su-Watsun, su-wet.	Fuente, plato ; plate, dish : Taitit.
Flecha ; arrow : Sata, sisa.	Frazada ; blanket : Wahali.
Forastero, ra ; foreigner : Kilai, kilai-ki.	Frente ; forehead : si-Tokohe.
Fuego ; fire : Éte.	Frotar, estregar ; rub : si-Kuiike.

G

Gallina ; hen : **Wotaa.**
Garganta ; throat : **si-Sapa.**

Gato ; cat : **Tinuk.**

H

Hacha ; axe : **Tanisäp.**
Hermano menor ; younger brother : **Eni.**

Zapallo ; pumpkin : **Sinaiyi**.
Zapatos ; shoes : **Nowés**.
Zorra ; fox : **Mawo**.

APÉNDICE B

CHOROTI

WORD FORMATION AND PARTICLES

In the Lengua-Mascoy language there is a clearly defined man's and woman's speech, which is consistent throughout from the personal pronouns down to the veriest particle, and in a less marked degree the same idea is evident in Toba, Mojo, the Quechua, and the Chaco dialects under review. Owing to the absence of a clear gender system in Choroti, I must use the Lengua-Mascoy as a base, with Toba and Mojo as supports, for this study, and whether the interpretation be right or wrong, the method adopted will be a help to the understanding of the formation of words and the uses of the particles.

I. THE LETTERS

1. The vowels are of first-rate importance both from the standpoint of radicals and pronominal particles, and considering all their various uses the primal meanings seem to be:—

<i>a</i> , father and ancestors	<i>i</i> , man and individual
<i>e</i> , mother and descendants	<i>o</i> , woman and whole
<i>u</i> , union ; husband and wife	<i>ai</i> , person, lineage, tribe

2. Closely associated with the vowels are the letters *h*, *w*, *y*, *s*. Treating the *a* as an absolute letter, *i.e.* both vowel and consonant; we have the *y* as equivalent to the *i*, and the *f* or *w* as consonantal form of the *u*, particularly in both cases when preceding a vowel. The *h* or *j* is antithetical to the *y*, and in some dialects is the substitute for *e*, so it is convenient to place it with that letter, and the *s* with the *o*, the *s* being the plural of both *y* and *h*, and in the Sanapana dialect of the Lengua-Mascoy the *s* takes the place of the initial *o*; *S-täkhek* for *O-täkhek*, I (will) return.

3. The three primary consonants *b*, *g*, *d*, are wanting in Choroti,

Suhin, Vejoz, Mojo, and Quechua; Toba has no *b*, Lengua-Mascoy no *d*.¹

4. The letters *p*, *k*, *t*, *n* are the most important consonants in Choroti: *b*, *p* represent the official father, the king, and male relative; *g*, *k* represent the official mother, the queen, and female relative. These are the great letters of possession and personal relation.

d, *t* represent the human father, the man, and the patriarchal line; *n* represents the human mother, the woman, and the matriarchal line. These are the great distinguishing family letters.

5. The letter *m* is perhaps the greatest of all the consonants and belongs to the family circle, home and mother, love and marriage, wife and husband. The *m* and *w*, and the *m* and *n*, are frequently interchangeable, both in the one dialect and also inter-dialectally.

6. *r*, *l*, *th* (*ll* or *ly*, *thl*). The *r* is wanting in Choroti, Vejoz, Lengua-Mascoy and Suhin, the *l* or *th* taking its place. The *th* has frequently a reflexive use and is sometimes interchangeable with *h* or *j*.

7. The compound letters, *ch*, *ty*, *ky*, *sh*, *sy*, *hy*, *fy*, *fw*, *ph*, *py*, *nh*, *ny*, *kh* and any others will be illustrated as we proceed.

II. THE PRONOUNS

1. In the widest sense there are but two parts of speech: (a) the verb or active agent, the man; (b) the noun or passive recipient, the woman. Action belongs to the man, possession to the woman, the particle in consequence is often reversed.

<i>A-ku-me</i> , I handle	<i>A-kyo</i> , thy hand
<i>Y-ah</i> , he dies	<i>Y-ăk</i> , my food

2. The vowels represent primarily person, animal, object:

<i>A</i> , thou	<i>I</i> , he, she, it
<i>A-ha</i> , egret	<i>I-wo</i> , maggot
<i>A-la</i> , tree	<i>I-na</i> , copse

3. The first person of the pronoun is denoted by *y* (man) in the singular; by *s* (woman) in the plural:

<i>YA</i> , I	<i>SA</i> , we
<i>A-yi-ne</i> , man	<i>A-se-ene</i> , woman
<i>A</i> , thou	<i>ASA</i> , ye
<i>Y-ot</i> , my chest	<i>S-ot</i> , our chest

¹ The letters *b*, *v*, and *hu* are adopted by some writers to express the English *w* which is a frequent sound in the Indian languages.

4. The vowel uttered by itself ends with a jerk, which in combination with other sounds becomes *h*, *j*, or *m* as *a'*, *ah*, *aj*, or *am*. The formation of the pronouns will thus be clear :

<i>ya</i>	<i>ya'</i>	<i>yah</i>	<i>yaj</i>	<i>yam</i>	I
<i>a</i>	<i>a'</i>	<i>ah</i>	<i>aj</i>	<i>am</i>	thou
<i>i</i>	<i>i'</i>	<i>ih</i>	<i>ij</i>	<i>im</i>	he, she, it
<i>sa</i>	<i>sa'</i>	<i>sah</i>	<i>saj</i>	<i>sam</i>	we
<i>asa</i>	<i>asa'</i>	<i>asah</i>	<i>asaj</i>	<i>asam</i>	ye
<i>is</i>	<i>is</i>	<i>is</i>	<i>is</i>	<i>is</i>	them

5. Comparing the pronouns of the second person singular with the surrounding tribes we have :

<i>ah</i> , Choroti	<i>am</i> , Choroti
<i>ak</i> , Suhin	<i>am</i> , Toba
<i>ak-ka</i> , Enimaga	<i>am</i> , Vejoz and Mataco
<i>ak-ami</i> , Mbaya (masc.)	<i>am</i> ; <i>ami</i> , Mbaya (fem.)
<i>k-am</i> , Quechua	<i>h-am</i> , Paiagua (Parodi)

6. The first person singular is formed from the second by the prefix *y* in the following :

<i>yah</i> , Choroti	<i>yam</i> , Choroti
<i>yak</i> , Suhin	<i>aiyim</i> , Toba
<i>yak-ka</i> , Enimaga	<i>iyam</i> , Vejoz
	<i>yam</i> , Paiagua (Parodi)

7. The distinctive letter and plural formation varies in the different dialects, e.g. :

N-amel (Vejoz), we *K-ami* (Toba), ye.

III. POSSESSIVE INFLECTIONS

1. The possessive particles are simply the personal pronouns prefixed to the nouns, but modified before certain letters. The possessive pronoun itself is a clear example. *Po* is an indeclinable verb of possession ; *ka* is a substantive.

<i>yam po</i> , I have, possess	<i>ya-ka</i> , I having, my possession, mine
<i>am po</i> , thou hast	<i>a-ka</i> , thine
<i>im po</i> , he has	<i>i-ka</i> , his, her, its
<i>sam po</i> , we have	<i>sa-ka</i> , our
<i>asam po</i> , ye have	<i>as-ka</i> , your
<i>im po</i> , they have	<i>i-ka</i> , their

2. In addition to the *i* (as in *i-ka*) the third person has three other inflections, *ta*, *thla*, *na*. The two former, *ta* and *thla*, correspond to the definite article "the," the *na* to the indefinite "a" or "an." *Ta* belongs to the father, definite, specific, and with reference to animals and inanimate things. *Thla* is reflexive but with a similar use. *Na* belongs to the mother, indefinite, national, and with regard to human possessions :

TA-kat, the, his, her, its, their, chin, bill, beak.

NA-kat, a chin, our chin, the human chin.

THLA-taas, the, his, her, its, their pot.

3. The simple nouns start from a derivative point of view with the vowels, and to differentiate them *t*, *k*, *n* and other consonants are suffixed and prefixed :

<i>a</i> , skin, fruit	<i>e</i> , thorn	<i>o</i> , seed, body, neck, etc.
<i>ak</i> , food	<i>et</i> , mother	<i>ot</i> , chest
<i>ka</i> , possession	<i>le</i> , word	<i>wo</i> , neck

The short vowels *ă* and *ō* are midway between *A* and *O*, and words like *ăk*, *ōk*, food; *ăs*, *ōs*, son, vary between *AK*, *OK*, *AS*, *OS* in the various dialects.

4. The second person of inflected nouns is the simplest or root form, that is to say, the personal pronoun suffers no modification before it, if required for clearness or emphasis the pronoun is prefixed to the noun, e.g. :

am et, thy mother *am ăk*, thy food *am ot*, thy chest

5. In the first and third persons the vowel of the pronoun may be retained or dropped, e.g. :

1. <i>ya-alat</i>	2. <i>alat</i> or <i>am alat</i>	3. <i>thla-alat</i>	pillow
1. <i>y-ot</i>	2. <i>ot</i> or <i>am ot</i>	3. <i>t-ot</i>	chest

The root vowel of the noun may sometimes be reduplicated or the prefix strengthened as in *e-yaj* :

1. <i>yo-os</i>	2. <i>os</i> or <i>am os</i>	3. <i>thlo-os</i> or <i>thl-os</i>	son
1. <i>ey-aj</i>	2. <i>aj</i> or <i>am aj</i>	3. <i>t-aj</i>	skin

6. The reflexive *h* or *j* is sometimes introduced :

1. <i>ijy-awe</i>	2. <i>awe</i> or <i>am awe</i>	3. <i>ta-awe</i>	abdomen
1. <i>ijy-ete</i>	2. <i>ate</i> or <i>am ate</i>	3. <i>nah-ate</i>	teat

7. The word for "mother" is irregular, in the 1st pers., viz. 1 p. *Ta-te*; 2 p. *Et* or *am et*; 3 p. *THL-et*.

8. Words that refer to nature have naturally but the one inflection:

thla, fruit *thle*, thorn *thlo*, seed *thlu*, light
tak, handle, stem of fruit *te*, hole, eyelet, thorn

These sometimes have the article *i* when standing alone:

i-te, hole *i-thla*, louse *i-thles*, frog (or children)

9. A series of words exclude the *w* (*f*, *fu*) from the first person singular:

1. <i>ey-o</i>	2. <i>aw-o</i>	3. <i>iw-o</i>	neck (sing.)
1. <i>siw-o</i>	2. <i>asw-o</i>	3. <i>iw-o</i>	neck (plur.)

A second series exclude the *k* from the 1st per. sing. and substitute *s*:

1. <i>isy-o</i> or <i>ish-o</i>	2. <i>aky-o</i>	3. <i>iky-o</i>	hand (sing.)
1. <i>siky-o</i>	2. <i>asky-o</i>	3. <i>iky-o</i>	hand (plur.)

10. Note the contrast in the first series of *y* and *w*, and in the second series of *k* and *s*, between the first and second persons; secondly, that of *y* and *s* between the first persons of the two series, e.g. *Yo* and *Syo*; and lastly that of *w* and *k* of the second persons, e.g. *Wo* and *Kyo*.

11. In Choroti itself the *w* and *p* are interchangeable, e.g. *waso* and *paso*, to crawl or glide as a snake (a word used by the same person of the selfsame action). The *m* is not much used in Choroti, the *w* taking its place, i.e. compared inter-dialectally, e.g. *ma* and *wa*, to go. Between Toba and Quechua or Toba and Lengua-Mascoy the *m*, *p* and *w* are freely interchanged:

Q. <i>all-PA</i>	T. <i>al-WA</i>	L.-M. <i>yil-PA</i>	earth, clay
Q. <i>MA-ki</i>	T. <i>Wák</i> or <i>Wok</i>	L.-M. <i>Mik</i>	hand
Q. <i>ma-Pha</i>	T. <i>la-PA</i>	L.-M. <i>pa-PA</i>	wax (Ch. and Vej. <i>so-Pha</i>)

In one solitary example the *ap* takes the place of the *aw* in Choroti:

1. *e-sinik* 2. *ape-sinik* 3. *iwe-sinik* paper

12. Taking the words "hand" and "foot" in several languages we notice some striking resemblances and contrasts, both in the roots,

e.g. the Guarani *po* (hand) and *pi* (foot), and in the initial letters, e.g. the Quechua, *ma-ki* (hand) and *cha-ki* (foot). A comparison of the dialects as between *kyo* or *kio* (hand, in Choroti) and *kwe* or *kue* (hand, in Vejoz) is equally interesting. The abbreviations of the languages frequently referred to are here given for convenience :

Language	Hand	Foot
Q.= Quechua	<i>ma-ki</i>	<i>cha-ki</i>
G.= Guarani	<i>mbo</i> or <i>po</i>	<i>mbi</i> or <i>pi</i>
M.= Mojo	<i>bou-pe</i>	<i>bo-pe</i>
S.= Suhin or Chunupi	<i>pa-kai</i>	<i>fo</i>
T.= Toba	<i>wāk</i> or <i>wok</i>	<i>pia</i>
L.-M. or L.M.= Lengua-Mascay	<i>mik</i>	<i>min-ik</i>
CH.= Choroti	<i>kyo</i> or <i>kio</i>	<i>ka-la</i> or <i>sie-te</i>
Vej. or V.= Vejoz	<i>kwe</i> or <i>kue</i>	<i>ka-la</i>
En.= Enimaga or Towothli	<i>yāk-se</i>	<i>fe</i>

13. For our present purpose it is sufficient to note the prevalence of *p* (also *b*, *m*, *mb*, *f*, *w*) on the one hand, and of *k* (*ky*, *kw*, *ch*) on the other as initial consonants. In the second dialect of Choroti (Appendix A) words like the ordinary Choroti *ky-u* (horn) lack the *ky* prefix, being simply *u* (horn). It must be concluded, therefore, that the *w* and *ky* divisions of nouns is a grammatical one of prefixes, and that whatever minor differences may exist or persistent usage have developed, the *aw* and *aky* are other forms of *a*, *ah*, and *am* of the second personal pronoun. The prefixes may and do vary in the numerous dialects, but it will help us in this study of word formation and comparison if we treat the initial consonants as originally possessing pronominal value.

14. A few examples will make the position clear :

1. YA, YAM	2. A, AM	3. I, IM	1 pl. SA, SAM	Personal pronouns
<i>ey-o</i>	<i>aw-o</i>	<i>iw-o</i>	<i>siw-o</i>	neck
<i>ey-o-le</i>	<i>aw-o-le</i>	<i>iw-o-le</i>	<i>siw-o-le</i>	hair
<i>iy-et</i>	<i>aw-et</i>	<i>iw-et</i>	<i>siw-et</i>	house
<i>ey-o-po</i>	<i>afu-o-po</i>	<i>ifu-o-po</i>	<i>sifu-o-po</i>	upper arm
<i>ish-o</i>	<i>aky-o</i>	<i>iky-o</i>	<i>siky-o</i>	hand
<i>is-imet</i>	<i>ak-imet</i>	<i>ik-imet</i>	<i>sik-imet</i>	possession
<i>isi-o-te</i>	<i>aki-o-te</i>	<i>iki-o-te</i>	<i>siki-o-te</i>	ear
<i>ich-o-te</i>	<i>ach-o-te</i>	<i>ich-o-te</i>	<i>sich-o-te</i>	ear
<i>its-usha</i>	<i>ak-usha</i>	<i>ik-usha</i>	<i>sik-usha</i>	friend
<i>its-eha</i>	<i>ak-eha</i>	<i>ik-eha</i>	<i>sik-eha</i>	arrow
<i>isy-uti</i>	<i>aky-uti</i>	<i>iky-uti</i>	<i>siky-uti</i>	pipe
<i>ish-uki</i>	<i>ahy-uki</i>	<i>ihy-uki</i>	<i>sihy-uki</i>	finger

15. Applying the same principles to the other initial letters we have :

1. YA, YAM	2. A, AM	3. I, IM	1 pl. SA, SAM	Personal pronouns
y-ōs	am-ōs	thl-ōs	sithl-ōs	son
il-es	al-es	il-es	sil-es	children
il-ujse	al-ojse ¹	il-ujse	sil-ujse	gun
el-eowa	al-awa ¹	il-eowa	sil-eowa	animal, pet
isi-ete	as-ate ¹	isi-ete	sisi-ete	foot ²
iti-ete	at-ate ¹	iti-ete	siti-ete	eye ²
in-iwe	an-iwe	in-iwe	sin-iwe	shoulder
ip-ose	ap-ose	ip-ose	sip-ose	down, hair
		im-ut		morning
		im-āk		flour, meal

16. In the following three examples before initials *k*, *t* and *y*, the *t* or *thl* is used in the third person :

ya-kat	a-kat	ta-kat	si-kat	chin
hi-tipot	ha-tipot	thla-tipot	sa-tipot	handkerchief
e-yik	a-yik	ti-yik	si-yik	necklace

Tipot is a derivative of *po*, to cover ; *Ti-yik* is simply a reduplication of the vowel *i*, *iik* or *yik*.

The *h* instead of *y* in *hi-tipot* is regular in its change, as is *sy* and *sh* in *isyo* or *isho*, hand, e.g. :

ahitik	ayitik	my head
ahine	ayne	man
AHA (Chor.)	AYA (Quechua)	dead

Before *ka*, and possibly before *ko*, either the *i* or *ta* prefix can be used, but in every other case the *ta* or *thla* is only used as prefix to the vowel roots, e.g. *ot*, 3rd pers. *tot* (the chest), the *i* prefix is used before the other initial letters, excepting before what we might term absolute words, e.g. *Taas* (a pot), *YA taas* (my pot), *THLA taas* (his or her pot), and derivatives of verbs as the word *tipot* above.

17. The *ky* nouns.—In Vejoz the corresponding words of this *ky* division are regular in their pronominal inflection :

1.	2.	3.	1 pl. Vejoz	Choroti	English
O-	A-	LI-	THLA-kue	kyo	hand
O-	A-	LI-	THLA-chote	kyote	ear
O-	A-	LI-	THLA-chut-hi	kyuti	pipe
O-	A-	LI-	THLA-chahi	keha	arrow

¹ Note the vowel changes in the other persons.

² The prefixes *isi* and *iti* could be written *ISY* and *ITY*; and *isi* could be *ish*.

18. The *ch* sound, as such, is rare in Choroti (some ten words or so), the word *nechas* or *nechias* (chief) being the most important. In Vejoz and the other members of the Chaco group the *ky* and *ch* sounds are regularly interchangeable by the same person of the same thing, e.g. V. *Kyote*, *chote* (ear). *Ch* and *sh* are interchanged in a similar way in Toba and Suhin, e.g. T. *Chigem*, *shigem* (up). The Tobas turn *s* into *sh*, as the Spanish *cinco* into *shinko* (five). Similarly *s* and *sh* are used in Choroti, e.g. *es*, *esh* (good). *Ts* and *ch* are likewise interchangeable in Vejoz, Toba, Choroti, and Suhin, e.g. V. *Tsu*, *chu* (egg). The simple *k* with *ch* are frequently changed about, *yik* (Vejoz) and *yich* (Suhin), to go; also the aspirated *h* or *j* with *sh*, e.g. *lutsij* (Vejoz), *lutsish* (Suhin), *lojse* (Choroti), the bow. Taking the various dialects together we thus have the equations :

$$ch=ky; ch=sh; ch=ts; ch=k; s=sh; j=sh$$

19. The *fu* or *w* nouns. The corresponding words in Vejoz are likewise regular :

1.	2.	3.	1 pl. Vejoz	Choroti	English
<i>o-wole</i>	<i>a-wole</i>	<i>la-wole</i>	<i>thla-wole</i>	<i>wole</i>	hair
<i>o-wet</i>	<i>a-wet</i>	<i>la-wet</i>	<i>thla-wet</i>	<i>wet</i>	house

20. A comparison of these *ky* and *fu* divisions of nouns, with those bearing the initial consonants *l*, *s*, *t*, *n*, *m* and *p* (§ 15) suggests the interesting question : Is the third person intended to be identical with the first ? or, Does the *ky* of the second and third persons mark an important contrast with the *sy* (*sh* or *ts*) of the first, and *fu* (or *w*) indicate a similar contrast with *ey* (or *iy*) ?

The Vejoz, as already shewn, makes no such distinction, but words, identical with the Choroti *ky* and *fu* nouns, are regularly declined, i.e. it does not exclude the *ky* and *fu* from the first person singular. The same might be equally urged for Suhin and Toba equivalents. Again, such equations as *ts=sh=ch=ky* (§ 18), and the nouns distinguished with initial consonants (§ 15), are in favour of an affirmative answer to the first question.

On the other hand, the Chiquita¹ and Lengua-Mascot languages differentiate the first person from the third very similarly to the Choroti. Take, for instance, a verb and cognate noun from the Lengua-Mascot :

Verb : Send, command (Q. Apachi)	Noun : Sending, Command.
1st p.	<i>E-y-Apaschi</i>
2nd and 3rd p. masc.	<i>Ap-Ky-Apaschi</i>
2nd and 3rd p. fem.	<i>In-Ky-Apaschi</i>
	<i>Se-y-Apasa</i>
	<i>Ap-Ky-Apasa</i>
	<i>E-y-Apasa</i>

¹ See *Arte de la Lengua Chiquita*, per LUCIEN ADAM y V. HENRY.

The *ky* prefix in L.-M. is used in the construction of other verbs and nouns, e.g. :

Păngmăt-kyi, to glow (as leaves) ;
Kya-păngmăt-kyi, to glow (as fireflies).

Another and similar prefix frequently used in the plural is *kil*, e.g. :

Mathnă-kyi, to sharpen a tool ;
Kil-măthnă-kyi, to ask for ; to sharpen tools.

These prefixes distinguish two important divisions of verbs and their derivatives in the language, and the ruling characteristic is the absence of the *k* in the first person singular and plural, the *s* marking the first singular of all verbal nouns. The first person is common to both sexes, but in form approximates to the feminine in all three divisions :

Division	1st p. m. & f.	2nd & 3rd p. masc.	2nd & 3rd p. fem.	English
i.	<i>s-ik-To</i>	<i>ăp-To</i>	<i>ik-To</i>	food
ii.	<i>s-el-Ma</i>	<i>ăp-kil-Ma</i>	<i>el-Ma</i>	possessions
iii.	<i>s-ey-Ispo</i>	<i>ăp-ky-Ispo</i>	<i>ey-Ispo</i>	cigar

It is evident, therefore, that the Choroti is not alone in preserving its *k* section of nouns, and excluding that letter from the first person singular. Furthermore, it appears to be a more primitive type, with perhaps an underlying idea of man's and woman's speech as in both the Chiquita and Lengua-Mascoy. Consequently the Vejoz and other dialects have developed the original anomalous form into a regular declension, and prefixed their own pronominal particles, e.g. :

Choroti	1. <i>ish-uti</i>	2. <i>aky-uti</i>	3. <i>iky-uti</i>	pipe
Vejoz	1. <i>o-chuti</i>	2. <i>a-chuti</i>	3. <i>li-chuti</i>	,
Choroti	1. <i>ey-o</i>	2. <i>aw-o</i>	3. <i>iw-o</i>	neck
Vejoz	1. <i>o-wo</i>	2. <i>a-wo</i>	3. <i>li-wo</i>	,

21. From the illustrations of this chapter we may, therefore, reasonably deduce these two principles regarding word formation in Choroti, that :

(1) The vowel is the basis of the word.

(2) The consonants are additions in the nature of pronominal inflections or to indicate a difference of meaning ; thus, from *o* (the body) is derived *ky-o* (the hand), *w-o* (the neck), *thl-o* (a seed), *o-t* (the chest), *thl-o-p* (a nest), etc.

22. Arising from these conclusions are several minor points worthy of note :

(a) The second person (being the root form) is the basis of pronominal inflection, e.g. *OT* (thy chest).

(b) The nouns that still retain the primitive form, *i.e.* with vowel root in the second person, require a consonant prefix (as it were a covering) in the other persons, *e.g.* 1st pers., *Y-ot* (my chest); 3rd pers., *T-ot* (his chest); 1st pers. pl., *S-ot* (our chest).

(c) The nouns that have acquired a permanent initial consonant prefix the vowel *i* in the first and third person, *e.g.* *i-les* (my and his children), exception being made in the two important *ky* and *su* sections.

23. The further development of nouns by the addition of syllables is shewn under the various particles, Chaps. VII–XXVI, *e.g.* *wo* (the neck), that which encircles; *ka-wo*, a servant, attendant; *ka-wo-ki*, a female servant; *wo-na*, a hat. Numerous examples are given (*see, e.g.*, Chap. XXI) to illustrate the various prefixes losing their pronominal use and becoming incorporated into the nouns like the L.-M.: *ăp* (masc. pref.), *awa* (woven thing) to *Ăpáwa* (blanket), which would require an absolute pronoun to denote possession, *e.g.* *ăpawa ăpánkuk* (his blanket), the original prefix *ăp* having lost its distinctive force of "his," and has become, if anything, an inseparable article.

IV. INFLECTIONS OF CONJUGATION

1. With some verbs in Choroti as the indeclinable *po* (possess), the personal pronouns are simply prefixed; in ordinary use even with verbs that suffer inflection the personal pronouns precede the verb, *e.g.* *Am ape* (thou returnest); in imperative forms, if emphatic, the pronoun follows, *e.g.* *Ape ah* (return thou); but if it is simple command the word *Ape* (return) is sufficient.

2. As with the nouns the second person is the root form of the verb, and in Choroti, Vejoz, Suhin and Toba serves for both the imperative and indicative, *e.g.* CH. *ak* (go thou, or thou goest). In Lengua-Mascoy the imperative is distinct and forms the radical of the verb *e.g.* *i-Ma*, take thou; *yi-Muk*, thou takest (or wilt take); *ăp-Meyi*, thou art taking; *ăp-Ma*, thy taking, that which thou takest, thy taker, holder.

3. In Quechua the imperative is a simple form, the indicative being formed with the addition of *n*: *Muna-i*, love thou; *Muna-ni*, I love; *Muna-nki*, thou lovest; *Muna-n*, he loves; *Muna-i* or *Muna-y*, my love.

4. In Guarani the imperative closely follows the indicative of 2nd pers., *E-mboé* or *Tere-mboé*, teach thou; *Ere-mboé*, thou teachest. Possession of the nouns is indicated by prefixing the personal pronouns, *e.g.* *che*, I; *che po*, my hand (*CHE* is pronounced *SHE*).

5. In Mojo the regular prefixes are : 1st pers., *NU* (*ne, ni*) ; 2nd pers., *PI* (*pe*) ; 3rd pers., *TA*, being alike for nouns and verbs, e.g. *NI*, to eat ; *nu-NI-ru*, my food ; *nu-NI-ko*, I eat. The imperative (as in Lengua-Mascot) is the basis of the future form : *Pi-ni-kia*, eat thou or thou wilt eat. These prefixes *NU*, *PI* are contractions of the personal pronouns *Nu-ti* (I), *pi-ti* (thou). Note, Quechua suffixes *NI* while Mojo prefixes *NU* (*ne, ni*) in the first person of verbs :

Q. *muna-Ni* M. *Ne-muna-ko* I love

and in the second person of nouns and verbs Quechua uses *k* while Mojo uses *p* :

Q. *muna-nKi* M. *Pe-muna-ko* thou lovest
Q. *yaya-iKi* M. *Pi-iya* thy father

and further note that in the third person Quechua uses *n* while Mojo uses *t* :

Q. *muna-N* M. *Te-muna-ko* he loves
Q. *cha-ki-N* M. *Tai-bo-pe* its foot

6. Broadly speaking, in Choroti the verbal inflections follow the order of the nouns, that is, the order of the personal pronouns in the singular ; the plural being formed with particles, but there are many anomalies.

7. For the verbs, as with the nouns, we must start with the vowels and have *a* as the great root verb of movement :

a, ah, ak, go, go away *a-pe*, return *a-me*, reach, go to
ma, advance, go on *na*, move *nah, nam*, arrive

The number of words that have been derived from this simple root are so many and so confusing, that we can only illustrate the various adverbial particles from one form of it, viz. *yam* :

<i>ya, Yam</i> , pl. <i>yamne</i> , to go	<i>ya-ka-wo</i> , to go under
<i>ya-me</i> , carry off, flow	<i>ya-me-si</i> , to set as sun
<i>ya-mi-kyo-yi</i> , sink, drown	<i>ya-mi-sha</i> , swallow
<i>ya-mi-she</i> , knock down (chair)	<i>yam-ke-he</i> , go astray
<i>yam-ki-sii</i> , go outside	<i>yam-pa</i> , disappear

8. In Vejoz, which corresponds very closely from a lexical point of view to the Choroti, there are four simple methods of pronominal inflection :

(a) Before the initial consonants *ch, ts* ; *fu, w* ; *h* ; *k* ; *l, thl* ; *m* ; *n* ; *p* ; *s*, and *t*, the regular prefixes are : 1, *o* or *ho* ; 2, *a* ; 3, *i* ; 1 pl., *na* or *ya* ; 2 pl., *a* ; 3 pl., *i*, e.g. :

1, *O-fwut* ; 2, *A-fwut* ; 3, *I-fwut* ; 1 pl. *NA-fwut* or *YA-fwut*, to sharpen.

(b) The reflexive *thl* or *l* is employed in the second person (and in a few cases the second reflexive *p*) with vowel roots and consonants, e.g. :

1, *O-nam* ; 2, *ALA-nam* ; 3, *I-nam* ; 1 pl., *NA-nam* or *YA-nam*, arrive.

(c) There are two forms of conjugation with vowel roots; the first introduces *y* into the first person, and marks the third, e.g. :

1, *OY-aj* ; 2, *Aj* ; 3, *Y-aj* ; 1 pl. *NAY-aj* ; strike.

(d) The second employs *t* in the same way, e.g. :

1, *OT-ose* ; 2, *Ose* ; 3, *T-ose* ; 1 pl., *NAT-ose* ; kick.

9. There are two forms of the personal pronoun in Vejoz :

<i>O-thlam</i> or <i>HO-thlam</i>	<i>Āpi-yam</i> or <i>Hāpi-yam</i>	I
<i>AM</i>	<i>ăp-am</i> or <i>Hăp-am</i>	thou
<i>thlam, eth, e</i>	<i>ăp-e</i> or <i>Hăp-e</i>	he, she, it

A dialectal form of *Ho-thlam* is *NO-thlam*, and the *o* or *ho* pronominal particle of the first person becomes *no*, which is the objective "me," where the *ho* is used as nominative, e.g. *aj-no* (strike me, obj.) ; *ho-yaj* (I strike, nom.). It is evident, therefore, that in Vejoz the prefixes are contracted forms of the personal pronouns :

ho, I ; *a*, thou ; *i* or *e*, he, she, it ; *na* or *ya*, we.

10. The reflexive *thla* or *la* of the second person is also used in Choroti and Suhin :

V. *thl-apil* ; Ch. *thl-ape* ; S. *thl-apik*, return thou (thyself).

P is reflexive in Vejoz, Choroti, and Lengua-Mascoy :

V. *p-apha*, sit down ; Ch. *p-a*, sit down ; L.-M. *i-ma-p*, be thou held.

11. The chief variation from the Vejoz in Choroti is the *a* of the first person, in Suhin *ha* or *s*, in Toba *s* or *sh* :

V.	1. <i>o-y-aj</i>	2. <i>aj</i>	3. <i>y-aj</i>	strike
Ch.	1. <i>a-y-ape</i>	2. <i>ape</i>	3. <i>y-ape</i>	return
S.	1. <i>h-apik</i>	2. <i>apik</i>	3. <i>y-apik</i>	return (<i>cf.</i> 1 p. <i>S'nam</i> , I arrive)
T.	1. <i>s-ami</i>	2. <i>aw-ami</i>	3. <i>y-ami</i>	give (<i>cf.</i> 1 p. <i>ashik</i> , I go)

The *s* is also used in the first person in Choroti :

S-ae, I strike *S-a*, I die *Si-to*, I am strong

A second set of verbs in Toba are formed with the *n* prefix :

1. *NYE-sok* 2. *AN-sok* 3. *NE-sok* prick, sting

The plurals throughout the group (excepting Lengua-Mascoy) follow more or less the order of the singular with varying plural particles. .

12. The aspirate in the Vejoz *o* both of the pronoun and the particle is variable, but the *no* of the objective (*aj-no*, strike me) is clear ; in the negative there is a variation between the *h*, *n*, and unaspirated vowel, which is a suffix in Vejoz, but prefixes in Choroti, Suhin, and Toba.

- V. *s-itā*, bad ; *wuj-hita*, not big ; *wuj-nita*, dialectal, not big.
The *y* is also used as in *is-iyata*, not good.
Ch. *he-es*, not good ; *fu-esi*, bad ; *ats-es* or *hats-es*, I am not good.
S. *s-as*, bad ; *ni-wan*, I see not ; *na-wan*, he sees not.
T. *sa-dañi*, not hard, soft ; *sa-sa-yaten*, I do not know.

From the above it is evident from every point of view that the interest centres in the consonants *y* versus *s* ; and *h* versus *n*.

13. The Toba distinguishes its objective and nominative by *y* and *s* :

NY-ami, give to me *S-ami*, I give

The Choroti reverses the order and makes its objective with *s* :

SI-we, sees me *A-we*, I see

The Vejoz makes its objective with *n* :

aj-no, strike me *oy-aj*, or *hoy-aj*, I strike

The Quechua distinguishes its direct object (first to second person) by *i* or *y* in contrast to the *ni* of the ordinary indicative :

Muna-i-ki, I love thee *Muna-ni*, I love

and by *hua* or *wa* (second to first person) :

Muna-wa-nki, thou lovest me *Muna-nki*, thou lovest

14. In Aymara there are two personal pronouns in the singular *ha* and *na* ; in Vejoz there are two in the first plural (particles of verbs) *na* and *ya* ; the chief point of divergence in the particles of the first person in Aymara and Quechua is the *y* and *h* (also *t* and *n*) :

- Q. *Uma-y* AY. *Phekeña-ha* my head
Q. *Yacha-n-i* AY. *Yaticha-t-ha* I know

15. In Lengua-Mascoy one dialect is distinguished from another chiefly by the *h* and *n* and also by *i* and *ă* :

ik-him *ik-nim* sun *ho-wu* *no-wu* like, equal
ab-ik *ab-ăk* corpse *yăk-hik* *yăk-hăk* kill

H-imyo, save me ; *năk-h-imyo*, do not save me ; *na-imyo*,

do not save ; *H-elapais*, send us ; *n-elapais*, do not ye send.

16. Many other illustrations could be given, but these and other contrasts and equations will be shewn later; enough for the moment to centre the varying elements into the important letters *y*, *s*, *h*, *n* as touching the first person singular and plural, the objective and negative particles. The third person of the verbs and the whole question of derivation viewed inter-dialectally is affected by these same letters in contrast, as e.g. V. *y-ik*, Toba *h-ek*, he goes.

V. EXAMPLES OF VERBAL INFLECTIONS

1st per.	2nd per.	3rd per.	English
<i>a-nes</i>	<i>i-nis</i>	<i>nes</i>	arrive here, come
<i>a-nesa</i>	<i>mi-nisa</i>	<i>nesna</i>	pl.
<i>a-nesne</i>	<i>i-nisne</i>	<i>nesne</i>	will come
<i>a-nesahāne</i>	<i>i-nis-hane</i>	<i>nes-hukihē</i>	pl.
<i>a-lei</i>	<i>lei</i>	<i>liya</i>	leave, pl. <i>a-leki</i>
<i>a-leine</i> (fut.)	<i>a-leipe</i> (I left)	<i>ta-lei</i> (was left, is left)	
<i>a-yape</i>	<i>ape</i>	<i>yape</i>	go back, return
<i>a-yapele</i>	<i>apele</i>	<i>yapele</i>	pl. (fut. <i>a-yapene</i>)
<i>a-yik</i>	<i>ak</i>	<i>i-ya</i>	go away (fut. <i>a-yikne</i>)
<i>a-kine</i>	<i>akine</i>	<i>yamne</i>	pl. (imp. <i>ma-ak</i> , pl. <i>ma-kine</i>)
<i>a-na</i>	<i>homit</i>	<i>na, nam, önna</i>	come (fut. <i>a-namäna</i>)
<i>nahana</i>	<i>honamit</i>	<i>namne, nömne</i>	pl. (imp. <i>homit</i> , pl. <i>honamit</i>)
<i>a-napa</i>	<i>apa</i>	<i>nape (niwete)</i>	watch (house)
<i>a-naii</i>	<i>a-nii</i>	<i>i-nii (iñate)</i>	bathe
<i>naha neki</i>	<i>a-nii</i>	<i>i-ni-atse (iñate)</i>	pl.
<i>a-fuaha</i>	<i>a-fuaha</i>	<i>i-fuaha</i>	chop
<i>a-fuahana</i>	<i>a-fuahana</i>	<i>i-fuaha</i>	pl. (imp. <i>a-fuehi</i>)
<i>si-fuaha</i>	<i>a-fuaha</i>	<i>ti-fuaha</i>	be chopped
<i>kas-fuahaki</i>	<i>a-fuahaki</i>	<i>ti-fuahaki</i>	pl.
<i>a-tepis</i>	<i>i-tepis</i>	<i>tepis</i>	suck, take breast
<i>a-tepise</i>	<i>i-tepise</i>	<i>tepise</i>	pl. (imp. <i>maka tepis</i> , pl. <i>maka tepise</i>)
<i>a-tuj, tiuj</i>	<i>i-tuj</i>	<i>i-tiuj</i>	eat
<i>a-tuwa, towaha</i>	<i>a-tuwa</i>	<i>tiyekune</i>	pl.
<i>a-pa, pahiana</i>	<i>pa</i>	<i>ta-aj</i>	strike self
<i>s-a, ah, aj</i>	<i>a, ah, aj</i>	<i>iyi, taaj</i>	strike, hit
<i>a-atne</i>	<i>a-atne</i>	<i>tajahana</i>	pl.

1st per.	2nd per.	3rd per.	English
<i>s-ae</i>	<i>ae, a-ane</i>	<i>aiyie, tajane</i>	strike an object (2nd p. pl. <i>ayiatna</i>)
<i>ajahane</i>	<i>ajahane</i>	<i>tajahane</i>	flog
<i>tajahanana</i>	<i>tajahanase</i>	<i>tajahane</i>	pl.
<i>a-yi</i>	<i>yih</i>	<i>i-yi</i>	abide, remain, sit down
<i>na-wai</i>	<i>yikihi</i>	<i>i-yiki</i>	pl.
<i>a-skini</i>	<i>ma-skini</i>	<i>ti-skini</i>	laugh
<i>ta-skiya</i>	<i>a-skiya</i>	<i>ti-skini</i>	pl.
<i>a-wuth</i>	<i>a-wuth</i>	<i>i-yuth</i>	climb
<i>a-wuthle</i>	<i>a-wuthle</i>	<i>i-yuthne</i>	pl. (imp. <i>maka wuth</i>)
<i>a-to</i>	<i>i-tu, tio</i>	<i>i-tu, tio</i>	carry, bring, take
<i>a-tone</i>	<i>i-tune, tione</i>	<i>i-tu, tio</i>	pl. (imp. <i>hone</i> , pl. <i>honeyi</i>)
<i>a-lane</i>	<i>a-leane</i>	<i>i-leane, liene</i>	remove, take off
<i>a-lanaha</i>	<i>a-leanaie</i>	<i>i-leane</i>	pl. (imp. <i>láne</i> or <i>tláne</i> , pl. <i>tlanei</i> or <i>lánei</i>)
<i>a-tate</i>	<i>a-tiete</i>	<i>tiete</i>	throw
<i>a-tatae</i>	<i>a-tietae</i>	<i>tiete</i>	pl. (imp. <i>tate</i> , pl. <i>tatae</i>)
<i>a-maa</i>	<i>mi-maahe</i>	<i>i-meaa</i>	sleep
<i>ta-mokaihe</i> (pl.)	<i>ta-maiyitsehe</i> (pl.)	<i>i-maate</i> (is sleep- ing)	<i>isi-ma</i> (sleep)
<i>a-lanit</i>	<i>a-leinit</i>	<i>i-leinit</i>	tie
<i>a-lanite</i>	<i>a-leinite</i>	<i>i-leinit</i>	pl. (imp. <i>maka lanit</i> , pl. <i>maka lanite</i>)
<i>si-leante</i>	<i>a-lante</i>	<i>ti-leante</i>	is tied
<i>kas-lanteha</i>	<i>a-leante</i>	<i>ti-leante</i>	pl.
<i>a-lesána</i>	<i>lesána, thlesána</i>	<i>lesána</i>	make
<i>a-lesána</i>	<i>lesánayi</i>	<i>lesánayi</i>	pl. (imp. <i>ma lesáne</i>)
<i>ekati</i>	<i>akati</i>	<i>takati</i> (pl. <i>takatini</i>)	dance
<i>esite</i>	<i>thl-esite</i>	<i>yisite</i>	cut
<i>esitaha</i>	<i>thl-esitaya</i>	<i>yisite</i>	pl. (imp. <i>ma esita</i>)
<i>efwuki</i>	<i>a-fwuki</i>	<i>ti-fwuki</i>	paint
<i>naha fwukihe</i>	<i>fwukiyi</i>	<i>ti-fwukihe</i>	pl.
<i>oma</i>	<i>oma</i>	<i>oma</i>	push
<i>omák</i>	<i>itumaha</i>	<i>oma</i>	pl.
<i>omate</i>	<i>ati-omate</i>	<i>y-omate</i>	extinguish
<i>omate</i>	<i>ati-omatie</i>	<i>y-omate</i>	pl. (imp. <i>omate</i> , pl. <i>omatie</i>)
<i>oki</i>	<i>thl-oki</i>	<i>y-oki</i>	bite

1st per.	2nd per.	3rd per.	English
<i>okaki</i>	<i>thl-okaki</i>	<i>y-okiaki</i>	pl.
<i>okie</i>	<i>thl-okie</i>	<i>y-okie</i>	bite it
<i>aki-esima</i>	<i>aki-esima</i>	<i>si-esima (its-esima)</i>	pinch, scratch
<i>aki-ma</i>	<i>aki-ma</i>	<i>isi-ma</i>	hold, take, have
<i>aki-maha</i>	<i>aki-mehe</i>	<i>isi-ma</i>	pl. (imp. <i>ki-ma</i> or <i>ku-ma</i> , pl. <i>ki-maihi</i>)
<i>its-es</i>	<i>n-es</i> or <i>an-es</i>	<i>es, esh</i>	good
<i>kas-es, kats-es</i>	<i>n-esishe</i>	<i>esis, esishe</i>	pl.
<i>s-a</i>	<i>in-a</i>	<i>y-a</i>	dead
<i>kas-ahale</i>	<i>n-ahale</i>	<i>y-ahale</i>	pl.
<i>si-to</i>	<i>a-to</i>	<i>i-to</i>	strong (1 pl. <i>kas-to</i>)
<i>si-paala</i>	<i>a-paala</i>	<i>yi-paala</i> or <i>ipiala</i>	thin, lean
<i>s-ewo</i>	<i>an-ewo</i>	<i>y-ewo</i>	tired
<i>kas-ewo</i>	<i>an-ewoysi</i>	<i>y-uwofuo</i>	pl.

VI. NOTES ON THE PRECEDING LIST OF VERBS

1. Lacking a prolonged acquaintance and practical use of the Choroti tongue I cannot attempt to explain why sometimes the second person follows the order of the third, e.g. 1, *a-to*; 2, *i-tu*; 3, *i-tu*, carry; and sometimes of the first person, e.g. 1, *a-wuth*; 2, *a-wuth*; 3, *i-yuth*, climb; but it should be noted that the latter word as also *aki-ma* (hold, have) reverses the order of the nouns:

- | | | | |
|-------------------|-------------------|-------------------|------------------|
| 1. <i>aki-ma</i> | 2. <i>aki-ma</i> | 3. <i>isi-ma</i> | verb, to hold |
| 1. <i>isi-met</i> | 2. <i>aki-met</i> | 3. <i>iki-met</i> | noun, thing held |

In L.-M. the same thing takes place, namely the third personal (or the feminine) prefix to the nouns becomes the first person of verbs:

1st p. 2nd & 3rd p. masc. 2nd & 3rd p. fem.

<i>sik-ma</i>	<i>ăp-ma</i>	<i>ik-ma</i>	noun, thing held
<i>ik-me-yi</i>	<i>ăp-me-yi</i>	<i>ing-me-yi</i>	verb, to hold it

The same principle holds good for the plural form of the same word:

1st p.	2nd & 3rd p. masc.	2nd & 3rd p. fem.	
<i>sel-ma</i>	<i>ăpkil-ma</i>	<i>el-ma</i>	noun, things held
<i>el-me-yi</i>	<i>ăpkil-me-yi</i>	<i>inkil-meyi</i>	verb, to hold them

Excepting the negative and one or two odd words the whole lan-

guage follows the feminine form in the first person, but with some additional letter or distinguishing prefix :

1st p.	masc.	fem.	
<i>ik-mathcheyi</i>	<i>ăb-makpe</i>	<i>ing-mathcheyi</i>	reflexive, to be held, hold self
<i>sik-mo-măthchi</i>	<i>ăp-mo-map</i>	<i>ik-mo-măthchi</i>	noun, one held or possessed

We have already noted in Choroti how the *y* of the first and third persons of nouns is used as a prefix to verbs in the third person ; and the *ta* prefix of *ta-te* (my mother) is another example of the change from the third to the first with nouns ; we see it also with the verbs.

2. Just as in Vejoz the *y* and *t* mark sections of verbs, giving as it were a distinctive index, as *Y-aj* (strike), *T-an* (cry), so also we find the same in Choroti, e.g. *Y-ape* (return), *T-o* (carry), and others like *A-Ki-ma* (hold, have, take, etc.), which in Vejoz is regular, *CHu-ma*, T. *Ko-na*, S. *Ku-ma*, L.-M. *MA*.

3. The word *oki*, to bite, is *Y-okuaj* in Vejoz ; *N-ăk* or *N-aigi* in Toba ; *T-ăk-thle-yi* in Lengua-Mascoy ; Mojo, *Ni-ko* ; Q., *Ka-ni* ; G., *ay-cuu* ; S., *Uiku*. The verbs "to bite" and "to eat" are closely allied, in Vejoz and Choroti indicated by the *t* prefix, *T-uj* or *T-iuj* ; in Toba by *CH*, *Chik* ; in L.-M. by change of vowel, *To-gyi*. From this it is evident that the consonants are used with precision, one tribe adopting an *n*, another a *t*, another a *y*, a *ch*, or change the vowel.

4. It is also clear that in words like *to* or *tio*, with an imperative *ho-ne* (carry, bring, take), or *po-ne* (imp. *one* or *ap-one*, to cover) ; that the *o* is the centre, the *t* and *p* prefixes, and the *ne* suffix being an addition to the word.

5. From the preceding list we see the root vowel varying and taking its position as first person, prefixed with the personal pronoun only, e.g. *E-kati*, dance ; *O-ma*, push. In the second person we find various consonants : *in-a*, dead ; *n-es*, good ; *ma-skini*, laugh ; *ihl-oki*, bite ; and changes of vowel as *a-tate*, I throw ; *a-tiete*, thou throwest. Is it possible to account for all these varying root letters, internal changes, and viewed inter-dialectally different index consonants ? Is it a haphazard jumble of sounds, or is there some clear simple law governing the various changes from letter to letter, vowel to vowel, and consonant to consonant ? If such a law exists, what is to be our guide, the vowel as root, or the consonant, or both ? Is such a law applicable to the Choroti standing alone, or must it be taken in conjunction with other dialects ? Does *ki*, for example, in Quechua contrast with *pi* in the same language ? or must the *ki* of Quechua and the *pi* of Mojo be contrasted ?

6. Languages like the Quechua, Mojo, and the Lengua-Mascoy have developed a clear pronominal system, as suffixes in the first, and prefixes in the last two, and the root words are brought into line with strengthening and balancing consonants. Even in the Vejoz and Toba the particles are more or less regular. Is the Choroti with its anomalies a primitive form of language, or a degenerate form? In any case the processes of word-building with clear cut monosyllabic particles will throw light on the other languages of the Chaco group.

7. An examination of the principal words in detail, following the order indicated below, will give at a glance the roots and the method of word-building. Some important comparisons with other languages will be given, and the contrasts and equations of letters will be indicated thus, *e.g.*:

ahi-ne, ayi-ne, man ($H=Y$) *aj, ahes*, skin ($J=H$)

8. The following table will facilitate reference to roots and particles dealt with in this study:

<i>A, ai</i>	.	.	Chap. VII	<i>W, f</i>	.	Chap. XVIII
<i>E</i>	.	.	,	<i>M</i>	.	XIX
<i>I</i>	.	.	,	<i>P</i>	.	XX
<i>O, u</i>	.	.	,	<i>K, ky</i>	.	XXI, XXII
<i>H, j</i>	.	.	,	<i>N</i>	.	XXIII, XXIV
<i>Y</i>	.	.	,	<i>T</i>	.	XXV
<i>S, sh, ts, ch</i>	,	,	XV, XVI, XVII	<i>L, th, thl</i>	,	XXVI

VII. EXAMPLES OF ROOTS AND DERIVATIVES (A, AI)

A, move, go, come.

A, ha, neg. pref., I am not.

A, la, fruit. T. *la*; V. *lai*; L.-M. *na* ($L=N$).

A, ah, thou.

A, v. pref., I : *e.g. a-yik*, I go; G. *a-mboe*, I teach.

A, n. pref., thy, your : *e.g. a-kyo*, thy hand. The *a* is a feminine prefix in L.-M. and Toba.

A, am, aw, v. pref., thou. Used also in Toba, Vejoz, Suhin; L.-M. *ab* or *ap*.

A, thing, animal, person ; L.-M. *äk*, *yäk*, *äksäk*.

A, prefix or article to nouns, a, an, the : *e.g. a-la*, a tree.

A, prefix to verbs, at, on to : *e.g. a-fui-iya*, on-wing-go, i.e. fly, flee.

A, aha, aha-le, dead ; Q. *aya* ($H=Y$) ; *le*, pl. suf.

A, ah, aj, strike, beat, hit, flog ; *a-e*, ring bell, strike object ; *ajaha-ne*, flog (reduplication of *ah* to form the plural of action and of persons,

strike much or many, many strike) ; *aja-nat*, whip (*nat*, instrument, thing for).

Aj, *oj*, skin, bark, shell, body ; *Mojo*, *o*, *vo* ; *Tob.* *ok* ; *V.* *thl-oki* ; L.-M. *yohok-thloho*, body ; hence the whole, all, big, etc. Cf. *loj*, *noj*, *wuj*, etc.

A-athlo, camp ; *V. a-thlo-taj* ; L.-M. *yok-thlith-ma*.

A-fue-na, bird (*a*, *a*, *an* ; *fue*, wing ; *na*, thing, object).

A-fue-na-ta, fowl. *Ta*, *taj*, *tiuj*, *tiuk* augmentative suffix, similar in Vejoz, Toba, and Suhin. In L.-M. it is a masculine prefix *yat*, its feminine counterpart being *yan* or *yam* (TAJ=YAT).

Ahi-ne, *ayi-ne*, man (H=Y) ; *ne*, family (cf. *asee-ne*, woman) ; *ahi* and *ayi* are used as prefixes to 1st p. *ahi-tek*, *ayi-tek*, my head.

Ait, put ; *aita-isi*, put upright (*s*, *isi*, good straight) ; *ait-kofue*, put below (*kofue*, low, below, under) ; *aut-kiwe*, put under ; *ata-ăp*, put up, spit fish ; *ete-e*, *ete-he*, place against, wedge ; *ot*, put, put in ; *ote*, put in ; *ote-wita*, wrap up (*wita*, together). See *an*, *am*. The two great roots "to put" are formed with various vowels and the consonants *t* and *n* or *m*. In L.-M. the distinction is made by *t* (sing.) and *n* (plural), *pit-kin*, to put down one thing ; *nin-kin*, to put down many things ; *V. ti*, put.

Ai, person ; *ai-yi*, companion (*yi*, individual) ; *ai-yi-ki*, female companion (*ki*, fem. suf.) ; *kil-ai-i*, stranger, foreigner (L.-M. *wulai-ya* ; G. *kar-ai-i*) ; Q. *ai-lu*, lineage, genealogy ; V. *ai-yo*, proper name of Vejoz. *Ay* or *ai* indicates union, frequently used of the mouth (*ai-i*), yawning, etc. In derivation *ai* passes to *o* as in *ait* and *ot* (put). Inter-dialectally *ai* and *aj* as suffixes are interchangeable, e.g. V. *Pel-ăj* ; Tob. *Păgr-ai* ; L.-M. *Mop-ai-a* (white). Like *o* the *ai* is often used as a plural, e.g. V. *la*, animal, *lai*, animals ; as a diminutive, L.-M. *se-ma*, my friend ; *se-mai*, my little friend, i.e. the *i* united to the *a* in both cases ; cf. Ch. *ai-yi* ; V. *yoj*, *ye-eth* ; T. *lya*, *kai-ya*, friend.

Aj, *ah*, reflexive of *a* prefix, *aj-na*, night ; L.-M. *ăth-taa* (S=TH and N=T) ; V. *o-na-tsi* ; M. *ya-ti* ; Q. *tu-ta* ; G. *py-tu* ; S. *tuth* ; T. *pe*.

Aj-na-jhe, last night (cf. V. *najhi* ; Ch. *pajhi*, past tense particle).

Aj-ne, to lower ; *aj*, move ; *ne*, down (*ej-ne*, pour down, empty out).

Ak pl. *aki-ne*, to go, 1st p. *ayik*, 2nd p. *ak*, 3rd p. *iya*.

Tob.	1. <i>ashik</i>	2. <i>kohok</i>	3. <i>hek</i>
V.	1. <i>oyik</i>	2. <i>thlik</i>	3. <i>yik</i>
S.	1. <i>hōuk</i>	2. <i>thlik</i>	3. <i>yich</i>

L.-M. *thling-kyi* ; Q. *ri*. This very important word means, "to go for the first time," go away, move as animal ; it is never used

in the sense of "going home" or to a familiar place. The root is *i*; *thl* is reflexive; In L.-M. the imperative in *k* makes its indicative in *ng-kyi*, a termination which has always the idea of this verb in it, e.g. *păt-mak* (imp.), *păt-meng-kyi* (ind.), to shoulder going away.

Ak, ok, food ; subs. of *tiuj, toj* ; L.-M. *to*, food ; *to-gyi*, to eat.

Aki, kill.

Akip-iyita, end of summer (*na-kap*, year ; *yitahe*, after).

A-kiu-se, poison (*se*, liquid).

A-la, tree, axe (L.-M. *a-thla*, palm-tree) ; *a*, article or prefix ; *la, le*, *lo*, etc., person, family, animal, tree, plant, natural object or element, season. Compare *la* with other prefixes, e.g. *e, e-le*, parrot ; *ki, ki-le*, sun ; *thla, thle*, etc., *thle-le*, people of, etc.

A-lat-ki, give scent ; *a-löti*, scent ; (*ki*, causative) ; V. *lat*, to feel, perceive ; *late*, to hear ; T. *laita*, a smell, scent ; L.-M. *ling-ai-yi*, to hear, feel, perceive a smell.

Am, thou. (See Chap. II.)

Am-is, beads, ornaments ; V. *thl-amis* ; T. *Malgrai* ; L.-M. *lamum*.

Am, an, put ; (see, *ait*) ; *ano-pe, am-pehe*, put in, on, above ; V. *ippe, tipha, tiphe*, etc. ; L.-M. *tă-kha*, above, from above, etc. (PHA=KHA). The basis of this very important particle is the word *ape*, to re-go, go again, go back, go up ; the word is used of the movements of friends, acquaintances, domestic animals, never of a complete stranger ; thus *a-yik*, I go to a fresh place ; *a-yape*, I return to a known place ; the L.-M. words are *thlingkyi* and *tăkhakthleyi*, making the particles *-ngkyi* and *-kthleyi*, e.g. *pitkin-angkyi*, to place, going away ; *pitkin-akthleyi*, to place returning, again, on, re-place. Cp. Q. *ri-pu*, go again ; M. *ya-po*, re-turn. Contrast *pe*, up ; *ne*, down. Motion downward and toward the speaker is expressed by *m* or *ne*, e.g. *ho-ne*, bring ; *ho-met*, come. In L.-M. the particle *-nteyi* is used, *păl-enteyi*, fall down, fall from above ; *miy-anteyi*, to come towards, come from there ; T. *añi*.

An, make ; V. *en* ; L.-M. *kil-Anaiyi*.

An-at, earth ; V. *hon-nat* (A=O).

An, cry, call, shout ; V. *an* ; L.-M. *wun, wain* (cf. *taj-ni*, to howl).

An-thlöj, snake ; V. *am-flaj* (N=M).

Ap, apa, call, weep ; V. *ep* ; L.-M. *Pa-wa*. See *Kam-tini*, to talk ; V. *am* ; L.-M. *Păk-mit*. *Ap, am* the two great roots for voice, word, cry, sound, mouth, lips, etc. ; *apa-met*, call here (*met*, motion towards) ; cp. *apa*, father ; *ama*, mother.

As, os (*as, es, is, s*), plural, women, children.

At, fat ; *at-ăj*, pl. *at-is*, caus. *at-isa* (*aj, ah, a*, substantive termination

in Choroti, Vejoz and Suhin, corresponding to *ai* (fem.) and *aik* (masc.) in Toba, and *ai*, *ya*, *eya* in Lengua-Mascoy).

Ate, teat, allied to *et*, mother; *tepis*, suck, take breast, and *ot*, chest. In L.-M. *ni-me*, teat; *me-me*, *inkyin*, mother; *inkyin-yik*, chest (T=N).

At, pain; V. *ait-ăj*; T. *wit*; S. *aot-ăj*, *ut-ej*.

Ates, drink; V. *hates* (A=HA); cf. *ni-at*, water; L.-M. *ăn-min*, drink; *ying-min*, water.

A-thlu, light. See *thlo-ma*.

Awe, abdomen; *k-awăk*, a belt; *k-awăk eti*, to gird, bind; *kawehene*, to weave; *kawenhi*, to put on the warp. Q. *awa* (*ahua*), to weave, woven goods. L.-M. *ăp-awa*, a blanket; *wathwuk*, web of blanket, inside of vessel; *pikinkyi wathwuk*, to weave, i.e. to put in the inside or body; *wathwa*, vessel, palm of hand, hollow, stream, etc., etc.

A-wo, *i-wo*, maggot (*a* and *i* used as prefixes).

A-wo, fur. See *wole*.

Awusa, pig; V. *awu-tsăj* (S=TS).

A-yi-ne, man, father, male; cf. *a-hi-ne* (*yi* and *hi* marks of 1st and 3rd pers.).

Ayi-ta, fruit of mistol; *a-yi-tăk*, tree of mistol; V. *a-hai-yăj*, fruit; *a-hai-yuk*, tree; S. *a-hai-yuk* or *ha-kai-yuk*, tree; *a-hai-yij*, fruit; T. *naa-la*, fruit; *naa-laik*, tree. The tree is distinguished from the fruit by the addition of *yuk*, tree, or a contracted form, *uk*, *ik*, *ak*, e.g. *fuai*, fruit; *fuai-yuk*, tree of algarroba, cf. *la* or *thla*, fruit; *ok*, body, whole, big, etc.

VIII. ROOTS AND DERIVATIVES (E)

E, index of first and third person; *e-sho*, my hand; *ey-ole*, my hair; *e-kos-ki*, his knee.

E, *eh*, pronoun of second person singular (thou) in Suhin and Nocten.

E, prefix or article to nouns, *e-kisi*, the camp; *e-le*, a parrot.

E, *he*, negative prefix of second and third persons, *e-es* or *he-es*, not good.

Ee, *ehe*, yes: V. *he*, *hej*, *ehe*, *chej*; T. *hee*; L.-M. *chai*, *thle*; S. *thlech*. The *e* with the reflexive *h*, *j*, or *th*, seems general in the Chaco group for assent, whether to positive or negative question.

E-ka, *e-ka-thla*, to shut door; *te-ka-thla-pe*, door closes itself. Many words, both nouns and verbs, are formed with the *ka* prefix (see under *ka*), frequently causative as here, *ka*, cause; *thla*, to go; *pe*, back; *te*, itself; *e*, it.

Ej, reflexive of *e*; *ej-ne*, let down. All the vowels are roots for verbs of movement.

E, *e-ki*. *E* is in general use as index to the demonstrative pronouns and the adverbs which they frequently represent, *e-ki-si*, the camp, outside, the one there; V. *eth*, that, he; *e-käpha*, above; T. *e-da*, *e-na*, that, this; L.-M. *e-kyi*, *e-kyaa*, he, this, that; M. *e-ma*, *e-su*, him, her. *Ki* or *kyi* is a strengthened form of *i*.

E-la, *la*, *le*, *li*, person, animal.

E-li, *e-li-tsi*, bag; V. *he-lu*; S. *li-sa*.

E-mi, *e-min*, love, like; V. *hu-min*; Q. *mu-na*; M. *mu-na*; L.-M. *mi-ñe*.

Ep, full. This very important root spreads through the Chaco group, CH. *epis*, full stomach; *tepis*, take breast; *penik*, cook food; *tipohi*, full, etc. V. *tip*, take breast; *yipis*, full stomach, etc. S. *pe*, full stomach; *ip-kyun*, hungry; *poo*, fill; *ti-fesh*, take breast, etc. L.-M. *epsasa*, full; *yäpkänäkme*, full stomach; *yäpkaneschi*, cause to be pregnant, etc. T. *elyip*, take breast; *eleprän*, one giving suck, and many others, but they require careful tracing from step to step, as e.g. L.-M. *yiphe*, a boil, from *yipheyi*, to swell, be full, bulge, etc.

Es, *esh*, good; V. *is*; S. *is*; L.-M. *ta-si*, passing to *täk-mil-a*. The change from *k* to *s*, or vice versa, is frequent in L.-M. Choroti makes its plural in *s*, but L.-M. in *k*. *S* and *k* roots should be compared, e.g. *esi* and *iki*, to cut.

Esi, *eshi*, cut, scratch, pinch, comb; V. *yisit*, cut; *sit*, comb; *chasmäj*, scratch; *ya-häs*, scrape; Q. *ki-su*, scrape; *has-pi*, scratch; *i-ki*, cut (cf. CH. *iki*, to cut, shave, scrape off). Q. *si-si*, to scarify; an ant, hence a great many derivatives, e.g. Ch. *to-kis*, ant; T. *kai-gi-säk*, ant; *ki-säk*, to scratch self, itch; L.-M. *osik-aiyi*, to itch; V. *ches-ai*, itchy, scabby; in L.-M. both *yeseschi*, to shear; and *pith-yik-aiyi*, to cut the flesh, are also connected, and many others such as L.-M. *yim-yikh-ai-yi*, to cut into strips, slice; *nip-kyesik*, sheep, etc.

Et, mother; T. *tee*.

Et, put. See *ait*.

E-tik, head; V. *thl-etik*; S. *sha-tich*; L.-M. *ka-tik* and *pa-tik*; T. *kaik*.

Eti, firm.

Eti, tell, count, touch.

E-wa, *e-fua*, cut, file, divide.

E-wo, tired, breathless; causative, *tsi*, *evo-tsi-ho*, to tire.

E-yäk-te, flame; V. *fuak*.

E-ye-wu, doctor; V. *ya-wu*; L.-M. *yi-hoth-ma*.

E-yi, mosquito; S. *i-ya*; L.-M. *pai-ya*; (*ya-pa* house-fly); V. *ya-pi-na*.

IX. ROOTS AND DERIVATIVES (I)

- I*, prefix or article to nouns, *i-na*, copse.
I, prefix to nouns in first and third person, *i-ni-we*, my or his back.
I, prefix to verbs in third person, *i-li'*, to clean, wash.
I, *ih*, he, she, it.
Ij, reflexive form of *i* as prefixes of first and third persons.
Ij-na-ki, hole, well ; cf. *e-ya-ki* (IJ=E and N=Y).
Ij-ñat, swamp ; cf. *i-ñat*, water.
Isa, *isha*, break, tear, snap, burst (see *esi*) ; V. *chisaj*, *kueschi* ; S. *kasche*, *kasúch-hi* ; cf. CH. *i-tsasa*, to open out as flower, gape.
I-sai, broad, spreading ; V. *saj-che*, *saj-ho*. See above *isa* and *esi* and cf. V. *saj-hi*, to plough, ear-mark ; *thlain-chesaj*, to yawn, gape.
Is-kyu-ni, walk, stroll ; V. *si-kai*.
Is, *its*, prefix of first person to nouns, *its-usia*, my friend.

X. ROOTS AND DERIVATIVES (O, U)

- O*, the body and its parts.
O, prefix or article to nouns, e.g. *o-sine* ; V. *ij-chin* ; S. *sin-haiyi* ; L.-M. *sing-heyi*, pumpkin.
O, interchangeable with *ai*, e.g. *thl-ai-yi*, *thl-o-yi*, companion.
O, as root letter used in first person, *o-ma*, I push.
O, move, go.
Oj, reflexive form of *o*, *ose*, run ; *ojse*, be quick.
Ok, causative prefix ; *ose*, run, quickness of movement ; *ok-ose*, cause to run, chase, drive, etc. ; V. *yokos-chi*.
O-ka-we, put under, move under.
Oki, bite ; *oki-e*, bite an object ; S. *iku* ; V. *Y-okuaj* ; T. *N-aigi* ; L.-M. *T-aith*, *tákthleyi* ; Q. *ka-Ni* ; M. *Ni-ko*. The Choroti and Vejoz use the *y* as index to this word ; Toba and Mojo the *n* ; the Lengua-Mascoy the *t* ; the Quechua the *n* prefixed with the *ka* particle.
Ok, food and drink ; the cognate verbs are distinguished by *t* (eat) and *y* (drink).
O-loj-wo, too many ; *o* either as prefix or suffix gives the idea of intensity, here by reduplication "many many" the adverb "too" is expressed.
Oma, push ; T. *sa-mäk*, I push.

Oma, efface, blot out ; V. *fuome* ; S. *a-wom-ha-chi* ; L.-M. *măs-che-yi*, to die, cease ; CH. *ome*, extinct ; V. *yom* ; S. *yimăk* ; T. *om*.

Opale, hiccough ; V. *yople* ; L.-M. *yabeschi*.

Opihi, crouch ; V. *y-upen-cha* ; CH. *opi-thle*, dismount ; V. *y-upăt*, rest.

Ose, run, quickness of movement ; *ya-kai-tsi-hi*, make haste ; *o-kă-se*, chase ; *otse* ; V. *stun*, be startled.

Ose, *otse*, dress, get into clothes.

Ot, chest ; *ota-le*, heart.

Ot, put. See *ait*.

Ote, set fire to ; *yate*, to burn ; *fuat*, fire ; *i-yata*, lamp ; L.-M. *mit*, burn ; *wit*, (*watneyi*) set fire to ; V. *wun*. The two great roots for "fire" are *na* and *ta* (Q. *ni-na* ; G. *ta-ta*) and give the index to the verbs connected with fire. For light and fuel, see *le* (*thlet*).

O-te-he, small-pox (*o* prefix, *te*, hole, pitted ; *he*, reflexive) ; V. *toi-thle* (L.-M. *nel-yiphe*, i.e. our pimples).

Ote-wita, wrap up ; (*ote*, put ; *wita*, together).

O-wi-te, red paint made from seeds of anotta (*Bixa orellana*) ; G. *urucú* ; Q. *achiote* ; V. *wai-tăj* ; S. *woi-taj* ; L.-M. *yate-me* ; T. (?) *mapole*.

O-wu-se, hawk ; V. *hu-tsăj* ; S. *shu-tsaj*.

U

U, used as prefix to nouns in the third person, *u-we*, ant-hill, and before verbs with initial letter *w*.

U, all important roots of *u* are preceded by a consonant, see *yu*, *wu*, *tu*, *nu*, etc.

XI. THE CONSONANTS H, J

H-e, the consonant *h* is to the vowel *e*, what to a great extent the *y* is to the vowel *i* ; and just as *i* (pref. 1st and 3rd pers.) may become *e*, e.g. *i-ka* and *e-ka*, his, hers, so the *y* and *h* change about in a similar manner, e.g. *ahi-tek* or *ayi-tek*, head ; *a-hame* or *a-yame*, reach ; *hi-ne* or *yi-ne*, father, man ; *ho-met* or *yo-met*, come ; *i-ha-piya* or *i-ya-piya*, to raise up.

H, the *h* is used with all the particles of the singular both with nouns and verbs, e.g. *hi-tipot*, his handkerchief ; *he-waha*, he cuts, divides. In Choroti as with Vejoz the aspirate is much softer than in Suhin or Lengua-Mascoy, especially the initial *h*. In Vejoz the medial *h* is nasal ; in Choroti it is pronounced with a jerk and

break in the voice, sometimes developing into a guttural. The final *h* or *j* in Vejoz and Suhin is defined and clear, in Choroti it occasionally tapers off into a vowel, *Taj*, *Ta*. The *hiu* or *hyu* sound is alike strongly aspirated in Choroti and Suhin. See Chap. XVIII.

H-j, the *h* or *j* is often reflexive : *ma*, to sleep ; *ha-ma-ha*, to rest oneself.

H, j=th, compare, e.g. Ch. *i-waj-la* ; V. *weth-laj* ; S. *hiumpu-wath-la*, the puma.

H-j, feminine infix : *kimpe-na*, orphan ; *kimpej-na*, orphan girl.

Ha, a, negative of 1st p. sing., *Ha-tses*, *A-tses*, I am not good.

He, e, negative of 2nd and 3rd pers. : *He-tope*, not far, near ; *e-es*, not good.

He, not, without ; *He-piye*, not sensible, without a shadow or soul.

Ha=ya, to go : *Ha-me* ; *Ya-me*, to go to, reach.

Ha=ya, to know : *Ha-ne* ; Q. *Ya-cha* ; T. *Ya-ten* ; L.-M. *Ya-sing-ko* ; V. *Ha-nej*.

He, hea, negative prefix to form verbs from adjectives : *wu*, big ; *heawu-tse-he*, to make small.

He, place of ; *He-nes-na*, place of arriving, camp.

He-tō, I kill myself (*he*, reflexive ; *lō*, *lō-na*, *thlō*, kill).

He-to-pe, not far, near (cf. *to-pe*, *toj-we* ; V. *toj-we* ; L.-M. *tiye-pe*, far).

He-wa, no not ; the complete word from which the *he* prefix is derived ; L.-M. *ik-ha-we*, contracted form *ha*.

Hi=yi, alternate forms, prefix to verbs in 3rd pers.

Hiu, a sound confusable with *yu*, *fju*, *shu*, *ku*.

Hiwit-hiwit-oj, to be like, equal ; a good example of reduplication.

Homet, come ; *Hone*, bring ; *h*, reflexive and imperative ; *o*, to move ; *met*, motion towards, here ; *ne*, motion towards ; *Hone* makes the indicative with *t*, *at-o*, I bring.

Hop, hup, grass, maize ; V. *ij-pat*, maize ; L.-M. *paat*, grass ; also the alternative forms, *wo*, *wu*, *wup*, grass, weeds, maize ; Ch. *wo-hu*, tobacco ; T. *wu-wi*, weeds ; hence *wu*, a covering, blanket ; *wuk*, house ; *thlop* or *thlo-wup*, nest, etc.

Hot-piye, to prop up, from *ot*, to put.

Ho-wat, alternate form of *ho-wet*, a bed ; *ho*, reflexive ; *wet*, house, place ; *at et*, (*wat*, *wet* ; V. *wet*, *wit* ; T. *sat* ; S. *tsat* ; L.-M. *thla*) are important particles denoting place, seat, position, grove, house, country of, home, hole, dwelling, nest, etc.

Ho, hu, move, go. See *yo*, *yu*.

XII. SUFFIXES AND PARTICLES (H-J)

H-n, the letters *h* and *n* are antithetical, yet in combination form completeness. Thus *ha* as root "to know" is completed with *ne* (*ha-ne*) ; *na* as root "to go," is completed with *ha* (*na-ha*, we go, we will, we are, we act, etc.). These two letters *h-n* are ubiquitous as particles with a variety of meanings of which *hāna* (āna, ine, etc.) is common to the Chaco languages and defies definition, the central idea perhaps is the simple verb "to be," existence, present, continuous, and future action, e.g. :

mes, two ; *kas-mes-hāna*, we two only.

wata, shake ; *ti-wata-hāne*, rock to sleep ; the boleadoras.

kawe, weave ; *kawe-hene*, weaving.

lemi, white ; *lemi-hine*, white of egg.

maha, yellow ; *maha-hine*, yolk of egg.

yohi, to seek, hunt ; *yohine*, to track ; *yojnaheyi*, to ride.

yam nehe, I am, I also ; *am neha*, thou art, thou also ; *naha*, we are, we will, we also, we will go, let us go, be, do, etc.

Ha (*he*, *hi*, etc.), plural suffix to verbs ; *kima*, pl. *kima-ha*, to hold.

Ha (*he*, etc.). (1) Simple verbal suffix : *fua-ha*, *fue-he*, *fue-hi*, to chop.

(2) Differentiating the meaning : *yen*, look ; *yen-ihī*, to spy ; *lisāna*, make ; *lisāna-ha*, to repair ; *lisāna-he*, card wool ; *maiyi*, take, bring ; *maiyi-he*, to take a letter, message. (3) Forming verbs from nouns : *fuat*, fire ; *fuat-ihō*, burnt ; *kieme*, sugar-cane ; *kemi-hi*, to be sweet ; *wu*, *yu*, dress ; *wu-hi*, to put on cloak ; *yo-hina*, to clothe. (4) Causative : *wosa*, flat ; *wosa-ha*, flatten. (5) Nouns from verbs : *yen*, look ; *ti-yen-aha*, mirror.

Hi, box, case, etc. : *fuat-ihī*, tinder-box.

Hi-yi, person : *Ki-hi*, adult ; *a-yi-ne*, man.

Hi-yi, plural particle : *anewo-yi*, ye are tired ; *kas-lemi-tsi-hi*, we are white ; or with unaspirated vowel : *tepis-e*, many suck.

Ho, very, intensive particle : *wuk*, house ; *wuk-oho*, inside the house.

Huk, fuel, firebrand : *fuat-ehuk*, firewood.

H, j. As an infix it makes nouns feminine : *iseni*, nephew ; *isejni*, niece ; and changes the meanings of verbs : *kime*, hold, handle ; *kijme*, work. In the following sentence it gives the idea of reflexive : *Sekii ah-alenta*, there are horses themselves there.

Ha, negative suffix : *thla yaka-wonta ha*, I am hatless. The *ha* belongs to *thla* as in *thla-he-pa*, none, there is or are none.

H-w. In some few words as in *toj-he* or *toj-we*, far ; *noj-he* or *noj-we*, all, exhausted ; the *h* and *w* are interchangeable.

XIII. THE CONSONANT Y

Y-i. The letter *y* is the consonant connected with and the equivalent of *i*. It most generally precedes a vowel as index of the first or third person instead of *i*, e.g. *y-ape* or *i-ape*, he returns. It frequently follows *k* as a compound sound; *ky-u* or *ki-u*, horn. In some few words the *i* following *k* is accented as: *ki-ene*, not *kyé-ne*, wild pig. Some writers prefer the *y* for the final *i*, as in *Pa-y* or *Pa-i*, my father; *Kil-ai-y* or *Kil-ai-i*, stranger, foreigner. In any case it should be pronounced with a certain strength or abruptness as in the English word "rain-y." See I, Chap. IX.

Y-h. The letters *y* and *h* in Choroti itself are frequently used as alternate forms as *ahi-ne* and *ayine*, man. See H, Chaps. XI, XII. The vowels *i* and *e* are likewise, either as alternate forms or equivalents, in constant interchange, not only in Choroti itself but throughout the Chaco group of languages, and the principle is of the utmost importance in a comparative study. It must, however, be carefully noted that *i* and *e* are not necessarily equations, some nice distinctions are often made with these letters by the Indians, who are rarely guilty of dropping or adding an aspirate.

Y-w. The letter *y* is generally singular and active, characteristic of the man; the letter *w* is plural and passive, characteristic of the woman, consequently a number of words are in contrast: *yen*, to look; *wen*, to see; *yohi*, to go for; *woyi*, to fetch. As the *w* is excluded from the first person singular, the *y* taking its place with certain nouns, derivatives proceed from both the *y* and the *w*:

<i>i-yu</i> , my blanket	<i>a-yohina</i> , I dress (active)
<i>a-wu</i> , thy blanket	<i>a-wuhi</i> , I dress or wrap myself up

As the ideas of many in number, much in quantity, big in size, etc. is one expression, so lightness and heaviness; thinness and bulk; are likewise contrasted with *y* and *w*.

<i>Yuk</i> , a tree	<i>wuk</i> , a house	<i>wutik</i> , a mountain
<i>i-Yenthle</i> , one	<i>wuj</i> , much, many	

Y-s. The letters *y* and *s* are contrasted very markedly in Choroti, the *y* denoting the man, male, and father; the *s* indicating the woman, female, mother, and child.

Y, prefix, first person singular of nouns; third person singular and plural of verbs.

Ya, pronoun, I, my.

Ya, go, move.

Ya, drink ; the verbs to drink and eat are chiefly differentiated by the prefix letters *y* and *t*, *ya*, *yäk*, drink ; *to*, *thläk*, food.

Ya-ka, my, my own, mine. As a prefix it is used with nouns and verbs apart from the usual mode of shewing personal relation : *ya-ka-le-na-thli*, jigger (my-of-dog-louse) ; *ya-kai-tsi-hi*, to make haste, from *otse*, to start, be frightened.

Ya-kaj-loj, sharp edge ; *kaj*, mouth ; *loj*, many, much ; i.e. much mouth, keen.

Ya-kat-nio-na, owner ; *ya-kat* (substantive formed from *ya-ka*) ; *nio-na* (one of ourselves) ; i.e. one of us who owns.

Yam, I ; first person of *am*, thou.

Yam, go, move, reach.

Yap. See *ap*.

Ya-pe, move back.

Ya-pe-wa-pa, to double up the arm ; an example of *y* the active motion, and *w* the passive, i.e. go back (forearm), be back (upper arm).

Yas-ine, adopt ; from *as*, son. See *h-n*, Chap. XII.

Yate, to burn ; *fu-AT*, fire ; *y-ATE*, burn ; *iy-ATA*, burner, lamp.

Ye, *yej*, breath ; *yej-le-hi*, to sigh ; *ti-ith-li-hi*, breathe (J=TH) ; V. *yith* ; T. *at* ; L.-M. *kyin-näma*, breath (T=N).

Ye-he, to ask, beg ; literally, to mouth it (*ahi*, mouth).

Yel täm, contracted form of *iyenthle täm*, one being. The change from *l* to *n*, or of eliding the *l* before *n*, is very frequent in the Chaco dialects, e.g. V. *yil*, pl. *yil-nen* or *yi-nen*, dead, tired. *Täm* is the L.-M. *ta-ha* or *tämhaiyi*, to be, do, say, act ; V. *tahi* ; cf. Q. *nyi*, say.

Yen, to look ; *wen*, to see.

Yi, *yim*, to drain, i.e. to be dry ; L.-M. and others, *yim*, dry.

Yia, infix *i* to *ya* in first and third persons, *y-i-ape*, he is on horseback.

i-Yihane, alternate form of *ha-ne*, to know.

Yihene, shew ; causative of *yen*, to look.

Yihi, to sit, abide, live at ; *yihape*, to rest ; L.-M. *Heyi*, imp. *i-thla*.

Yi, *yik*, to go.

Yit, to stab (cf. *aiyitäh*, *taitaha*, *taiyo*) ; *yit-ki*, to tattoo.

Yo, move, go (generally with set purpose) ; L.-M. *yo-okme*, to go for.

Yófuaha, the Chorotis, probably " Of the Dove " (*ofuo=dove*).

Yoj, fisherman, i.e. he who goes with purpose (to hunt, fish, etc.).

Yojwe, cooked (cf. *yiowe*, ripe) ; V. *yö*.

Yo, used as particle of verb " to be " ; *yo-thloki-ha*, to flower ; *yo-wanthalé si-tu'*, to be alive (*yo*, am ; *wanthalé*, stage, condition, amount ; *si-tu'*, I strong, hard).

Yu, similar to *yo*, go, move.

Yupalek, shed, shade. See *hup*, grass.

Yus, hius, old, root peculiar to Choroti, cf. *Mojo, echasi*, old person or thing.

Yut, weave, net, knit ; L.-M. *kyot* (cf. Chor. *ki-te* ; L.-M. *kyitama*. needle, especially the large needle of hard wood used in weaving). This verb is the active or instrumental part of weaving (see *awe*) ; T. *kai-yădawagi*, inserting the yarn ; *no-wo-nik*, to weave, speaking of the object woven, hence the two roots for weave, V. *te* ; *u-yitche* ; Q. *awa* (weave) ; Q. *awa-ranku* ; T. *no-wo-ränäkte* ; T. *ka-no* ; V. *ka-na* (needle). *Kana* is probably a contraction of *kawana* (*kawa*, to weave, and *na*, thing for).

XIV. SUFFIXES AND PARTICLES (Y)

Y-h. For similar uses of the *y* and *h* particles see Chap. XII.

Yi, yik, suffix to nouns, person, animal, object, e.g. *ai-yi*, companion ; *ahai-yi*, bat ; *ahai-yik*, fish ; *niete-yik*, mucus. As person compare also *kia-yo*, this one ; *kia-yoj-ne*, she.

Yi, verbal termination : *kim-ki-yi*, catch ; *mai-yi*, take, bring ; *oho-yi*, reside.

Yi-we, active and passive terminations : *nu'we*, to fall, be born ; *nu'yi*, to cause to fall, give birth. Compare also the two words for "sit down" : *yi-hi*, pl. *yi-ki-hi*, and *we-he*, pl. *wai-yi-tse-he*. Note the two contrasted plural letters, *ki* and *tse*.

Yi, place of ; *lo-yi*, place of fighting ; *la, lō, lō-na*, fight.

Yi, negative suffix : *He-pi-ye*, soulless, stupid ; *las-pole-yi*, cloudless ; *thla-kyo-yi*, handless ; *ne tām po woho ya*, to be short of tobacco.

Yi, plural suffix to verbs : *fwu-ki*, pl. *fwu-ki-yi*, to paint.

Ya, the verb "go" is attached to nouns to form verbs : *A-fui-iya*, fly, flee. Nouns are formed from the same verb by prefixes : *Kaj-iya*, track, footprint ; *Naiyi*, road ; *i-neaiyi*, canal, entrance to nest.

Y-i. The vowel *i* often stands by itself with the same meanings as *yi* (see above), as e.g. with nouns *Kil-ai-i*, stranger ; with verbs, *Mai-i*, take.

XV. THE CONSONANT S

S. The prominent ideas connected with this letter are : Index of the plural, women, children, flesh, substance of vegetables, fluids, the adjective good, dampness, the verb to cut or lay open, another.

S, plur. pref. to nouns and pronouns in 1st pers. plur. : *s-am*, we ; *s-et*, our mother.

S, pref. to some nouns in 1st pers. sing. : *s-yo*, my hand.

S, pref. to adjectives and some verbs in 1st pers. sing. : *s-a*, I am dead, faint ; *s-ae*, I strike.

S, pref. to verbs in 1st sing. to denote the passive, reflexive, or objective "me" : *A-we*, I see ; *Si-we*, I am seen, I see myself, as in a glass ; he sees me.

S, pref. to some verbs in 3rd pers. : *is-ima*, he holds.

S, plur. suff. to nouns : *sona*, pl. *sona-s*, deer, brocket.

S, ts, sh, heart, core, pith, substance, flesh, froth, pip, kernel, centre, juice, gum, honey, veins.

S, ts, female, egg, female genital, embryo, pregnant, belly, children, suck, giving suck, satiate.

Sa-hak, turkey buzzard ; V. *sahak* ; G. *chaja* ; S. *Tua* ; T. *takak* ; L.-M. *Timpila*.

Sa-he, him ; *se-kii*, he, there ; *suniasa*, she ; *shuki*, he ; idea of person or thing away from speaker.

Sa (*se, sia*), plural idea, muchness, increase, augment, quantity, especially used of water, flood, rising water, etc.

Sak, wall, bank ; V. *la-hak*.

Sa, we, us, our.

Sa, child ; *os*, son ; *ose*, daughter ; *les*, children ; *samlia*, child ; V. *saa*, *chem-saj* ; L.-M. *säk-kyaa*, child ; Q. *ususi*, daughter.

Sati ; Q. *usuta* ; V. *ni-saj*, sandals ; V. *satte*, stirrup ; Ch. *siet*, foot.

Sai (*shai*), empty out, drain, spill, sprinkle (primarily of water).

Seelate, point (a pencil) ; V. *silak*.

Seene, woman ; V. *tsinna* ; M. *e-seno* ; Q. *china*.

Semihlak, beer bottle tree ; Q. *yuchan* ; V. *semihlák* ; S. *yuk-tsa-uk* (y=s). *Yu* is "plant" in Quechua (*yura, yuyu*) ; *yuk* is "tree" in Vejoz, Suhin, and Choroti, and the termination *uk*, *ak*, *ik* is general in the Chaco to indicate "tree," or to distinguish the tree from the fruit.

Siat, listen ; V. *chi-huyi*.

Siat, shiat, red ; V. *chat*.

Siliáka, tiger cat ; V. *silajhai* ; S. *shlokai* ; Q. *oskollo* ; L.-M. *kith-ka-thlik* (L.-M. *sikkaihän*, wild cat).

Sippup, dove ; V. *sippup* ; L.-M. *säppup* ; connected with the Mataco *pop* ; Ch. *ofwo* ; S. *ufo*, big pigeon.

Sius, fish ; S. *nu-sus* ; cf. L.-M. *kil-ásma*.

Siwalák, spider ; this word is very general for one or other of the spiders ; the spider is the great weaver or spinner, e.g. *Mojo, samatu*, spider ; *someco*, weave ; *someru*, fabric. *Walák* or *walok* is the Toba word for cotton. S. *wakäkli*, cotton ; *wakäkli-yuk*, cotton plant ; *su-wäklák*, spider ; *suwäklák-thleech*, thread ;

L.-M. *so-walāj*, tarantula ; *yo-waiki*, spider. Compare also Q. *awa* or *ahua*, weave ; *kusi-kusi*, spider ; *kusku*, arrange a pattern.¹ *Siyu*, to dawn ; L.-M. *kil-si-kaiyi* ; subs. *el-saiya*. *Ski*, to laugh ; a very important root. V. *sche* ; S. *ta-scha-aien* ; L.-M. *kyismeschi* ; *waswethcheyi*, smile ; *sisi*, to be amusing ; S. *hasina*, an amusing speaker ; Q. *asi*, laugh ; *ku-si*, joy ; L.-M. *kil-sowasowu*, to rejoice. *Sona*, deer ; V. *tsonna* ; S. *tashinsha*. *Soóle*, ant-bear ; V. *sulāj* ; S. *suklaj*. (N.B.—Suhin invariably prefixes *k* to the Vejoz *l*, e.g. V. *pe-lāj*, white ; S. *pe-klu* ; L.-M. *pe-lu* (proper name for the Matacos) ; Ch. *i-lemi*, white ; S. *klim*. *Sōpa*, wax ; V. *sopha* ; L.-M. *pa-pa* ; Q. *ma-pha* ; T. *la-pa*. *Suti*, wait, expect ; Q. *suya*.

XVI. CONSONANTS SH, TS, CH

Sh, the consonant *sh* is interchangeable with *s*, many words having both the *s* and *sh* forms, e.g. *siat*, *shiat*, red.

Shi, *shu*, an important demonstrative particle. *Su* in Mojo is feminine (she) ; *sa*, *so* in L.-M. denotes nearness to the speaker (this, these) ; *so* in Toba denotes movement (he, she moving) ; *si*, *su*, *shi*, *shu* in Choroti indicates distance from the speaker (he, she, that there, away).

TS

Ts, the consonant *ts* is a modification of *s* being used before certain words : *s-ae*, I strike ; *tsa-hane*, I know ; *isyo*, *isho*, my hand ; *its-cha*, my arrow. The same rule holds good in Suhin, *käs-fo*, our foot ; *käts-ot*, our chest. *S* and *ts* as initials to nouns are interchangeable in Vejoz : *Sonnat*, *TSonnat*, knife.

Tsat, wet ; causative *it*, *tsat-it*, make wet. *T* and *n* are both causative particles in Vejoz ; *pel-hät*, to make white ; *pum-yen*, to make wet ; *schi* in one form or another is the causative in Lengua-Mascoy, but to differentiate *t* is also used. Two words from the same root

¹ During the feast of the *Yanmana* (i.e. of a girl reaching puberty) a number of young lads with masked faces, holding in their hands filaments of twisted ostrich feathers, move about the booth of the girl, running round and round the women on guard with their canes, who chant vociferously on the approach of the lads who are called "Sowalāj" or spiders. Is it the idea of weaving a web round the girl (an emblematic fly)? The lads are continuously uttering a shrill cry as they run about in this serpentine manner. The cry is also called "sowalāj," and whenever they kill a spider they utter the cry, lest they lose their voice! (Lengua-Mascoy custom.)

will illustrate it : *Pōkthleyi*, to crack, burst ; caus. *Pathkātkyi*, to split ; *Pākthleyi*, to gather ; caus. *Pathchischi*, to gather that of another.

Tsu, suck, chew, kiss (important root), cf. Q. *su-ccu*, *chun-cca*.

CH

Ch. The consonant *ch* is a compound sometimes equal to *ty* (L.-M. *i-tyam* or *i-tcham*, to tread on) ; *ky* (V. *kyu*, *chu*, horn) ; *sh* (T. *shita*, *chita*, fat) ; *ts* (V. *tsu*, *chu*, suck). The *ch* is a rare sound in Choroti, but appears in the word for chief, which is noteworthy : Ch., *ne-chas* or *ne-chias* ; V., *ka-ñat*, *ka-niat*, *ka-niati* ; S., *kă-ni-cha*, *thkai-ne-che* ; T., *nă-ka-shi* ; T., *salya-gana* (chieftess), *salya-ganik* (chief) ; L.-M., *wi-schi* ; Moeovi, *na-schi* ; Enimaga, *thla-ka-se* ; Arawak, *wa-chi-na-chi* ; Mojo, *a-chicha-ko*. The *salya* of the Toba is equivalent to the L.-M. *kilyi*, as in *kilyi-nniat*, monkey ; *kilyi-khama*, spirit ; a prefix denoting tribal, racial, shewing some "totem" relation as in the word *kilin-yapa*, dove. The underlying idea of chief is a kind of father. The *ch* is used extensively in all the languages of the centre of the continent for family relationships, children and parents.

XVII. PARTICLES AND SUFFIXES (S, SH, TS)

S (*es*, *is*), plur. suff. to nouns.

Se, *she*, particle denoting "down" ; *ka nep ta-se*, moonset ; *toni-she*, to strain, filter, drop down.

S, liquids or soft parts of the body ; *katus*, milk ; *kasile*, tripe ; *woyis*, blood.

Sha, same as *she*, down ; *yami-sha*, to swallow ; *yami-she*, knock down. *Sha*, *sa*, an instrument ; *tehe-isha*, digger ; *taha-isa*, adze.

Sii (*kisihi*, *kishii*), away from, outside, distance : *kisihi*, camp ; *nui-kishi*, scatter ; *nuka-sii*, abandon ; *nuki-sha*, depart.

Si, causative or of another ; *lane-si na-wuyi*, to strip, make bare a person.

S, *ts*, hurry, haste ; *mishima*, hurry ; *yakai-tsihi*, hurry ; *ojse*, follow, be quick, rouse up ; *ose*, run ; *okäse*, chase.

Se, hair, down ; *po-se*, beard ; *tia-se*, eyelashes.

Tse (*tsi*, etc.). 1. Other, another ; *ke-tsi*, *ke-tse*, *ke-tsia*, other ; *its-*

usia, its-usha, my friend, *alter ego*. 2. Distance, away from, other side, etc. ; *awetsehe*, other side ; *yó-tsahe-i*, reach other side.

Tse, tsi, plural to verbs and adjectives : *wehe*, pl. *waiyi-tsehe*, sit down ; *lemi*, pl. *lemi-tsi*, white ; with adjectives it gives a degree of comparison ; *maha*, yellow ; *maha-tse*, yellowish, very yellow. *Che* is superlative in Mojo, comparative in Vejoz. *Tse, che, she* are all used in Choroti and Suhin. As a plural it is used with some nouns, and sometimes with the verbal idea underlying it : *Soma Yofuaha itse*, we are Chorotis.

It is also used as causative ; *sewo*, tired ; *sewo-tsiho*, to tire ; *he-wu*, not big, small ; *hea-wu-tsehe*, to make small.

It has a similar but somewhat redundant use in the phrase : *taha-ts-anat-e*, to be on foot (*taha*, to be ; *anat*, earth ; *ts-e*, is). *Che* is causative, comparative, plural (and *chi* interrogative) in Vejoz. The softer *sh* has the same uses in Suhin ; *an-shane*, put down, below, under ; *yuk-shi*, reddish ; *akloj wef shine*, many are dead ; *shi naitich ?* what art thou doing ?

XVIII. THE CONSONANT W OR F

W-u. The consonants *w* and *f* belong to the vowel *u*. In Choroti the *f* is usually connected with the vowel and forms the compound *fu* or *fw*, but frequently the aspirated *f* is absent or at any rate interchangeable with the simple *u* or *w*, e.g. *fuopo*, *fwopo*, *uopo*, or *wopo*, upper arm. In Vejoz the *f* is likewise combined with *w*, *fwuj*, finger ; *fuen*, splinter. In Suhin the *f* often stands by itself as in *fo*, foot ; *wef*, dead ; and is frequently found in conjunction with *y*, e.g. *fyuj*, finger ; *chäkfju*, a hole. It is also interchangeable with the aspirated *hy vel sh*, e.g. *fyu-wekla* ; *hyu-wekla* ; *shu-wekla*, the moon. In Toba and Lengua-Mascoy the *f* is not used, but as in many tribes the *p* or *ph* takes its place. The *ph* is, of course, separate sounds as in L.-M. *Ep-he-hik*, finger ; not the *f* sound we give to the English word "physic." The above word is the tribal equivalent of *fwuj* (Vejoz) ; *fyuj* (Suhin) ; *hyuki* (Choroti). The Toba uses *pia* (foot) for the Suhin *fo* ; Vejoz *pa-cho* (sole of foot). Another form the *f* takes is the *w*, e.g. Ch. *a-fui-ya*, to fly ; V. *fui-ya* ; T. *wai-ya* ; S. *fai-ya* ; L.-M. *kyim-pai-ya* ; Q. *pa-wa* (*pahua*) from feather or wing : root=*f*, *p*, *w* ; Q. *putpa*, *puhura*, *patpa* ; Aymara, *puyu* ; M. *po-wo* (*pobo*) ; Ch. *fues*, *wole* ; V. *thle-f* ; S. *thle-f* ; T. *la-wa* ; L.-M. *thlim-pin* (or *thlim-pinik*, pl. *thläm-pänkuk*, the particle

ănkuk is reflexive), wing ; L.-M. *wa* ; T. *we* (feather).¹ Among the Chorotis the *f*, *p* and *w* are interchangeable, i.e. used of the same action by the same person at the same time : *waso*, *paso* *fuaso* (to crawl) ; *wate*, *pate*, *fuate* (to shake).

W-y. See *y-w* for the contrast of these letters as initials. The *i* or *y* denotes the man and activity ; the *u* or *w* represents the woman (particularly the wife or married woman) and receptivity ; hence the idea of union and completeness as of man and wife. Compare the exclusive pronoun "we only" (*noca-ycu*) in Quechua, i.e. *y-k-u* (the *k* linking up the *y* and *u*).

W. As a particle it is used in the plural with nouns, *kiwet*, pl. *kiwet-iwa*, mouth. The *w* is excluded from the first person singular with certain nouns, *i-yu*, my blanket ; *a-wu*, thy blanket ; but *wo-po*, general word for blanket.

Fua, algarroba fruit ; V. *fuai* ; S. *fuai* ; T. *map* ; L.-M. *to-wis* ; M. *mee*. *Fua*, hole, that which holds or contains.

Fua, chop, split ; V. *fuaj*.

Fuat, fire ; L.-M. *wit*, *wat-neyi*, to light fire ; *mit-kyi*, to burn.

Fua-tso, green, fresh ; V. *wa-tsan* ; Q. *wai-lla* (*huaylla*).

Fua-tsi-thle, spit, spittle ; V. *fuats-huncha*, spit ; *thla-tsith*, spittle ; L.-M. *kil-pă-tse-yi*, spit ; S. *thla-tchik*, spittle.

Fues, wing, fin ; cf. *a-fui-iya*, fly, flee ; *pea*, swim ; S. *nōkape*, swim ; Q. *wai-ta* (*huayta*), swim ; *pawa* (*pahua*), fly ; L.-M. *empa*, fly, flee, imp.

Fue-si, bad, neg. of *es* ; V. *fui-tsaj* ; S. *sas* ; *hăf-săj*, savage ; Ch. *ne-wes-ine*, blame.

Fuo, *wo*, around, encircle, embrace, protect ; hence *a-wo* ; V. *fuo*, fur of cactus fruit ; CH. *wo-le*, hair ; *fuohi-napa*, nurse ; *fuo-po*, arm ; *wo*, neck ; *wōna*, wasp making paper ball like nest ; *wo-nis*, mane ; *wo-nata*, hat ; *wu*, covering, blanket ; *wopo*, blanket ; *wuk*, house ; *ka-wo*, protector, guardian, attendant, servant, as *sontas-wo*, shepherd ; *po*, to cover ; *pole*, clouds, and many others with equivalents in the various dialects. Cf. roots *ma* and *mu* in Quechua, e.g. *maki*, arm ; *makalla*, embrace ; *muyu*, encircle, etc.

Wa, part, piece, side ; Toba and other dialects *yi* ; V. *thl-ip*.

Wam, *wan*, *wen* with termination *thla* or *thle*. The root idea of *wam* is size, quantity, number ; with *thla* it gives the meaning of state or abstract condition, e.g. L.-M. *sig-wam* ? how many ? *wan-thle*,

¹ Between the eastern and western Yaghans (Tierra del Fuego) Mr. W. B. Grubb informs me that the reverse was the case in regard to the *F* and *P*. The easterners could never say *P*, but always used *F* ("fig" for "pig") ; the western Yaghans could use both *P* and *F*. Among the Chaco Indians we find some using both *P* and *F* but some unable (or avoiding) to sound the *F*.

there is what there is : Ch. *wen-thle*, one ; *wanthla-wita*, the body, whole : S. *we-thla*, one : V. *waye-hathla*, one ; *fuantis-ihī*, five, number, size : Ch. *wanthla thlöe*, young, i.e. state or condition reached, only, no more than, being but, really young.

Choroti adopts *wa* as a plural suffix : *kyuti-wa*, pipes ; it also appears in a number of derivatives ; *tempa nowa?* how many ? *wom-ine*, to add ; *pom-na*, to make big.

Wan-thla, ostrich ; V. *wan-thläj* ; S. *wana-thlöj* ; T. *man-ik* ; Ch. (2) *am-la* (the initial *w* being dropped) ; L.-M. *thla-bin*, not *bin-thla*. (The L.-M. always prefixes nouns of this kind, where Choroti, Vejoz, Suhin, and generally Toba use suffixes, e.g. the augmentative *taj* suffix = *yat* prefix, e.g. V. *yel-la*, tapir ; *la-taj* or *yel-la-taj*, horse ; Ch. *alen-na*, tapir ; *alenna-taj* or *alenta*, horse ; L.-M. *napothling*, tapir ; *yat-napothling* or *yat-nathling*, horse).

Wa, important root to move ; *wa-sa*, shake, flutter, be alive ; *wa-so*, crawl ; *wa-tsi-lat*, turn over ; *wa-te*, shake, jerk, turn handle ; V. *wahate*, shake ; *wa-chu* ; Ch. *pa-so*, myrapod. See also *Pa-te*, etc.

Wats-ithkät, rainbow ; S. *Fas-chäklich* ; V. *la-woth* ; T. *kämäga-nalo* (or *nelo*) ; L.-M. *Pim-hit* ; Enim. *esai-yi*. (The underlying idea of this word is sacred object, animal, totem, etc.)

Wat, handle ; V. *li-wut* ; S. *thla-hyut*.

We, sheath, or that which holds or contains (the primal meaning being mouth (*ki-wet*), then house (*wet*), to have (*we, wem*), etc. V. *la-hi* ; S. *le-shi* ; T. *la-yi* ; L.-M. *thla-nkuk*, sheath, fence, house, etc.), hence HOLE, etc.¹

We, have ; *we-he*, sit down ; V. *wen, i-hi*, have ; L.-M. *heyi*, imp. *thla* ; also *neyi, yit-neyi*, have, be, rest, abide, sit down. In the widest sense this verb expresses existence, denoting rather position than possession. In L.-M. the verb agrees with the object, e.g. *ăp-tawa ing-häk*, his wife she is ; *i-tawa ăp-häk*, her husband he is, i.e. he or she is married, or there is (to him) a wife.

We, to see, find ; V. *wen* ; L.-M. *wit-aiyi* (n=t) ; S. *wen* or *wan* ; T. *wana* ; M. *ni-moo* ; comp. *yen* (to look) ; V. *yahin* ; L.-M. *kil-anowu* (w=y).

We, give ; V. *wennō* ; T. *mi* ; L.-M. *meschi* (caus. of *ma*, hold, take, cf. *ki-ma*) ; M. *ne-enico*.

Wee-la, moon ; V. *we-la* ; S. *hyu-we-kla* ; L.-M. *pil-tin* ; Enim. *hu-al* ; T. *käg-waik* or *käg-raik* ; Q. *ki-lla* ; M. *ko-he* ; Guar. *ya-si*. (The

¹ The mouth being the source of all speech it is but natural that many words should be suggested by it ; AP a closed mouth, KI an open mouth ; *pa-wa* (a socket, i.e. parted lips) ; *hua-ha* (to split, i.e. an open mouth) ; *hua* (a hole) ; *we* (a sheath) ; *wet* (a house) ; *wowi, pajwi* (to blow) ; *wo-fuo* (to bark) ; *wita* (joined).

moon is considered a "man" but not "husband" by the Chaco tribes.)

Wesi, cf. *thlōse*; V. *wes*; to change residence.

Wet, et, house, place, position of any person, animal, tree or thing; V. *wet*; S. *tsat*; T. *sat*; L.-M. *thla*; e.g. *fua*, fruit; *fuai-yuk*, tree; *fuak-et*, grove of algarroba.

Wethkatine, tickle; V. *fuilāj-thle*; S. *of-sij*; cf. CH. *ne-pat-ni*; V. *ij-fuilāj*; L.-M. *yim-pit-chi*; T. *no-wi-gik*, to scratch.

We-thli, to dream; V. *fui-thlan*; cp. L.-M. *wānmā-kyi*, to be silent; *wānmeschi*, to dream.

We-thlek, mill, mortar; V. *fue-thlek*. As in Vejoz and Quechua *k* added to the verb forms a substantive.

Wi-kit, pestle; *kit*, instrument.

Wikiu, village; V. *la-wukuo*; pl. of *wuk*, house.

Wo, verbal particle; *wo-thle-yi*, to name, from *thle*, a name.

Wo-wi, blow; CH. *wosok*; V. *fuoth*, whistle, flute.

Wo-yi, go for, fetch (cf. *mai-yi*); S. *wo-oi*, mee; V. *tuki*; L.-M. *waiyi*.

Wuk-ina, north; compare *ini-wuk* (south), position designated by reversion of syllables. Sex is sometimes indicated in the same way, e.g. L.-M. *kil-nawa*, male; *kil-wana*, female.

Wu, *wuk*, covering, house, weeds. Many derivatives are formed from these or with initials *m* and *p*.

Wita, verbal particle, together, with, joined; *yu-wita*, reside, live at or with; *yiki-wita*, join, put together; *yapo-wita*, to close itself as a flower.

Wuka, same as *wita*. Probably both these particles are modifications of *wet* and *wuk* (house, place); *tsea-wuka*, stuck together.

We, particle, hollow, belly, centre; *ka-tse-we*, the lap; *lojse-kyowe*, the centre of the bow; *teo-we*, inside, hole, socket, womb.

We, intensive particle; CH. *toj-we*; L.-M. *tiye-pe*, far; CH. *noj-we*, all, exhausted.

Wet: 1, a house; 2, a wound; cf. L.-M. *nating-ma*, house; *nating-wa*, wound.

NOTE.—The fact that the letters *p*, *m*, and *w* interdialectally are changed about and in some cases, as in Choroti (e.g. *waso*, *paso*, to crawl), are identical, does not alter another great principle running through the Chaco group, viz. that *w* and *m*, *w* and *p*, and *m* and *p*, are used to distinguish niceties of meanings or contrasted ideas. In Lengua-Mascoy *m* and *w* are generally speaking feminine, and *p* masculine; e.g. *Mok*, other woman; *kil-wana*, a woman, female; *Pok*, other man. The following example from the L.-M. will illustrate the different shades of meanings by the use of initial letters:

Imperative	Indicative	
<i>TA-ith</i>	<i>Tāk-thleyi</i>	to bite, nip, prick (action of teeth, thorn or finger)
<i>PA-ith</i>	<i>Pāk-thleyi</i>	to gather, pluck off fruit (one)
<i>NA-ith</i>	<i>Nāk-thleyi</i>	to gather, pluck off fruit (many)
	<i>Māk-thleyi</i>	to be serrated, notched, broken off
	<i>Wāk-thleyi</i>	to break out, be torn off, as eye of needle or piece of dress caught in a nail.

Pōk-thleyi, to crack, burst, break ; causative, *Path-kāt-kyi*, to split, cause to crack, break, burst ; the action of an instrument, viz. of *TA-wa*, axe, or *PO-te*, axe, i.e. the biter, breaker, cracker. Compare the Toba words *chipi*, to split, crack, burst ; *ka-chipe*, axe.

XIX. THE CONSONANT M

M. The letter *m* is not very general in Choroti. It is closely connected with *w* and *p* on the one hand, and with *n* on the other.

Ma, interrogative particle ; *ma akna?* are you going ? *maka ape?* are you returning ?

Ma, movement, motion.

Ma, sleep, dream.

Ma, light, day, dawn, East ; *thlo-ma*, day ; *i-mut*, at dawn ; *máanuk*, east ; *lemi*, white.

Ma, say, speak ; *kam-tini*, talk ; *ma-hi*, say.

Ma-ha, yellow, green.

Māk, meal ; V. *mok*, *muk* ; S. *mak* ; L.-M. *nik*.

Miyoki, eagle ; V. *miyo* ; T. *wiyik* ; L.-M. *mewá*.

Mosek, spirit ; V. *husek* (mind).

Met, particle denoting motion towards ; *homet*, come.

XX. THE CONSONANT P

P-k. The letters *p* and *k* whether as particles or initial letters primarily shew relation, and form many important contrasts throughout the group.

P, article. The most interesting use of *p* in Choroti is to link up words in sentences : *Maiyi p-ala*, bring the wood ; *Aliana pa kyuni*, I killed a tiger. In Suhin the use is identical : *Ta thle p-atsat?* what is the name of thy house ? In Lengua-Mascoy *k* is used, e.g. *Áptasi-k enthlit* (the man is good), where it is always attached

to the verb as a suffix ; the *p* is suffixed to words to indicate the masculine : *ithchi*, thou a woman ; *ithchi-p*, thou a man ; attached to the interrogative pronoun the *p* is seen as masculine and the *k* as feminine, e.g. *săp-taha* (masc.), *săk-taha* (fem.), what did you say ? *săp-mahak* (masc.), *săk-mahak* (fem.) where ? what direction ? Cf. Chor. *tem pa thle* ? what is the name of ? *tem pa ihi* ? where ? Vej. *chi wo thle* ? what is the name of ? *chi pi ihi* ? where ?

As a reflexive *p* is used thus : Chor. *P-a*, be seated ; *P-a*, strike thyself. Vej. *P-apha*, be seated ; *Hăp-am*, thou thyself. L.-M. *i-tikpăng-ap*, strike thyself (masc.) ; indicative, *tikpăng-akpo* ; *kă-tikpăng-ithchi*, strike thyself (fem.) ; indicative : *tikpăng-athko*.

As a genitive in Quechua the *p* may be compared to the Choroti use above, and the L.-M. affix *ap*, e.g. Q. *Hacha-p-runā*, monkey, i.e. wood its man ; L.-M. *enthlit āp-to*, man his food. *Ku* is reciprocal and *pu* is against one's wish, in Quechua, e.g. *muna-ku*, to love oneself ; *muna-pu*, to love against one's wish ; *k* is second person (*Kam*, thou) ; *p* is third person (*Pay*, he).

P and *pa* are alternate forms ; the Quechua genitive *pa* follows a consonant, *p* follows a vowel ; in Choroti *p* precedes a vowel (*p-iñat*, water), and *pa* precedes a consonant (*pa kyuni*, the tiger). This addition of the vowel is intended to give balance to the sentence, e.g. Toba, *Dapik a lapa*, the bee its wax ; L.-M. *Āptahak a siyanea*, he said to me, commanding.

P, position : (1) above, on, over, from above ; (2) again, against, back. *Nata-pe*, above, on, over ; *am-pehe*, put above, on ; *hinăpha*, press upon ; *opihi*, crouch ; *topisha*, stumble ; *ape*, return, go back ; *napini*, behind ; *yiha-pe*, rest ; *yape-wapa*, double up arm.

Paj-hi, bitter ; V. *pai* ; S. *tuphai*.

Palnat, tongue ; (? *pa*, mouth ; *linat*, instrument) ; V. *kaj-thlichu* (*kaj*, mouth) ; Q. *cca-llu* ; S. *chăk-lich* ; T. pl. *chăk-ate* ; sing., *chrăt* or *chăgăt* ; L.-M. *āth-kuk*. *Pa* and *ka* are both connected with the mouth and lips, and often merge one into the other ; compare, e.g. Q. *si-mi*, mouth ; M. *su-mu*, upper lip ; V. *kaj*, mouth ; T. *Ka*, chin ; *Ak*, lower lip ; *Ap*, mouth ; L.-M. *PA*, important root of voice, speak, etc. ; M. *ha-ka* and *pa-ho*, mouth ; V., S. and CH. *Pa-set*, lips ; *Pa-se*, beard ; *Kat*, *Huse*, *kaat-shi*, lower lip ; S. *ashi*, mouth.

Papa, father ; Q. *apu*, lord ; L.-M. *yabam*, *yabm*, *yap*, father ; T. *Pi*, grandfather ; G. *abi*, man ; *tuba*, father, and many others.

Pe, *pehe*, *pha*, particle ; up, upon, on, above, over, again, back, from above. See AM, AN.

Pe, pi, pu, shade, shadow, soul; T. *KI*; V. *pe-yäk*; S. *j-pik*; L.-M. *pi-schi-schi* (the personality, a reflexive idea—to tread on an Indian's shadow deliberately is the deepest insult).

Pe, oil; V. *pe*.

Pehomat. See *wowi*.

Pe, pi, a number of equations exist in Vejoz and Suhin and the other dialects, but the reflexive particles (prefix and suffix) of the different dialects must be taken into account, and the various words traced through many lines to be sure of the identity. It will be at once noticed that words in *p* (initial) are for the most part nouns, and the initial letter often shews tribal or other relation, differing with the various peoples, thus introducing a number of principles of balance and contrast beyond the scope of the present article.

Po, to possess (a verb); *ka*, a possession (substantive).

Po, full.

Po, many, big.

Po, to cover, block up, fill, shut, wrap, etc.

The root (or roots) *po* is very widespread and with numerous derivatives (see *wu*). *Po* is used as a [plural] particle to nouns, and sometimes with a verbal idea; *tiete-po*, eyes; *iwas-po*, to be full of maggots; *thlas-po*, possessing a child. The last example is the common use of the particle.

XXI. THE CONSONANT K

K. If frequency and ubiquity are tests of magnitude the letter *k* ranks first among the consonants. As prefix, infix, and suffix it has varied uses, frequently differing in meaning with the change of vowel preceding or following.

Ka. The *ka* prefix is used in a variety of ways:

- (1) With future form; *ka-ta* like the Toba *kä-me* or *ko-me* gives the idea of adverb of time, when, at, then, etc, e.g. *ka thloma ta*, to-morrow, i.e. to (be) day shall (be); *ka afuenta náp ta*, at cock crowing, i.e. to (be) cock crow shall (be); *ka ajna*, at night, or then being night. N.B.—*Ka* is the substantive verb in Quechua.
- (2) With nouns to differentiate, denote possession by, or indicate special use, e.g. *kiwet*, mouth; *ka-kiwet*, entrance to a cow-pen; *anat*, land, earth, ground; *ka-anat*, estate, land of, property owned; *tosine*, a shell; *ka-tosine*, a spoon. *Ka* is suffixed

to the personal pronouns to denote the possessive *ya-ka*, my, etc., and the simple fact remains that nouns of this description cannot be used without the possessive pronouns, or confusion would prevail.

- (3) As a prohibitive ; *Ka ak*, do not go.
- (4) To form new verbs as nouns are formed (in § 2) : *wen*, to see ; *ka-wena*, to gaze after.
- (5) *Ka* or *kai* forms a future negative of verbs ; *a-yape*, I return ; *a-kai-yape*, I am not returning or I will not return.
- (6) *K* or *ka* is used as initial to verbs as in *K-am-tine*, talk ; cf. Vejoz, *y-am-thle* ; and with nouns *K-ata-ki*, a fly ; V. *ataj*.

Ke. Nouns which make their second person with *a-ke* and third person with *i-ke* have a first personal form of *itse*, e.g. *its-emla*, my wife. Verbs of the same division places *itse* in the third person : *its-efuop*, he or she embraces ; *ak-efuop*, I embrace. The same principle applies to the *u*, e.g. *its-usha*, my friend ; *ak-usha*, thy friend. With the *ki* prefix *is* (not *its*) is used : *isimet*, my possession ; *isima*, he or she holds or possesses.

Ke, ki, ku, these prefixes are mostly possessive particles when applied to nouns, but with frequent use some have lost their specific pronominal use, e.g. the words *kiale* (boy) ; *kiale-ki* (girl) ; *kiales* (people) are obviously connected with *si-les* (our children), and in point of fact *siale* is used in the sense of "I am a child" ; but for the most part the pronominal idea has been lost in the wider and more general term, boy, girl, people. The same applies to animals and things, *ke-ela* (lizard) ; *kyu-ni* (tiger) ; *ki-te* (needle), someone's or something's *la, ni* and *te*.

A semi-civilized Indian frequently adopts a word and gives it a characteristic turn with his own prefix, like the Toba *Kăm* or *Kom*, *kăm-china* (a girl) ; *kăm-mama*, the mother ; *kom-misha*, the cat ; probably in this case derived from the pronoun *Komi* (we) ; and the prefix is used to give a proper rhythm to the Quechua words whose accents fall on the first syllable contrary to their own rule of accent on the final syllable.

In Choroti (2nd dialect) the word for "horn" is *u*, not *ki-u* ; and words like *ki-ili* (elder brother) and *ki-ini* (younger brother) are regularly declined with *itsi-ini* (my y. br.), etc., so it is evident that for derivative purposes all words with the *ki* prefix bear an obsolete or usable pronominal particle.

As these particles differ in the various dialects, some peoples emphasizing, say the *k*, another the *p*, it at once becomes apparent that the Choroti *KI-lai-i* (foreigner) and the Lengua-Mascoy

WU-lai-ya (foreigner) are the same word (compare Chap. XVI, sec. CH and the word for chief).

This principle (applied to names of birds, animals, and inanimate things) is of tremendous moment, and at once explains the variety of initial syllables (and, *ipso facto*, the final syllables). Every tree, bird, animal, and household utensil has borne (or still bears) a conjunctive pronoun of possession or relation. The Guarani word *cha-ha*, or *sha-ha* (turkey-buzzard), is the same word as the Vejoz and Choroti *sa-hak*, and the Suhin *ta-a* or the Toba *ta-kak*; and the Quechua *pu-ma* corresponds to the Lengua-Mascay *me-wa* (the lion), both of which words play an interesting part in Indian mythology. Some of these words are fairly obvious but others are much more difficult to trace.

Q. *ki-lla* (or *ki-lyá*) ; Ch. *wee-la* ; V. *we-la* ; S. *we-kla*, moon.

Q. *su-lla* (or *su-lyá*) ; L.-M. *ya-lyá* ; T. *a-lo-ñi*, dew, frost.

Q. *all-pa* ; L.-M. *yith-pa* (or *yil-pa*) ; *thla-pup* ; T. *al-wa*, earth, soil, clay.

Compare the different prefixes in the following words :

L.-M. *pe-yim*, bee ; *pi-yim*, lizard ; *nai-yim*, ant-bear ;

T. *wo-yim*, monkey.

Ke, ki, ku. These particles are applied to verbs also, in the first instance to shew relation, then various modifications of meanings, causative, frequentative, etc. Thus from the idea of "from above downwards," we have : *aj-ne*, to lower ; *toj-ni*, drip, leak from roof ; *ej-ne*, empty out ; *oj-na*, *laj-na*, *ti-ki-na-ha*, unfold, open out, display, expose ; *kij-ne*, *koj-ni*, *ti-ki-na-ha*, spread out on ground.

From the root *ma* (to hold, grip, take, etc.) is formed *ki-ma* (hold, etc.), and with addition of particles *ki-mkiyi*, catch ; *ki-mkiwoi*, raise ; *ki-jme*, work ; *ki-met*, a possession ; *ki-manik*, servant, etc.

A *ki* noun is sometimes taken boldly and prefixed to a verb to form another as, e.g. *kio*, hand ; *kio-fua-ki*, grind ; *kio-fua-ne*, pound ; *kio-fua-te*, press ; *kio-lano-wata*, loosen a rope, let hand go.

From *wo*, the neck, that which encircles, we derive *fuo-po*, arm ; *fuop*, around ; *inu-fuop*, to be around ; *ake-fuop*, embrace.

From *wo* or *wo-ma*, to plant, we derive *kiak-wone*, to bury, giving the word a special (perhaps family or rational) significance, as with the word *thle*, a name ; *tempa thle*? what is the name of ? *kiak-thle Manuel*, his name is Manuel.

N.B.—Many of the nouns with the *ke*, *ki* or *ku* prefix are connected with the family relationships or the names of the parts of the body, both of which series rank very high in Indian parlance : the verbs likewise are intimately connected with the family.

Ko. The prefix *ko* is rare in Choroti. The words *koaki*, cough, and *kohi*, vomit, are probably onomatopœic words.

Kos, a joint, knot, knee; cf. *ta-kos*, to crawl. In L.-M. the knee and the ham are distinguished by different initials: *T-ăpnik*, the knee; *L-ăpnik*, the ham, hollow of knee.

XXII. SUFFIXES AND INFIXES (K)

K, ki. The suffix *k*, or the absence of the suffix *k*, with nouns is very general throughout the Chaco group, and demands some consideration, because both number and gender are affected thereby. Examples (for immediate reference) :

- (1) *kima*, hold; *kima-nik*, man-servant; *kima-niki* or *kima-nki*, female servant.
- (2) *lesāna*, make; *lesan-ik*, thing made.
- (3) *tet-ik*, a plate; *tet-i*, pl. form, plates.
- (4) *aiyi*, pl. *aiyi-s*, fem. *aiyi-ki*, companion.
wo, pl. *wo-s*, fem. *wo-ki*, attendant, guardian, servant.
- (5) *ayit-a*, fruit; *ayit-ăk*, tree of mistol.
fuai, fruit; *fuai-yuk*, tree of algarroba.
nen-i, fruit; *nen-yuk*, tree, wild fruit.
honnai-yi, fruit; *honnai-k*, tree, wild bean.
- (6) *kos*, crawl; *koski*, knee; *kosok* or *kosoki*, knot, joint.
- (7) *anat*, earth, soil; *anat-iki*, digger, spade, hoe, etc.
niat, water; *niat-iki*, bucket, jar, barrel, etc.
ala, wood; *ala-oki*, auger, gimlet, awl, pricker, etc.
- (8) *hyu-ki*; Vej. *fwu-j*, pl. *fwu-s*; S. *fyu-j*, pl. *fyu-s*; L.-M. *epheh-ik*, finger.
miyo-ki; Vej. *miyo*, eagle.
ot; Vej. *to-kue*; T. *to-ge*, chest.
wuk; Vej. *wuk-e*, house.
T. *ok*; Vej. *thl-oki*, body.

From the foregoing illustrations it can be easily seen how the presence and absence of the *k* suffix is changed about dialectally and to form plurals or the feminine. The principle involved is not confined to the *k* suffix, but other letters are likewise treated, e.g. *os*, a son; *ose*, a daughter; *les*, sons and daughters.

(a) Substantives are formed by adding *k* to the verb (Ex. 2); cf. Q. *muna*, love; *muna-k*, lover; *suma-y*, to be beautiful; *suma-k*, beautiful; V. *wom*, leave; *wom-ik*, left one.

(b) The instrument, vessel for, tool, weapon, implement, etc., is

denoted by adding *ki* (*aki*, *iki*, *oki*, *kiu*, etc.) to a noun (Ex. 7). Many little particles or words are added to denote this idea throughout the group, as *wo*, *lo*, *ma*, *hi*, *cha*, etc., and these are constantly shifted about as prefix or suffix, or from one word to another, so to make the present suffix clear a great many examples would have to be shewn. But the main principle of eliding the *k* is not touched.

(c) In Choroti and Toba the tree or plant is denoted by adding *k* (*ek*, *ik*, *uk*, *yuk*, etc.), to the word for fruit (Ex. 5). In Vejoz and Suhin the word for fruit may have a final *j*; e.g. V. *ahai-yāj*; S. *ahai-yij*; Ch. *ayit-a*, fruit of mistol. In Lengua-Mascoy the same word expresses tree and fruit, e.g. *nosa*, fruit or tree of mistol. If it is required to distinguish either the one or the other, separate words are used, viz. *yithna*, fruit; *yokthloho*, tree or whole, i.e. the body. In Mojo thus, *mee*, fruit; *mee-kie*, tree of algarroba.

(d) Certain words have a masculine and feminine form and one plural common to both (Ex. 4). The feminine form consisting of the suffix *ki*, and the plural form being the letter *s*, added in both cases to the masculine or radical, e.g. *wo*, *wo-ki*, *wo-s*, servant.

(e) In Ex. 8 we have some examples of words in Vejoz and the other dialects differing slightly from the Choroti, chiefly by the omission or addition of the *ki* suffix, e.g. *miyo*, *miyo-ki*, eagle. The word for "finger" resembles the form of the words treated in section D if treated inter-dialectally:

Ex. masc., V. *fwu-j*; S. *fju-j* : *Ex. fem.*, Ch. *hyu-ki* :
Ex. pl., V. *fwu-s*; S. *fju-s*

(f) In Ex. 1 the final *k* denotes the masculine (the syllable so to speak closed with the *k*); the feminine has the open syllable *ki*.

ki-man-ik (masc.) *ki-man-ki* (fem.)

In Ex. 3 the singular is indicated by the final *k*, and the plural by the dropping of it.

tet-ik (sing.) *tet-i* (plur.)

This principle is general, the masculine and singular on the one hand and the feminine and plural on the other having points of resemblance, e.g. :

Toba	<i>chik-nik</i> (masc.), bow	<i>chik-na</i> (fem.), arrow
	<i>chik-nik</i> (sing.), bow	<i>chik-nika</i> (plur.), bow

NOTE.—Though this rule is very general and many words are inflected in this way, there are exceptions: the *ki* suffix is not always feminine, e.g. T. *yařai-ki* or *yagai-ki*, old man; *yařai-na* or *yagai-na*, old woman; L.-M. *yowai-ki* (masc.) spider.

(g) Noting the above principles, compare the Toba and Vejoz words for child, with the Choroti :

T.	<i>yal-e</i> , daughter	<i>yal-ik</i> , son	pl. <i>yal-ka</i> , sons
CH.	<i>ki-ale</i> , boy	<i>ki-ale-ki</i> , girl	pl. <i>ki-ales</i> , people
V.	<i>thl-as</i> , son	<i>thl-ase</i> , daughter	pl. <i>les</i> , children

Having formed from the root *ale*, the word *ki-ale*, boy, youth, it was then necessary to add a suffix *ki* to indicate the feminine, *ki-ale-ki*, girl, maid.

Under the *ki* prefix (Chap. XXI) we have seen that it is largely used to denote family relationships, but it will be convenient here to illustrate the *y* (of Lengua-Mascot) and *k* (of Choroti) prefixes and the *t* and *n* roots as important factors to distinguish the elder from the younger.

Elder sister : Ch. *ki-tia* ; V. *chi-ta* ; S. *chit-taa* ; T. *pi-lte* ; L.-M. *ya-thla*.

Elder brother : Ch. *kii-li* ; V. *chi-la* ; S. *chä-kla* ; T. *pi-chaka* ; L.-M. *yip-ma*.

Younger brother : Ch. *kii-ni* ; V. *chi-nij* ; S. *chi-nish* ; T. *noko* ; L.-M. *ya-thling*.

Younger sister : Ch. *ij-nia* ; V. *chi-nna* ; S. *fuk-chi* ; T. *noo* ; L.-M. *ya-thling*.

The first person is often irregular, e.g. :

L.-M. *Hawuk* or *Hauk*, my elder brother ; cf. Q. *Huauki*, brother.

L.-M. *Yaiya*, my elder sister ; cf. Q. *ñaña*, sister.

Between the Choroti *Ki-tia* and the Toba *Pi-lte* (elder sister) there is the same difference of prefix and construction as there is in the word for moon, Q. *Ki-lla* ; L.-M. *Pi-ltin* ; Ch. *wee-la* ; and similar prefixes of relation exist with the sun, moon, and stars, Ch. *ki-le*, sun ; *wee-la*, moon ; *kä-tes*, stars.

(h) The final *j* and final *k* sometimes differentiate the verb from the noun, *Tuj*, to eat ; *Nok*, food. Nouns are distinguished with the same two letters, *Tak*, a handle of pot ; *Taj*, skin, shell ; *afuena-tiuk*, toucan ; *alena-taj*, wolf. *Tiuk* and *taj* are both augmentative suffixes.

(i) The *ki* suffix with nouns is both feminine and plural ; *wo-ki*, female attendant ; *kias*, tail ; *kias-ki*, tail of bird, i.e. tails.

(j) *Kie* is another form of *ki*, instrument ; *piate-ikie*, sieve, instrument for maize. *Kit*, instrument, e.g. *wi-kit*, pestle.

Ki, verbal suffix ; *alat-ki*, give out scent ; *fuaha-ki*, split ; *an-ki-hi*, make level ; *thlan-ki-ape*, unload.

Ki, plural suffix or infix of verbs ; *lei*, pl. *leki*, finish.

Ki, ko, etc., as link between root and particle :

ko-fue, under, below ; *ait-ko-fue*, put under.
ki-fue, under, below ; *aut-ki-we*, put under ; *yu-ki-fue*, go under.
ka-wo, under, between ; *ya-ka-wo*, go under.
ki-wita, together ; *lan-ki-wita*, separate that which is stuck ;
 tsu-ki-wita, adhere ; *yu-ki-wita*, to join, place together.
ki-ne, *na-ki-yine*, low ; *niyuwa-ki-ne*, low, short ; *yim-ki-nane*,
 to drown, go down.

Compare also, *esh*, good ; *nāk-esh-ni*, to try, test, see if it is good ;
nojwa, all ; *nāk-nojwa*, to be enough.

Ke, new ; compare *ahi-ke*, new ; *ke-siki*, to flower.

Ki, kii, pronominal particle used as prefix and suffix ; *shu-ki*, he ;
se-kii, it is there, there are there ; *ki-shii*, it is outside, there.

Note on the k Section of Words

The *k* being largely used as an auxiliary prefix, pronominal or verbal, the roots for the most part must be looked for under other initials, consonants or vowels, for comparative purposes in the other dialects. In Vejoz, for example, see words in *ch*, and Lengua-Mascoy in *y*, as touching relationships. There are few verbs of importance, but there are many nouns, especially those denoting the names of the parts of the body either of men, animals or inanimate things, whose index letter is *k*.

XXIII. THE CONSONANT N

N. The letters *n* and *t* are the great family letters, in gender they may vary according to their position and use, but taking the languages broadly the *t* represents the father's family while the *n* belongs to the mother's family. The letter *l* is closely associated with *t* and *m* with *n*. The family names for the most part circle round these letters. Though it cannot be laid down as a rule, the tendency of the Chaco dialects is thus :

Father's family, <i>l, t</i>	Mother's family, <i>m, n</i>
Males, <i>l</i>	Females, <i>t</i>
Elder members, <i>l, t</i>	Younger members, <i>m, n</i>

- N*, (1) prefix to nouns denoting that which is human, belonging to the family : *ta-kat*, his, her chin ; *na-kat*, human chin.
(2) article or copula : *A-napa ni wete*, I guard the house.
(3) initial to nouns : *āk*, food ; *nāk*, food ; *yik*, to go ; *naiyi*, road ;
 V. *naiyij* ; S. *noish* ; T. *nākaik* ; CH. *ap*, cry ; *nāp*, song, cry.

(4) initial to verbs to differentiate or modify meaning ; *yape*, return ;
napa, watch ; *niyape*, return ; *napamet*, return here.

Na, *nia*, advance ; *naha*, we will, we go, etc.

Naii, bathe ; V. *nain*.

Na-ka, pronoun, person or thing near ; Ct. *nō-kii*, here ; *se-kii*, there.

Nāk, prefix ; *esh*, good ; *nāk-esh-ni*, to try, test, prove, see if good.

Nāki, to be, have ; Q. *ca-ni*, I am ; L.-M. *nāk*, to be (indeclinable).

Nam, come, arrive, motion towards, cf. *Yam*.

Nap, return, cf. *Yap*.

Nate, water jar ; V. *yate* ; S. *nofki* ; T. *ko-ña* ; L.-M. *wathwa* ; M. *yupi*.

The idea of this word is uncertain. In L.-M. *wathwa* is the idea of a hollow as, e.g. the palm of the hand, bed of stream, belly.

Na-wai, boiling ; V. *naiwe*, *nawai* ; S. *naiwe-shi*.

Neaiyi, another form of *naiyi*, a way, path, road.

Nes, arrive, come, reach.

Niat, *ñat*, water ; Matacó, *inot* ; S. *inaat* ; T. *net-rāt* or *net-gāt*.

Noj, all ; cf. *loj*, many ; *wuj*, big. *O* is a favourite vowel to express bigness, great number, and as intensive particle throughout the Chaco group.

Nu, verbs of movement, cf. *yu*.

XXIV. PARTICLES (N)

N is used as prefix to adjectives in the second person singular and plural, *an-es*, thou art good. In Suhin there is a similar use with adjectives and verbs : 1st per. *si* ; 2nd per. *nu* ; 3rd per. *yi-ipkun*, hungry. In Lengua-Mascot the *in* (*im* or *ing*) prefix is second and third person feminine with verbs, and with some nouns. *T* or *thl* is very usual as a reflexive to the second person in Choroti and Vejoz, e.g. *thl-api*, return, but *n* is rare, unless we take the initial *n* of verbs in that sense, e.g. *an-apamet* (return thou), but in this case as with the nouns, e.g. *ini-we* (shoulder), the *n* is not confined to the second person. The *n* is sometimes dropped in the second person like the *y* in *y-ape*, 2nd per. ; *ape*, return ; *an-apa*, I guard ; *apa*, guard thou ; *napa ni wete*, he guards house.

an is a possible euphonic change with *am* (thou).

Na, termination of nouns ; *afue-na*, a bird ; *ale-na*, dog.

Nat, instrument ; *aja-nat*, whip, striker.

Ne, verbal termination ; *po-ne*, cover ; *aa-ne*, strike with stick.

Na, *ne*, plural of verbs ; *ak*, pl. *akine*, go away ; *ho-mit*, pl. *ho-na-mit*, come.

Ne (1) down ; *aj-ne*, let down ; (2) towards ; *ho-ne*, bring.

Ne, ni (1) younger members of the family ; *ij-nia*, younger sister ; (2) family ; *ayi-ne*, man ; *asee-ne*, woman.

Ne, future ; *ayik*, I go ; *ayik-ne*, I shall go.

Nes, nis, ring, that which encircles or overhangs ; *hyuki-nes*, a ring ; *wo-nis*, mane of horse.

Nik, cf. *nes* ; *kyo-wo-nik*, bracelet.

N, cf. *na*, termination to nouns ; *wate*, turn ; *ti-watan*, grindstone.

Na, ina, makes verbs of nouns ; *yas*, my son ; *a-yas-ina*, to adopt ; *to'se*, smoke ; *ti-tus-ina*, to smoke, make a smoke.

Na, ni, etc., causative ; *wom*, big ; *wom-ine*, add ; *pom-na*, make big ; *wosa*, flat ; *wos-ini*, to make flat.

NOTE.—A comparison with the Vejoz vocabulary initial *n* shews many equations under the same letter in Choroti.

XXV. THE CONSONANT T

T. (See *n.*) The *t* and *n* form the distinguishing marks of two great divisions in the Chaco languages and beyond. In Toba the two great divisions of nouns are characterised in the first person plural by *kana* or *kona* and *kada* or *koda* (some words in *kata*) ; and many similar contrasts of *n* and *t* have already been noted ; as a further example, take the *yan* and *yat* augmentative prefixes in Lengua-Mascoty, the former used with feminine, the latter with masculine nouns. Many important words connected with the mother (chest, breast, suck, etc.) in Choroti, Toba, Vejoz and Suhin are indicated with *t* (e.g. *te*, the feminine of *ta*, for mother) ; the Quechua, Mojo, Lengua-Mascoty, and Enimaga use *n*, e.g. Q. *ñuñu*, woman's bosom ; M. *eno* ; L.-M. *inkyin* ; En. *nana*, mother. This is but one example out of many to illustrate the great principle of the two strains running through the Chaco group.

T, l, th. (1) The *t*, *l* and *th* sounds frequently cross each other treating of the various dialects and even in one dialect. In Choroti the *th* is a very soft sound, so that a word like *thlahepa* (nothing) is often sounded as *lahepa*.

(2) *l* and *th* are equivalents, e.g. Ch. *kioth*, *kiol*, locust ; V. *thlaichath*, *thlaichal*, branch ; L.-M. *pith-tin*, *pil-tin*, moon ; *kil*, *kyith*, a prefix ; *l* takes the place of *th* in Toba, no *th* sound existing.

(3) The sound *th* when final (as in *kioth*, locust), becomes *thl* when

preceding a vowel (*thlet*, his mother). *T*, *th*, and *l* are common to the group as prefix of third person :

Ch.	<i>thlo</i> , seed	<i>tot</i> , chest	<i>lawole</i> , weeds
V.	<i>thlöi</i> , seed	<i>toj</i> , skin	<i>lowole</i> , hair
Ch.	<i>thlai</i> , fruit	<i>toj</i> , skin	<i>lashi</i> , mouth
T.	<i>ala</i> , fruit, seed	<i>lok</i> , skin	<i>dam</i> , belly

In Lengua-Mascoy there is no special form for the third person, but everything is arranged as 1st person, 2nd and 3rd masculine, and 2nd and 3rd feminine ; it is, therefore, of greater interest that this third personal prefix is preserved in a number of words referring to inanimate things or animals, but modified to receive the distinctive prefixes :

<i>ab-ith-chipuk</i> (m.)	<i>ith-chipuk</i> (fem.), leg, trunk, stem
<i>ab-yith-na</i> (m.)	<i>ig-yith-na</i> (fem.), fruit. Ch. <i>thlo</i>
<i>ab-ith-na-muk</i> (m.)	<i>ih-na-muk</i> (fem.), flower. Ch. <i>thlo-ki</i>
<i>ap-tämnik</i> (m.)	<i>a-tämnik</i> (fem.), foot-print, from <i>ämnik</i> , foot
<i>ap-thlimpinik</i> (m.)	<i>i-thlimpinik</i> (fem.), wing. V. <i>thlef</i>

- (4) In Vejoz the particle *thle* makes its plural in *ta* (denoting present tense). In turning a noun into a verb *t* is substituted for *thl*, e.g. *thli-chu*, egg ; *ti-chu-i*, to lay eggs ; *thla-wo*, flower ; *ta-wo-i*, to flower.
- (5) Final *l* or *th* is often slurred as, e.g. in Vejoz, *amel* (ye) and Choroti *kiol*, *kioth* (locust), or in the first syllable of the Lengua-Mascoy *kyel-thlingkyip* (ye), pronounced respectively almost like *ame*, *kio*, *kye*.
- (6) The *t* is rare in its use (as compared with *l* or *th*) with nouns in Vejoz, Choroti, Chunupi and Toba, but of frequent occurrence as index of the third person in verbs ; while on the other hand the *l* or *th* is rarely, if ever, used as a verbal index of third person. As a reflexive in the second person *l* and *thl* are used in Vejoz, Choroti, and Chunupi. See Chap. IV, § 10.

The *i* or *y* is the usual third person particle of verbs in the three languages mentioned and Toba, but with certain verbs *t* is used, and in Choroti the *t* prefix denotes the passive, or reflexive, which often in these dialects is the same thing, e.g. L.-M. *pitkin-athcheyi*, she places herself down, she is placed down. The passive is often a substantive ; CH. *ti-woma* (is planted ; that which is planted, a garden) ; *ti-tiyaki*, a dart ; *i-tiyaki*, to shoot. The letter *n* though used as verbal termination, e.g. *po-ne*, cover, is not used as verbal prefix, excepting

- the *an* prefix in 2nd pers. with verbs and adjectives. In Toba the *n* marks one division of verbs, and in Lengua-Mascoy *in* (*im*, *ing*) is the ordinary prefix to verbs (2nd and 3rd fem.).
- T*, prefix to nouns in 3rd pers. ; *t-ot*, his, her, its chest.
- T*, prefix to verbal nouns in 3rd pers. ; *ta-wo*, his, her, its planting.
- T*, (1) prefix making verbs passive in 3rd pers. ; *ti-ponaha*, to be covered. (2) reflexive ; *te-taiyo*, to be stabbed, to stab self. (3) with neuter verbs and adjectives ; *ti-mes*, the two ; *ti-pohi*, to be full.
- T*, sometimes used instead of *thl* in 2nd pers. ; *ati-omate*, extinguish.
- Ta*, *te*, interrogative pronoun ; *te mpa?* who? which? what? when? how? where? T. *eta?* V. *chi?* *ki?* Q. *pi?* L.-M. *sa?* *s-?* M. *ha?* *ta-ha?* etc.
- Ta* (*kăta*), reflexive suffix ; *yamkă-ta*, I myself ; *amkă-ta*, thou thyself.
- Ta* (*te*, *tiuk*, *taj*, *tiuj*), augmentative suffix to nouns meaning, similar, larger, of same species, the underlying idea is father. V. *taj*; S. *taj*; T. *ta*; L.-M. prefix *yat* (with masc. nouns), *yan* (*yam*, *yang*) with feminine nouns.
- Ta*, *tata*, uncle, i.e. father's brother who often bears the same synonym as the father. Compare *te* (mother) with *ki-te* (aunt, mother's sister).
- Tajni*, howl; *tajnitsi*, sing loud; see *ane*, to call, cry, shout. The letter *t* is perhaps the most used of the initial letters to modify, differentiate, and distinguish words; thus from *wowi*, to blow with the mouth; *wowi-ti*, wind blowing; *ta-wi-li*, *ta-we-tini*, to whistle; *wosok*, flute.
- Taas*, pot; S. *ta-thlăs*; V. *to-wej*.
- Takith*, grow; V. *tăh*, grow; *talak*, grown; S. *tohpă*, grow; cf. Ch. *tōthlehe*, grow.
- Tie*, nouns and verbs in *ta* are often inflected to *tie*, e.g. *itie-te*, my eye; *ata-te*, thy eye; *ta-te* and *tie-te*, to throw. This principle is not confined to the letter *t* but is general; furthermore, in the other dialects this method of infixing vowels is frequent. T. *n-Y-ami*, give to me; L.-M. *n-IP-thlit*, his waist. As with single words so with the sentence, compare the word, L.-M. *him-kyi* (abode) in the following sentence: L.-M. *Āp-him ithnik ūnat e-kyi*, he abode, it was said, there; and Ch. *ne-ya*, without, short of—in this example: Ch. *Ne tām po wohu ya*, he was short of tobacco.
- Tinuk*, domestic cat. This word is well known through the Chaco, as is the Suhin word *nuu*, dog (Aymara, *ano*). L. *t* and *n* are used very largely for animals, cf. *kyu-ni*, jaguar. The Guarani *yagua*, dog, can be seen in the following words for *jaguar*, T. *kidyuk*; V. *eyăj*; S. *iyōj*. The words cat, dog, jaguar, and puma are

exceptionally important in tracing the various sources and influences of words.

Tio, tall ; V. *pi-taj* ; L.-M. *wi-nka* ; Q. *suni*. Another example out of many of the *t* in one dialect appearing as *n* in another. Cf. also *to*.
To, *tu*, hard ; V. *tun* ; S. *tun* ; T. *kädamta* (*sa-dañi*, soft) ; Q. *anak* ; L.-M. *yinna*.

To, imp. *ho-ne*, bring ; cf. *na* or *nam*, imp. *ho-met* (come) are both illustrations of the growth of the initials *t* and *n*, from a root *o*. *Ne* and *met* are terminations denoting motion toward.

Kas-to, our eater, he who eats us ; *si-to*, he who eats me, my being eaten ; L.-M. *sin-to*, our eater, etc. ; *si-to*, my eater, etc.

T, suffix used in the formation of nouns ; *kima*, hold ; *kimet*, thing held.

T, sometimes slurred at end of word : *we'* for *wet*, house.

Ta, future particle ; *ka-thloma-ta*, to-morrow ; *ka-thloma*, to-day.

Te, *to*, *ti*, verbal terminations ; *esite*, *esito*, to cut ; *etiti*, touch.

T, *te*, nouns ending in *t* like *iñat* (water) in sentences often add *e* as *iñate*.

Te, place of ; perhaps contraction of *wete* ; *ka-penan-te*, kitchen, from *penik*, to cook ; cf. *ka-lanke-wet*, slaughter-house, from *lanki*, kill.

Tot, chest, used to express palm, sole of ; *kyo-tot*, palm of hand.

Tini, verbal termination corresponding to Vejoz *thle* indicating actual present tense ; *kam-tine* ; V. *yam-thle*, talking ; comp. *maa*, sleep, *maa-te*, sleeping ; *lanit*, tie, *leante*, tied.

XXVI. THE CONSONANTS L, TH, THL

L, th. See *t*, Chap. XXV.

L-r, the absence of *l* in Mojo, Quechua, Guarani and others is often compensated by *r*, and equations must be looked for under that letter, e.g. G. *karaii* ; Ch. *kilaii*, stranger.

L-ll. Many of the words in Quechua written *ll* appear as *l* or *th* in the Chaco dialects, e.g. Q. *lla-pa* ; T. *la-pa* ; L.-M. *thla-mo*, all ; Q. *llika* ; V. *thluk* ; Ch. *thluk*, a net ; Q. *llakta*, a town ; probably the Toba *ka-lota*, village ; L.-M. particle *äkthla*, *mäkthla* attached to verbs to denote place, and *thlänkuk*, house, place.

L-th, the letter *th* may sometimes be a strengthened form of *l*, as *ithlis*, a rib, but generally speaking *l* and *thl* are interchangeable terms. In Vejoz it is sometimes used to differentiate, *li-chu*, its horn ; *thli-chu*, its egg. As prefix of third person Toba uses *l* (the *th* sound not existing), the Suhin invariably adopt *th* (the *l* being rare), e.g. T. *l-wäk*, his hand ; S. *th-pakät*, his hand.

- L, th*, prefix to nouns in 3rd pers. ; *thl-et*, his mother.
L, th, prefix to verbs in 2nd pers. ; *thl-oki*, thou bitest.
L, th, negative particle, none, short of ; *laj, thlos a*, childless, barren ;
thla kio yi, armless.
L, th, reflexive ; *ape*, return thou ; *thl-ape*, return thou thyself. The
th sound particularly is used like the *h* or *j* as an inherent reflexive,
to give strength and completion to certain letters, e.g. V. *ij-cha*,
not *i-cha*, my father ; L.-M. *ith-chi*, thou thyself ; Ch. *thlaawu*,
wind ; *thle*, name ; *nio-thli-tiuj*, cannibal, our eater.
L, th, initial to verbs. Scarcely any absolute nouns are to be found
under initial *l* or *thl*. By the term "absolute nouns" is meant
those nouns whose pronominal particles have lost their signifi-
cance as, e.g. *i-niat*, water ; *kyu-ni*, tiger ; *luj-se*, a bow. Thus
from *a*, to strike, is formed *la* and *thla*, to kill ; *lana*, killed ; *ne-la-ne*,
fight, wage war ; *lan-ki*, slaughter animals ; *liana*, a general form
for kill, slaughter, destroy, etc.
- L.* The following root verbs are the most important :
- La-n*, kill.
La-n, remove, unloose, open, take off or out.
La-nt, tie, bind.
La-h, smooth, plane, sweep.
Lai, abandon, leave, cease.
Laj, open out, unfold.
La, move (*lapeha*, hang up).
Lat, dry.
Le, many words with *la* roots change to *le*.
Lem, white.
Lesan, make, do.
Li, clean, wash.
Lak, play, feast, game.
Thlon, smoke tobacco ; burn.
Thlos, change residence.
Thlut, bore.
Le, word ; *ka-le*, word ; *thle*, name.
Leowa, lawa, animal, domestic animal ; V. *la* ; T. *lo* ; S. *klau* ; L.-M.
wi-tip ; Q. *chi-ta*. *La* and *wa* are frequent particles in the names
of animals ; *i-waj-la*, lion ; *e-le*, parrot ; G. *yagua*, dog ; Q. *huy-
hua*, animal reared by hand ; V. *wan-thlöj*, ostrich.
La, le, etc., particle denoting of the family ; relation, animal, thing :
kem-la, wife, husband ; *kee-la*, lizard ; *nei-le*, an idiot ; *po-le*,
sky ; *wee-la*, moon ; *a-la*, tree ; *les*, children ; *Lio-ni-lia*, the
Quechuas or Bolivian hill tribes ; *thle-le*, people of, or belonging to ;
A-thle, the Chunupies.

La, *le*, verbal particle denoting plural or secondary idea ; *yaha-le*, pl. to die ; *wen*, see, *wen-la*, squint ; *yik*, go, *yik-hale*, accompany ; *yik-ala*, put on hat.

L, *th*, initial to nouns. There are some nouns that can only be used in the third person, being related to trees, animals, or inanimate nature. The *l* or *thl* prefix consequently denotes "its," either expressed or understood :

thl-a, its fruit ; *thl-e*, its thorn ; *thl-o*, its seed.

Expressions like "my fruit" being impossible, the *thl* has become fixed with use and serves as a general expression, e.g. *thla*, fruit ; *thlop*, nest ; *thles*, heart, core.

To these have been prefixed particles to give other significances : *les*, children ; *hi-les*, bees ; *ith-les*, frog ; *thla-hi-lis*, spawn ; *kia-les*, people, etc. *Thles*, heart, core ; *thles-iki*, kernel ; *thles-inik*, a tree whose fruit contains a biggish stone ; cf. V. *thlo-kas*, heart or cabbage of palm ; *yuk-le-che-nuk*, tree as above ; L.-M. *e-siksik*, heart ; *ith-wa-siksik*, palm cabbage ; *nai-sikso*, centre, middle. *Thlu*, light—this very important root undergoes considerable changes, but is very widespread : *thlo-ma*, day ; *thlet*, fire, light, match ; T. *le* ; V. *thlet* ; Ch. *thloni*, to set fire to ; *thluti* ; L.-M. *kilik-täthchi*, fire by friction ; *ta-thla*, fire.

APÉNDICE C

TOWOTHLI OR LENGUA-ENIMAGA

INTRODUCTION

THE following words of Towothli, collected for the most part by my colleague, Mr. W. Barbrooke Grubb, though few in number are extremely useful as links among the Chaco languages. The stray words of Lengua and Enimaga are taken from the *Manuscrito del Capitan de Fragata D. Juan Francisco Aguirre*, 1793, edited by Enrique Peña, and published in the Boletín del Instituto Geográfico Argentino, tomo xx. In the pages of the MSS. the Enimaga are called "Tujetge" and "Estabosle," the latter expressly stated to be the Mascoy word for the people whose general name is either Enimaga or Enimaca. From the short description given, as well as from the words of the vocabulary, there is no hesitation in identifying them with the Towothli or Tawathlai, a name well known among the Chaco peoples from the Río Paraguay to the Río Pilcomayo, the *nyimaka* of the Tobas, and the *namaka* of the Matacos.

A glance at Aguirre's words under Lengua and Enimaga reveals at once that the two peoples were mixed up at that date, and in his notes he refers to the fast vanishing "nación famosa" of the Lenguas, whose few solitary remnants were dwelling with the Enimaga and the Mascoy or Machicuy. The term Mascoy is used to-day of a section of the people who speak the language of Aguirre's "Mascoy," the mass, of which this forms a part, still bears in popular language the name of "Lengua," the subject of Grubb's *Unknown People in an Unknown Land*, in which full reference is made to the Towothli, a small and friendly tribe to the south-west, wedged in between the so-called Lenguas and Suhin, with the Aii as their southern neighbour. These latter are a branch of the Tobas known to history under the various forms of the present Toba word, *Pihilgá*, viz. *Pífliga*, *Pilága*, *Pitilagá*, *Yapitalaga*. Its significance, I believe, is simply "Northern People," because its application is not limited to the Aii nor to the Tobas of Bolivia, but includes also the Chunupi and Choroti.

Popular names like "Lengua," though misleading when dealing with

specific tribes, are not to be roughly cast aside in treating of a district, for a particular name persisting for centuries must have had a strong foundation, and there can be no doubt that the "famous nation of the Lenguas," albeit shorn of its glory, considerably reduced in population and villages, and its original members amalgamated with allied tribes, is nevertheless extant to-day in that particular part of the Paraguayan Chaco where the name of Lengua is still known and employed by Indians and Paraguayans, hence the coupling of the name to designate the Lengua-Mascoy and the Lengua-Enimaga, the latter tribe calling itself "Humet," and known to the former by the name "Towothli," once explained to me as the equivalent of *To-wathlai*, or the Pigeon eaters. The term *Palomo*, or pigeon, is given by Hervas in his *Catálogo de las Lenguas el año 1800*, as a name of one of the Chaco tribes, but this would apply equally well to the Choroti, who designate themselves *Yofuaha*, a word evidently derived from *Ofuo*, pigeon.

The tradition of the Towothli migrating southward till they reached their present habitat and losing their language on eating the rainbow¹ seems to be corroborated by their vocabulary. The lexical base shews affinities with Vejoz, Choroti, and Suhin, but with important modifications. The pronominal scheme is also closely allied to these. Strange to say, excepting a few adopted words, there is no close resemblance to the Lengua-Mascoy.

The following examples will serve as illustrations of the widespread Mataco-Mataguayo influence, so persistent and extensive, as to compel one to believe in their own tradition, that they were the original occupants of the whole Chaco region, and that the varying dialects have been formed by fugitives from the north and north-west, who by conquest or intermarriage have annexed both country and language.

The abbreviations are similar to those used throughout this work :

V. Vej. Vejoz	M. Mojo
T. Toba	S. Chun. Suhin or Chunupi
En. Enimaga	L.-M. Lengua-Mascoy
Ch. Choroti	Q. Quechua
L. Lengua	G. Guarani

1. Lengua- Enimaga	Various Dialects	English
Peno	V. <i>Pinu</i>	bee
hats-Hapi	V. <i>o-Yapil</i> ; Ch. <i>a-Yape</i> ; S. <i>Hapik</i>	I return
Omhit	V. <i>Omat</i> ; Ch. <i>Omate</i> ; S. <i>Umkatni</i>	extinguish
Feluk	V. <i>Hala</i> ; Ch. <i>Ala</i> ; S. <i>Yikla</i>	tree

¹ W. BARBROOKE GRUBB, *A Church in the Wilds*, p. 66.

Lengua- Enimaga	Various Dialects	English
<i>Ataak</i>	V. <i>Aitāj</i> ; Ch. <i>Atehe</i> ; S. <i>Aotāj</i>	painful
<i>ne-Yatsik</i>	V. <i>Hates</i> ; Ch. <i>Ates</i>	native drink
<i>e-Yawin</i>	V. <i>Yawu</i> ; Ch. <i>e-Yewu</i> ; L.-M. <i>Yihothma</i>	medicine man
<i>e-Khoi-ekho</i>	V. <i>Koi-thle</i> ; Ch. <i>Lakini</i> ; S. <i>tā-Kloii</i>	to play
<i>e-Tokhe</i>	V. <i>Tojhe</i> ; Ch. <i>Tojwe</i> ; S. <i>Tojhai</i>	far, distant
<i>yi-As</i>	V. <i>othl-As</i> ; Ch. <i>y-As</i> ; S. <i>yo-Os</i>	my son
<i>y-Asi</i>	V. <i>othl-Ase</i> ; Ch. <i>y-Ase</i> ; S. <i>yo-Ose</i>	my daughter
<i>no-Tikeni</i>	V. <i>li-Tek</i> ; Ch. <i>thlo-Takine</i>	cotton, cotton goods

2. The word *afo*, for woman, is interesting and should be compared with the word for wife in the other dialects :

Afo, woman ; V. *Chej-wa* ; S. *Chāk-fa* ; L.-M. *Tawa* ; T. *Dowa*, wife.

The important *na* root for mother belongs to the Mojo :

L.-En. *Na-na* ; M. *eno* ; L.-M. *inkyin*, mother ; M. *yeno*, wife.
 L.-En. *ta-Nani* ; M. *Ese-no* ; L.-M. *kilana*, woman.
 L.-En. *e-Nani*, girl ; Q. *china*, female ; Ch. *aseene*, woman.

The prefix *wi* (*wit*, *witi*) is used in the general sense of "the" or "our," and may possibly be a reminiscence of Mojo *witi*, we, of the first person plural, the Guaná or Waná peoples of a pronouncedly Mojo type being near and friendly neighbours to the north, e.g. :

wi-chait, house ; *witi-kaiyi*, road ; *wit-kalwotsa* ; Ch. *kawāk*, a belt ;
wi-tith-kuki ; V. *thluk*, string bag for women ; *wi-pilase*, garden

3. The personal pronouns approximate closely to the Suhin :

L.-En.	Suhin	English
<i>Ya-kha</i>	<i>Yāk</i>	I
<i>A-kha</i>	<i>Ak</i>	thou
<i>In-akha</i> or <i>En-akā-wa</i>	<i>Name</i> or <i>th-Nameth</i>	we

4. The possessive conjunctive pronouns are similar to the Suhin and Choroti in the singular ; but the first person plural prefix *in* (*im*, *ing*) is like the Lengua-Mascoy, e.g. L.-M. *ing-mik* ; L.-En. *ing-yākse*, our hand :

1. <i>y</i> or <i>i</i> , my	<i>i-yākse</i> , hand	<i>yo-kohits</i> , hair
2. <i>a</i> , thy	<i>a-yākse</i> , hand	<i>a-kohits</i> , hair
3. <i>thl</i> , his, her	<i>thla-yākse</i> , hand	<i>thlo-kohits</i> , hair
1. pl. <i>in</i> , our	<i>ing-yākse</i> , hand	<i>ino-kohits</i> , hair.

5. The particles of conjugation likewise follow the Suhin in the

singular, but the information is too scanty to decide the plural forms, e.g. :

- | | |
|-------------------------------------|------------------------------------|
| 1. <i>he-tuj</i> , I eat | 1. <i>asthla-tuj</i> , we eat |
| 2. <i>thla-tuj</i> , thou eatest | 2. <i>asthla-tuj-yith</i> , ye eat |
| 3. <i>yi-tuj</i> , he, she, it eats | 3. <i>yi-tuj</i> , they eat |
-
- | | |
|--|--|
| 1. <i>he-aihinkyi</i> , I keep back | 1. <i>atsi-aihinkyi</i> , we keep back |
| 2. <i>e-aihinkyi</i> , thou keepest back | |
| 3. <i>y-aihinkyi</i> , he, she, it or they keep back | |

Other examples could be given shewing that *h* is the general prefix of the first person singular and plural, but the form *he* or *ha* sometimes adds the *tse* particle, which is plural throughout the Chaco group and also in Mojo. The second person singular is frequently the root form, as *aponik* (cover it); and the *thl* prefix is also very usual with this as with the other members of the group, e.g. *thl-isik* (hold, grip). In the third person the *y*, *i*, *e* and *t* prefixes follow the order of both the Mataco and Guaycuru families, e.g. :

Y, *yanikiyo*, fill in; *yapelosik*, scrape, as skin.
I, *e*, *iyakhe*, drink; *ivots-han*, drive; *etokhe*, far.
T, *tathkyi*, grow, spring; *tekhoipii*, boiling.

6. The imperative of verbs and the interrogative is formed with the particle *ma*, as in Choroti, etc., e.g.:

Ma ma, sleep (imp.) *Ma matak?* art thou sleeping?

The negative and prohibitive follows the Vejoz negative suffix *hite*, (*ita*, etc.), e.g. V. *Chuyu hita*, he is not hungry. The Towothli has both the *hete* and *kitik* or *kitaiki* forms, thus :

Mape hete or *Mape kitik*, do not return
Mooi kitaiki, do not bring

7. The *kyi* suffix to verbs like the Lengua-Mascoy represents the actual present tense, e.g. *Tath*, grow; *Tath-kyi*, growing; L.-M. *tip-kyi*, growing.

Ka is an intensive particle used with nouns and verbs, thus :

Fetsuk, palm tree; *Fetsot-aka*, another kind of palm, the pindo.
Kocheta, sheep; *Kocheta-ika*, goat. Cf. Toba : *Kaigeta*, sheep;
Kitāk, goat.

Mapel, return; *Mapel-ka*, return quickly or in anger.

K denotes trees and plants as in Vejoz, Toba, Choroti, and Suhin :
Fenak, tobacco, cf. L.-M. *ik-Hena*; *Feluk*, tree (generic), cf.
V. *Hala*.

Fetsuk, palm tree; *Kithlaikotak*, quebracho tree; *Intathlak*, mistol.

He like the Vejoz *hi*, thing for, e.g. *Fenak*, tobacco; *Fenka-he*, pipe. *Nat*, instrument, as in *witákpekasnat*, hoe.

A number of substantives and the adjective "many" terminate in the unusual sound of *ts*, similar to the Vejoz *j* or *s* and the Suhin *sh* or *ch*, e.g.:

L.-En. *Alots*; V. *los*; Ch. *loj*; S. *akloj*, many; compare also V. *lutsij*; Ch. *lojse*; S. *lutsish*, bow; S. *yiktech*, my grandfather. The following examples illustrate the Towothli:

Ken-hats, friend; *Kohits*, hair; *Mäts* or *Mäch*, elder brother.

N.B.—The suffix *s* or *ts* represents the feminine form in Chiquita, and the absolute substantives in general, e.g. *Kise-ts* (*quicez*) is "knife" in Chiquita, evidently the *quice* of the Guarani; and *Tamoco-s* (dog), which in Mojo is *Tamucu*. *J* and *s* as final and infixes (with exceptions) represent the feminine and plural in Vejoz and Choroti; and in the few odd words where the *j* sound occurs in Lengua-Mascoy as in *Thlen-ăj* (red deer) it is also feminine.

NOTE.—I am responsible for the spacing of all the words in the vocabulary as aids to the comparison and particles. R. J. H.

VOCABULARIOS

CASTELLANO—INGLÉS—TOWOTHLI¹

A

Abanico ; fan : he-Köf.	Agarrar ; hold, grip : ai-Kumi.
Abeja, miel ; bee, honey : Selel.	Agarrar ; hold, grip : thl-Isik.
Abeja ; bee : Peno.	Agitar ; stir : hu-Tigaiak.
Aborrecer ; dislike : hu-Tan : L. ² ne-Talsoe ; En. ³ Saapijagen.	Agotar ; exhaust, drain : hats-Ham.
Abrazar ; embrace : i-Gai ; i-gai-hik, ti-gai-yik.	Aqua ; water : Iwali ; L. Guale ; En. Eguale.
Abrazar no ; do not embrace : i-Gai-kitai-ki.	Aguará-guazú ; wolf : Wawu.
Abuela ; grandmother : L. Mama ; En. Quiet-ti.	Ahitar ; surfeit : hua-Thlin ; ki-thlin.
Abuelo ; grandfather : L. Pipi ; En. Quiet.	Ahora ; now : Inkaihikha ; L. Abuena ; En. Najaicum.
Aburrido ; tired, done up : so-Amheya.	Ahora ; now : Hatsa.
Acabar ; finish : sák-Kätahai.	Ala ; wing : he-Köf.
Acabó ; finished : Tahelik.	Alegre, feliz ; happy : he-Soan.
Acabar ; finish, exhaust : hats-Ham.	Algarrobo ; bean fruit tree : Ininhak.
Acariciar ; fondle : e-Komye.	Algarrobo negro ; tree (<i>prosopis nigra</i>) : Asisok ; Ch. Isiösok.
Acompañar ; accompany : hatse-Hu-api.	Algodón ; cotton : no-Tikeni ; Ch. thlo-Takine.
Acostumbrado ; used to : hatse-Aiyik.	Alisar ; smooth : e-Lasiik.
Achiote ; annota : Wotak.	Alma ; soul : thlai-Hos ; L. Neg-napelem ; En. Cagisequi.
Adelante ; forward : L. Aguancain ; En. Ajo.	Aloja ; native drink : ne-Yatsik.
Afligirse, estar triste ; grieve, be sad : ke-Kometkyi.	Alto ; tall : i-Hetak.
	Alto, arriba ; high, above : Was.
	Amar ; love : L. Letiachuune ; En. Hiigsuum.

Yerba ; grass : Hupal.	

Z

Zancudo ; mosquito : Eya.	Zorra ; fox : Aihena.
Zapallo ; pumpkin : Laiketi.	

APÉNDICE D

CHUNUPI OR SUHIN

INTRODUCTION

THE Chunupi or Suhin language runs on the broad lines of the Choroti and Vejoz both lexically and pronominally. In some of the details there are slight differences, which as far as I am able will be indicated in the following notes.

1. The name *Suhin* is given by the Lengua-Mascoy to the nation living on their western frontiers, and in the form *Kăs-Suhin-cha* the eastern section of the Chunupi-Suhin people speak of themselves. On the river Pilcomayo they call themselves *Athluthlai* and are known to the white settlers of the lower Pilcomayo as *Chunupi*, a name to be found in the old records and maps, and which is variously pronounced as *Chona-pe* or *Sona-pe*, evidently a word of Mataco origin, and meaning *Ovejeros*, or the "Sheep possessing peoples," from *Sona*, *Tsonna* or *Chonna* (the little forest deer from which the sheep takes its name) and *Pe* (possess).

The Vejoz who speak Spanish frequently refer to the friendly interior tribes as *Ovejeros* and to the inimical Chamacoco as *Perros* (dogs). The names *Ithlatese*, *Itanhucas* and *Chane-áthle* are also given by the Vejoz to the Chunupi, while the Choroti call them *Athle*. *Chane* means "man" or "comrade," and as a title belonged to the *Chane* or *Guana* living to the north of the present Suhin and Lengua-Mascoy. *Ajihle* is but another form of *Athle* of the Choroti, which in turn closely resembles the name the Chunupi use of themselves, *Athlu-thlai*. It is quite possible that the word *Athle* may be the equivalent of the Quechua *alli* (good), the Quechua *ll* has many equations of *tl* in the Chaco tongues, also *sh*, and the word for "good" in Choroti is *esh* or *es*; Vejoz and Suhin, *is*; Towothli, *Thlawis*. Strange to say the Suhin give to the Lengua-Mascoy the name of *Thlai-yis* or "comrades," but they are called *Eskăno* by the Pilcomayo Suhin. "Good comrades" is by no means an uncommon general title among Indians.

The Chunupi-Suhin extend from the borders of the Lengua-

Mascoy to the Pilcomayo and until within recent years occupied a part of the Bermejo river as well. Owing to trouble with the military last year (1913) the last village on the Bermejo was broken up and its members joined their compatriots across the Rio Pilcomayo.

2. The system of spelling adopted for the Choroti, and the letters required serve equally well for the Chunupi-Suhin. Mr. Pride prefers to use an *r* for certain vowel sounds preceding the *k*. The sound is that also found in Choroti which some of the Indians pronounce with an *i*, others with a *u*. The two following examples will illustrate the difference of Pride's spelling and my own :

<i>Haperk</i> (Pride)	<i>Hapik</i> (Hunt)	I go back
<i>Yimerk</i> (Pride)	<i>Yimuk</i> (Hunt)	It is extinct (fire)

Another point of spelling is that Pride adopts a *k* sometimes before the *l*, which I write with *th* or omit, e.g. :

<i>Klim</i> (Pride)	<i>Lim</i> or <i>thlim</i> (Hunt)	white
<i>Klesa</i> (Pride)	<i>Lesa</i> (Hunt)	knife

The general system adopted by us both agrees, any slight differences existing I have made uniform for comparative purposes.

The peculiar sound *hy* is equivalent to *hy*, *fy*, or *sh* according to the speaker, e.g. *Hyuwekla*, *Fyuwekla*, or *Shuwekla* (the moon).

3. Unlike the lisping or affected accent of the Choroti, this language is forceful and clear, and uttered with no uncertainty or hesitation. The accent of the sentence and of individual words is more inclined to the final than to the penultimate syllable.

4. I am not sufficiently conversant with the language to indicate with exactitude the eliding of vowels in the formation of various parts of the verb, but as a general rule vowels are added to the particle rather than omitted, e.g. *Noyān*, gourd; *Noyān(i)taj*, big gourd; *Sonto-(i)thmaote*, bedstead of foreigner.

The interchange of *sh* and *ch* and others are common to this and the Choroti languages.

5. As with the Choroti the possessive particles of the third person are used as articles for words when standing alone, and the *n* and *p* are used to link up sentences :

<i>Ith-poe na kashi</i> , shut the door.
<i>Ta thle p-atsat?</i> what is the name of your house ?
<i>Wethla no-fuis</i> , five, i.e. one set of fingers.

6. The plural number of nouns is formed exactly as in Choroti, but the Choroti *wa* termination seems to be wanting in Suhin :

Final <i>s</i>	<i>Nuu</i> , dog	<i>Nuus</i> , dogs
	<i>Pot</i> , cover, nail	<i>Potäs</i> , covers, nails
<i>J</i> , pl. <i>s</i>	<i>Itoj</i> , fire	<i>Itos</i> , fires
	<i>Fyuj</i> , finger	<i>Fyus</i> , fingers
<i>Taj</i> , pl. <i>tas</i>	<i>Tashinsha-taj</i> , sheep	<i>Tashinsha-tas</i> , many sheep
<i>Taj</i> , pl. <i>tes</i>	<i>Sania-taj</i> , melon	<i>Sania-tes</i> or <i>Sania-tahes</i> , melons
Final <i>se</i>	<i>Thla-wo</i> , flower	<i>Thla-wose</i> , flowers
Final <i>k</i>	<i>Kyu</i> , horn	<i>Kyuk</i> , horns
Final vowel	<i>Pakät</i> , hand	<i>Pakät-e</i> or <i>Pakät-ai</i> , hands

7. There are no clear marks to indicate gender excepting a few terminations already shewn in the Choroti grammar, Chap. VIII.

8. The possessive prefixes to the nouns are :

<i>Y</i> , <i>i</i> , <i>ya</i> , <i>yäk</i> , my	<i>käs</i> , <i>käts</i> , <i>käse</i> , <i>kätse</i> , our
<i>a</i> or <i>e</i> , thy	<i>a</i> or <i>e</i> , your
<i>th</i> , <i>t</i> , <i>l</i> , <i>thl</i> , his, her, its	<i>th</i> , <i>t</i> , <i>l</i> , <i>thl</i> , their

PAKÄT, Hand	OT, Chest.	Person.
1. <i>i-pakät</i>	<i>yo-ot</i>	my
2. <i>a-pakät</i>	<i>a-ot</i>	thy
3. <i>th-pakät</i>	<i>to-ot</i>	his, her, its
1 pl. <i>käs-pakät</i>	<i>kätse-ot</i>	our
2 pl. <i>a-pakät</i>	<i>a-ot</i>	your
3 pl. <i>th-pakät-e</i>	<i>to-ot</i>	their

9. The personal pronouns are :

<i>yak</i> (or <i>yäk</i>), I	<i>name</i> (or <i>ith-name</i>), we
<i>ak</i> (<i>ap</i> or <i>e</i>), thou	<i>ak-eth</i> (or <i>ap-eth</i>), ye
<i>naka</i> (<i>nöka</i> , <i>näka</i>), he, she, it	<i>Naka</i> (<i>nöka</i> , <i>näka</i>), they

10. The absolute possessive pronouns for both animals and ordinary words is *klau*, which corresponds to the *la* of Vejoz, the *lo* of Toba, and the *leowa* of Choroti, with a general meaning of animal :

<i>ya-klau</i> , my	<i>kätsi-klau</i> , our
<i>a-klau</i> , thy	<i>a-klau</i> , your
<i>th-chäklau</i> , his, her, its	<i>th-chäklau</i> , their

The personal pronouns are sometimes affixed to nouns to denote possession, e.g. *yäk-les* or *yik-les*, my children; *thname kyuaiyu*, our horse; *paiich namape*, our house.

11. The reflexive pronoun *kata*, we (exclusive), is used with the other persons after the personal pronoun, e.g. *ak-käta*, thou thyself.

12. The third personal pronoun *naka* (*näka*, *näkha*, *nöka*, *nöke*, etc.)

is also used as a demonstrative "this, these"; and with the suffix *shi*, as *nōka-shi*, "that, those."

13. The interrogative particles are *ta* (*ti*, *te*, *tai*) and *shi* (*si*, *se*), e.g. *Ta thle?* What is the name of? *Shi naitich?* What art thou doing? *Shiosi?* What? *Ta thlok shi?* Where? *Ta noii?* When? *Ta thlai yaash?* How many?

14. The particle *po* (*pa*) denotes possession as in Choroti, but the positive is more usually expressed with *thlechehe* (there is or there are) like the Vejoz *iche*; or with *Kaha*:

Thlechehe wäkya, there are cattle; *Kaha tashinshatas*, there are sheep.

But with the negative particle *am* or *an* the particle *pa* is often subjoined, e.g. *äm*, no, it is not; *äm-pa*, none, no more; *äm-pa tata*, I have no father; *äm p-inata* or *äm-pa p-inata*, there is no water; *äm-pa chäkfa* or *an-thla-pa chäkfa*, he has no wife.

15. The general negative of adjectives and verbs is *n*; 1st pers. *na*, the other persons *ni* or *nin*, e.g.:

Na-wan, I do not see; *ni-wan*, he does not see; *nin-tun*, not hard, soft; *ni-yame*, thou hast not reached.

16. Some of the adjectives appear to be absolute lacking the possessive or verbal particles, e.g. *akloj*, many; *yuk*, red; *lim*, white; *tun*, hard.

For those that are inflected the following particles are used:

1st p. sing. <i>s</i> or <i>ts</i>	1st p. pl. <i>ka-s</i> or <i>ka-ts</i>
2nd p. sing. <i>n</i>	2nd p. pl. <i>n</i>
3rd p. sing. <i>y</i> or <i>i</i>	3rd p. pl. <i>y</i> or <i>i</i>
<i>PE</i> , satiated, full.	<i>IP-CHUN</i> (<i>ipkun</i>), hungry
1st p. sing. <i>tsu-pe</i>	<i>si-ipchun</i> , I am
2nd p. sing. <i>na-pe</i>	<i>nu-ipchun</i> , thou art
3rd p. sing. <i>ya-pe</i>	<i>yi-ipchun</i> (<i>e-ipchun</i> or <i>i-ipchun</i>), he is
1st p. pl. <i>ka-tsu-pe</i>	<i>ka-si-ipchun</i> , we are
2nd p. pl. <i>na-pe</i>	<i>nu-ipchun</i> , ye are
3rd p. pl. <i>ya-pe</i>	<i>yi-ipchun</i> , they are

The adjectives are modified for comparison with the particle *shi*, e.g. *yuk-shi*, somewhat red; *lim-shi*, somewhat, slightly white.

17. The numerals are:

1. *wethla*
2. *nepu*
3. *puhyana*
4. *yichat-huth*
5. *wethlanofuis*
6. *wethlayama*
7. *yamasta nokai yame*
8. *puhyana yama*
9. *yichat-huth yama*
10. *yamana akloj*

18. The inflections for the verbs are similar to Choroti, the only important difference being in the first person where the Choroti *a* is substituted by *h* or *s* with or without an accompanying vowel, thus : *h-apik*, I return ; *hō-uk*, I go ; *hă-nam*, I arrive ; *s-nam*, I arrive ; *s-thuke*, I plant ; *si-taishte*, I know.

The plurals are formed with a suffix or internal change to the verb itself, the prefixes being the same for singular and plural, e.g. *h-ăpák-lith*, we return ; *hă-cheshine-a nameth*, we sit down.

The second person may be the vowel or consonant root, the prefix *a* or *th*, e.g. *mee*, bring thou ; *änche*, put it inside ; *ischī*, mark thou ; *a-wethla*, sit thou down ; *a-kume*, hold thou ; *thl-anape*, cover it over ; *th-nam*, thou hast arrived ; *l-eshape* or *thl-eshape*, wipe, rub.

The imperative and indicative are frequently (if not always) one and the same thing : *A-kume*, thou holdest ; *A-kume*, hold thou.

The third person may lack a prefix, e.g. *nam* (he, she, it or they arrive) ; or may be prefixed with *y* or *t*, e.g. :

Yi-muk, it goes out, becomes extinct ; *ya-fumki*, she washes clothes ; *Y-ich*, he goes ; *yi-ma*, they sleep ; *t-iyāj*, he shoots ; *t-aishi*, it sounds ; *t-ösee*, they tread on.

TUJ, to eat.

Singular	Plural
	Present Tense
1. <i>Hă-tuj</i> , I eat	1. <i>Hă-tuj name</i> , we eat
2. <i>A-tuj</i> , thou eatest	2. <i>A-tuj aketh</i> , ye eat
3. <i>I-tuj</i> , he, she, it eats	3. <i>I-tuj</i> , they eat
	Future Tense
1. <i>Hă-tuj haiyu</i> , I shall eat	1. <i>Hă-tuj haiyu name</i> , we shall eat
2. <i>A-tuj haiyu</i> , thou wilt eat	2. <i>A-tuj haiyu aketh</i> , ye will eat
3. <i>I-tuj haiyu</i> , he, she, it will eat	3. <i>I-tuj haiyu</i> , they will eat
	Past Tense
1. <i>Hă-tuj hămkyi</i> , I ate	1. <i>Hă-tuj hămkyi name</i> , we ate
2. <i>A-tuj hămkyi</i> , thou atest	2. <i>A-tuj hămkyi aketh</i> , ye ate
3. <i>I-tuj hămkyi</i> , he, she, it ate	3. <i>I-tuj hămkyi</i> , they ate
	Infinitive
<i>Ka-tuj</i> , eating of	<i>Thl-ăk</i> , food

The following list contains a summary of the most important of the particles :

VARIOUS PARTICLES

- A*, possessive prefix to nouns, 2nd pers. sing. and plur.
A, prefix to verbs, 2nd pers. sing. and plur.
Ai, plural suffix to some nouns.
Ām, negative particle.
As, plural of *aj*.
Cha, sha, verbal suffix denoting "down," "backward."
Che, she, comparative suffix of adjectives.
Che, she, verbal suffix, "inside," "in," "down."
Che, she, plur. particle of verbs and adjectives.
Chi, shi, alternate form of *che* or *she*.
Chi, shi, interrogative particle.
E, plural suffix to some nouns.
E, alternate form of *i* or *y*.
E, feminine termination to some nouns, e.g. *thlas-e*, daughter.
Eth, th, plural particle of nouns and pronouns.
Eth, other, another, more.
Et, wet, place of, grove, home.
H (ha, hă, ho), prefix to verbs 1st pers. sing. and plur.
Haiyu, future particle.
Hāmkyi, past particle.
Hăt, particle denoting "instrument."
Hin, plural particle of verbs.
I, y, possessive prefix to nouns in 1st pers. sing.
I, y, pronominal prefix to verbs and adjectives, 3rd pers. sing. and plur.
Ij, termination to nouns denoting "fruit."
J, plur. *s*, termination to nouns.
J, euphonic particle.
K, termination to nouns formed from verbs, *tuj*, eat; *thlăk*, food.
K, plural termination to some nouns.
Ka, substantive verb, used as particle to form nouns from verbs, e.g.
 Ka-tuj, eating of; and to form other nouns from nouns, e.g.
 Ka-niyăk, bridle.
Kăs, kăts, pronominal prefix, 1st pers. plur. of adjectives.
Kăs, kăts, possessive prefix, 1st pers. plur. of nouns.
Kătchi, centre, middle of, in.
Kats-hat, under, below.
Ki, particle turning nouns into verbs, e.g. *tuth*, night; *tuthloki*, to be
 dark or night.
Kishăm, over, above.

Kiu, kyu, instrument.

L, particle entering into the formation of some nouns; and alternate form of *thl*.

N (ni, na, no), article; indefinite prefix to nouns.

N (ni, na, nin), negative prefix to verbs and adjectives.

N (na, nu), pronominal prefix, 2nd pers, sing. and plur. of adjectives.

Na, prefix sometimes used in 1st pers. plur.

Nat, nach, particle denoting "instrument."

Necha, recent, time just past, e.g. *Necha kă-nethlu*, was this morning.

P, article.

P, pa, reflexive particle.

Pa, po, particle denoting possession.

Pe, particle denoting repetition, "again," "back," "over."

Phe, pha, particle denoting "above," "over," "upon."

S, es, as, se, plural suffix to nouns.

S, si, sa, prefix, 1st pers. sing. and plur. of verbs.

S, si, su, prefix, 1st pers. sing. of adjectives.

Ts, tsu, tsi, prefix, 1st pers. sing. of adjectives.

Tsat, place, house, country.

Sh, alternative of *ch*.

Sha, shane, verbal particle denoting "down," "downward," "on the ground."

She, che, alternative of *shi* or *chi*.

Shi, interrogative particle.

Shi, particle denoting "other," e.g. *Thluma-shi*, other day, to-morrow.

Shi, plural particle of verbs and adjectives.

Shi, comparative particle of adjectives.

Shi, particle—"that which encloses or contains," *pasche-shi*, a ring.

Shi-pe, more, again, also (Chor. *Kipe*).

Shine, particle—"down," "downward," "below."

Shishäm, shäm, particle—"up," "upward," "above."

T, possessive prefix to nouns, 3rd pers. sing. and plur.

T, verbal prefix in 3rd pers. sing. and plur.

Ta, interrogative particle.

Taj, pl. tas, augmentative suffix to nouns, "similar," "larger," "same species."

Taphe, particle—"above," "over."

Th, plural termination to some nouns.

Th, thl, reflexive particle.

Th, thl, thla, possessive prefix to nouns in 3rd pers. sing. and plur.

Th, thl, prefix to verbs in 2nd pers. sing. and plur.

Thlowos, people of, belonging to.

Uk. See *yuk*.

Wet, et, termination to nouns denoting "place of," "grove."

Y, i, pronominal prefix to verbs and adjectives, 3rd pers. sing. and plur.

Y, ya, yäk, i, possessive prefix to nouns, 1st pers. sing.

Yoknoka, prohibitive particle to verbs.

Yuk, uk, termination to nouns denoting "tree," "plant."

VOCABULARIOS

CASTELLANO—INGLÉS—CHUNUPI¹—SUHIN²

A

Abajo ; below, under : Sha, shane ; S. Shina.	Abundar ; abound : Akloj ; S. Ajloj.
Abandonar ; forsake : h-Owām ; S. Owām, owām-hin.	Acabar ; finish : S. Tut.
Abanicarse ; fan the body : Kyāf ; S. yi-Kauji-nuke.	Acabar, consumir ; consume, ex- haust : S. Atimshi.
Abarca ; sandals : nāk- Fiyis ; S. tāk- Fiis.	Acabado, completo ; finished, com- plete : Yaklish ; S. Yaklish.
Abarcar ; clasp : hi-Chāpāth ; S. hi-Chāpālh.	Acabado, no haber más ; finished, over : Noj, nojhe.
Abdomen ; abdomen : S. kātse- Wak.	Acabar ; finish : S. Wiaklitās.
Abeja ; bee : Shinwo ; S. Shinwo.	Acabar, cesar ; finish, cease : S. owa- Mish, stawak-mish, thla- wāpmish.
Abeja ; bee : S. Tslaklakne.	Acabar trabajo ; finish work : Noj yakyumet.
Abeja ; bee : S. Woolsik.	Acabar trabajo ; I have finished work : Yamantle tsehe ya-kyu- met nechu.
Abertura ; opening : Kafuf ; S. th-Kaufāf.	Acarrear ; carry : S. e-Tithlok nokai.
Aborrecer ; hate, dislike : Tan- shii ; S. Yepun.	Acepillar ; to brush : Watāsatshi.
Abrazar ; embrace : hi-Chāpāth ; S. hi-Chāpālh.	Acepillo ; brush : Watātfyuhi.
Abrazar ; embrace, hug : Shan- shān.	Aequia ; canal : Watau-yinaat.
Abrir ; open : Anāmate ; S. Anā- mate.	Acertar ; aim : Tiyāj.
Abrir puerta ; open door : Ish- anchate na kashi.	Aclararse el cielo ; clear up (sky) : S. Nāmi.
Abuela ; grandmother : S. kāts- Ukte.	Acocear ; kick : Tōsee.
Abuelo ; grandfather : S. kāts- Ektech.	Acól (sandía de la tierra) ; a bul- bous root containing water : Sletsij ; L.-M. Ānwit.
	Acometer ; tiger attacked (sheep) : Tejlichami niyāj.

¹ Chunupi (*ex Hunt, 1913*).

² Suhin (*ex Pride, 1903*).

- Acompañar ; go with : ha- Näch
haiyu.
Acordarse ; remember : S. stu-
Kaihunish.
Acostarse ; rest, lie down : S.
Katuk.
Acostarse en cama ; lie on the bed :
S. **Katuk fiklaute.**
Achiote ; Bixa orellana : **Woitaj** ;
S. **Woitej.**
Adelante ; forward : Nähkesh.
Adentro ; within : S. **Yitasha.**
Adentro (lata) ; inside of tin :
thla- **Tsee.**
Adentro (casa) ; inside of house :
Poyich yiakfi.
Adios (respuesta) ; farewell : S.
Sheits.
Adulto ; adult : S. **Itsuj.**
Afeitarse ; shave : Towasche an-
äkkeshän pase.
Afilado ; sharp : **Sofui** ; S. **Tsofki.**
Afilar ; sharpen : Thlefseyäj ;
S. **sti-Shoki.**
Afilar lapiz ; to point a pencil :
Totsuhi.
Agacharse ; crouch : **Alujhäne.**
Agarrar ; hold, grip : a- **Kyume** ;
S. a- **Kume.**
Agarrar ; hold, catch : thl- **Amat.**
Agitar ; shake : Shanshäne.
Agitar ; stir : Ankoichäkla ; S.
Ankoitchäkla, chauchäklashi.
Agotar ; exhaust, drain : Atimshi ;
S. **Atimshi.**
Agua ; water : Inaat, inat ;
S. **Inaat.**
Agua colorada ; red water : Inat
yukshi.
Agua turbia ; muddy water :
S. **yi-Klimeneshi inaat.**
Aguará guazú ; wolf : Wawu ;
S. **Wawu.**
- Agudo ; pointed : Sofui ; S. Tsofki.
Aguja ; needle : Les-ithkäkla ;
S. **Klesä-nith.**
Agujear ; pierce : Kaihitcho-
honhät.
Agujericos ; small holes : Toithle.
Agujero ; hole : **Kimämke.**
Ahitar ; surfeit : na- Pe (2^a p.) ;
S. **tsu-Pe** (1^a p.).
Ahora ; now : Wamte ; S. Kauj-
kla, niteshishii.
Ahora se fué ; he is just gone :
Wamte yich.
Ají ; red pepper : Oyinche ;
S. **Oiyinche.**
Ajuar ; goods, belongings : Käk-
lote ; S. **Käklitai.**
Ala de ave ; wing : Thle-f, pl. fas ;
S. **Thle-f**, pl. fus.
Alacráñ ; scorpion : Athlipásti-
häna ; S. **Athluspósanai.**
Alambre ; wire : Tsache, lesänith-
suche ; S. u- **Tso.**
Alargar, entregar ; hand, give :
Ashutipa ; S. Unhut.
Alcanzar (corriendo) ; overtake :
Tukfeschun ; S. **Tukfeskun.**
Alcanzar (llegar hasta) ; reach to :
Tichai.
Alcanzó ; reached to : Yame
hämkyi.
Alcaraván ; bittern : S. **Hatsup.**
Algarroba (la fruta) ; bean fruit :
Fuai ; S. **Faai.**
Algarrobal ; grove of A. : **Fuainaik-**
yuket.
Algarrobo (el arbol) ; tree (*Pro-
sopis*) : **Fuaiyuk** ; S. **Faaiyuk.**
Algarrobo negro ; tree (*Proso-
pis nigra*) : **Fuai-itsiyuk** ; S.
Wai-itsiyuk.
Algo de ; some of, something :
S. Iya, iyetsej, pitchem.

- Algodón (el capullo); cotton pod : Wakäkli ; S. Wajukli.
- Algodón (planta); cotton plant : Wakäkli-yuk.
- Algodón, género; cotton goods : Chäkoieth.
- Aliento; breath : Yath ; S. kätsi-Yilth, yelth.
- Alimento; food : no- Yäk ; S. Utsok.
- Alisar; smooth : Akläsche ; S. Sesha.
- Alisar; rub, wipe : Leshape.
- Almeja; clam, mussel : Stapataj ; S. Sapata, pl. is.
- Almohada; pillow : S. käs-Siwet.
- Aloja; native drink : S. Kyumha.
- Aloja de miel; native mead : S. Sinowu-nuk.
- Alrededor; around, put around : Tafaishup.
- Alto; high : Tojishem ; S. Tojisem.
- Alto; tall : Pitaj ; S. Pitej.
- Alzar; lift up : Akyummäkke.
- Allá; there : Nökashi ; S. Nö-kaiyuen.
- Allá está; it is there : S. App-thlesi nökaiyuen.
- Allá está una cuenta; there is a bead there : S. Flakutaj an-aune.
- Amamanta; nursing mother : Ikawatak ; S. Yöksona.
- Amamantar; suckle, give breast : S. Kusfinchi.
- Amansar; to tame : S. Yithkien.
- Amar; to love : Oteth ; S. Kaiyaa, ta-kaiee, niyepe.
- Amargo; bitter : Tuphai ; S. Tuphai.
- Amargar; make bitter : Tanshi, tanshihi.
- Amargo, no dulce; not sweet, bitter : Nokkójha ; S. Najajaj.
- Amarillo; yellow : Kojiyáj ; S. Jujiyej.
- Amigo mi; my friend : ye-With ; S. ye-Wilth.
- Amigo nuestro; our friend : käs-With ; S. käs-Wilth.
- Amigos somos; we are friends : Käswith ithnameth.
- Amolar; sharpen, grind : Itej.
- Ancho; broad : S. Thlákashikauche.
- Andar; walk, go : Athlun ; S. Athlun.
- Andar; walk : S. Wakle-ich.
V. IR.
- Andar despacio; go slowly : ish-Noksa, noksam.
- Andrajo. Cf. TRAPAJOSO.
- Angosto; narrow : S. Nuhahaishikauche.
- Anguila; eel : S. Utsi, utsi-taj.
- Anillo; ring (finger) : Pasche-shi.
- Animal casero; animal owned, pet : Klau ; S. Klau.
- Ano; anus : to-Wich.
- Anoche; last night : S. Tathlechis.
- Anochecer; grow dark : Tuthloki.
- Anta; tapir : Yiikle ; S. Iekli.
- Antaño; last year : S. Kuklaup.
- Antebrazo; forearm : Tuk ; S. käs-Tuk.
- Antena; antennae : Pase ; S. Pose.
- Antes; before : S. Hauyishi.
- Antiguo; of long ago : Hämkyi ; S. Hämkyi.
- Anublar; cloud over : Nam wahäs.
- Anzuelo; fish-hook : S. Wätkainusus.
- Añadir; add to : S. i-Fieshem.

- Año ; year : **Ninkap** ; S. **Ninkaup**.
Año pasado ; last or other year :
S. **ki-Ninkaup**.
Apagar fuego ; extinguish fire :
S. **Umkat ni itoj**.
Apagarse ; go out, become ex-
tinct : **yi-Mak** ; S. **yi-Muk-shi**.
Apero. Cf. **SILLA DE MONTAR**.
Apolillarse ; worm-eaten : **Hai-
chahat**.
Apostema ; abscess : S. **Tákaiis**.
Apresar ; seize (as in wrestling) :
Shanshán.
Apresurarse ; be quick : S. **Äpot-
sin**.
Apuntar ; aim, point at : **Tiyäj**,
tiyöj.
Apuñalar ; stab : **Yintej**.
Apurarse ; be quick : S. **Äpotsin**.
Aquél ; he, she, it : **Näkha**.
Aquél (lejos) ; he (further off) :
Näkhu-mäna.
Aquél (indicando) ; he, it (indi-
cated) : **Thlech**.
Aquí ; here : **Nökasat** ; S. **Nokai**.
Aquí, este lugar ; here, this place :
Saihai ; S. **Hänamithli**.
Aquí está ; here it is (handing) :
S. **Klaitschi**.
Araña ; spider : **Suwäkläk**.
Árbol ; tree (generic) : **Yikla** ;
S. **Yikla**.
Árbol un ; tree : S. **Hät-hai-yuk** ;
L.-M. **Yait**.
Árbol, paratoda ; tree : **Aklenai-
yuk** ; S. **Akhlenuk-seesh**.
Árbol un ; tree : **Shinsha-tuk**.
Árbol, mora; tree : **Tisuk** ; S. **Tusuk** ;
Vej. **Tetsuk** ; L.-M. **Taining**.
Arbusto ; shrub : **Täklauk**.
Arco ; bow : **Lutsish** ; S. **Klutsish**.
Arco iris ; rainbow : **Faschäklich** ;
S. **Faschäklit**.
Arcilla ; clay : **Aiyis-hän** ; S.
Aiyiskun.
Arder ; glow, burn : i-**Chesh** ;
S. i-**Chish**. Cf. **QUEMANDO** o
QUEMAR.
Arena ; sand : **Hosäj** ; S. **Akoteth**.
Armadillo ; Armadillo : S. **Kojku** ;
L.-M. **Yalwa**.
Aro (de reloj) ; watch-ring : **thla-
Hut**.
Aro (de metal) ; metal rings :
Fakätunshe.
Arrastrar ; pull, drag : **Tojhän** ;
S. **Tohon-shi**.
Arrear ; drive to : S. **yi-Sees**.
Arrear no ; not drive to : S. **ni-
Sees**.
Arriba ; above : **Sham**, shisham ;
S. **Chishemni**.
Arriba ; above : **Yäklonith**.
Arrojar ; throw : **Yuke**.
Arrojar por alto ; throw up :
Yuki-shäm.
Arrollar ; roll up as plume :
Yäklapo-she.
Arroyo ; stream : **Natofue** ;
S. **Toishoiish**.
Arroyo ; water course : S. **Pitä-
kishtu wishini**.
Arroz ; rice : **Ashithlöj**.
Asa ; pot handle : **Thlau-tis**, **thla-
hyut**.
Asador ; spit for meat : **Yujlute**.
Asar ; roast : **Yujhi** ; S. **Neshi**.
Asar ; roast meat : **Yujhi wäka
tasan** ; S. **Anishina tåskanish**.
Asentaderas ; the rump : **käs-
Chito** ; S. **kätse-Chuto**.
Asiento ; seat : **wä-Chowat** ; S. **ith-
Kyowat**.
Asir ; grip : a-**Kyume** ; S. a-
Kume.
Asno ; donkey : **Kyuaiyu-taj**.

Asta ; horn : **Kyu**, pl. **k** ; S. **Thla-ku**.
Asustar ; frighten : S. **Oyonhaiu**.
Atar ; tie : **hö-Kfe**, **äkfe** ; S. **u-Kfii**, **ukfi**.
Atar ; tie, bind ; **Wona-äkfuech**.
Atender ; tend : S. **yi-Hotsii**.
Atrás ; back, behind : **Manthle**.
Atravesar, de traves ; across : **Taiyish** ; S. **Taiyishi**.
Aullar ; howl : **Tonhin** ; S. **Tuk-shi**.
Ave ; bird (generic) : **Ahákla** ; S. **Ákla**.
Avestruz ; ostrich : **Wanathlöj**, pl. **s** ; S. **Wanäthlok**, pl. **s**.
Avisar ; tell, advise : S. **Infaklem**.
Avispa amarilla ; yellow wasp : **Matis-thläjke** ; S. **Situan**.

Avispa negra ; black wasp : S. **Onite**.
Avispa (de nido ollero) ; wasp, water-pot nest : S. **Matis**.
Ayer ; yesterday : S. **Kinut**.
Ayudar ; help : S. **Unpuithkäp**.
Azada ; hoe : **Shohok** ; S. **Shohäk**.
Azada ; hoe, digger : **Tinehu** ; S. **Tinkyu**.
Azadonar ; to hoe or garden : **yä-Kloschi** ; S. **hai-Klots-hän**.
Azotar ; thrash, whip : **Tijyojhäne**.
Azote, rebenque ; lash, whip : **Wotsonhät**.
Azucar ; sugar : **Kanhufui-lamök** ; S. **ith-Kashimi**.
Azul ; blue : **Yäkut-shäne** ; S. **Yokhut-shini**.

B

Bailar ; dance : **Kats-han**.
Bajada ; water hollow : **Ni-piteja**.
V. HONDO.
Bajar ; lower : **Anshäne**.
Bajar de caballo ; dismount : **hä-Kleshane**, **ta-klicha** ; S. **sta-Klichain**.
Bajo, no alto ; short : **Tika** ; S. **Tika**.
Bajo, abajo ; low : S. **Shishemni**.
Balar como vaca ; low as cow : **Teshe**.
Bambu ; bamboo (exotic) : **Sonto-uk**.
Banana ; banana : **Kämuk-fuit-kaiyuk**, **smitkaiyuk**.
Bandurria (ave) ; ibis : **Wakak** ; S. **Wokhok** ; L.-M. **Tittit**.
Bañarse ; bathe, wash self : S. **Eneship**.

Barba ; beard : **Pase** ; S. **käs-Puse**.
Barba ; chin : **Kaat** ; S. **käs-Kaat**.
Barranca del río ; river bank : **Towäk-ith-takyok** ; S. **Towak-klaok**.
Barrer ; sweep : **if-Köklos** ; S. **ya-Klose**.
Barreta ; bar, digger : **Tinehu** ; S. **Tinkyu**.
Barriga ; belly : **Tsee** ; S. **kätsau-Tsee**.
Barro ; mud, clay : **Aiyis-hän** ; S. **Aiyiskun**.
Bastar ; suffice : S. **Enklenshi**.
Batallar ; go on warpath : S. **yu-Tsuten**.
Batata ; sweet potato : **Pijaiá** ; S. **Pijaia**.
Beber ; drink : **Yokfui** ; S. **i-Yoke**.

Beberé; will drink: S. si-Yok-aiyu.	Bosque (isla de monte); copse, wood: Thluhuhyu; S. Thlaufu.
Bebida; beverage: S. Okhe.	Bosta; dung: Amik.
Bermejo río (?); Río Bermejo (?): Thlakhaiish.	Bostezar; gape, yawn: Kaiyato; S. Aiyatu, kaiyotahin.
Bicho; insect: Tinwo, yipchu.	Botar; cast away: Wom.
Bienes; goods: Käkloté; S. Käklitai.	Bote, barca; boat: Yikla; S. Yikla-tej.
